Lima beans, best in market, 6th 25 cents; London layer raisins, 10c pound, at Felty & Co.'s, Railroad street. Call quick and secure bargains. 404

NOTICE.—All persons knowing themselves indebted to me will please settle same on or before Jan. 15, 1894. After that time all bills will be placed in the hands of an officer for collection. 42-31 THOMAS SANSFIELD.

The members of St. Peter's Roman Catholic church in Oakland, who conducted a fair for the benefit of their church in Offutt's hall during the holidays, closed the fair Monday night, having realized quite a sum of money.

Mr. John Legge has bought of G. Conn of his fine comets which is a very fine instrument of superior workmanship. The comet is of silver with gold mountings and has a very rich tone, which John brings out with seeming ease.

On last Friday night the Oakland Cornet Band came to THE REPUBLICAN office and rendered some very choice selections of music. The band boys have our thanks for their visit and we hope are long they will again surprise us.

W. R. Johnson, of Mountain Lake Park, is prepared to take photographs at his home, second door north of drug store, or to go out in any part of the county and make photos or views of groups, homes, live stock, etc. Drop him a card or call and see his work.

On last Monday Mr. D. E. Offutt associated with him in his mercantile business in Oakland, his eldest son, Edward. The business of the new firm will be carried on under the firm name of D. E. Offutt & Son. The new member of the firm is a young man of sterling business qualities, is well liked by all who

know him and will no doubt make a great success in his new line of life.

The Board of County Commissioners for this county have been in session since Monday engaged in appointing road supervisors and transacting routine business. A full list of the road supervisors will be published in these columns as soon as the appointments are completed and the clerk can make them up.

Cards are out announcing the coming marriage of Mr. Chas. Wegman, of Grantsville, to Miss Della C. Michael, of Farm Rock, this county. The ceremony will take place at the home of the bride on Wednesday, January 10th. We extend congratulations in advance and wish the young couple happiness and prosperity.

On last Monday, according to authentic information, Arch Cosner, residing at Bismark, W. Va., a small town about eleven miles east of Gorman, was accidentally shot, but by whom we have not been informed. Mr. Cosner only lived a few moments after the shooting took place. He was of good family and very much respected in the community in which he lived.

On last Thursday evening after the Masonic lodge had closed, Worshipful Master J. M. Jarboe banqueting the members of the fraternity at his home on Liberty street. An elaborate supper consisting of oysters, turkey, ham, etc., was served and enjoyed exceedingly by all present. Those present were: Revs. Dr. Benjamin Ison, Geo. W. Kepler, W. L. Leisher, John M. Davis, Messrs. D. E. Offutt, Dr. E. H. Bartlett, G. A. Spedden, S. T. Jones, G. S. Hamill, S. L. Townsend, M. V. Flannigan, G. A. Fraley, R. C. Townsend, Benj. H. Sineell and C. F. White.

Married.

DAVIS—BARKER.—On Dec. 28, 1893, by the Rev. Wm. L. Leisher at the Lutheran parsonage, Mr. Jno. A. Davis, of Salem, W. Va., and Miss Laura Barker, of Bloomington, this county.

BOUCHER—BOUCHER.—On Dec. 19, 1893, by the Rev. J. H. Enlow, at the home of the bride, Mr. Walter Boucher, of Salisbury, Pa., Mr. Phineas C. Boucher, of Grantsville, and Miss Melissa B. Boucher, of Salisbury, Pa.

YOST—BROADWATER.—On Dec. 26, 1893, by the Rev. J. H. Enlow, at the M. E. church, Salisbury, Pa., Mr. John H. Yost, of Roanoke, Va., and Miss Jennie L. Broadwater, of Salisbury, Pa.

FRIEND—POPE.—On Dec. 27, 1893, by the Rev. J. H. Enlow, at Mt. Zion, Md., Mr. Edwin E. Friend and Miss Carrie L. Pope, both of Garrett county.

LICHTY—GETTY.—On Dec. 27, 1893, by Rev. E. S. Hassler, in the Reformed church at Grantsville, Md., Dr. Bruce Lichty and Miss Fannie Getty, both of Grantsville.

RYAN—HUGHES.—On Dec. 26, 1893, by the Rev. G. W. Kepler, at the Commercial Hotel, Oakland, Mr. Charles N. Ryan and Miss Hannah May Hughes, both of Fairchance, Pa.

TATE—FISHER.—On Dec. 25, 1893, by the Rev. George W. Kepler, at the Commercial Hotel, Oakland, Mr. Charles Tate and Miss Louie L. Fisher, both of Monongalia county, W. Va.

RUSSELL—BLACKMELL.—On Dec. 25, 1893, by the Rev. George W. Kepler, at the M. E. parsonage, Oakland, Mr. George Russell and Miss Maude Blackmell, both of Fairmont, W. Va.

WATSON—STILES.—On Dec. 27, 1893, by the Rev. George W. Kepler, at the Glades Hotel, Oakland, Mr. Jacob P. Watson and Miss Lucy H. Stiles, both of Pennsylvania.

SNOUSE—BARNARD.—On Jan. 1, 1894, by the Rev. J. M. Davis, at the home of the bride, near Mt. Lake Park, Mr. John Reade Snouse, of Terra Alta, and Miss Lillie Ann Barnard.

FEATHER—CODDINGTON.—On Monday, January 1st, 1894, at the parochial residence in Oakland, by Rev. Romanus Mattingly, Mr. Orval Feather, of Cranesville, W. Va., and Miss Alice Coddington, of Oakland. The couple departed on train No. 4 the same night for the east, where they are spending their honeymoon.

HERE AND ELSEWHERE.

Movements of Prominent Persons Known to the Readers of "The Republican."

Hon. Geo. W. Wilson, of Wilson, was here Saturday.

Mr. H. R. Boyer, of Accident, was in the city Tuesday.

Mr. Geo. P. White, of the Park, was in the city Tuesday.

Mr. Silas Peats, of near Friendsville, was in the city yesterday.

Mr. Wm. Hinebaugh was in Cumberland on business Tuesday.

Senator R. A. Ravenscroft departed for Annapolis last Saturday.

Rev. Dr. H. C. Alexander spent the holidays with relatives in Virginia.

Mr. John Wilhelm, of near Avilton, was in the city Tuesday on business.

Mr. and Mrs. J. E. Barnard, of Swanton, were pleasant callers at this office Tuesday.

Miss Lilly Bover, of Accident, was in the city Tuesday en route to her school at Crollin.

Mr. and Mrs. G. A. Fraley spent two or three days this week with relatives in Terra Alta.

Mr. George Miller, sr., has been confined to his bed for several days with an attack of the grip.

Mr. S. P. White, of White, W. Va., was visiting relatives in Oakland Saturday and Sunday.

Miss Emma Hinebaugh, of Accident, passed through Oakland Tuesday on her way to her school in Dist. No. 12.

Miss Grace Riley, of Elkins, W. Va., daughter of ex-Sheriff John H. Riley, was visiting her aunt, Mrs. W. M. Coddington.

Mr. Ellwood Offutt and Miss Nellie Offutt and Maggie Miller were in Terra Alta on a visit to friends Saturday.

Miss Ruth Wilburn, of Terra Alta, was the guest of Mr. and Mrs. Chas. J. Newman in Oakland from Saturday until Tuesday.

Misses Mamie Flannigan and Mamie Gilligan, both of Grantsville, are visiting Mr. and Mrs. George W. Moose on Liberty street.

Mr. Ellwood Offutt, who spent the holidays in Oakland with his parents, returned to Annapolis Tuesday to re-enter school.

Mr. Lee Porter, who has been a resident of Michigan several years, has returned to Oakland where he will remain during the winter.

Mr. Joseph Locheim, one of the wealthiest clothiers of Philadelphia, was in Oakland Tuesday on business connected with his house.

Mr. Chas. Wegman, Sheriff of Garrett county, was in the city several days this week on business. He went to his home in Grantsville yesterday but will return to Oakland and enter upon the active discharge of his duties about the 15th.

Died.

At her home near St. Paul's (Wilhelm) Reformed church, Somerset Co., Pa., on December 25th, 1893, Mrs. Susannah Horehler, aged 60 years, 3 months, and 2 days.

Hoos.—On Tuesday at her home in Frederick county, Md., Miss Myrtle Hood, aged seventeen years. The deceased was a cousin of Mrs. Leah F. Sineell and also of Mr. E. P. Anderson, of Oakland.

Bucklen's Arnica Salve.

The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, tetter, chapped hands, chilblains, corns, and all skin eruptions, and positively cures piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by H. J. Mayers. 49-1v

New Feed Store.

The undersigned have opened a feed store in the old Totten building on Main street, where they will be pleased to serve persons needing anything in their line. 40-48 WHITE & WHORTON.

Valuable Advice.

Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conducting titles" before paying for Military Lots. Charges reasonable. Office in Colarneau Cott ge, opposite the bank, Oakland, Md. 41-1f.

The Value of County Papers.

The last legislature decided that county newspapers have become valuable as mediums of information, social, legal and political, and has enacted a law directing county commissioners to subscribe for three weekly papers, have them bound in separate volumes and keep them in their offices as books of reference for the public. Each commissioner is to select one of the three weeklies—Lock Haven (Pa.) Democrat.

January Forecast, 1894.

The month is most likely to open fair and frosty, which will be reversed about the 3rd. The temperature from the 4th to the 7th will continue warm and threatening, attended by some rain, and at the close of the period a light snow fall will prevail, and then the air currents will change to the north and grow cold. The 9th will bring a change of temperature, attended by storm conditions to the 11th, when the temperature will turn cold. The 14th will reverse weather conditions, with south winds running to the 16th, when a change to cold freezing weather will set in, continuing to the 21st, and then it will relax, growing warm, attended by showers of rain and snow storms. The last change of weather conditions for the month will center about the 28th, when rain and snow storms will be in transit, and then the rush of northern air currents on the heels of the disturbance will renew the demand for overcoats. The month will close cold. January is quite likely to pass off as a very interesting month south of the 42° of north latitude, attended by environments which are not likely to bring about excessive storms and severe cold running through the larger portion of the month.

February will be apt to be much colder than January, storms of wider extent, more severe and much prolonged above those of January. P. R. SMITH.

Dec. 15, 1893.

Rogers' Specific Liniment.

A radical cure for cholera. Sold by A. G. Sturgiss, Oakland, C. F. White, Hinton; The Co-Operative store, J. O. DeBerry, Corinth; E. A. Weiner, Melleny, Smith & Callis, Johnston; J. E. Gangey, Accident; Jonas Frazer, Young Store Co., B. Liston, Selby; A. Wass & Son, Mineral Springs; L. E. Friend, Friendsville; P. T. Garthright, Mountain Lake Park and at all other general stores.

Xmas in Florida.

To the Editor of The Republican.

Our Christmas down here in the "land of flowers" is very different from the same occasion in your latitude, dear home readers of the Oakland REPUBLICAN, as to weather conditions.

From the time of your county correspondence, Mr. Editor, I should concede that your dear old Garrett hills are all white with snow as you look out from your dining room windows. Down here we have been sitting out on our piazzas all day enjoying the temperature of your later May days. Instead of frost flowers on our windows, we have actual roses and violets, with many other sweet varieties of flowers blooming in the open air. Thus far we have had very little cold this winter; what the troublesome "weather witches" will yet bring us, who knoweth?

In some respects one loses much of the real zest of holiday enjoyment in this latitude. Among the natives very little interest is indeed taken in the season, aside from a certain amount of idleness, powder-burning and general conviviality. The sacred side of the season does not seem to present itself impressively; hardly anywhere does one see a disposition to a worshipful observance of the day. This is of course a real and serious drawback to northern immigrants, as a rule.

However, the usually mild and delightful weather renders social visiting and outdoor pastime so enjoyable as to make the day pass very pleasantly, even without a church service to attend.

The reason why so little is made of the day, religiously, results largely from the views and teachings of the denominations predominant in the South generally. Where the more churchly views are held, the day is also religiously observed. What strikes a newcomer very forcibly, is the convivial observance of a Christmas week. Among all classes, both white and black, nothing is undertaken in the way of work or business for an entire week, running from Xmas to New Year. Naturally during these idle days no small amount of roistering is indulged in, and the introduction to this is drink and noise. Anyone who fails to yell like a Comanche, or shoot off a gun of some kind, is not "in it." This year the memorial day fell on Monday, and one would naturally suppose the shooting would be deferred till after midnight of Sunday. Such, however, was not the case. Early Sunday night one began to hear the guns go off, and until dark to-day it was kept up.

We have our poor in Florida, as elsewhere, but everyone somehow gets powder for Xmas noise. And to-night there are as many raw throats in Florida from howling, as in your snow land from exposure to a raw atmosphere. All in all, we have usually a very enjoyable holiday season, though in following the prevailing customs it is made abundantly plain that a good share of the "Old Adam" is found in the Southern man also.

The custom of making Xmas presents prevails only measurably among these people, it is by no means as common as in your region. Extending to yourself and all your readers, Mr. Editor, the compliments of the season, I am, Fraternally,

J. B. SHOUR.

Mikesville, Fla., Dec. 25, '93.

OUR WASHINGTON LETTER.

(From Our Regular Correspondent.)

WASHINGTON, Jan. 1, 1894.

Mr. Cleveland has evolved a new scheme to prevent the dissatisfied Democrats from expressing their objections to his tariff bill before the Democratic caucus, which will probably be held this week. He has issued an order that the caucus shall decide immediately after assembling whether it is advisable for it to pass on the tariff bill. If he can control a majority of the caucus the tariff bill will not be touched. Meanwhile some of the dissatisfied Democrats are trying to get the Republicans to promise to vote with them to recommit the bill to the Ways and Means committee when Mr. Wilson calls it up in the House. The Republicans have not decided whether they will do this, but it is hardly probable that they will.

Senator Allison thinks that the Cleveland tariff bill will be considered by the entire membership of the Finance committee when it gets to the Senate, just as the McKinley bill was. It will be remembered that the Republicans of the Ways and Means committee of the House

were not allowed to take any part whatever in the making of the bill.

The New Year's reception at the White House to-day recalled sad memories to many. One year ago the White House and the residences of members of the last administration were all in mourning because of the then recent death of Mrs. Harrison, and no official receptions were held in Washington.

There is a wide difference of opinion among Democrats about aut orizing the issue of bonds recommended by Secretary Carlisle, and it may cause a big fight in the House as soon as the tariff bill is disposed of.

It will cause no surprise among treasury officials should there be a deficit at the close of the current fiscal year—June 30, 1894—of as much as \$75,000,000. This is more than three times what the estimate was of the probable deficiency before the schedules of the Cleveland tariff bill were made public. That bill is directly responsible for the probable rebelling of the deficiency. Importations are getting smaller and smaller and will continue to dwindle so long as there is any probability of that bill becoming a law. Importers are not disposed to pay the present duties when there is a possibility that by waiting a few months they can take advantage of the low duties or of the free list of the Cleveland bill. And that is not the worst of it. The same cause is operating to shut down American manufactures and it will be no better for a long time should that bill become a law, which God forbid, for as soon as it does our markets will be so flooded with foreign goods that our own manufacturers will hesitate to start up again even at the reduced wages which everybody now sees must follow such a law.

The administration Democrats in the House who supposed that their sharp practice just before the holiday recess would enable them to smother the criticisms of Mr. Cleveland's Hawaiian policy, in the House, will find themselves very much mistaken. The Republicans of the House committee on foreign affairs have prepared a scorching minority report on the McGreevey resolution reported by the House recess and intended to screen the administration's unconstitutional acts, and that report is going to be made the text for some talk in the same line as the redhot speeches of Senator Hoar and Representative Bontell made before the recess. The Republicans in both House and Senate are fully determined that the smothering act shall not be performed.

Notwithstanding repeated denials on the part of those connected in one way or the other with the administration, there are many people, Democrats as well as Republicans, who believe that there is good foundation for the reports which have again been current concerning Secretary Gresham's retirement from the cabinet on account of the failure of the Hawaiian policy of which he was the originator. It has been known for some time that Mr. Cleveland was looking for a loophole through which he could make his own escape. This his friends are foolish enough to think would be provided should Secretary Gresham write a letter resigning from the cabinet and stating as his reason therefor the failure of the Hawaiian policy which he had persuaded Mr. Cleveland into adopting. This would, of course, be humiliating to Gresham, either with some other appointment or with a promise of the next Supreme Court vacancy. It is difficult to see, however, how the resignation of Secretary Gresham can possibly relieve Mr. Cleveland of the responsibility belonging to his acts as President, or in any way exonerate him.

When Baby was sick, we gave her Castoria.
When she was a Child, she cried for Castoria.
When she became Miss, she clung to Castoria.
When she had Children, she gave them Castoria.

Chamberlain's Eye and Skin Ointment.

A certain cure for Chancres, Sore Eyes, Tetter, Salt Rheum, Scald Head, Old Sores, Erysipelas, Sore Throat, Sore Gums, Sore Nipples, and all other skin diseases, itching and burning. It has been cured by it after all other treatments had failed. 25 cents per box.

HER BURGLAR.

BY MARGARET ROLFE.

"Dear me! I do wish that Jack would come home! Such a stupid novel! The idea of that lackadaisical young woman, Iva, confronting a great burly burglar with her tiny revolver and scaring him into a closet, and—"

"Oh, hum! Oh, hum—I'm so sleepy," sighed pretty Mrs. Norcross, lounging back deep into the pile of cushions around her.

The slow, solemn tick of the big library clock and an occasional subdued snap from the fireplace were the only sounds to disturb the profound stillness.

Mrs. Norcross sat gazing dreamily at the logs slowly falling into glowing coals and, in her mind a vague vision of a big, burly, heavy-booted man being backed into her closet, and thought she would rather object to the crushing her gowns would receive in the process.

"But, then, of course," following up her train of thought rather drowsily, "he wouldn't have on big boots; they would make a noise—dear me!"—out loud—"what was that?" and she suddenly sat erect.

Surely, she had heard a noise in the direction of the dining-room. All was quiet again, however, and not being an extremely nervous young woman, Mrs. Norcross subsided into her cushions again, thinking she had been mistaken.

She picked up the despised novel and read a few lines; but it failed to claim her attention, and again her eyes sought the dying embers.

The drowsiness stole over her senses and she had nearly dropped asleep when she found herself half out of her chair, straining every nerve to listen.

Yes, it is no mistake this time. She can plainly hear the catch in one of the long dining-room windows rattling gently.

The window in the dining-room is gently raised, and at the sound the trembling woman suddenly becomes self-possessed and calm.

Rising softly she turns down the bare in the hall lamp, and creeping out into the hall hastens up the broad stairs, and flies along the corridor to her room.

She resolves that as there is no man on hand she will herself assume man's garb and sternness.

Entering her husband's dressing-room she hastily throws aside her trailing gown, and snatching down trousers and smoking jacket from the pegs and a soft shirt from the dressing case, proceeds to array herself in her heroic lord's attire with a rapidity astonishing considering the strangeness of the apparel.

Putting a smoking-cap over the soft masses of her hair, she utters into the hall, and leaning over the balusters, hears steps in the library she had but just left.

"Oh," she thought, "I don't feel so very brave. If I am in Jack's coat, what can the horrid creature be doing so long in the library? Hush! he's at the desk. I guess I'll get Jack's revolver. I've found papa's any number of times."

Softly she reenters the dressing-room, and there gets a terrible shock—there is a man advancing towards her—can there be two of them?

Involuntarily she shrinks back in terror, and then, even in her fright, fails to laugh, and, noiselessly—for the man does likewise—in the mirror at the foot of the room.

Still trembling from her sudden fright, she creeps downstairs, gathering courage at each step, as she grasps the loaded revolver tightly in her hand. Stopping on the last step, just out of the broad light streaming from the library door, she sees the tall, slim figure of a man busied with the papers in her husband's desk.

Half her terror dies away as she notices that he is well dressed and quite the gentleman in his appearance, until the thought comes to her—these gentlemen burglars are all the more cruel and relentless—and as the man turns his head at this moment, she determines in her own mind that there is a hard, steady look in his otherwise handsome eyes.

Deciding that it would be wiser to surprise the burglar than to be surprised by him, she steps into the circle of light and masters up a deep voice: "Well, what are you doing here, pray?"

The start the man made was not a very guilty one, and the coolness displayed for a burglar caught in the very act stirred Mrs. Norcross's manly mind to wrath.

"Who are you?" she demanded, angrily, "and what are you doing?"

The intruder took a step forward, at which Mrs. Norcross clasped the revolver more closely, and said most courteously: "I beg your pardon, sir, but I would

like to speak with Mrs. Norcross a moment."

Recovering from the effect of this audacity, the lady returned:

"You cannot do so."

"But I must," persisted the stranger.

"I tell you you cannot, Mrs. Norcross is not at home."

"Not at home? Are you sure?"

"I am sure, and now will you oblige me by leaving my house"—this very grandly.

"Your house," echoed this rude man.

"Mr. Norcross desired me to get some papers for him and leave a message with his wife."

"Will you leave?" interrupted Mrs. Norcross, who, reasoning that an unknown man bringing a message from her husband, would hardly have crept in by the dining-room window, raised the revolver and leveled it at the burglar's breast.

Thus threatened the intruder shrugged his shoulders carelessly.

"I do not know who you are, but if Mrs. Norcross is not at home—and you say she is not—the message is unnecessary. Let me pass, sir."

"Not so fast," still in a deep tone of voice, "you will walk in front of me."

"I do not know who you are, but if Mrs. Norcross is not at home—and you say she is not—the message is unnecessary. Let me pass, sir."

"Not so fast," still in a deep tone of voice, "you will walk in front of me."

ORDER IN THE

Many Sounding Boards Are Fitted to Maintain It.

Something About the House of Representatives—A Talk with Reed and Crisp.

(Special Washington Letter.)

The vice-presidents and the speakers, during the history of our country, have selected chairs suitable for their comfort and convenience while presiding over the senate and the house.

The desks which they have used officially have been selected for them by the sergeants-at-arms of their respective bodies.

The desk which is now occupied by Vice President Stevenson is the same one which was occupied by Vice President Hannibal Hamlin, in 1861, when the senate wing of the capitol was completed and first occupied by the senate.

The chair which Vice President Stevenson uses is a high-backed one which has been used by several of his predecessors.

The chair which is occupied by Speaker Crisp is a new one, selected at the commencement of the special session of congress in August.

The desk which is before him is also a new one, as, indeed, are all the desks occupied by the speakers of the house at the commencement of a new congress.

This desk, of course, is not entirely new, because the surrounding framework is a part of the desks occupied not only by the speaker, but by the clerk and other officials engaged in keeping the record of the day's proceedings in the house.

The board top and baffle cover are new.

The top of the desk used by the vice president is never marred by the use of the gavel. The senate is a quiet, dignified body, and very easy to keep in order, even under circumstances of political excitement and acrimony.

The gavel used by the vice president is a small piece of ivory, and it has been put to the same use by the various vice presidents and vice presidents pro tempore for more than fifty years.

Without any muscular exertion appreciable, the vice president may lightly rap upon the desk before him and bring the senate to order without any difficulty.

The speaker of the house, however, does not have so easy a time to preserve order. There never has been a house of representatives so quiet and so easily controlled as to enable the speaker to serve out his term without requiring a new desk top, or as it is called, a new sounding board.

At the commencement of another session, the idea of writing a letter upon this subject occurred to me while standing in the document room of the house of representatives and looking at the top of the desk which was used for the past two years by Speaker Crisp.

There are a number of other relics in the house document room, but the various desks used by the different speakers for the past thirty years are the most interesting.

The green cloth, of course, is stripped from these boards and they stand naked, showing by their splintered condition that they have faithfully served their country to the best of their ability.

The board used for the top of the desk occupied by Speaker Crisp is a piece of white pine, roughly sawed. At one end of it, where the gavel used to fall, it is hammered to almost pulpiness, while the cracks extend in either direction, along the grain of the wood.

This condition of the sounding-board was brought about by gentle taps as well as by heavy blows of course.

When ten or twenty members are trying to catch the speaker's eye at a time, the speaker demands order and raps very lightly upon the desk, every stroke being heard in the remotest corner of the house.

But when there are turbulent scenes, and it is necessary for the speaker to take part in a demonstration by making himself heard as well as felt, he hammers the sounding board with all his might.

Although the first term of Speaker Crisp was one of comparative peace in the

house of representatives, the sounding board in front of him gives evidence of pretty rough usage.

Near the sounding board which was used by Speaker Crisp are the remnants of the two sounding boards which were used by Speaker Reed during the turbulent times of the Fifty-first congress.

The top of the desk which was used by Mr. Reed during the first session of the Fifty-first congress, at the time when he was establishing the precedent of a "present quorum," looks as though it had been in a cyclone without a guaranty. It is a foot in width. That space which came under the weight of his right hand and a heavy gavel is fairly crushed.

The last night of the first session was an exciting one, and Speaker Reed, who had already been thinning the wood by constant hammering, struck one mighty blow, which carried the gavel clear through the board. It looks like

a piece of armor-plate pierced by one of the modern projectiles fired from a Krupp gun of tremendous power.

If the old sounding board could only talk and tell the stories of the particular scenes and incidents which brought about its destruction, it could deliver entertaining lectures for all future times.

The visitor, however, can only gaze on the wreck and ruin of the sounding board and conjecture for himself concerning the scenes and incidents which resulted in this manner.

Mr. Rogers, of Arkansas, Mr. Byrnes, of Indiana, Mr. Hatch, of Missouri, and others who personally as well as politically disliked Speaker Reed, were constantly annoying him and requiring him to call the house to order and hammer upon that board.

Upon one occasion Mr. Hatch, of Missouri, came down the aisle protesting against having his name counted as "present and voting."

Mr. Reed brought down his gavel heavily and inquired: "Does the gentleman from Missouri mean to state that he is not present?" That ludicrous scene will account for at least one heavy blow which the old sounding board received.

One of the employees says that the top of Mr. Reed's desk is in the workroom of the superintendent of repairs.

The gavel which Mr. Reed used has disappeared. Possibly there was nothing of it left. Maybe when worn down to a mere semblance of its former polished self it was tossed through a window and found its way to the ash barrel.

If wood were receptive and had the power of articulation, it could tell strange tales of the emotions of the man who grasped it so firmly and brought it down with so weighty an arm.

For a long time the desk top, which was missing, although Mr. Reed made many efforts to secure it immediately after congress adjourned. Because of his anxiety to obtain it, somebody thought that it was intrinsically valuable, and secreted it. Now that it has been recovered, Mr. Reed cannot send it to his Maine home and hang it up over the fireplace, just where his English ancestors many decades ago used to hang their shields and bear spears.

Speaker Crisp has arranged to send to Georgia the desk top used by him during his last term, and the greatest relic in the green cloth which covered Mr. Reed's desk, and which is covered by a red cloth, is the result of its experience, in the possession of a young married woman, who was a pretty belle two years ago, and when visiting the capital was given for a memento by the speaker.

She says that she intends to keep it forever, and bequeath it to her issue; for she is an enthusiastic admirer of Mr. Reed, and regards the shrouded green board as a priceless heirloom.

"These things will all be lost or forgotten in a short time," said Mr. Reed, the other afternoon. "These relics of political excitement are well enough to keep in families, but the general public never takes any interest in them. That which is likely to last forever is the spirit which was given for making rules in the days when the old desk was hammered so hard, and when the gavel crashed beneath the weight of my arm and hand. The noisy scenes are already almost forgotten, and the wooden relics are valuable only to myself and family, but the principle that congress is elected to do business will probably last forever."

The distinguished and aggressive ex-speaker is not a man who seems to have any personal pride or egotism. He is as modest and approachable as a man as there is in either house of congress, and he is possessed of a fund of good humor which often disarms his political enemies.

Speaker Crisp, who now holds power second only to that of the president of the United States, is also an unpretentious man whom everybody likes, and his door always has been open to his friends.

He is the last man whom one would expect to pound needlessly upon his desk to maintain order; yet he was obliged to do so, as his desk indicates. He says: "A great deal of the speaker's work, in securing order, is done by the ears, and the call to order, and continue their conversations or public speaking, involuntarily, feeling that they must continue until their ideas are fully set forth. The house is not intentionally disorderly. It is very easy to encourage a feeling of individual irresponsibility."

SURIN D. FEE.

Just in His Line.

"What do you call this?" asked Officer McGobb, as he pulled a dangerous looking bludgeon out of the pocket of his prisoner.

"That is called a 'life preserver,'" answered the derelict, who you with a life preserver, O would like to know?"

"Because I belong to the floating population, see?"

But the officer refused to see.—Indianapolis Journal.

THE TRAINING SCHOOL

The Good Work Accomplished by Mrs. Molly Vannoy.

When Graham Vannoy and Molly Glenn, a fairly educated, energetic young man and woman, were married twenty-five years ago, Graham said: "Molly, you have no maid. I have no man. Even a poor young physician with a practice scattered over a good bit of country must keep horses and a man. How shall we manage the expense?"

"I have selected my maid—one of your poor patient's young daughters. Anne is fifteen, healthy and intelligent, and I mean to make even homely duties attractive to her. A mistress may be companionable with her maid, and yet not descend to being familiar and confidential."

"You are planning, Molly, to be a household missionary," said Dr. Vannoy, laughing.

"I am planning, Graham," said the little woman, earnestly, "not to miss an opportunity to arouse in our servants an ambition to do their very best. Anne will serve me better when she finds I have a real and kindly interest in her affairs. We shall get along nicely. Oh, you doubting Thomases! you are questioning my ability to arouse in her a wholesome ambition to serve well."

"I am wondering, Molly," acknowledged the doctor, "if your petted maid will remain content to serve her patient teacher. She will probably disappoint you."

"I do not think she will, Graham," said Mrs. Vannoy, confidently. "If I command her respect, she will take kindly to my teaching. I have faith in Anne's common sense. She can be taught the difference between good housekeeping and slothful methods. Graham, a strong boy can serve you. Mrs. Maret tells me that her Jamie is overwhelmingly anxious to learn the doctor's trade."

"Trade? That lanky, green boy?" cried Dr. Vannoy.

"I am speaking of a neglected, ambitious lad whose parents consider him the ugly duckling in their brood of seven. Why not try Jamie?" said Mrs. Vannoy, persuasively. "He has no encouragement at home to make the slightest effort to attain anything desirable. He will care for your horses, buggy and office for small pay, his board, and the help you may give him in preparing for college. Surely, Graham, when you remember the good things you can do for him, you will be willing to lend a hand to Jamie. We had better have Anne and Jamie here soon. I have time now to spend in looking after them a bit."

"Of course, Molly, you'll have your way. I've no faith in your success."

"Only wait—wait, Graham, and see," urged the wife.

Anne Holby accepted without a demur the uniform provided by Mrs. Vannoy, when she noted that the "doctor's lady" wore a similar dress.

"It makes very little difference the way housekeepers go about work. The wise woman who wants to keep tidy every day wears in the kitchen gowns and aprons easily laundered."

"Shall I eat at the table with the doctor and you, Miss Vannoy?" inquired Anne. "Maw says I mustn't forget I'm not a common servant."

"Some one must wait on the table," replied Mrs. Vannoy, calmly. "In the Jaynes family, the three daughters take turns in waiting. Once when I dined there Master Willie performed that duty. He was proud, too, of being able to serve without making unnecessary noise. Minnie Jaynes considers it one of her accomplishments."

"I shouldn't think the richest man in Wingate would let his girl do such work. I thought Minnie Jaynes took music lessons," commented Anne.

"Minnie's friends are quite proud of her musical talent. But she is ambitious to become a really good housekeeper and home-maker. To do this, one needs to begin at the beginning. It's an art to be able to serve a dinner correctly," explained Anne's mistress.

"I've now won't mind my waiting on table when I tell her Minnie Jaynes waits, too," replied Anne, reluctantly.

Jamie Maret's expressive blue eyes looked his willingness to serve the doctor faithfully. When winter came, Dr. Vannoy's practice increased to a degree which necessitated his absence from home many evenings. He said regretfully:

"Molly, do abandon this night school of yours. Since Anne has shown a wish to study, you may as well tax her by hearing recitations and directing your students. In the schoolroom your work was paid."

"Spare your pity until I need it, Graham," advised Mrs. Vannoy. "Anne and Anne are worth the little I do for them."

During the ensuing two years Anne Holby, a pure blonde, grew into a pretty, graceful girl. Her mother occasionally instilled into her soul a slight rebellion—a distrust of the kindly mistress, who, with rare patience and tact, speedily righted matters at such seasons.

"My dear," said Dr. Vannoy, "James has become almost invaluable to me, but I must spare him soon. The boy is too bright to remain here longer. Can you look up a successor?"

"I think so, Graham," replied Mrs. Vannoy, thoughtfully. "I must spare Anne, too. My old teacher needs a utility girl, one who will earn board and tuition in the girls' school at Corry. She will give Anne vocal lessons, too."

"Alta, Molly, your trained help?"—Graham, would you have me selfishly keep Anne in my service when this chance has come to her?"

"No, my dear, only you receive no reward. I shall receive the very highest reward if Anne improves her opportunities. I have a second maid in view already."

"I have no doubt, Molly, that you

will continue keeping a preparatory school."

"So long as I am able to conduct one," said Molly, laughing. "Only yesterday Sator Mora's Marjory said to me: 'I wish I knew how to do things as Anne does them. When I am able to keep house and not spend more money than papa can earn in Wingate, he need not go to sea. He will get a home for Willie and me.' Marjorie is a nice girl. She is anxious to become papa's housekeeper. She will have a motive to labor best."

"And what do you expect to make of yourself, my boy?" inquired Dr. Vannoy, when Patrick Plunket, Jamie's successor, reported for duty.

"A dentist, sir, by 'nby. I hopes you'll give me the helpful hand, if I'm deservin'," responded Patrick, brightly.

"Well, we'll see, Patrick. Don't forget that Jamie has spoiled my horses by petting them," said Dr. Vannoy, kindly.

In time Mr. Moran returned to Wingate, and a winsome, happy Marjorie Holby, "papa's housekeeper," Patrick Plunket gained confidence also in his own ability to be somebody.

"Our ungrateful servants have given us the opportunity to look up successors. Here's my second boy, Patrick Plunket, off to the dental college just when I was doubting Thomas!" explained Dr. Vannoy, with a twinkle in his eye.

New maids and new boys continued to enter the Vannoys' service and to leave their kind employers, until twenty-five years went by. Much had happened during that time. When young Dr. James Maret sought an opening, Dr. Vannoy's increased practice enabled him to take him as a partner. Anne Holby, while paying her way through college, continued her friendship with Jamie.

"Another going away of your plans, Molly," said Dr. Vannoy, handing his wife some wedding cards. "You've planned a musical career for Anne Holby. The young woman, after six years of close application to study, settles down in a cozy cottage with a young partner, who has his fortune yet to make."

"I'm not disappointed that Anne listened to Jamie's wooing. Jamie is quite as well off in every respect as you were when I married you, and now we are very comfortable," replied Mrs. Vannoy, placidly.

On the union of Mrs. Vannoy's fiftieth birthday, a company of well-dressed men and women unceremoniously entered her parlors.

"Graham," cried Mrs. Vannoy, "it is Patrick, David, Paul, Sylvia, Rachel and the others!"

"It was Anne's idea, this wholesale invasion," explained Dr. Maret. "She has spent three months in locating your ex-maids and boys, who each realize the debt of gratitude they owe you."

"Molly," cried Dr. Vannoy, "you are responsible for a great deal. Here are eight men and seven women who were once members of your training school. Patrick Plunket is making more money than the legislature. Jamie expects to step in my shoes. Do you notice, Mrs. Vannoy, Sylvia Moore's fine gown? You never owned such a gown. You never wore like this. Since she married a successful business man and you married a poor young doctor. Your pupils do you credit. Rachel Dane has actually chosen my profession. Dr. Rachel Dane, permit me to congratulate you and wish you success. There isn't a false in the number. But, Molly, I can't forget that your maids were in haste to leave your service."

"Graham, not one left me until an opportunity!"

"Exactly! and when an opportunity to enter another training school presented itself, you were left lamenting."

"Not lamenting, but glad that my pupils were so apt. At any rate, my maids tarried with me quite as long as your boys remained with you."

"A true word you said, Jamie! The ungrateful fellows developed aspirations in no time, and away they scampered. Such a state of affairs is only possible in a democratic country, where the pluckiest people climb to the top of the ladder. I note with pleasure that our guests have brought with them suggestive baskets. Suppose we begin the banquet."

Dr. Vannoy viewed with pride the company of self-reliant men and women, each occupying a creditable place in the work-a-day world. His heart thrilled with pride as he looked upon his wife's sweet, placid face. He valued her as his dearest, wisest, most patient and unselfish woman in the world.

Mrs. Vannoy looked her happiness. The childless wife had not in the beginning planned work by any set means. Being a born teacher, possessing the ability to stimulate and bring out each one's best, the natural result followed, and Dr. Vannoy, despite his tending, proved an able assistant in the home training school.—Waverly Magazine.

The Football Player's Sorrow.

"This one by one are our fondest dreams dispelled," said the dejected-looking young man, as he dropped his head with his long, flowing locks into his hands. "And she always seemed so unselfish."

"Oh, well, brace up. Think of your fame as a football player."

"It is that which shattered the ties that bound us. She demanded too much."

"But you told me only a short time ago that you would give her your life if she asked for it."

"So I would—but what she desired was—"

"Well?"

"A lock of my hair!"—Washington Star.

—The ancients took great pains to ornament their favorite volumes. Propertius speaks of tablets with gold borders. Ovid mentions manuscripts with red titles, and other authors mention presentation of copies of which the cover was overlaid with precious stones.

A DEADLY CONTEST.

Big Battle Between Three Bulls and an Alligator.

I was witness to a, said an old hunter from Kissimmee, Fla., of a very exciting and singular contest between a huge bull alligator and several head of cattle, in which the alligator was killed and two of his so badly injured that they had to be shot, and another was rendered almost hors de combat.

A party of hunters, several of them visitors from the Tropical hotel here were camping out on the lower shelf mound, which overlooks a lake, though several hundred rods from the shore, which is marshy and grassy. Cattle gather there by the hundreds, as the grass is always fresh and black flies, their bane on most lakesides, generally absent.

While eating their dinner that day the hunters were startled by loud lowings that came from the lake, accompanied by the well-known "cry" or grating of alligators. On hastily getting to the bluff a most exciting scene was witnessed. From the appearance of the field it would seem that one of the old bulls went to the shore for water, and as he was drinking a big "gator" swam up and seized his nose.

The bull, a big black, with a pair of magnificent sharp horns, was taken by terrible discomfiture, and began bellowing loudly and endeavoring to shake off his antagonist. The "gator" had secured a firm hold, however, and he clung tenaciously, churning the water into foam with his immense tail, the blood streaming from the bull's lacerated nose already dyeing the waters red.

With a mighty effort the bull plunged backward, hauling his "attachment" partially on dry land, and then the fun waxed furious. The bull, endeavoring to free the "gator," was taken into the water, and the "gator," failing in that, stamped at him and plunged around him to get rid of his foe. Attracted by his bellowings, two other bulls came furiously down the side, and seeing the "gator" plunged at him, they tried to escape, but too late.

One of them caught his horn near the "gator's" fore leg, and with an upward toss tore a big hole in his side, the saurian responding with a deep roar of anger and pain. As the bull, however, with his tail and gave the animal a terrible blow, knocking him over on his side with a dull thump.

His first victim was now free, and the three thoroughly infuriated animals surrounded their foe, bellowing and with lowered heads presenting a picture of sharp horns which the saurian didn't like, as he attempted to crawl into the water. His three opponents now began a systematic warfare.

First one would dash at him, escaping the flying tail of the big reptile, and give him a dig with his horns and endeavor to toss him. The "gator" was getting weaker all the while, and though still game he seemed anxious to cry quits.

In the end, and as he came without his usual caution, the reptile whirled and delivered a sweeping blow with his tail that caught the animal's legs, breaking them like pine stems. The old fellow falling with a roar of madness that could have been heard a mile, while the saurian's eyes seemed to gleam with triumph as they glowered at his enemies.

Then ensued a rough-and-tumble contest which no description could do justice to. The bulls plunged viciously, their oftentimes hitting one another in their mad rushes, while the alligator swept his big tail around in endless circles and inflicted terrible whacks on their sides and legs.

Finally the "gator" again seized his victim by the neck, and with a death grip. The other animal plunged in, and catching both horns under the "gator's" side gave him a toss, ripping him up so that his entrails protruded.

The effect was seen at once, as his terrible fall played more feebly, but his hold on the bull's nose could not be broken. Several more ugly wounds were made, and the reptile's roars of anger changed to those of pain and fear. His antagonist charged at him time and time again, lacerating him terribly.

Finally no resistance was made, the victor trampling on the bloody carcass, though the terrible grip of those iron jaws still maintained their hold on the nose of the first bull, who had been forced to his knees and was fast dying from the terrible blows he had received and the great loss of blood.

Several of the men brought down and mercifully shot the two wounded bulls.

The alligator, which measured, as well as they could ascertain, over twenty feet, the head and jaws being six feet, was literally torn to pieces and disemboweled. The blow delivered by the "gator's" tail broke several ribs of the bull, whose legs were also broken, while even the victor was badly injured. The one which had been seized by the nose presented a horrible appearance, the flesh having been stripped to the bone by the iron hold of the saurian's jaws.—Boston Commercial Bulletin.

A Dandy.

The Synthes were giving a little dinner party soon after the arrival of Johann Noman, an awkward, but willing and thoroughly good-natured servant girl.

Johanna had been coached by her mistress and had been promised a present if she got through with her duties as waitress without making blunders of any kind, and the girl started in, prepared to do her best.

In the very beginning of the dinner she upset a plate of soup all over the tablecloth, while several of the guests had to rise hastily to keep their garments from being soiled.

But Johanna, turning toward her mistress with both hands uplifted, said with a chuckle:

"Now, ain't I a dandy, ma'am?"—Detroit Free Press.

DIAMONDS IN THE ROUGH.

How the Man in the Hotel Lobby Didn't Make a Fortune.

"Talking about making a fortune by a cold stroke," said a man in the hotel lobby as conversation lagged a little. "I once had a fortune within my grasp and was obliged to see it go to another just for the lack of a few paltry dollars."

We all said we wanted to hear the particulars, and he got his feet on the windowsill and continued:

"I was on my way from Savannah to Washington by rail when I fell in with an old chap who said he had landed at Savannah the day before as a shipwrecked sailor. He was a rugged, honest-looking old codger and, though he didn't say so, I took it that he was an American who had lived abroad for many years. Something was said about South America and he appeared posted. It was three hours after we had got to each other before I knew that he was going to Washington to see his brother. It was another half hour before he innocently said that his brother was a jeweler, and that he wanted to show him some curious stones he had picked out of a gravel bank. That interested me, of course, and without much coaxing the old man took a sailor's tobacco box out of his bosom and exhibited thirty or forty diamonds in the rough. I had never seen a rough diamond before, but there seemed to be no doubt of their being the genuine stuff."

"And of course, you were in for a spec," said one of the group.

"Of course. The old fellow had no idea of their value, but said he guessed they might bring a couple of hundred dollars. He was quite sure they were diamonds, but he thought a diamond had got to be as big as a hickory nut to have my particular value. He didn't care particularly about seeing his brother, and was sorry he hadn't sold the stones to a chap in Savannah, who offered him two hundred and fifty dollars for them, as he wanted to get off to sea again, and riding in the cars made him sick. I told you, gentlemen, my heart was choking me so I could hardly articulate when I asked him what he would take for the lot, tobacco and all. I figured that the old fellow had got to be as big as a hickory nut to have my particular value. He didn't care particularly about seeing his brother, and was sorry he hadn't sold the stones to a chap in Savannah, who offered him two hundred and fifty dollars for them, as he wanted to get off to sea again, and riding in the cars made him sick. I told you, gentlemen, my heart was choking me so I could hardly articulate when I asked him what he would take for the lot, tobacco and all. FARM AND GARDEN.

A CHEAP BROODER.

It is Entirely Reliable and Needs Not Little Attention.

Our brooders are homemade, says W. A. Ramsey in the American Farmer. Fig. 1 is a tank 9 feet long, 4 feet wide and 2 inches deep, over which the house or box (Fig. 2) is placed. The lower edges of the house in Fig. 2 rest upon the rim or projection (a, a, a) of Fig. 1. The walls (b, b, b) of Fig. 2 stand a half inch away from the sides of the tank. The floor (c, c, c) of the chicken apartment also is one-half inch above the top of the tank. The little holes shown in the walls (a, b, b) admit fresh air. This air spreads all around the tank of hot water. There are one-inch tin tubes set in holes through the floor (c, c, c).

The air coming in contact with the tank becomes heated, therefore expands, and, becoming lighter, passes up and over the tank, finding egress through the tin tubes into the chamber occupied by the chicks, furnishing them with pure, warm air. The tank cannot be made hot enough to rob the air of any perceptible amount of oxygen.

The tank of water is heated by two lamps (Fig. 3). Ours have but one lamp, but we find that it furnishes hardly enough heat; therefore we suggest two lamps, and more if the tank be longer.

The lamp needs but little description. The tube (d) is one inch in diameter and is set diagonally across the depth of the tank to facilitate the circulation of the water. The flame plays against the tube and heats the water, which, being expanded, passes out at the upper end of the tube, giving place to cooler water coming in at the lower end.

The chimney (e) is tin, as is also the flue (f). The chimney fits over a projection of the flue under the tank. The chimney should be made short enough to let the flame barely touch the tube.

The lamp occupies an apartment under the tank, the tank constituting the top or cover of the lamp box. Our lamp box is thirteen inches high, hooked at the corners and has two small doors at the side (back side), for convenience in handling lamps. This lamp we use requires a chimney whose diameter is three inches. Now for the cost: The tank cost five dollars, the

INEXPENSIVE BROODER AND FOUNTAIN. Lamp one dollar, the remainder, some scrap lumber, and time to put it together. Any tinier can make the tank and heater. The material is galvanized iron.

The chamber which the chicks occupy is just over the tank, and is six inches high at rear and five inches in front. The opening in front is closed with a board, which may be hinged at the edge of the floor and constitute a part of the platform leading from the room to the ground. The roof, by the way, will need a knee to support it at the middle of the opening at front.

THE GUINEA FOWL.

Characteristics of the Breed and Their Value on the Farm.

These noisy fellows are not without their good points, and we wonder they are not more commonly found upon our farms. They are very beautiful; their eggs are better than those of duck or turkey; and their flesh, though tender and fine, and much like that of wild birds. They mate in pairs. The hens lay fifteen eggs to a litter, and

A TYPICAL GUINEA FOWL.

will repeat the litter at least once if not moved to sit. Common hens rear the young guineas better than their natural mother, because the latter are more given to roosting. When young, they are delicate, like the turkey, and require the best care and protection from cold and storms, but they are not liable to disease. Feed the chicks often, say with hard-boiled eggs, chopped fine, and a little stale bread crumbs. After three or four weeks old, give meal wetted with scalded water. They like a little onion or garlic, and a pan of sour milk will do them good for an occasional change. The guinea fowl is a typical specimen of much like we show, re-enacted from (Poultry World) are good protectors of other young fowls from the depredations of hawks, as they are quick to give an alarm, and their peculiar notes are not musical to the avian visitor. The only objections to this bird are its noise and somewhat quarrelsome habits.—Orange Judd Farmer.

Don't be hasty in shifting from one kind of stock to another. The man who sticks either to hogs, sheep or cattle through thick and thin, will generally come out all right.

HANDY FARM TRUCK.

Diagram Explaining How One Can Be Built for a Few Dollars.

The cost of the manufactured low-down trucks has prevented many farmers from purchasing and using them. The one shown in the illustration, from a sketch by J. H. Brown, of Michigan, is cheaply made, costing about four dollars for iron, lumber and blacksmith work. The diagrams explain every point so thoroughly that any farmer with a few tools can easily make it. The frame is made of 4x4 inch and 2x4 inch seasoned white oak. The wheels may be taken from two old mowers, those used on the rear axle being some-

FRAME FOR FARM TRUCK.

what the larger and stronger. The steel shafts from the same mowers may be cut and made into stub axles, bolted on each end of the 4x4 inch oak axles. Collars are to be put on, holes drilled, and cap washers made to hold the wheels in place. The axle a, above, is two feet nine inches long; axle b four feet three inches long. The rear axle is 4x4 inches by ten and one-half feet long. It rests on top of the front axle, and a hammer trap, p, below, runs underneath. A hangerbolt, one inch in diameter, runs through all three, holding them securely in place. About one-half inch is cut out of both rear axle and reach, at their intersection, making a tight, square joint. A one-half inch bolt is put through the center. The reach projects three feet back of the rear axle. The crosspieces, d, 2x4 inch by four feet six inches long, are next bolted on at right angles to reach. Two pieces, e, above, are next laid on top of the three crosspieces, d, and bolted about four inches from the ends. This leaves room for mortises, f, to be made for stakes. Now level up the frame and measure for the braces, a. These are made of flat iron bars one-half by one-fourth inches. The outside pieces, e, 2x4 inches, are bolted on endwise. Side boards should rest on top of these e's and against the stakes f. The stakes may be raised full length when hauling rails, and lowered when not in use. At right is the view of the truck made of bolts with heads cut off, and curved around to hold the stake. The lower clamp holds the stake in position. The upper clamp is to hold the side board when needed; x represents the flooring, 1 inch thick. The platform of this truck is 7 1/2 feet long and 4 feet 2 inches wide. As made, one can turn very short in front of platform. The tongue was taken from an old binder, and braces attached, as shown. The seat, u, and spring, v, came from an old reaper, and is about forty years old. The tool box, z, holds wrenches, chisels, nails, pliers and oil can. In the rear of truck is a ring, m, for attaching a coil disc harrow or other implements, if needed, to save extra trips.—American Agriculturist.

FACTS FOR FARMERS. Stocks of wheat in warehouses in the northwest are estimated by the Minneapolis Market Record at 18,789,000 bushels. This is the time to buy seeds for next year and plan for the crops to be grown, not overlooking the garden in the estimates. BONANZA farms do not pay as much per acre as the small farms. Farming depends more upon skill than upon the area cultivated. It is not freezing that damages apples, but thawing. Keep them in some place where the temperature changes but little. TAKE up the study of certain crops and learn all that you can about them, and be prepared to put the knowledge into practice next spring. A LAYING hen is, in proportion to its weight, one of the largest producers of saleable products of the farm, exceeding in this respect even the cow. MAKE, save and apply manure during the winter. Haul it to the fields often to save time in the spring. Spread it finely and plow or brush early in April. SUNFLOWER seed, it is well known, is a good egg-producing food for chickens. It is also fine food to give the plumage a glossy appearance for exhibition purposes. YOUNG stock should not be fed heavily, but should receive three meals a day. If necessary, to promote rapid growth, and the food should be of a varied character. Caring for the fruit trees is the most neglected part of farm business. The orchard is planted in most any kind of way, and is cultivated whenever there is time, whether it is in season or out of season. To Keep Eggs from Freezing. It is impossible to avoid a certain amount of loss from freezing of the eggs during very cold weather, but this may be avoided to a certain extent by placing the most boxes in warm locations. Use only deep boxes; and do not be afraid to have plenty of hay in them. Collect the eggs as frequently as possible, and keep the eggs in a temperature not lower than forty degrees above zero. When shipping them to market pack them carefully to avoid freezing on the journey.

FIRESIDE FRAGMENTS.

—Box for Washing. Planned washing in cold water with a little borax will not only be well cleaned but there will be no shrinking. Use a large handful to ten gallons of soft water.

—Walnut Macaroons.—One cup of walnut meats, chopped fine, one cup of sugar, a little salt, one egg of cold tablespoons of flour. Cook on a buttered tin sheet in a shallow oven. These make delicious little cakes for an afternoon tea.—Boston Budget.

—Chestnut Soup.—Shell and blanch a pint of Italian chestnuts, and cook in boiling milk until tender. Boil the nuts through a colander, add salt and sufficient milk and cream to make a soup of the proper consistency, reheat and serve.—Good Health.

—Mulligatawny Soup.—Cut three small onions, a carrot, a turnip and a head of celery into two quarts of cold stock; bring to boiling, then let it simmer half an hour. Beat smoothly two tablespoons of flour with a little cooled liquor, stir it into the soup and boil three minutes. Strain through a coarse sieve and serve with boiled rice in separate dishes.—The Farmer.

—Chicken Pie.—Cut the chicken in a cream a generous half-cupful of butter and gradually work into this one cupful of sugar. Add one ounce of chocolate, melted; also two unbeaten eggs. Beat vigorously for five minutes, then stir in half a cupful of milk and lastly one cup and a half of flour with which have been mixed two tablespoons of baking powder. Flavor with vanilla. Pour into a buttered, shallow cake pan and bake for half an hour in a moderate oven. When cool spread with place frosting.—N. Y. Ledger.

—Chicken Pie.—Cut the chicken small, put it in a little with a few pieces of salt pork, cover with cold water, and boil until tender. Turn it out into a well greased pan, putting in alternate layers of sliced raw potatoes with the chicken, using plenty of butter, salt and pepper. Make a soda biscuit crust and cover the top with it, cutting a hole in the middle. Pour the broth over, with enough boiling water to cover it. Boil ten minutes, then put in the oven and thicken the gravy with flour.—The Farmer.

—Ten Cakes.—Put upon a pie-boat one pound of flour which you have previously sifted; make a hole in the center, in which place one-half pound of butter, six ounces of powdered sugar and four eggs. Mix all well together and knead it out in rounds or squares, put in a pan which has been buttered, slightly brush your cakes with beaten egg, sprinkle on top one-half pound of currants; put in the oven, and when colored a bright yellow remove them and serve as needed.—Farm, Field and Fireside.

—Drop Cakes.—One cup sugar, one cup molasses, one cup shortening, one cup water, one teaspoon soda, cinnamon, ginger and nutmeg to flavor. Stir with flour very stiff and drop in small balls on greased tin. English omelette "dumplings" a nice way to prepare at home. The skins of oysters are required with the pulp removed. They are best cut in halves. Boil in clear water until tender, and then drain and place in rich soup. Boil until clear and transparent, remove all pieces on plates to dry in a slow oven. If any soup remains it will make fine filling for cake. Add one cup of water, a lump of butter, and when hot thicken with corn starch.—Country Gentleman.

EMBALMED IN AMBER.

Nature's Process of Preserving the Remains of Plants, Insects and Animals. In many instances may be seen, in the most perfect state of preservation in amber, fossilized remains of plants and animals. The science of Egypt in its highest development did not succeed in discovering a method of embalming so perfect as the simple process taking place in nature. A tree exudes a gummy, resinous matter in a liquid state. An insect accidentally alights in it and is captured. The exudation continues and envelops it completely, preserving the most minute details of its structure. In the course of time the resin becomes a fossil and is known as amber. The history of fossil insects is largely indebted to the fly in amber. And to the preserving properties of amber we owe, likewise, our knowledge of some of the more minute details of ancient plant structure.

The coasts of the Baltic are, and have been from the days of the Phoenician traders, the great source of the amber of commerce. It occurs in the fossil fragments of strata known to geologists as oligocene. These are tertiary rocks of a date a little more recent than those of the London basin, and equivalent to the younger tertiary series of the Isle of Wight. The fragments of fossil resin were washed down by the rivers from the pine forests of the district, along with sediment and vegetable debris.

In them are found most perfectly preserved remains of the most delicate tissues of the vegetation of the period, as well as of insect life. Fragments of twigs, leaves, buds and flowers, with sepals, petals, stamens and pistils still in place, occur. Pollen grains have likewise been found. A recent genus, dentinia, has been recognized by its characteristic stamens; the valves of the anthers of cinnamomum are seen in others. In one specimen the pendent catkin of a species of oak is seen as distinctly through the clear amber as if it were a fresh flower.

And besides the insect and plant remains thus sealed up in amber, stray relics of the higher fauna of the forest have also been met with. Fragments of hair and feathers have been caught in the sticky resin and preserved. Among others, a woodpecker and squirrel have been recognized in the Baltic amber.—Gentleman's Magazine.

Small Change.

Reggie—I changed my mind. I suppose I have a right to? Kitty—O, yes; only it must be something like changing a cent.—Life.

WERE BOOK AGENTS.

Distinguished Men Who Once Followed that Humble Calling. A list of eminent men who have been book agents comprises many authors and statesmen. George Washington was a book agent and a good one. Prior to the fateful Braddock expedition he sold over two hundred copies in Fairfax and adjoining counties in Virginia of a work on the "American Savage." Jay Gould, Ralph Waldo Emerson and Mark Twain were in an early life, book canvassers. So, also, was Longfellow, and his success was remarkable. There is now in possession of the Massachusetts Historical Society a prospectus the poet used, and on one of the blank leaves are the skeleton lines of the celebrated poem "Excursion," which he was evidently then incubating. Daniel Webster paid his second term's tuition at Dartmouth by selling books. Gen. Grant at one time took an agency for Irving's "Columbus." Bret Harte was a book agent in California in 1849-50. Ex-President Hayes once canvassed for a book.

After the siege of Toulon, Bonaparte, then a young lieutenant, employed at the capital, and two honorable, to duplicate his pay account. He took the agency for the "History of the Revolution," by Bismarck, Cardinal Mezzofanti, Count Metternich, Canning, Lord Dunsford and Coleridge, the poet, were all at some period of their lives book agents. So, also, were Mme. de Staël and Mrs. Jameson, and Columbus canvassed for a work on "Marine Explorations."

James G. Blaine began his business career as a canvasser in Washington County, Pa., where he sold the "Life of Henry Clay." Many others whose names embellish the pages of history were obtained success to the expense and honorable calling of a book agent.—Philadelphia Times.

A Quick Sale.

Dog Dealer—I've been to say you sold that two-cent pup for twenty-five dollars? Why, I've got thoroughbreds that I can't sell for half that.

Boy—I sold him to a Boston woman. "What did you tell her?" "Nothing." "I did not put a pair of twenty-five-cent eyeglasses on 'im."—Good News.

"What is your objection to private theatricals?" he asked of the semi-faced man. "The publicity that is invariably attached to them," was the reply.—Washington Star.

STANDS to reason—the debater.—Philadelphia Record.

When a collector brings a bill round he always wants it made square.

It's a wise cow that knows its own butter.—Florida Times-Union.

TALK about women being flighty! Look at bank cashiers.—Texas Sittings.

The politician isn't narrow-minded—he is willing to put himself into anybody's place.—Elmira Gazette.

Progress.—"What pity that this young lady has both her arms." She would otherwise be a real Venus of Milo.—Hillegood Blatter.

THE EMPRESS.—Mrs. Whitcomb—"Who shall decide when doctors disagree?" Mr. Whitcomb—"The coroner, I guess."—Indianapolis Journal.

The burglar is not inclined to be talkative, but he is a great bore when he finds the safe locked.—Birmingham Republican.

When a man has no bills against him, he must feel as if he belonged to the nobility.—Texas Sittings.

A PLAIN dinner today is better than a banquet next week.—Truth.

SOME men are more afraid of criticism than a woman is of a shotgun.—Hum's Humor.

GREAT men have large noses, to enable them to stand the wear and tear of the grindstone.—Truth.

"Did you consider your coal real good?" "Yes." "Well, no; for every Sunday she goes to church and leaves me to get breakfast."—N. Y. Journal.

"No HANLEY has given up the idea of building a house in the spring." "Yes." "Did he say so?" "No, but he has bought twice for his wife this winter."—Inter Ocean.

IN EVERY Receipt that calls for baking powder use the "Royal." It will make the food lighter, sweeter, of finer flavor, more digestible and wholesome.

"We recommend the Royal Baking Powder as superior to all others."—United Cooks and Pastry Cooks' Association of the United States.

Nothing Wanted. A paper was gravely read at a woman's club in the west recommending the following efforts in decorative art from what most families throw away. Five out of ten women will probably read it seriously. Coffee grounds had been dried and were used to fill head rests, whose covers were brown silk, embroidered with coffee blossoms carefully copied from an encyclopedia picture. The tea leaves were similarly disposed inside a slip of green silk. Corn husks stuffed sofa cushions and potato parings carefully washed and dried, served admirably for the interiors of floor and piazza cushions made of sailcloth. The corn cobs were at first a poser, but finally, dried and gilded and tied with different colored ribbons, they made "lovely" (?) ornaments to suspend from every chandelier in the house. And finally an umbrella stand in the hall, "greatly admired," was made from a tile covered with putty, into which was pressed the egg shells of a month. Some of these were left white, others dyed yellow with the skins of red onions, the whole varnished and the putty ridges gilded.—N. Y. World.

A Difficult Undertaking. Priscilla—A girl never marries her first love. Primella—No; she's lucky if she can marry her fifty-first nowadys.—Puck.

Little Fellows, But They Work Hard. Those diminutive organs, the kidneys, do a great deal of work. An interruption of their functions is most disastrous to the system, and if not remedied, leads to a surely fatal termination. Hostetter's Stomach Bitters renews their activity and averts the danger. Besides this, it cures rheumatism, biliousness, neuralgia, and all the ills of the nervous system.

The Most Pleasant Way. Of preventing the grippe, colds, headaches, and fevers is to use the liquid laxative, PINKETTS, which whenever the system needs a gentle, yet effective cleansing, to be benefited one must get the true PINKETTS, manufactured by the California Fig Syrup Co. only. For sale by all druggists in 50c and \$1 bottles.

The merchant finds that his hardest work begins when everything is done. The Western Trail, is published quarterly by the Chicago, Rock Island & Pacific Railway. It tells how to get a farm in the West, and it will be sent to you gratis for one year. Send name and address to "Editor Western Trail, Chicago," and receive it one year free. JOHN SEIBERTS, G. P. A.

A LIGHT enter. The museum freak who swallows fire.—Philadelphia Record.

A COUGH, COLIC OR ROSE TURNER should be the motto of every household. These are a simple remedy, and give prompt relief. 25c. a box.

A BARBER has a right to lather his wife.—Boston Courier.

Dr. Hoxie's Certain Croup Cure. Sent postpaid with beautiful souvenir spoon. Send five to A. P. Hoxie, Buffalo, N. Y.

FOR SORENESS OR STIFFNESS FROM GOLD, USE ST. JACOBS OIL. IT RELAXES, SOOTHES, HEALS, CURES.

"August Flower" CALIFORNIA

Full information regarding the State, its lands, climate, the mid-winter fair and the most comfortable and economical way to go will be cheerfully furnished by the undersigned. Pullman Tourist Sleepers.

Miss C. G. McClave, School-teacher, 753 Park Place, Elmira, N. Y. "This Spring while away from home teaching my first term in a country school. I was perfectly wretched with that human agony called dyspepsia. After dieting for two weeks and getting no better, a friend wrote me, suggesting that I take August Flower. The very next day I purchased a bottle. I am delighted to say that August Flower helped me so that I have quite recovered from my indisposition."

WRITE TO-DAY. JAMES CARLTON, General Passenger & Ticket Agent, CHICAGO & ALTON R. R., CHICAGO, ILL. SEND THIS FOLDER every day to you.

HARTSHORN'S SELF-ACTING SHADERS. Notice of Intentions. AUTOCOLOR. The GENIE. HARTSHORN. A. N. K.—O 1481.

COLCHESTER SPADING BOOTS. ARE THE BEST. THE BEST RUBBER BOOT ever invented for Farmers, Winers, H. E. hounds and others. The outer sole extends the whole length of the sole down to the heel, preventing the heel from catching and other work. BEST quality rubber sole. ASK YOUR DEALER FOR THEM.

PISOS CURE FOR Consumption and People who have weak lungs or Asthma, should use Pisco's Cure for Consumption. It has cured thousands. It has not injured one. It is not bad to take. It is the best cough, asthma, and consumption cure.

The Republican.

BENJ. H. SINGELL, Publisher.

OAKLAND, GARRETT CO., MD.

Drive the glow from the house of the dead.

He had known her several months, but he had never been allowed to invade her boudoir before. As he waited for her in the gathering dusk of a winter's afternoon moving aimlessly about with all the restlessness of a lover, his eye took in all the details of this room, that had in it had he only skill to read the signs aright, the whole of a woman's life history. She kept him waiting—she always did, never in her life had she been first at a rendezvous—and he looked and noted until a whole sun of new knowledge of her urged round him.

It was not a commonplace room, he decided; how could it be? It bore in every detail the stamp of originality. It was not a commonplace room—the ordinary feminine kind—knacks were conspicuously absent—yet no one could have taken it for a man's room. The emulous disorder, the preconceived irregularity, the graceful litter was that of a fanciful, capricious, quick-moving woman, with too much sense of beauty and fitness to allow it to go beyond the point where it should cease to be picturesque and interesting.

The first sight of the place where she lived, and all its accumulated, evidence brought her before him as a few short interviews in friend's houses—a few waltzes with her—a few hurried meetings in the park—had never done, and as the door—not the door he expected—was pushed open behind him, he was already so thoroughly imbued with the personality that he felt no shock of surprise, only that the circle of identity was complete.

They were engaged to each other, but she did not kiss him, or even wish him good day. She detested formalities of every kind, and a habitual kiss of greeting would have seemed to her the worst manifestation of common-place. He knew her moods—or rather he waited on them—he divined them with the fine intelligence of a clever man who loves, and who, seeing how short life is, has elected to set all the qualities which would have gone to make him famous to the fathoming and furthering of the whims, to the appreciation of the moods, of one woman.

She puzzled him, and she knew it. It was one of her pleasures. She gratified her strong histrionic instinct by thus offering herself to him as a living drama, and yet, in this elaborate presentation of herself, she was always sincere. She would have considered insincerity degrading and laborious. She knew that nothing she could invent would be more striking, more interesting, than her own personality. She only recast her strange thoughts into an artistic form for the benefit of her slavish audience of one, and then she laughed sweetly at her own intolerable complexity. She loved to see him unravel her fanciful phrases, and marvel at the force of her images, with the same vicious sense of enjoyment she would have felt leaning over his shoulder as he read the pages of a book of more than average intelligence. She was his novel, his poem, his problem—and his love.

"Sit down," said she. "How do you like my room?"

"I like it, because it is you."

A flash of tantalizing consciousness swept over her face as she replied, seriously:

"Ah! It is not all me—at least, not me as I am now."

He prepared to be puzzled. "I have lived here always—nearly always, you know. My people never invade this room—it belongs to me. It has always been mine. But do you suppose that I have not changed in all these years that I have been a woman? How often does a permanent cast of slough? This room holds my worn-out skin, many of my worn-out skins. There is nothing mean about me. I do not throw my old envelopments away. I don't despise my old self, or deny it. I have been a girl in this room, a grunting, sentimental schoolgirl—do you see my map of Europe and my detestable bore? I have loved horses and led an out-of-door life—do you see my little rack full of whips? Look at those angular angles on the mantel-piece. I once believed in Botticelli, and called myself a pro-Raphaelite."

"And what are you now?" he asked, smiling, willing to fall in with her humor.

"A Russian princess, at your service."

"Still, in all these changes, it was always you."

"Ah, but not your youth!"

"Some one else, do you mean?" He tried to speak lightly. "Have I any right to ask that?"

"Every right," she waved her hands, and the odor of the pastilles that were burning on the mantelpiece seemed stirred and accentuated. "Look at my life! It lies spread around you. I conceal nothing."

He was too delicate to pry. He drew nearer and sat down beside her. She let him put his arm round her neck, just under her chin, and looked over at the ruffling lace on the breast of her gown below, with a certain complacency.

"We look rather nice, I think," she said, with her usual frankness giving expression to a dispassionate sense of the beauty of their mutual pose. Her lips closed in a happy curve and she sat there quietly, in the sweet inertia of absolute content. Not so her lover, she had set his mind working backwards, and he put to her the inevitable

question—the eternal preoccupation of lovers:

"Have you ever loved anyone but me?"

"My dear friend!"

"What does that mean?"

"I am a woman."

"Then you have?"

She laid a negligent arm round the back of the causer; it grazed his hair like a caress.

"Dear, I won't even make you the conventional reply—but not as I love you—for it would not be the truth. Since you ask me—two men have loved me and I loved one man, almost as dearly as I love you."

"Was he ever in this room?"

"Yes, often. Do I give you pain?" she asked, gently.

"No—only—I wish you had not told me. It is unreasonable of me but I shall always feel him here—now."

"Mon ami, you asked me, and he is here now—in a way"—she went on.

"But he does not know—does not imagine I am false to him. If he did, he would want to kill you—but he would be glad to think I was happy. He is like that. So am I, ours was not a common love."

"You say he is here in your room, still," whispered the man. "Is he in your heart too?"

"No," she replied, with some vehemence. "I swear he is not; that would be being false to you both. We parted—not unkindly—but for ever. That—my heart—was swept and garnished for you—every corner of it, when you took possession. I am not a base woman, although I may be a cynical one. I do not confound the past with the present. I cut it off—absolutely—but I do not ignore it. It is part of me—I could not—what has been must be."

He was silent. He could have wished her to say that the past no longer existed for her. She said instead very quietly:

"There is his portrait! Go and look at it—the etching—done from Rajon's portrait in the Salon."

He rose and followed her gaze till it rested on one of the framed etchings. It represented the head and shoulders of a man in the prime of life, the eyes, deeply bitten in, seemed to glow with an expression of intense reproach—or so he fancied.

"He is handsome, is he not?" she asked, wistfully.

He answered her gravely and respectfully in the affirmative, overcome for the moment by a sentiment of pity

for the man who had had the misfortune to be killed by such a woman. The blow must have nearly killed him. Yet the man of the portrait did not look like a man who had been killed, but then—neither was she a woman to be forsaken? He pondered this so long that she grew impatient, and called him back to her side. Yet he lingered. The nobility of that reproachful face had impressed him very deeply, and he said, his back still turned to her, his eyes fixed still on the portrait:

"Ah, dear, you have changed for the worse; he is perhaps more of a man than I."

"You are like Octave in 'Les Caprices.' Je ne vous aime pas, Marianne, Cello vous aime!," she quoted scornfully.

"But Cello was a poor creature, and I daresay Marianne was quite right to prefer Octave. Poor Cello!" She laughed.

"Did he give it to you?" he asked.

She nodded. "Shall I throw it away? Shall I turn down that portrait?" She asked, with an affection of carelessness.

"Not for worlds!"

"I should dislike doing it very much," she continued, gently, "but if you were to demand it—"

"What? In spite of your theories?"

"Yes, I love my theories—but I love you better."

She had never made such a concession before, and yet his heart did not go out to her, and his body hesitated to move. "A woman ought to have no theories," was the thought he formulated in that moment.

The clock struck, his eye turned to it. He had been there an hour, and it was his first visit to her in her own house, a day he had marked in his lover's calendar and longed for, how passionately! And it had passed thus! He saw the parallel thought gather in her eyes and pitied her. It was not his fault that he was ill at ease—not himself—that he did not know what he was doing! Some adverse influence held him apart from her, the sense of constraint between them was so strong that he

actually wished himself anywhere but in this stronghold of love—this goal of all his hopes.

The silence grew tense, the pictures on the wall seemed to gallop round the room, he felt breathless, and as if his strength, like blood from a wound, were ebbing away from him, moquent by moment.

"Open the window," she gasped.

He did so, and, leaning over the sill, watched the early stars slipping out, one by one, in between the chimneys of the houses below. He could just distinguish the river, only his confused sense was unable to realize the true level of the dull blue flood below him, and he confounded the lazy barges and lighters on the water with the slow moving carts passing over the bridges.

"Sit down here beside me!" she ordered him imperiously, and he obeyed, though he would not have done so of his own accord. She took his hand, it was helpless and unresponsive; her own was hot with fever, and the pupils of her eyes seemed to have grown into burning points of dark, unnaturally distinct on the glaring white of the eyeballs, as in the first stages of the mesmeric trance.

"You are restless," she said, incoherently. "You want to leave me—you hate me—you want to get into the air, go—go, but you know I love you—"

The tears stood in her eyes—she had never seen them there before, and yet he could not stay.

"I think I must leave you," he murmured. "It is he, I died him. I am not quite myself. The air of the room—perhaps those pastilles you burn—I don't know what it is—"

He saw her hand point in the direction of the portrait.

"Don't you know why?" she murmured. "It is he, I died him. I am not quite myself. The air of the room—perhaps those pastilles you burn—I don't know what it is—"

He understood her, and she went on wistfully.

"He says: 'Not here—not here! Here I kissed her—here she loved me. False mistress, find some other place to be with your new lover! You must never come here to me again! I have done very wrong. I have sinned against love—I was confident—brutal—heartless—'"

"Yes," he said slowly, "you did wrong to let me come here—to speak to you. It is not for nothing that we put heavy stones over our dead, and bury them a long way off. We try to forget them, we destroy traces of them as far as we can. Dead is dead. Yes, you made a mistake. The breath of

your room poisons me. Can one man live in the tomb of another? His love is antagonistic to mine. It kills it. His eyes are on me, his presence between us. I feel as if I were doing him a deadly wrong in being here with you. You loved him, he had a part in you. He retains it—by your wish. But you do not know. A woman's heart is only large enough for one love. You have been his, he will rise and claim you from me, in Heaven, perhaps, as the better lover of the two!"

"Do you not love me, then?" she said, very low.

"Never before have I loved you so dearly, but—would my image have the power to paralyze emotion in another man who loved you—in your next lover—for you will have other lovers, I know that now. See, I have not dared to kiss you. I cannot, he forbids me. I must not insult him so. You know it—you feel it—your lips are quite white. You are frightened. I think you have no heart, but I want you, I want you for mine. Will you choose between us—once for all?"

She rose, tottering, and walked towards the picture; her breath came fast, her slender hands coiled themselves round the frame. She tore it down, and with feverish, ineffectual strength strove to break it across her knee.

"Help me! can't you help me?" she cried.

"Ah, how can you ask me?" he murmured, revolted, while every fiber in his body tingled with emotion and the desire to assist at the annihilation, as it were, of the man who had rendered fruitless and sterile of joy his first rendezvous with his beloved. He laid his head in his hands, while the noise of the snapping of the frame, and the tearing of the paper went through his brain and beat on his heart as if it were the prospective beat of the carpenter's hammer on his own coffin.

It was done! Panting, and weary, she came back to him, and laid her arms round his neck.

"Now kiss me!" she cried. "Let not the worst vice lie roll!"—London Black and White.

Admitted His Error at Once.

A flashy, young man wearing a loud checked suit and a pair of yellow patent leather shoes stood on an up-town corner and talked boldly to two friends.

"I think," he said, "that she's one of the prettiest young girls I ever saw. There isn't a thing that girl don't know and can't do. She swims and rides and plays billiards and poker, and dances beautifully, and can do anything about the house that any girl can do. I tell you, she's un-de-siz-zle."

"What's that?" asked one of the friends.

The flashy young man hesitated for a moment. "She's fine sizzle, I said."

"You mean fine sizzle, don't you?" asked one of the friends.

"Yes," said the flashy young man, evidently much relieved. "In de sizzle, that's it. I thought fin de sizzle didn't sound right all the time."—Buffalo Express.

AT SCHOOL.

Johnny broke the rule to-day by fighting with his brother.

Then his teacher, strange to say, straightway broke another.

—Harper's Young People.

A Christmas Request.

"Now, Tom," said Tom's father, "you must go to the fireplace, and call up to Santa Claus, and tell him what you want him to bring you for Christmas."

Tom thought deeply for a few minutes, and then strode bravely over to the fireplace, and sitting down before the fender began:

"Well, Mr. Claus, I want a three-wheeled bicycle, because I always fall off the other kind and break my neck. I want lots of marbles and tops, and railway engines, and steamboats. Got that?"

There came no answer.

"Go ahead," said his father. "He hears you."

"And I want a pony, and a dog, and a wagon, and lots of books and tin soldiers. In fact, Mr. Santa Claus, you might bring me a little of everything."—Harper's Bazar.

Musical Item.

Gus De Smith—Things are pretty evenly distributed in this world, after all.

Hostetter Melodist—How so?

Gus De Smith—The piano has spoiled many a good dishwasher, and many a good dishwasher has spoiled a piano.—Texas Siftings.

The Matter With It.

Hoon—Look here, Waters! I don't care for any more milk like that you left yesterday morning. It was altogether too cynical to suit my taste.

Waters (the milkman)—Cynical? What do you mean?

Hoon—It seemed to have been prematurely soured.—Puck.

Been a Boy Himself.

Practical Father—I want to buy a watch for my boy's Christmas present—the cheapest you have.

Honest Dealer—I'm afraid I can't warrant the cheap ones to keep very good time.

Practical Father—Oh, that doesn't matter; just fix it so he can open the back case.—Puck.

He Wouldn't Stand Still.

"I had my picture taken the other day," said Tom.

"And was it good?"

"I don't think so," said Tom.

"And why not?"

"Because I wasn't good myself, I guess," said Tom.—Harper's Young People.

HE KNEW HIS BUSINESS.

Kind-Hearted Maudlin (flinging for a stray penny in her purse)—I suppose you poor blind people feel your misfortune keenly?

Blind Mendicant—Yes, indeed. The Lord only knows how I miss the pleasure of being able to look into the beautiful faces of the handsome and lovely ladies who are kind enough to donate.

Kind-Hearted Maudlin (fishing out a quarter)—Here, poor fellow, take this. I'm sure you are deserving.—Puck.

Latter-Day Children.

Domestic—It's getting very late, Johnny.

Little Johnny—Goin' to bed?

"Yes."

"Is papa and mamma in bed?"

"Yes."

"Then I guess it's mos' time for me to go, too."—Good News.

Of Course.

In France, instead of our "What else may I show you?" the shopkeepers use the phrase: "And with that?" An Englishman recently in Paris had bought several things in a large shop there and considered the formula repeated between each purchase most impertinent.

The last thing he bought was a pocket handkerchief, and the shopman most blandly asked: "And with that?"

This proved too much for the exasperated Briton, who angrily replied: "And with that," pointing to the handkerchief: "I blow my nose, you block-head."

The Sale of New Jersey Havanas.

"Good morning, sir," said the oily stranger, entering the office. "I hear that you are a lover of fine cigars. Now, if you know how to keep a secret, I have here a few boxes of perfectos which were smuggled through the custom house, you know, which I can sell you at—"

There were two reasons why the oily stranger did not continue. One was that he had sold cigars to the same man before; the other was that the man was in fine physical trim and needed exercise.—Chicago Record.

Time by the Forelock.

Father—Seems to me you have been making a big lot of additions to Dick's wardrobe lately.

Mother—Well, he just teased for first one thing, and then another, until I had to get them. You can't blame a boy for wanting to look nice.

Little Dot (in another room)—Why did you make such a fuss about wanting new things? Your old ones look as bright.

What's One Little Cipher?

May B. Willing—You remember I told you when you had a salary of \$10,000 a year I would marry you.

Ben A. Fraud—Yes (hopelessly).

May B. Willing—How much is it now, dear?

Ben A. Fraud—One thousand (more hopelessly).

May B. Willing—I don't suppose the extra cipher is really worth bothering about, do you?—Harper's Bazar.

MORE WAYS THAN ONE.

Mr. Pokes—Land ob lub, Cludy, wha' yo' doin' wif my razor?

Cludy—Wha' I doin'? Why, dere hain't no pupah' tail in de house ter make a blaze wif ter scorch de hair off dis chicken. I jes' natchully has ter shave 'im.—Harper's Bazar.

Identified.

They served us at our boarding hours with "hurry" to-day; equal! I'm sure it was a portion of the one that Mary had.

The Prescription Free.

Tramp—I just dropped in, mum, to offer my new cure for indigestion, dyspepsia, and kindred ailments, mum. It may prove a great blessing to your family, mum, and I charge you nothing for the prescription.

Housekeeper—Well, I must say that's reasonable enough. What is the cure?

Tramp—Live on plain food, and give your rich and indigestible dishes to the poor. I'm the poor, mum.—N. Y. Weekly.

Very Nice.

Dusty Rhodes—I said to Mrs. Dogood that the merry Yuletide brought to me only sad recollections; memories of a day when I had turkey and cranberry sauce, and hot mince pie and gooseberry jam, and—

Hungry Higgins—And then—show!

Dusty Rhodes—Said she considered those very comfortable things to think about.—Truth.

Probably Not Their Last.

Mr. and Mrs. Wickerby's first quarrel had reached its height.

"I was drunk, madam, when I proposed to you," he said, savagely.

"Then I owe you an apology for having misjudged you, Sir," rejoined Mrs. Wickerby, sweetly. "I thought I was merely engaging myself to a rich idiot."—Chicago Tribune.

NOT THAT BLUE.

Miss Hanks—Who is that man with the empty sleeve you just spoke to?

Clement—Capt. Ketchum. He lost an arm winning a victory for the blue.

Miss Hanks—Introduce me; I have a brother at Yale.—Frank Leslie's Weekly.

Then She Knew All About It.

"What is that big iron thing?" asked Laura.

"Locomotive boiler," said Tom.

Laura looked thoughtful. After a moment's silence she asked: "Why do they boil locomotives?"

"To make 'em tender," he said, slowly, to go, too.—Boston Globe.

Precious Stones.

Among the interesting facts not generally known are that the supply of rubies has steadily diminished for centuries, and that now a ruby the size of a carat or over is worth from three to ten times as much as a diamond of similar size; that the sapphires is the same stone as the ruby, but different in color; that the "star" sapphires, the rarest variety, exhibit by reflected light a six-pointed star; that the best turquoise are American; that an imitation of the turquoise is cut from the teeth of fossil animals; that spinels resemble very precious gems; that the tourmaline has electrical properties when heated.—N. Y. Mail and Express.

Seven Surgical Operations.

I underwent in consequence of a wound. The wound ceased to heal and the surgeons gave me up as a hopeless case. April 1, 1892, I commenced to take Hood's Sarsaparilla. After

Hood's Sarsaparilla Cures.

taking the first bottle the pains left my groin and have not returned. While taking the second bottle the wound at the hip entirely healed. The third bottle made me feel well as ever.

CHAS. A. STALKER, West Waltham, N. Y.

Hood's Pills assist digestion and cure headache. Sold by all druggists. 25 cents.

DR. KILMER'S

SWAMP-ROOT

CURED ME.

Dropsical Swelling, Cold as Ice.

LIFE WAS A BURDEN.

"Swamp-Root" saved my life after I had suffered everything but death.

I found you my photograph and this description of my case and you can use it if you wish.

My hands were as cold as ice; I would not warm them. Dropsical swellings of the lower limbs; I could not button my shoes. Exhaustion completely exhausted me; death seemed so very near. The swellings have gone and all my troubles have disappeared. My health is better now than it has been for years.

"SWAMP-ROOT CURED ME."

Tell doubting ones to write me I will tell them all about it.

Mrs. R. J. CURRIER, Marietta, Shelby Co., Ind.

At Druggists 50c. and \$1.00 size.

"Swamp-Root" Cures Rheumatism, Gout, Gravel, etc.

Dr. Kilmer's U. & O. Anointment Cures Piles. Trial Box Free—At Druggists 50c. each.

The Greatest Medical Discovery of the Age.

KENNEDY'S

MEDICAL DISCOVERY.

DONALD KENNEDY, OF ROXBURY, MASS.,

Has discovered in one of our common pasture weeds a remedy that cures every kind of Humor, from the worst Scrofula down to a common Pimple.

He has tried it in over eleven hundred cases, and never failed except in two cases (both thunder humor). He has now in his possession over two hundred certificates of its value, all within twenty miles of Boston.

A benefit is always experienced from the first bottle, and a perfect cure is warranted when the right quantity is taken.

When the lungs are affected it causes shooting pains, like needles passing through them; the same with the Liver or Bowels. This is caused by the ducts being stopped, and always disappears in a week after taking it.

If the stomach is foul or bilious it will cause squamous feelings at first.

No change of diet ever necessary. Eat the best you can get, and enough of it. Dose, one tablespoonful in water at bedtime. Read the Label. Send for Book.

Ely's Cream Balm

QUICKLY CURES GOLD IN HEAD

Price 50 Cents.

Ely's Balm 10c each bottle. Ely's Balm 25c each bottle. Ely's Balm 50c each bottle.

THE JUDGES OF the WORLD'S COLUMBIAN EXPOSITION

Have made the HIGHEST AWARDS

(Medals and Diplomas) to WALTER BAKER & CO.

On each of the following named articles:

TEMPERANCE.

BACCHUS AND THE GRAPE.

At the purple close of evening
Careless Bacchus sleeping lay—
Purples from the coast of Sicily
Bore him to their decks away;
When the slumbering god awoke,
Wondering he beheld the deep
While the grapes, laughing, told him,
Boys should not be caught asleep.
Bacchus should never be caught asleep.

As they jested green vines kept springing
Rich as feel by southern gales;
From each plump their broad leaves dingling
Mingled with the cords and sails;
Clinging mast and spar, like heavy
Round the neck of warrior brave;
Whilst the ship, unit for duty,
Lay all helpless on the wave;
Hail! ha! Bacchus—ha! ha! Bacchus!
Who's the captor—who's the slave?

All muzzled the pirates gazing,
Watched the clustering grapes ascend—
To the topmost spar soaring;
As their rich robes were wind and
Then the pirates, lowly kneeling,
Swole to turn the boy's god's frown;
But the ship, like drunken's reeling,
With a sudden shiver went down;
Hail! ha! Bacchus—ha! ha! Bacchus!
Fathoms deep the water's down.
—Charles Swate, in *Mosha's Monthly*.

EFFECTS OF ALCOHOL.

It Does Not Aid Work and Retards Digestion.

The actual effect of alcohol upon the human system is a subject which has excited considerable interest of late years among physicians, and has attracted some attention from mankind at large. The average man is probably aware, or has been aware at some period of his life, of certain "effects" of pleasant forms of alcohol upon the system, and may content with himself that alcohol in moderate quantities is not only good for his health, but necessary for it. Whether this be true or not, he may learn by reading the opinion of scientists appended herewith.

From a publication entitled "Abnormal Man," issued by the Bureau of Education and compiled by Arthur Macdonald, the specialist, are gathered the opinions expressed below, being from the pens of a number of the most celebrated writers upon sociology in the world.

The alcoholic question is above all a physiological one. We know that alcohol is consumed in our body, that it is a source of living force; but it does not follow that it is food until this power is shown to aid the working of normal functions. We do not know whether the muscular fibers and nerve cells can utilize alcohol as a source of power. Alcohol lessens the heat of the body by working an enlargement of the blood vessels in the skin, in consequence of which more warm blood flows through the cold surface and more heat is given out. The enlargement of the blood vessels comes in this way: In the walls of the blood vessels there are small ring muscles, which are in constant contraction. The cause of this contraction comes from certain nerve fibers, which run to the ring muscles, and they all have a common center in the brain. Alcohol paralyzes this center; the nerve irritation ceases, the ring muscles relax, the blood vessels are widened and the skin becomes richer in blood (recognized by the color). The reddening of the cheeks after drinking wine, which is the effect of alcohol, is a pathological phenomenon.

The ordinary man says alcohol warms him in cold weather. This is a self-deception; he feels simply the warm blood streaming out to the skin in greater quantities. As a matter of fact he loses heat. The deception comes, perchance, in this way: The brain center, which mediates the feeling of cold, is stupefied by paralysis. In general it can be proven that all effects of alcohol which are generally designated as "excitation" are in reality only paralytic phenomena. The paralytic effects are especially so. The brain function, which is first weakened, is the clear judgment or critical faculty. In consequence the emotional life prevails, freed from the chains of criticism; the man becomes open-hearted and careless. But back of the paralytic effect of alcohol shows itself in this, that every feeling of discomfort and pain is benumbed, and especially the bitterest of pains, the psychological ones, as sorrow and anxiety, wherefore the merry feeling in a "drinking company." The man never becomes clever than he can drink. This widespread prejudice is also a deception; it is likewise a symptom of brain paralysis, where, as self-criticism sinks, self-sufficiency rises and self-control is lost.

He who becomes accustomed to take alcohol regularly is in fact better equipped for working than if alcohol was suddenly taken away from him. But this is the case also with other poisons. When morphine is taken away from the morphine-eater he can not work, sleep nor eat. He is "strengthened" through morphine. But he who is not accustomed to narcotics is not made more capable of work through narcotics. Not of still more weight are the thousands of experiments that occur in the case of soldiers; that in war, in peace, in any climate, and hardships of the most wearisome marches are best endured when the soldier abstains wholly from all alcoholic drinks. These facts are verified in the English armies in Ceylon, West Africa, Canada and India. And that thousands of sailors are not allowed to touch a drop of alcohol on board, and that in tropical, temperate and especially in polar regions. Most while fishers are total abstainers. That which is true of bodily exertion is also true of mental. Alcohol strengthens no one; it simply benumbs the feeling of fatigue.

The error of poor people in this regard is especially unfortunate, as they spend much for alcoholic drinks to strengthen them instead of buying rich and salutary food. The advocate of beer claims that it is nutritious. True, beer contains a considerable quantity of hydrocarbons, dextrin, and sugar. But there is a surplus of this in food already, and there is no reason, why it should be taken in a more

costly form. It is claimed that beer and wine aid digestion, but many experiments have been made on animals and men, and especially on men with the aid of the stomach pump, which show that moderate doses of beer and wine lengthen the time of digestion and disturb it. Direct observations on persons with stomach fistula likewise indicate the same effects.

Alcohol as a medicine is a mild anesthetic; it should only be used for acute sickness, but never for chronic troubles, for the same reason that morphine and chloral hydrate should not be employed.

Many drink because of the good taste of liquor and not for its effects. But taste is made perverse in this way, the appetite tends almost wholly toward meat; sugar, ripe fruits and sweet food in general are disgusting to the drinker. Physiology has established that sugar is the source of muscular force. When the sweet is no more agreeable to us signifies an abnormal condition. A drinker finds himself in this condition; and he is a drinker who does not feed himself at dinner who takes beer, wine, or alcohol in any form.—Washington Star.

Those Who Gain.

The economies of the saloon question were presented in an interesting manner at Worcester, Mass., the other evening by a committee which has been making a thorough investigation, visiting saloons, questioning proprietors, barkeepers and patrons, and procuring information from other sources. There are 80 saloons in the city, the rent of which ranges from \$300 to \$1,500, with an average of \$800; bartenders are paid \$6 per week and board to \$25; and incidental expenses average in the larger places \$50 per week; and there is, besides the license fee, which for the 80 saloons this year amounts to \$118,300. This last sum may be considered what the liquor traffic pays to the citizens. On the other hand as nearly as can be estimated, the citizens pay to each saloon \$60 a day, or fully \$1,800,000 a year—ten times the amount of the license fees. As showing the money-making capacity of a popular saloon, a bank president told of a rumrunner who borrowed \$1,000 to pay his license fee, giving a mortgage on his house, and paid off the mortgage in three and a half months, saying that he had also paid for his stock and lived well in the meantime.—N. Y. Post.

Drink Caused His Downfall.

John L. Sullivan, the pugilist, a man of powerful physique, but hitherto a hard drinker, was recently asked if he would ever fight again. He was beaten in his last contest, and his defeat was attributed to drink. In response to the inquiry of his friend, he reported as saying, with deliberation after expanding his big chest: "I think I am as good to-day as ever I was. My health is first class, and when I slip through a year without touching a drop of liquor I think you will see a marked change for the better in me."

Sullivan has learned by his own humiliating defeat that abstinence from liquor is his only hope of being able again to command his fine muscular power.—National Temperance Advocate.

VARIOUS NOTES.

THERE are 45,000 tramps in our country. A careful investigation shows a year's drift of 1,345 tramps had trades and 1,199 were able to read and write. Liquor and shiftlessness were the chief elements of their downfall.

DR. RICHARDSON, before he became an abstainer, prescribed wine to a celebrated boat-race trainer. He refused to give the wine by drinking wine himself, saying: "I should by drinking wine, say four points on which I rely in my business, viz: Endurance, decision, precision and presence of mind."

A LARGE manufacturing firm in Cincinnati recently made the following statement: "A drinking man will turn out from twenty to thirty per cent. less work than a non-drinker, and, in addition, his work is apt to be defective and require reworking."

THE PENNSYLVANIA supreme court decides that if any person meets a violent death at the hands of a man who is intoxicated, under the civil damage act, the dependents of the deceased person can recover damages from those who sold the liquor which intoxicated the one who committed the violence.

DR. HUGH RICHARD KERR, of London, great authority on intemperance, says that women inebriates are much more difficult to control and cure than men. He tells the following story: The women in his retreat first got their curling tongs. Then, as curling tongs must be made hot, they got some methylated spirits for the lamp. Next, by various devices, hot water, sugar and lemon juice were obtained from one of the maids. And so out of curling tongs came grog and a state of intoxication, shocking and startling to the proprietor of the retreat.

FIFTY or sixty years ago whisky was on the tap on every ship, and free to all the crew or served out to them in large quantities. At length a captain forbade the whisky supply; half his crew deserted him, but others took their places. The captain did this because of the comparative and marked inefficiency of the drinking part of his crew during a terribly violent storm with snow, sleet and ice. Not to be considered mean he gave his new crew the best food the market of each port could supply. Marine insurance companies began at once to discriminate in rates in favor of his vessel and cargoes. Other shipowners were compelled to adopt the same rule by the force of business competition, and now supplying liquors freely to sailors is an extinct custom.

MISCELLANEOUS.

—The house property of Australia is more valuable compared with population than in Europe.
—Father: "Well, young man, I understand, then, that you love my daughter?" Nervous Youth: "N-n-n-no, sir, I wish to marry her!"—Inter Ocean.

—It is estimated that every American drinks a pint of water daily, which makes the daily consumption 6,125,000 gallons.

—The governor of Oklahoma estimates the population of the territory at 151,304 and that of the Cherokee strip at 100,000, making a total of 251,304.

—Her Father: "Does he work hard in business, my dear?" Himself: "Work? Why, papa, it takes all his energy to be a gentleman."—Philadelphia Press.

—Jags is after everything in sight. I believe he'd like the earth. "No, he wouldn't." "Why wouldn't he?" "Well, because it's two-thirds water."

—Millions for defense, not a cent for tribute. (Charles Pinckney, in a speech made concerning the Jay treaty with England.) These words were used with reference to France, the treaty being ill-received by the doctors, which hinted that money payment would smooth over the difficulty.

—Man Y. Palido, of Madrid, is the only woman lawyer in Spain. Her portrait, which represents her as a remarkably handsome young woman, occupied a conspicuous place in the Spanish exhibit at the World's fair. Near by was her special permit to practise in the Spanish courts.—Boston Woman's Journal.

—Stable keepers in New York seem long to have known the trick of domesticating the vagrants. They consider the stables as attractive. A large or small flock of these birds, and some stable keepers put up tiny shelters where the pigeons may rest and breed. The metropolitan instinct of the birds keeps them faithful to these allotted houses.

A Baltimore newspaper is quoted as saying that the terrapin was unknown to Europeans thirty years ago, but whatever may be the truth as to Baltimore, the terrapin was looked upon as a delicacy by eastern shore men thirty years ago and long before. As long ago as 1800 terrapin was so great a luxury that even eastern shore folk of considerable means had it upon their tables only now and then. It was sometimes served with a sauce like a thick soup.

—Temple of Ephesus was a famous temple of powerful Diana, in ancient Ephesus, Asia Minor. The original temple, erected in the sixth century, B. C., was intentionally burned by Herodotus, with a view to gaining notoriety, on the same day that Alexander the Great was born, B. C. 356. The temple, which occupied more than two centuries in building, was one of the largest and most gorgeous of all those erected by the Greeks, and was regarded one of the wonders of the world. Scanty remains of it still exist.

—"Everybody knows," said a boy, that it is more difficult to black new shoes than old ones. The other day when I bought a pair of new shoes and saw in the store a sign that said: 'New shoes polished free,' I thought, 'I don't mind if I find them so.' They blacked them just as anybody would except in this: The very first thing they did was to give the shoes a good rubbing with a cloth, just as they do for the last final polish. I asked the bootblack why he did that and he said that new shoes were generally a little oily and that that first rub was to rub the oil off. Then he went ahead and blacked them without difficulty."

—"I should certainly count myself a person of at least ordinary intelligence," said a middle-aged man, "as I find things I don't know. Take the matter of pronunciation, for instance; I am making discoveries in that all the time. I find that there are words that I have been calmly mispronouncing all my life, to the disgrace, I doubtless, of the world inexorable. Do you know that until a few years ago when I heard somebody pronounce it correctly, I had always called that insect 'fly.' Sounds dreadful, doesn't it? It really is a word which I got along comfortably enough with inexorable for a good many years."

—More roses are grown in the pretty New Jersey village, Madison, than anywhere else in the United States. About twenty years ago three wealthy residents conceived the idea of raising roses to supply the New York market, and beginning with small greenhouses, the industry has increased until there are now not less than one hundred and seventy-five greenhouses in the vicinity, and twenty-five more houses are in process of building. The average daily shipments amount to about thirty-five thousand buds. Among the most popular varieties are the American Beauty with its long stem, rich crimson petals and spicy perfume; the pure Nephrole, the yellow Pearl, the Marechal Niel, a deep yellow, and the blush Marmet.

—Everywhere about the valleys of New Mexico, invariably upon eminences, and usually upon high flat-topped mesas or table hills, are the ruins of houses of the ancient civilized Indian population that lived here and tilled the soil before the coming of the Spaniards, four centuries ago. The numbers of this old population can only be vaguely inferred by the numerous cobblestone foundations of their houses, still well defined above the surface of the ground, and by the debris of the fallen walls which cover the adjacent grass-grown and intermixed with occasional old stone utensils and countless fragments of pottery. This pottery when turned up by the spade is found to be handsome and varied in color and as fresh of tint as if it could have been when the village was destroyed or abandoned and every tradition of its existence lost in prehistoric past.

THE TEXAS RANGERS.

Origin of the Organization—An Effective Body.

These rangers, as they are called, are in reality mounted police who are accustomed to the country, and their long life of scouting on the plains and among the foothills enables them to locate the position of the revolutionists accurately, and to strike an effective blow at the important moment. The entire ranger force massed upon the frontier of the state could alone protect the interests of law and order, and make it impossible for filibustering parties to make their plans and preparations within the United States limits, and then to pass over the state line to help the revolutionists. These revolutionists are accustomed to the same kind of life as the rangers, and they know the country thoroughly, but they have not the discipline and courage of the mounted police employed by the state. The rangers are practically scouts and spies, and for frontier fighting they are unequalled. Originally they were organized to fight the Indians and outlaws of the state, being a sort of vigilance committee, who at a moment's notice could be ordered to any part of the country. The first ranger company consisted entirely of scouts, trappers and old Indian fighters, and they volunteered themselves to the call of the law. They were a force and power in the southwest long before they were organized as a state company, and the state's marvelous development is largely due to their services. They banded together naturally to fight the Indians, and gradually the different scouts became known to the people of the towns and cities. Besides their marksmanship and bravery, they were all over the country, protecting the weak and helpless whenever possible, and boldly facing all enemies to the interests of peace and order. Besides being crack shots, they were as cunning as the Indians and as brave as lions.

The present battalion dates its history back to 1874, when Richard Coke was governor of Texas. Texas was then overrun by Indian marauders, the desperate border ruffians and cunning Mexican bandits. These law-defying people were strong in numbers, and life and property were not secure in any part of the state. Ranches within half a mile of a large town were often attacked and robbed. The state troops could not prevent these raids, for before they could move upon the enemy they had fled to other parts of the country. There seemed to be only one way to solve the difficulty, and that was to organize the companies of rangers. I believe this was done immediately, and the state appropriated \$50,000 for the purpose, upon the recommendation of the governor. Although their numbers have steadily decreased since then, still the rangers are a fixture in the state, and their services will always be needed as long as the vast stretches of country are settled and the home of law-defying persons. Each company now contains about twenty men, but there are many "stray bands" which can rapidly be pressed into service when needed. The rangers are always busy, and the law is always upheld. They are always referred to the quietness and inactivity of the camp. Often they are compelled to make forced marches of many miles, and they show their endurance in the saddle by riding for twenty hours at a stretch. They follow the trail of the enemy through rough, mountainous passes and across pathless plains with tireless energy until the Indians or desperadoes are caught, and then with a disregard for their own personal safety they rush into the battle with a determination to conquer and they generally succeed. Superior forces, often outnumbering their own five to one, are attacked with the same amount of self-confidence, and so effectively do they use their weapons that all fall before them. They have a name throughout the state which sends the cold shivers down the backs of those on whose trail the rangers are placed.

The rangers furnish their own weapons and horses, and each one is compelled to have a good Winchester, a Colt's revolver and a hunter's knife. The state provides them with active duty sixty rounds of ammunition for the rifle and thirty rounds for the revolver. Tents and food supplies are also given them at the expense of the state. They are not hampered by heavy equipment, and at a moment's notice can leave their camp and start in pursuit of the enemy. A small male pack slung over the side of the saddle contains all the necessary equipments they need. The discipline of the ranger companies is unlike anything that prevails in the regular government troops, and, in fact, no discipline really exists, for every man knows his duty, and they act together in battle. The reason of this lack of discipline is due to the fact that every ranger is an experienced hunter or scout before he enlists, and the rough country, knows instinctively what to do in case of an emergency. There are no drills or parades and only one inspection a year.

These rangers are on the field now, under experienced leaders who have won names as Indian fighters, and they are seen every day along the border line. The state of Texas depends more upon its rangers to keep the Mexican revolutionists from coming into the United States territory than it does on the regular government troops. The men composing the rangers exist for the term of one year and are then permitted to leave if they so wish, but if at any time one wants to return he is at liberty to do so; consequently the companies are never full, except at a time like the present, when there is a chance of daily fighting, when it seems as though every scout in the country comes rushing into the ranks of the rangers.—New Orleans Times-Democrat.

—The man who lives only for himself is engaged in very small business.—Ran's Horn.

PUNGENT PARAGRAPHS.

—The army and navy of the Argentine Confederation are kept up at an annual cost of \$10,000,000.
—Tommy: "Paw, why does parrots live so long?" Mr. Figg: "To give them time to repent, I guess."—Lancaster Journal.

—She: "I wonder if there will be anything to talk about in the next world?" He: "No, yes. You know, there is always something to say on the other side."—Boston Transcript.

—Miss Flirt (to her young admirer): "Why, Charlie, you don't even know the A. B. C. of love?" Charlie (stoutly): "Well, I know the C and I of it anyway."—New York Journal.

—Newpaper: "Poor, old Nappie must be completely discouraged about ever being cured of insomnia." "Why?" Newspaper: "I heard him tell the doctor that he sleeps like a baby now."—Inter Ocean.

—Did you ask Miss De Style if she would be yours, Horace?" "I should say not, Gideon." "But I thought you intended to do so." "Hardly. What I did ask her was if I might be hers."

—Little Dick: "Johnny Wheeler has a new bicycle." Father: "Another? What is he going to do with the old one?" Little Dick: "He's going to sell it to me as soon as you give me the money."

—Teacher: "Where is the island of Cuba situated?" Boy: "I dunno, sir." Teacher: "Don't you know where your sugar comes from?" Boy: "Yes, sir; we borrow it from our next-door neighbor."

—A Conservative Estimate: "The value of such a poem as this cannot be expressed in more dollars," exclaimed Mr. Bond. "No, it cannot," agreed the editor; "we will pay you seventy-five cents for it."

—Mike (going down a ladder): "Hand on, Pat. Don't yez come down on me bolder 'at Ot down. It's cold and crooked." Pat (getting on): "Arra, be easy. It would save th' boss right to have to buy a new one."

—An Inference: "Hello!" exclaimed the Brooklyn man, "there must have been something wrong with the trolley railroad yesterday." "Weren't the cars running?" asked his wife. "I don't think so. I don't see anything in the paper about anybody having been killed by them."—Washington Star.

—Mr. Skidds (feeling his way): "Miss Fossick, what salary do you think a young man ought to have to marry?" Miss Fossick (with well-simulated surprise): "My gracious, Mr. Skidds, young men demand a salary for marrying nowadays?"—Harper's Bazar.

—No Society Household Should be Without It: "Fakin'—This box, indeed, is grace, and this is an instantaneous radiator; they will be worth their weight in gold to you." Mrs. Earle: "How?" Fakin': "Why, you can soil your clothes, get them through the custom house free, and then clean them in five minutes after you get home."

AN AMERICAN CITIZEN.

And He Was Having No French Rules Played on Him.

A man with that variety of whiskers known technically as "loose chewing" was playing billiards in an uptown room on Saturday afternoon. He had for an antagonist a little man with a broad-brimmed hat and a high-collared coat. The man with the whiskers made a shot. "Here," shouted the man with the straw hat, "that was a push shot and push shots don't go."

"What's that?" inquired the man with the whiskers.

"Harred, hay? Well, you in blazes barred them?"

"Why, they are barred in the rules." The man with the whiskers thumped down on the floor and looked over the table.

"For this game?" he asked.

The straw-hat player hesitated. "I ain't exactly sure," he finally said, "but I suppose it was the French."

"Suppose it was the French, hay? Well, I suppose so, too. Now, where is the land where the French live?"

The straw-hat man looked unimpressed. "Across the water, ain't it?"

"It is. And the French are the foreigners, ain't they?"

"I suppose so."

"Well, young fellow," said the man with the whiskers, "I want you to understand that I'm an American citizen. I'm a dweller on freedom's soil. I'm a believer in home industries and I don't recognize no rules made by any darn foreigners. American rules is good enough for me, and if they ain't no American rules I'll make a few myself. Therefore I am decidedly of the opinion that push shots go. Play billiards now before I sneeze you."

And the straw-hat player was so rattled that he missed the easiest kind of a carom.—Buffalo Express.

Useful and Ornamental.

No sleeping room is quite complete without a hair receiver, and a pretty one can be made from a small quantity of China or soft silk. If your room is in blues, have the silk of that color and get a celluloid ring of blue that is about five inches in diameter. (Similar rings are used for towel-racks.) Cut your silk in the shape of a go-sized circle, stir it twice at an inch and a half from the edge, and draw it up. You then have a small silk bag. Through the space between the shirings run a bonnet-wire and bend into an oval shape to keep the bag open at the top. Half of the towel-rings is inside the bag and half of it rises above to form a handle. The bows of blue ribbon over the places at each side where the ring is fastened to the bag, and one bow on the handle.—N. Y. Post.

A Bad Season.

"Speaking of light houses, the smallest ever I saw was in a one-night stand in Texas," said one actor to another, as they were talking on the Rialto in New York.

"How many people were there in the house?"

"There was only one man, and pretty soon I missed him. I asked what had become of the audience, and a sage told me he had gone out to get a drink."—Texas Siftings.

SCIENCE AND INDUSTRY.

—North Dakota has several wheat farms of 10,000 to 15,000 acres each. Over 210,000 tons of buffalo bones, representing 7,800,000 animals, have been exported from this state.

—The public cannot too clearly understand that medical science has nothing more valuable to offer than its non-medical suggestions, grounded on clinical and laboratory research—health maxims which, as the Paris prodigal told his doctor, "any fool knows" something of, and which, I may add, all fools should pay for except in bitter personal experience.

—California's vintage this year will be about 18,000,000 gallons, some 3,000,000 gallons more than last year's yield, and the quality will be good. It is expected that the vintage of the next ten years, owing to the ravages of phylloxera and to overplanting, will show a decrease during the next ten years caused by overproduction tend also to place a check on the industry.

—One way of toughening or selves is by means of a cold foot bath. We take a cold foot bath as often as any day, by putting them in cold water for about ten seconds, morning and night, and then rubbing them till they are red, is a grand remedy for all this, and toughens very much. Ten or fifteen seconds are long enough, and even less will do in the first few times. It is unwise to prolong this bath, and may do harm.

—Speaking of snakes, in answer to a question by Ruskin, "What use has a serpent for its tongue?" Mr. Hudson, after denying that it is an insect-eating organ, a decoy, or a tactile organ, suggests that the snake uses its tongue to concentrate the attention of an intended victim upon its head, while its body is being trailed forward to effect the capture.

—A sort of anti-deer apparatus has been invented for preserving pictures. It is a glass tray with a solid back, and the picture is put inside and hermetically sealed. The air is then exhausted with an air pump, with the result that in this vacuum the paint will preserve its pristine freshness, not only forever, unless the thing looks.

—New England's mackerel catch this season was 31,448 barrels, an increase of some 2,000 barrels over that of last year, 16,000 over that of the year before, and more than three times the catch of 1890. This does not indicate a steady growth in the industry, for the size of the catch fluctuates greatly. In 1888 it was over 40,000 barrels, and fell to between 16,000 and 17,000 the two succeeding seasons.

—It may not be known to a general reader that a rifle ball deflected from its course immediately assumes a line of flight after running the object it is unable to pass directly through. That is to say, a ball turned from its course by a rib passes under the skin until it reaches a point mathematically opposite to the point where it entered the soldier's body and then passes out, retaining its exact line of flight, if enough of its initial velocity remains.

—Goat raising is an important and growing industry in Oregon and some other northwestern states. One rancher in Benton county, Ore., has a fine herd of 450 goats, which includes a number of thoroughbred Angora bucks. Twenty-two cents a pound is the lowest this man has received for a fleece in a dozen years, while frequently he has received thirty to thirty-five cents a pound. The average yield from a goat is about four pounds, if it is to be of high grade goats. The goats are not only valuable for their fleeces, but in clearing off land, as they subsist largely on brush and weeds.

—In the ice age the thickness of the ice which covered northeastern Pennsylvania has been supposed to be great enough to rise twenty-two hundred feet above the sea level. Until a short time ago no signs of glacial action had been discovered at a loftier elevation than this, but Mr. John C. Branner has explored Elk Mountain, which is believed to be the highest point in northern Pennsylvania, and there he found scratches made by the ice at an altitude of about twenty-seven hundred feet. It is evident, therefore, that the glacial epoch must have been thicker than geologists have hitherto thought.

—The True Gentleman.

Show us a man who can quit the brilliant society of the young to listen to the kindly voice of age—who can hold cheerful conversation with one whom years has deprived of all charms; show us the man who is willing to help as if the blush of Helen mantled on his cheek; show us the man who would not sooner look rudely at the poor girl than at the well-dressed lady in the strata of fashionable life; show us the man who treats unprotected womanhood as he would the heifer, surrounded by the powerful protection of rank, riches and family; show us that he abhors the artificial libertine's insinuating blandishments or power of stealing the affections of innocence and purity to ruin the possessor of them—who shuns him as the blasphemer and traducer of his mother's sex—who seems as he would the coward, the ridiculer of a woman's reputation; show us the man who never forgets for an instant the delicacy and respect that is due to a woman, in any condition or class, and you show us a true gentleman.—Albany Press.

Ordered It Rare.

Waiter—Here you are, sir! porter-house steak rare—that was your order, I believe.

Guest—Hum! It isn't long since this beef was killed, is it?

"No, it's not, sir."

"No, can't be very long. I see it is still warm."—N. Y. Weekly.

Some Stuck Left.

"When I was in the country this summer," said Van Arndt, "I struck a storekeeper who was in pretty queer shape. He was out of every thing but—"

"Well, but what?"

"Debt."—Truth.

NUMBER 45

GRIN AND BEAR IT.

"To get a motto like a home,
Perhaps, in terms his soundings
But as from coal rare colors come,
Truth richly worth expounding
Lies in this sage—truth sublime—
And I would here declare it:
And if a bore you deem my rhyme,
Why, simply grin and bear it."

When cherished projects come to naught,
Or pain embitters pleasure;
When banks and bonds you deemest thought
Bring loss to hoarded treasure;
When friends forsake, and foes increase,
Put on, though hard to wear it,
A sunny smile of perfect peace—
"Twist just 'grin and bear it.'"

When woes come thick and still more thick,
Disasters gathering daily;
When hope deferred the heart makes sick,
While round you, festing daily,
The world knows not how sad your soul,
Dreams not what griefs do tear it,
Keep over self a calm control,
And bravely 'grin and bear it.'"

Ah, 'neath their homely words there lie
The tones of deepest meaning;
Whole tones of sound philosophy
Well worth most careful listening;
Yet not mere sages' lore, large—
Forever I forsake it—
Let earth's and heaven's best wisdom merge—
Trust God, then 'grin and bear it.'"
—Philip B. Strong, in Detroit Free Press.

FORGIVENESS.

In the house, a big hive of work people, situated in the Rue Delambre, where for six months Tony Robec had occupied a room, everyone thought that he was a widower. He could not have been a widower very long, for his little boy, Adrien, who lived with him and who was always well cared for, was not more than six years old. Yet neither of them were mourning.

Early every day Tony Robec, who was employed as a compositor in a printing house in the Quartier Latin, left his room with the child still half asleep on his shoulder. He left the little one at school and called for him again at night when returning from work. Then they went shopping together, after which they shut themselves up in their garret, and nothing more was seen of them until the following morning.

The kind-hearted gossips were full of pity for the poor fellow. He couldn't be more than forty and was still good looking, although sad and pale, and with silver streaks in his black beard. Behind his back they said: "That man ought to marry again."

They wished to make his acquaintance. Generally this is not difficult in such a house, where the tenants live with open doors. But Tony had a very reserved manner, and bowed so distant and coldly—although politely—to his neighbors when he met them on the stairs that they were afraid to approach him.

"No, ladies," said the doorkeeper, who was inclined to be sentimental, "that widower will never marry again, mark my words. The other Sunday I passed him in the cemetery at Montparnasse. His wife is doubtless buried there. It cut me to the heart to see the poor man with the motherless little chap at his side. He must have doted on his wife."

Certainly Tony had been very devoted to his wife and would not be consoled now that he had lost her—but he was not a widower.

His life had been simple, but by no means happy. Although a conscientious workman he was not particularly good at his trade, and therefore until he was thirty he had not succeeded in making a tolerably good living, and could not think of marrying. When he did resolve to marry he ought to have chosen a sensible, economical wife, who had known what he had. But love does not occupy itself with such trifles. Tony lost his head over a pretty, light-minded, light-hearted flower girl of nineteen, honest, doubtless, but frivolous, and thinking more of her toilet than of anything else under the sun. It must be admitted, however, that she could make a dress out of a few scraps of stuff.

He had saved a little money with which to start housekeeping. Among

other things he bought a big cupboard with a glass door in which his wife could admire herself the whole day. They were married and at first lived very happily. They had two modest rooms on the fifth floor of a house on the boulevard de Port Royal, with a little balcony from which they had a bird's-eye view of Paris. Every night on leaving work Tony Robec disengaged his workman's clothes under a smart overcoat and waited for his wife, who presently appeared from her little booth in the Rue Saint-Honore, and arm in arm they returned to their humble home.

At last a son was born and was put out to nurse. The parents went to see him once a fortnight. But at the end of a year the child died of convulsions. The parents were, however, soon afterward consoled by the birth of little Adrien. Having had such a sad experience, Clementine resolved to bring up the child herself, and gave up her little shop in order to be able to attend to her baby. She took in work, but did not make more than half of what she had previously earned. Nevertheless, she continued to dress well. In vain did Tony work desperately; the house-

hold became embarrassed and steeped in debt. When the child was weaned he was sent out during the day to a children's asylum, and the mother, often unoccupied, became tired of her inactivity. Just think of her poor husband, old before his time, worn out with working for and worrying about his giddy, pretty wife of twenty-three.

One evening when Tony entered the house with the child, whom he had picked up at the asylum as he had passed, he found an envelope on the mantelpiece, from which, when he opened it, fell Clementine's wedding ring. In the letter she bade good-by to her husband and child, and begged their forgiveness.

The faithful wife died in the beginning of May. At the end of July Tony sold the greater part of his furniture in order to pay his debts, and moved into the Rue Delambre.

Toward the end of September he received a letter from his wife, four incoherent and desperate pages, plentifully washed with tears—in which she announced that she had repented and implored pardon. This was all very painful for Tony, but he was proud, and the letter remained unanswered. He heard no more from Clementine. Christmas eve he went, as was his custom, to the cemetery at Montparnasse, there to place on the grave of his dead child a few frozen violets and roses. For the first time Tony went alone with the child, and, strange as it may seem, on entering the cemetery he suffered more poignantly than ever before the absence of that wife who had so cruelly deceived him. "Where is she now, and what is she doing?" thought he.

On arriving at the grave he started, for at the foot of it were strewn several little playthings such as the poor give to their children—trumpet, a jack-in-the-box and a whistle. They had evidently just been placed there, for they were quite new.

"Oh, what pretty playthings!" cried little Adrien, excitedly. But his father, having detected a scrap of paper pinned to one of the toys, opened it and read: "For Adrien, from his brother Felix, who is now with the child Christ."

Suddenly he found the boy pressing against him and murmuring: "Mamma." There, only a few paces away, under a clump of cypress trees, knelt the mother. She was clad in a wretched dress and a thin shawl. Her eyes were sunken and her cheeks hollow and pale. She was looking at her husband, and her clasped hands were stretched toward him in supplication. Tony pushed the boy gently toward her, saying: "Adrien, go and kiss your mother."

The poor creature strained the child convulsively to her breast and covered him with kisses. Then rising and turning toward her husband, but always with the air of a suppliant, she said: "How good of you!"

But he, already at her side, said harshly, almost harshly: "Don't talk. Take my arm."

It is not far from the cemetery to the Rue Delambre, and they walked quickly and without uttering a word. The child, engrossed in his newly-found treasure, trotted along at their side, thinking only of his toys.

When they reached the house the doorkeeper was standing on the steps. "Adrien," said Tony to her, "this is my wife. She has been six months in the country with her mother who was ill, and now she has come back to live with me."

When they reached the room Tony made his wife sit down in the only chair placed the way to her lap, and opened a drawer from which he took an old cardboard box. Out of this he took the wedding ring, which he pressed on his wife's finger. Then, without a word of reproach or bitterness about the sorrowful past, silently, gravely, with the overflowing generosity of a simple, childlike heart, he gently pressed his lips to her forehead as the seal of his forgiveness.—Translated for Romance.

She knows a lot. The really popular girl always knows a lot. She knows enough not to gossip about a people who have done her favors and who are in a way of doing her favors. She knows enough to dress appropriately at all times and never to be overdressed. She knows enough not to wear diamonds, discuss religion or politics, boast about her ancient lineage or tell long-winded tales. She knows enough to keep silence and she knows enough to dance, swim, row, sail a boat, play the piano and banjo, sing negro melodies and college songs. She knows enough not to "give away" all the funny confidences that the boys give her when in the blue or feeling particularly good, and she knows how much to show when they are stranded on an island, becalmed and without oars or a stick with which to pole home. She knows just how to entice a fish and then to cook it, and she knows enough not to grovel and whine and complain until they are a safely home.—Philadelphia Enquirer.

—For nearly twenty years Hannibal, antipathetic, defiant and capricious, cruel and cunning in a fiercer ring, he finally took it to avoid falling into the hands of the Romans.

LEAF FROM A TRAPPER'S LIFE.

Experiences of an Old Woodsman in the Maine Woods.

"There are times in the life of a Maine woods trapper," said Capt. Bajer, who is an old-time Maine woods trapper himself, "when he'd rather catch sight of his old log camp in the wilderness than run up against a gold mine, for the camp at such times can do for him what all the gold mines on the face of the earth couldn't do—save his life. If you had ever tried trapping in the Maine woods in the depth of winter you would know what I mean. For the sake of an illustration just imagine yourself trapping there, say along in the month of December. There is a foot of snow on the ground. It doesn't require much imagination to see a foot of snow on the ground in 'the Maine woods' in December. You might multiply it by three and get nearer the truth. You have two camps, and if they are fifteen miles apart it would be nothing unusual. Leading from one of these camps to the other you have two lines of traps, one to the right, over the hardwood mountains, where there is good ground for the sable and fisher, and the other to the left, up a brook and around a small pond, where the otter and beaver and muskrat work in their various ways, and then up another brook valley to the camp."

Early in the morning you take your ax and rifle, your bag of bait and lunch, and follow the mountain line of traps, while your partner takes the valley line, or vice versa, as the case may be, but the result will be the same. The expectation and calculation is that you are to meet each other at the camp before dark. You go up into the mountains. It begins to snow about five o'clock. Your partner has no difficulty in following the valley line for the creek shows the way, and he will get to camp before dark, cut the wood for the night, get it in, build a fire, and prepare for getting supper, expecting to hear you stamping in before long. But things go differently with you on the mountain line. There is now snow up there than in the valley. The traveling is hard. The traps need a good deal of setting over and fixing, for the wildcats have been busy along the line, robbing you of a sable here and a fisher there, which others wise would have been your well-earned trophy. Then a fisher, fast in a trap, has dragged it away into the woods, and it takes you a good while to find it. A light wind drives the fast-falling damp snow against the trunks of the trees, and it sticks there so that in a couple of hours or so you can't see the blaze marks on them until you have brushed off the snow.

"By and by you find a blazed tree, and then look ahead and try to make up your mind which is the next blazed tree. You pick out a tree that you think is the one and brush off the snow. No blaze there. Then you go on to another tree, perhaps off to the right, and brush again. No blaze. Some distance ahead of you to the left you see a blaze. That must be the next blazed tree, surely, you think. You scrape the snow off that tree. No blaze there. And then you go on, hunting here and there for the next blazed tree, until at last you find it, only to have to repeat the proceeding, perhaps, before you can find the next blazed tree. Then, on your course. All this takes much time and annihilates but little distance, and almost before you are aware of it darkness begins to fall around you. You have lost the line altogether now. You don't know whether it is to the right or to the left of you, but you do know that you are still a long way from camp. You have a compass, but as you don't know your course, it's of no use to you. "By this time you have begun to think that there is a good chance for your having to spend the night in the wilderness. You slip your hands into your pocket to make sure that your match box is all safe, and feel a little faint when you fail to find it. The likeliest explanation for its absence is that it slid out of your pocket while you were sleeping in your bunk last night. Never before have you realized the importance of always being sure that you have everything that can possibly be necessary on a tramp when you leave camp."

Your situation now can't be described as a pleasant one. The damp snow through the day, together with the perspiration due to your hard working, has wet your clothes through and through. By and by it stops snowing. The wind has shifted around into the north-west, and is blowing a gale. The snow comes piling down from the trees upon you, and it hurts, for it is frozen. The fast-falling clouds look white and fleecy, and you occasionally see a cold-looking star up through them. The mercury is liable to tumble down to twenty-five or thirty degrees below zero before morning. It is madness to think of lying out. You must get to camp or die.

"You are struggling on through the snow and night, fully conscious of the peril of your situation, when suddenly you hear the distant report of a rifle. No one who has ever been there knows how sweet the report of a rifle can sound to his ears when plunging aimlessly about in the darkness, lost in wintry woods, and what a change it can make in his feelings on the instant. If you ever want to hear music that is sweeter than the swell of the grandest organ; let the report of a rifle come to your ears under circumstances such as those. At first you find yourself rushing in the direction from which the sound came. Then you stop suddenly. The awful thought comes upon you that it was not a rifle shot you heard, that you only imagined it to be one; that your nerves are forsaking you; that you are losing your own senses under the strain. Then the thought comes to your mind that it is really only a moment. Then you hear the report again. This time you no longer doubt your ears or your senses. It is your partner, uneasy at your tardiness and fearing its cause, signaling in hope that you will hear. You answer with a shot and stride on for camp, knowing that you are saved. "By and by you come out in sight of the camp. Bright sparks are shooting

up in showers out of the smoke hole. It is but a rough rude log hut, but no illuminated palace of kings could awaken such joy within your breast as that same hut, with its blazing fire. The finest dinner that was ever spread could never taste as good as the meal of flapjacks, venison and black coffee that your partner has ready for you when you knock the snow off of you and go in. And no downy couch ever brought such rest to mortal man as that bed of spruce boughs on the cabin floor will by and by bring to you."—N. Y. Sun.

hold became embarrassed and steeped in debt. When the child was weaned he was sent out during the day to a children's asylum, and the mother, often unoccupied, became tired of her inactivity. Just think of her poor husband, old before his time, worn out with working for and worrying about his giddy, pretty wife of twenty-three.

One evening when Tony entered the house with the child, whom he had picked up at the asylum as he had passed, he found an envelope on the mantelpiece, from which, when he opened it, fell Clementine's wedding ring. In the letter she bade good-by to her husband and child, and begged their forgiveness.

The faithful wife died in the beginning of May. At the end of July Tony sold the greater part of his furniture in order to pay his debts, and moved into the Rue Delambre.

Toward the end of September he received a letter from his wife, four incoherent and desperate pages, plentifully washed with tears—in which she announced that she had repented and implored pardon. This was all very painful for Tony, but he was proud, and the letter remained unanswered. He heard no more from Clementine. Christmas eve he went, as was his custom, to the cemetery at Montparnasse, there to place on the grave of his dead child a few frozen violets and roses. For the first time Tony went alone with the child, and, strange as it may seem, on entering the cemetery he suffered more poignantly than ever before the absence of that wife who had so cruelly deceived him. "Where is she now, and what is she doing?" thought he.

On arriving at the grave he started, for at the foot of it were strewn several little playthings such as the poor give to their children—trumpet, a jack-in-the-box and a whistle. They had evidently just been placed there, for they were quite new.

"Oh, what pretty playthings!" cried little Adrien, excitedly. But his father, having detected a scrap of paper pinned to one of the toys, opened it and read: "For Adrien, from his brother Felix, who is now with the child Christ."

Suddenly he found the boy pressing against him and murmuring: "Mamma." There, only a few paces away, under a clump of cypress trees, knelt the mother. She was clad in a wretched dress and a thin shawl. Her eyes were sunken and her cheeks hollow and pale. She was looking at her husband, and her clasped hands were stretched toward him in supplication. Tony pushed the boy gently toward her, saying: "Adrien, go and kiss your mother."

The poor creature strained the child convulsively to her breast and covered him with kisses. Then rising and turning toward her husband, but always with the air of a suppliant, she said: "How good of you!"

But he, already at her side, said harshly, almost harshly: "Don't talk. Take my arm."

It is not far from the cemetery to the Rue Delambre, and they walked quickly and without uttering a word. The child, engrossed in his newly-found treasure, trotted along at their side, thinking only of his toys.

When they reached the house the doorkeeper was standing on the steps. "Adrien," said Tony to her, "this is my wife. She has been six months in the country with her mother who was ill, and now she has come back to live with me."

When they reached the room Tony made his wife sit down in the only chair placed the way to her lap, and opened a drawer from which he took an old cardboard box. Out of this he took the wedding ring, which he pressed on his wife's finger. Then, without a word of reproach or bitterness about the sorrowful past, silently, gravely, with the overflowing generosity of a simple, childlike heart, he gently pressed his lips to her forehead as the seal of his forgiveness.—Translated for Romance.

USE OF SWAMPS.

The Service Which These Much Abused Spots Have Done to Science.

It would perhaps be difficult to find anybody who would speak a good word for swamps. The man who drains one and turns its marshy surface into productive soil is universally regarded as a public benefactor. So the projected draining of some of the most remarkable of the Dismal swamps, of Virginia, and the Okafokow swamp, of Georgia, is regarded only with favor, and few could be found to regret the disappearance of those remarkable features of our American landscapes.

Yet, setting aside the strange picturesque quality of such marshy regions, and the curiosities of plant life which they exhibit, it is easy to show that swamps have been useful in a manner that could hardly have been anticipated. They have very effectively served the cause of science by preserving the remains of some of the most remarkable of the former inhabitants of the earth.

Here in America the skeletons of several mastodons have been found embedded in ancient swamps, and so perfectly preserved that no difficulty whatever has been encountered in re-erecting the bones to their normal position, setting the skeletons on their feet, and thus exhibiting to the eyes of modern men the monster animals which were probably familiar sights to our ancestors nobody knows just how many thousands of years ago.

In Ireland the ancient swamps were equally efficacious in preserving for us the gigantic eels which became mired in them.

Swamps have proved no less useful agents of science in other parts of the world, and particularly in Australia, New Zealand and Madagascar. What could be more interesting than the bones of a giant bird which was in all probability the roc described by Sindbad? Just such bones have been discovered in the swamps of Madagascar, and New Zealand, and there is plenty of evidence that the great birds which owned them were the contemporaries of men in the past history of those islands. But for the swamps we might have remained ignorant of the fact that birds with legs larger and heavier than those of the largest horse once flourished in the southern hemisphere.

Lately these Madagascar swamps have yielded other remains of extinct animals, hardly less interesting than the huge bird, the epiornis, itself. These are the skeletons of a creature resembling a bear of gigantic size, but remarkable for the small quantity of brains which it possessed. It is said that there is evidence that man was responsible for the destruction and disappearance of this creature. If so it was probably a simple case of brains against brute force.

There is reason for thinking that still other discoveries remain to be made in Madagascar, discoveries that will possibly bring to light even more interesting facts concerning the former inhabitants of that part of the world. Suppose one of our swamps, which we regard as utterly useless, should preserve to a remote future age the only remains of some animal like the bison or the tiger, now rapidly becoming extinct. The men of science then living would be very busy, not only in refuting that swamp had existed, but that we have for being thankful for the revelations contained in the swamps of ancient days.—Youth's Companion.

DIPLOMACY REWARDED.

The Clever Answer Made by the Empress Elizabeth's Maid.

The only trait of mine which I ever noticed in Empress Elizabeth of Austria, says a writer, was the pride she took in her magnificent chestnut hair, which fell behind her knees. She used to have it brushed several hours every day, while her reader read to her English, French, or Hungarian novels. Her majesty was particularly anxious that the dressers who brushed her long tresses should avoid pulling out a single hair. This, of course, was an impossible task, and the unfortunate maid concealed carefully in the pocket of her apron any hair which became entangled in the brush. "One day the empress, happening to glance into the looking glass, caught sight of the maid concealing a small roll of hair. Jumping up from her rocking chair, her majesty clutched her attendant by the wrist.

"I have caught you at last! You are ruining my hair!"

With a presence of mind which would have done honor to an expert diplomat, the maid replied, unhesitatingly: "I implore you, majesty, to forgive me! I only wished to have a few of my sovereign's hairs to put in the pocket which my little girl wears around her neck as a talisman."

Whether the empress believed or not this clever invention, I do not know, but shrugging her shapely shoulders she resumed her seat, laughing merrily, and the next day she presented to her maid a locket enriched with diamonds, saying, with a mischievous twinkle in her eyes: "I think this is the kind of talisman your little daughter deserves for having such a clever mother."—Harper's Magazine.

A Simple Beautifier.

A pretty little woman said with a sigh, as she laid down a list of anxieties for her maid to follow: "It is just enough to wear any one all out to follow half the directions written now to make you beautiful. I've tried them all. I've used vasoline and glycerine, acid, coconut oil and almond paste, rose water and lemon juice. I have bathed in boiling water and ice water, and in tepid water and milk and water. I have washed my face in a towel of the coarsest crash I could buy, and rubbed my very untidy hair in my struggles to follow out the directions, and I have washed it, as I would a bit of porcelain, with the softest, finest flannel I could buy. I think the worst of all was when I didn't wash it at all for a while, because some one

TEMPERANCE.

A WISE REGULATION.

Strong Propositions from an Advocate of Drink.

The Wine and Spirit Gazette, the city of New York, published in the city of New York, and devoted entirely to the subject embraced in its title—the traffic in intoxicating liquors. It is a bitter opponent of prohibition, of course. Nevertheless, the last issue contains the following editorial, under the heading "A Wise Regulation."

"The Phoenix Protective association of this city, which is a local branch of the organization of Surface Railroad Employees, has seen fit to denounce an order of the management of the roads, combined under the Broadway syndicate, forbidding its operatives to enter a saloon during working hours."

"The syndicate has a perfect right to make such an order, and the Protective association assumes an untenable position in opposing it. Employees sell their time to their employers. They need not sell it if they do not wish to do so, but having sold it, it becomes the employers' time, and their own no longer. Therefore the employer has a right to say where it shall and where it shall not be consumed. The time shall not be consumed in his service, not idled away in saloons or other places removed from his field of labor. That is the commercial proposition."

"But there is another and a stronger argument in this instance. Railroad employees are entrusted with the care of lives and property for which they are responsible. The responsibility is so great that it will admit of no unnecessary chance or risk. A man who drinks once will be befuddled the brain, rendering the man stupid and careless or reckless and daring. A man in such a condition is not fit to have the care of human lives or of property. Therefore the railroad company simply says its operatives shall not put themselves into such a condition, nor even take the first step towards it, while their time is at its disposal. At other times they are free to do as they please."

Everyone will agree to both the propositions laid down by the Wine and Spirit Gazette. The first is, as it correctly states it, the "commercial proposition." The employee sells his time to his employer, and the latter has the right to say where it shall be spent. The second, while strictly true in every word, is one which we must confess surprises us to find in the columns of a paper devoted to the liquor traffic. It says "a man who drinks once will be fatally true that is. Then, 'too brain' and a man who is befuddled is not fit to have the care of human lives or property."

Quite true. But the principle has a far wider application than merely to railway employees. Is a man whose brain is befuddled a proper person to stand behind an accountant's desk, for instance? Is he a proper person to work at a machine? If he be a stonecutter, for instance, is his work, while under the influence of liquor, of proper quality, or does he accomplish as much as though he were perfectly sober? And would not the same answer be given if he were a painter, a paper-hanger, a carpenter, a bricklayer, or employed in any other of a hundred occupations?

There is no reason the line should be drawn on railroad employees, and not on men employed in any other operation. No matter what may be the work, its quality suffers when the workman is a drinking man. If, perchance, it be work in the case of a section which is to be used in the construction of a bridge, the workman who is drunk is a danger to the work, and the bridge is a danger to the public. The drinker is not so good, nor so reliable, nor so profitable an employee as the non-drinker. While this may be considered as also a commercial reason, it is a potent one. When a liquor organ admits, as a mercantile proposition, that an employer has the right to require his men to abstain from visiting saloons or drinking during the hours of labor, it makes an admission which is a very strong one against the liquor habit; and when it goes further, and admits that an employer has the right to require men not to drink, because it destroys their sense of responsibility, it has given the opponents of the drink traffic a powerful weapon; for, if the traffic be abolished, men can not drink.—Toledo Blade.

ALCOHOL IN THE SYSTEM.

Strong Drink Productive of Intellectual Weakness.

The accustomed use of the use of alcohol causes, sooner or later, a feeling of need for it; alcoholism is not, therefore, an inborn instinctive need, but an acquired one. Experience teaches that the longer this vice exists in a nation the greater the vice becomes. Persons who misuse alcoholic drinks, especially whisky, often become sick and the sooner the moderate drinkers and the non-drinkers. When alcohol is taken habitually, and when misused, it injures the whole constitution; all tissues and organs, and especially the blood, suffer sooner or later a pathological change, with which susceptibility to disease is increased. Alcohol intoxication not only calls out diseases and disturbances that the non-drinker does not have, but it gives rise to a greater morbidity. It is an old experience that in epidemics of cholera, dysentery and small-pox drinkers are attacked in larger numbers and with greater intensity than non-drinkers. The bad constitution of the blood, the weak-

ness of the changed heart muscles, the smoken energy of the nervous functions, and the frequent accompanying disease of the brain, give a bad course to every disease and a high mortality. The close relation of alcoholism to insanity is shown by the statement of a specialist (Krafft-Ebing) that all forms of insanity, from melancholia to imbecility, are found in alcoholism. It is artificial; it begins with a slight mental excitement, thoughts flow freely, the quiet become loquacious, the modest bold; there is need of muscular action; the emotions are manifest in laughing, singing and dancing. Now the intellectual ideas and moral impulses are lost control of; the weak side of the individual is manifested, his secrets revealed; he is dogmatic, cruel, cynical, dangerous; he insists that he is not drunk, just as the insane insists on his sanity. Then his reason becomes weak, his consciousness dim, his senses arise, he stammers, staggers, and like a paralytic his movements are uncertain.

The principal character of these mental disturbances consists in a moral and intellectual weakness; ideas become lax as to honor and decorum. There is a disregard of the duties of family and citizenship. Irritability is a concomitant; the slightest thing causes suspicion and anger which is uncontrollable. There is a weakness of will to carry out good resolutions, and a consciousness of this leads some to request to be placed in an asylum, for they are morally certain in advance that they can not resist temptation. Thus one has been known to have his daughter carry his wages home as he could not pass a saloon on the way without going in if he had any money with him. Now it is a weakness of memory, a difficulty in the chain of thought and a weak perception until imbecility is reached.

There may be disturbances in brain circulation, causing restless sleep, anxious dreams, confusion, dizziness, headache. Such circulatory disturbances in the sense-organs can give rise to hallucinations. There is a trembling in hands, face, lips and tongue. In short, there is a gradual mental and bodily degeneration.

In the past wine was used almost wholly by the well-to-do classes, and beer was of such a nature that harm was out of the question. Excessive use of alcohol first began with the distillation of spirits, and the obtaining of strong concentrated whisky from corn, potatoes and the like. With the universalizing of the use of whisky, a series of phenomena have appeared which are designated by the word "alcoholism."

The climate is an important factor. Drunkenness is more frequent in cold than in warm countries, and is more brutal and injurious in its effects as we go north. Yet this is not always true, for within the last ten years alcoholism has greatly decreased in Sweden, and increased in southern France and northern Italy. In tropical regions it is at present spreading fast, and with great injury.—Washington Star.

From Father to Son.

"I have drunk whisky every day for thirty-five years," remarked a gentleman of sixty, rather proudly, "and I don't see but I have as good a constitution as the average man of my age. I can stand behind an accountant's desk, for instance, and would not the same answer be given if he were a painter, a paper-hanger, a carpenter, a bricklayer, or employed in any other of a hundred occupations?"

There is no reason the line should be drawn on railroad employees, and not on men employed in any other operation. No matter what may be the work, its quality suffers when the workman is a drinking man. If, perchance, it be work in the case of a section which is to be used in the construction of a bridge, the workman who is drunk is a danger to the work, and the bridge is a danger to the public. The drinker is not so good, nor so reliable, nor so profitable an employee as the non-drinker. While this may be considered as also a commercial reason, it is a potent one. When a liquor organ admits, as a mercantile proposition, that an employer has the right to require his men to abstain from visiting saloons or drinking during the hours of labor, it makes an admission which is a very strong one against the liquor habit; and when it goes further, and admits that an employer has the right to require men not to drink, because it destroys their sense of responsibility, it has given the opponents of the drink traffic a powerful weapon; for, if the traffic be abolished, men can not drink.—Toledo Blade.

TEMPERANCE TIDINGS.

The man who has temperance principles should not keep them in the dark. The census bureau figures show that in 257 American cities there are 15,316,167 people, and 61,339 saloons; an average of one saloon for every 60 families.

T. D. CROFTES, M. D., an American authority on the subject, states that alcoholism is on the decrease among women in this country.

DR. ANDREW CLARK says: "Good health will, in my opinion, always be injured by even small doses of alcohol. The bloom of life and the perfection and loveliness of health, both mental and moral."

DR. LAURENT, in his valuable work on the habits of the Paris prisoners, asserts that drunkenness alone, or combined with some other noxious condition, is to be found almost constantly in the parents of criminals.

A KAFFIR maiden when visiting England was asked what she most wanted for her own country. She replied: "Let us be treated at home as here, not as cattle, but as human. Let us have schools where we can be taught useful arts. Let us have free education and take away the drink."

It is said that two wage earners of the United States annually pay \$600,000,000 for liquor—a sum so large that if it were saved for a few years, and properly invested, a fund would be created that, under wise management, would render destitution among the poor of this country forever impossible.

"PUDD'NHEAD WILSON."

How a Queer Genius Came in the End by That Name.

He was a homely, freckled, sandy-haired young fellow, with an intelligent blue eye that had frankness and comradeship in it, and a covert twinkle of a pleasant sort. But for an unfortunate remark of his, he would doubt have entered at once upon a career of success in Dawson's Land. But he made his fatal remark the day he spent in the village, an "aged" him. He had just made acquaintance of a group of city when an invisible dog began to bark and snarl and howl, and make him very comprehensively disagreeable, whereupon young Wilson said, with as one who is thinking aloud:

"I wish I owned half of that dog. 'Why?' somebody asked. 'Because I would kill my half.' The group searched his face with curiosity, with anxiety even, but found no light there, no expression that they could read. They felt away from him as from something unclean, and went into privacy to discuss him. One said:

"Pears to be a fool."

"Pears," said another, "to reckon you better say."

"Said he wished he owned half of that dog, the idiot," said a third. "He did reckon would become of the other half if he killed his half and another person owned the other end, he would have wanted to own the whole dog, knowing that if he killed his half and the other half died, he would be responsible for that half just the same as if he had killed that half instead of his own. Don't look that way to you, gentles?"

"Yes, it does, if he owned one-half of the general dog, it would be so; if he owned one end of the dog and another person owned the other end, it would be so, just the same; particularly in the first case, because if you kill one-half of a general dog there ain't any man that can tell whose half it was, but if he owned one end of the dog, maybe he could kill his end of it and—"

"No, he couldn't either; he couldn't and not be responsible if the other end died, which it would. In my opinion the man ain't in his right mind."

"In my opinion he ain't got any mind."

No. 3 said: "Well, he's a lunatic, anyway."

"That's what he is," said No. 4; "he's a lunatic—just a Simou-pure lunatic, if ever there was one."

"Yes, sir, he's a dam fool, that's the way I put him up," said No. 5. "Anybody can think different that wants to, but those are my sentiments."

"I'm with you, gentlemen," said No. 6. "Perfect jackass—yes, and it ain't going too far to say he's a pudd'nhead. If he ain't a pudd'nhead, I ain't no judge, that's all."

Mr. Wilson stood elected. The incident was told all over the town, and gravely discussed by everybody. Within a week he had lost his first name; Pudd'nhead took its place. In time he came to be called, and well liked, too, but by that time the nickname had got well stuck on, and it stayed. That first day's verdict made him a fool, or even modified. The nickname soon ceased to carry any harsh or unfriendly feeling with it, but it held its place and was to continue to hold its place for twenty long years.—Mark Twain, in Century.

A GREAT DIFFERENCE.

Little or No Similarity Between Night Hawks and Whippoorwills.

I'm comparing a night hawk with a whippoorwill we find that, apart from the very well defined difference these birds exhibit in their internal structure, and in the general tone and markings of their plumage, there are a few external striking features that ought to enable any person to distinguish one from the other at the most casual glance.

I refer especially to the long, conspicuous bristles projecting from about the mouth of the whippoorwill, which are entirely absent in the night hawk. Further, the tail of the former is very much rounded, with four middle feathers like those of the hawk, the three outer ones, on either side, having their terminal feathers white. In the night hawk the last mentioned feathers are black, and the form of the tail is very different. Our night hawk also has a distinctive white patch on the outer aspect of each wing, which is not present in the whippoorwill. Again, the habits of these two birds are by no means similar. The whippoorwill, with rare exception, is active and feeding from dark until daylight, and sleeps on the ground in the forest all day, the very reverse of this being the case with the night hawk. In some respects the latter is known by the name of the "hull bat," the first word undoubtedly having reference to the booming noise it emits during its plunging freaks through the air, in which it indulges while out abroad for food. Audubon and Wilson disagreed on the score as to how this noise was produced by the bird, the former claiming that it was performed by the wings, and the latter that it was "doubtless produced by the sudden expansion of his capacious mouth." I am inclined to the opinion of Audubon in this matter.—Dr. R. W. Shufeldt, in Popular Science.

A Big Pay Roll.

The civil list or salary of King Humbert of Italy is the largest of all those paid by European nations to their respective sovereigns. This is so much more remarkable, because Italian finances are at the lowest ebb. Humbert's civil list is fixed annually at 14,500,000 francs, nearly \$3,000,000. The European sovereigns who receive the highest pay below that of Humbert are Emperor William of Germany, with a civil list of 12,000,000 francs, and Queen Victoria, with about 9,000,000.—N. Y. Sun.

His Idea of Justice.

Dr. Francis Parkman, the late historian, had a strict idea of justice. A friend met him one day walking along the street leading a street boy with either hand.

"What in the world are you doing, Parkman?" asked the friend. "I found," said Johnnie here had eaten all of the 54 instead of dividing with his little brother. I am going to buy another for a younger boy and make Johnnie eat him while he eats it."

How He Rose.

He made a great name for himself, but two another's name, you see, and so the jury sent him up for seven years for forgery.—Chicago Tribune.

A HEARTLESS MOTHER-IN-LAW.

Mrs. Van Million—But, Mr. Marigold, if you marry my daughter how do you and she expect to live without money?

Jack Marigold—Do you mean to say that you would allow your son-in-law to starve?—Frank Leslie's Weekly.

The Boy Knew the Men.

"Johnny," said his teacher, "if your father can do a piece of work in seven days, and your Uncle George can do it to nine days, how long would it take both of them to do it?"

"They'd never get it done," said Johnny; "they'd sit down and tell fish-stories."—Demorest's Magazine.

An Estimate.

Suitor—My man, have you any idea how your young mistress regards me in comparison with the others who seek her hand?

Manservant—When I told her you were here she said O, yes, she was prepared for the worst.—Detroit Tribune.

A Hopeful Sign.

Music Teacher—From your daughter's voice, madam, I cannot promise that she will be a great prima donna.

Mme. Gammes—Oh, I am so sorry. Music Teacher—But do not despair, madame, I observe that she has a fearful temper.—Chicago Record.

Correcting Him.

"Do you know that my gas bill is one of my heaviest expenses," said the man who complains, at the gas office.

"Excuse me, sir," said the clerk in a tone that left no room for further discussion, "it is necessarily a light expense."—Washington Star.

PROOF POSITIVE.

His Honor—What's the charge, officer, drunk?

Officer McQuirk—No, sir; crazy. His Honor—How do you know?

Officer McQuirk—Well, sir, he is proprietor of a daily paper, and I heard him tell a man that the paper probably had the smallest circulation in the city, and so—

His Honor—The padded cell, quick!—Life.

A Sure Thing.

Overgrown Colored Boy—Say, boss, don't you wantter boy for to learn to be a jock?

Horse Owner—By the time you've learned to ride you'll be too heavy. Boy—Den you kin bet on de odder hoss, an' you'll have a shuah thing, boss.—Good News.

Honoring-Like.

Chacepaté—Where do the joke writers get all their jokes? Spacetrav—They get most of them back from the papers they send them to.—Town Topics.

What It Was.

"I understand that your editor had a fine time in Chicago."

"What was it?"

"Same as a plain drunk anywhere—five and costs."—Atlanta Constitution.

There Are Many Instances.

"O, is there nothing," exclaimed the lady in the fur jacket, "that can uplift our servant girls?"

"The coal oil can," answered the lady in the yellow buskin.—Chicago Tribune.

Vile Slender.

"I don't believe those yarns about Flinders striking his wife, do you?"

"Not a bit. He hasn't courage enough even to strike an attitude."—Brooklyn Life.

Repertee.

Boothblack—Shine! Tipple (roughly)—Don't need it. Boothblack—I wasn't agoin' t' shine yer nose!—Puck.

Approps.

"Why do you call your father-in-law 'Tence,' Markham?"

"Because he gave consent."—Truth.

How He Knew.

Johnny—When Mr. Hankinson comes this evening—

Willie—Mr. Hankinson ain't comin' this evening. This is Mr. Ferguson's evening.

Johnny—I'll bet you my watch against your gun.

Willie (after a severe struggle with his conscience)—No, I won't take it. It's wrong to bet when you've got a sure thing. I know it's Mr. Ferguson's night, 'cause I saw Laura in the parlor a little while ago turning the clock back two hours.—Chicago Tribune.

The Scheme Will Work.

They were taking inventory in the men's furnishing goods store.

"Here," said the new clerk, "is a necktie that I've been unable to work off on any man. The pattern really is outrageous. What shall I do with it—throw it away?"

"No," replied the old and wily haberdasher, "some woman will come in here some day to buy a necktie for her husband, and we'll work it off at a fancy price."—Buffalo Express.

Didn't Know It All.

Old Gentleman—And how do you like the drug business, my son?

Boy—First rate, so far. The boss gave me a little prescription to put up yesterday—some kind of saive that was easy to make.

"That's encouraging."

"Yes, I've learned a lot since I've been there, but I ain't got so I can correct the doctor's mistakes yet."—Good News.

An Incentive to Extravagance.

"Why did Roller lose all his money?"

"You see his wife gave him a diamond scarfpin on his birthday, and he's been trying to live up to it."—Chicago Record.

NO PROSPECT.

Nurse—Now, Mamie, how would you like to have a brother?

Little Mamie (gloomily)—Who's going to propose to me, I'd like to know?—Truth.

No Trouble.

Carruthers—I hear you are engaged to one of the Rathburne twins. How do you distinguish her from her sister?

Waite—Oh, prior to the wedding I haven't regarded it as material, and when the time comes I presume she will know the difference.—Truth.

A Friendly Tip.

Mistress—I don't want you to have so much company. You have more callers in a day than I have in a week.

Domestic—Well, mum, perhaps, if you'd try to be a little more agreeable you'd have as many friends as I have.—N. Y. Weekly.

The Dear Girls.

Molly (patronizingly)—I had such a splendid time at the dance last night. Mr. Hylly took me, you know.

Etta (sweetly)—You enjoyed it? How glad I am, dearie, that I refused to go with him.—Chicago Record.

A Limit.

Mr. Lanks (to the new boarder)—Please help me to another portion of the wild duck, Mrs. Flint.

Mrs. Flint (the landlady)—I am sorry, Mr. Lanks, but there is a limit to this little game.—Brooklyn Life.

He Thought Not.

Office Boy—There's a stranger at the door.

Editor—Does he want to pay his subscription?

"I suppose not. He says he's anxious to see you."—Life.

STAYING HIM OFF.

Miss Pinkerly—I hope you will see me in a new gown when you call again.

Young Tutter—When do you expect to get it, Miss Clara?

Miss Pinkerly—Oh, not for several weeks!—Puck.

An Amazing Coincidence.

"Isn't it singular," said Cholly Van Vuyster to the other men in the club window, "isn't it singular, when you think of it, don't you know, that our great independence day, the Fourth of July, don't you know, should always fall right on July 4?"—Chicago Record.

Mutual Surprise.

Mrs. Ritchley Horne—Do you know, dear, I have always wondered why you never married.

Miss Highly Freddie—And I, love, how in the world you ever did.—Brooklyn Life.

FARM AND GARDEN.

NOTES FOR BEEKEEPERS.

QUEENLESS bees nearly always build drone combs that are not fit to use. ONLY good queens should go into winter quarters.

ITALIAN bees were first imported in this country in 1859.

Don't let the bees either starve or freeze to death this winter.

Stomachs gathered from decaying fruit in a dry season are unhealthy.

If honey is overheat the color and transparency will be affected.

MOVING bees, even a short distance, invariably results in the loss of some.

In the majority of cases unhealthy stores are the cause of the loss of bees.

DURING the winter prepare for the spring by making and mending the hives.

Most beekeepers prefer the Italian to the black bees, as they are more gentle to handle.

In moving bees in freezing weather care must be observed, as the comb becomes very brittle.

WHEN bees are to be wintered on summer stands they ought to be packed and fixed up early.

It is said that a bee-keeper at Reno, Nev., recently shipped 50,000 pounds of honey to St. Louis.

This is the time to plan all the changes and improvements to be made in the apiary next spring.

The honey of Central and South America remains liquid longer, as a rule, than that of North America.

A variety of the bees that winter well are kept in a temperature of 45 to 50 degrees, with some ventilation.

In some states efforts have been made to prohibit spraying at certain seasons on account of the liability of the bees dying from poison.

SPRING dwindling is often caused by having too many bees to start in the winter on. They die before spring and leave the colony weakened in numbers.

The sting of the bee is more painful while working on buckwheat. This fact is attributed either to a more powerful secretion of formic acid or because it is secreted in increased quantities.

FAULT is found abroad with eucalyptus honey, the strong flavor of which does not please the English taste. The Australians are likely to be disappointed in the market they had hoped for.

EXPERIMENTS made to determine the comparative value of comb foundation, drawn comb and "starters" brought out the fact that those swarms hived on foundation, as a rule, stored the most surplus; next came those hived on comb, and then those on "starters."—N. Y. World.

FEEDING FOR EGGS.

Nourishing Rations Especially Adapted for Laying Hens.

Cooked feed for the morning meal is excellent if composed of the proper ingredients and fed regularly.

A good mixture may be made of equal parts of cornmeal, fine middlings, bran, ground oats and ground meat. This should be stirred into a pot of cooked vegetables while boiling hot until the mass is as stiff as can be manipulated by a pair of strong arms.

Potatoes, beets, carrots, turnips, onions or anything in the vegetable line, clean and free from decay, will be acceptable. Cut clover hay may be substituted for vegetables for an occasional meal.

The above contains a variety of food elements and such as advise putting a little dry meal in a hopper for them to peck at until their breakfast is ready.

We have given substantially the same advice before, but do so again in answer to repeated inquiries for a ration especially adapted to laying hens.—Farm Journal.

WINTER POULTRY HOUSE.

One That Affords Plenty of Outside Shelter from Storms.

An outside shelter and protection from storms is of great assistance to a flock in winter. Fowls desire close confinement and prefer to be in the open air. The illustration shows an ordinary poultry-house, ten feet square, suitable for a flock of a dozen hens. The house has a large window

in front and a small one on each side, which makes it very light. An opening for egress or ingress is at the front, the door being shown at the side. The house is eight feet high in front and five feet at the rear and faces the south. By the use of two short posts and some light scantling a covered shed, to be made of muslin, may be arranged in front. The muslin may be painted with linseed oil to make it water proof, if preferred, the lower or open space may also be inclosed by fastening a strip of muslin, one yard wide, from the side of the house, around the posts to the other side, as a wind-break. With this contrivance the hens will have plenty of light and warmth, the cost being but a trifle, and as the hens will be more comfortable they will also produce a larger number of eggs.—Farm and Fireside.

FOR YOUNG PEOPLE.

A BRAVE BOY.

There was a little boy,
With the cognomen of Roy,
Who said one day: "I guess I'll learn to skate,
skate, skate."
But though striking out with care
His feet flew in the air,
And he landed on his curly little pate,
pate, pate.

"Never mind," he bravely said,
"I have a splendid sled—
Tobogganing down the hillside I will go,
go!"

Perhaps he couldn't steer—
But why he is not quite clear—
But they dug him out of seven feet of snow,
snow, snow.

"Oh! never mind," said he,
"My roller skates I see,
And swiftly on the pavement I will roll,
roll, roll!"

But prone upon the ground,
Star-gazing, he was found,
With a bruised and sorely aching little poll,
poll, poll.

Still he said: "Oh! never mind,
My cycle I will find,
Through Central park my wheel will glide
along, long, long."

He merely rubbed his knees,
As brave as brave can be,
When a "header" threw him in the crowd
through, through, through.

But invariably a plunger,
Escaping soap and sponge,
When Nurse his grimy hands and face would
have, have, have!

From lungs both deep and strong
Came forth both long and long,
And all his efforts he doth brave, brave,
brave.

—Human, Sedgwick, In Our Little Men and Women.

FOR THE BOYS.

Two Experiments Combining Science and
Take a small piece of colored woolen
stuff and fasten on one end of it a
glass tube or a long nail, the weight of
which will keep it well stretched.
Trace on the material the letters of
any word, using a glass pen which has

been dipped in a strong acid. Have
ready in a glass a solution of chlorate
of potassium. The letters traced on
the cloth are invisible, but on plunging
the latter into the glass they immedi-
ately turn white, the material retain-
ing its color. In our illustration the
experiment is shown at the point
of plunging the stuff into the glass,
when the word "science" appears in
white letters. Care must be taken to
withdraw the material as soon as pos-
sible, or it, too, will suffer discolora-
tion and spoil the experiment.

THE CAPTIVE CONK.
Procure a good-sized bottle with a
wide mouth and an ordinary cork stop-
per; also a piece of wire and another
piece of cork, flat and round, such as
usually found in a mustard jar; with
these materials you may make an ap-
paratus that will present a very inter-
esting trick.

Insert the wire in the under side of
the cork stopper exactly in its center.

the other end of the wire, when the
bottle is corked, should be at some
distance from the bottom of the bottle.
Next pierce the second piece of cork
with a circular hole exactly in its cen-
ter, half full of the bottle with water,
then drop into it the perforated cork,
and, while it is floating, pass the wire
through the hole in its center and push
down the stopper; you will then have
the apparatus shown in the right-hand
figure of our illustration. The
trick consists in removing the captive
cork without removing the stopper.
This can be done by turning the bottle
round quickly in a circular movement
several times in succession; then set it
on the table and the cork will be re-
leased. The quick circular movement
will draw the water from the center to
the sides of the bottle, leaving a con-
cave depression in the center. The
water that has supported the cork
being thus withdrawn, the cork will
drop down off the wire as in the left-
hand figure of the illustration.—Once a
Week.

BILLY AND THE BOY.
The Story of a Horse Who Could Take
Care of Himself.

Billy was a veteran among horses,
He had lived twenty-nine years and
six months when I knew him, and all
that time he had been learning how to
take care of himself without troubling
others to look after him. His reputa-
tion had never been good, though the
older he grew the worse he grew, re-
sulting in his master's statement. For
my part I always thought the horse
was justified in his treatment of those
who ill-treated him.

Perhaps if he had been better tem-
pered he might have been turned out
to grass in his old age and had little or
nothing to do. As it was no one was
fond of him, and since he was able to
draw moderately heavy loads he was
harnessed regularly and made to work.
He had been known to bite, to kick,
to run away, though no one believed that
he had really been frightened.

"It is just ugliness, wanting to show
what he could do to be hateful," said

his master, one day, when the hired
man came home with the news that
Billy had shied at a bicycle, had
run into a wagon and broken it and
the one to which he was harnessed into
"allvers," as the man expressed it.

This "fright," if it really was one,
cost his master fifty dollars, and Billy
forthwith had blinders put on him. He
never shied again, but the blinders did
not improve his temper.

One day when he was just about
finishing a meal which he was taking
out of a pile set in front of him on the
ground, a small boy came past with a
long wisp of straw in his hand. He

did not know him, but he knew small
boys when he saw them, and had no
love for any of them.

The boy, named Billy, kept on
eating. The boy went nearer and
nearer the curb and at last reached
over and tickled Billy's nose with the
straw.

Billy made believe at first that he
did not feel it, and the boy became
bolder and bolder and tickled harder.
Billy finished eating, and then had
time to attend to him. Suddenly he
tossed his head, caught the boy by the
back of his jacket, lifted him off his
feet and marched down the street
with him. The boy screamed, but no
one was near enough to seize him.

They did not go far, and before any
one interfered Billy stopped and shook
that boy exactly as a man might have
shaken him for punishment, then
dropped him, turned and walked back
home.

No small boy dared to meddle with
Billy after that, and although the lad
was not hurt, he had one of the worst
scars of his life.—Louisville Courier-Journal.

SAVED BY A BUFFALO.
How a Pugnacious Bull Put a Savage
To Rest.

The forest land of southern India
possesses a breed of buffaloes vastly
superior to the bare-skinned, ungainly
creatures common to the plains of In-
dia. They are shaggy-haired, massive
and short-jointed, with short, thick,
symmetrically-curved horns. They are
trained as beasts of burden and pos-
sess immense strength. A bull of this
breed is a match for a tiger.

A herd of buffaloes was grazing on
the outskirts of the forest at Noonah,
with the herder on guard a short dis-
tance away. A tiger came out of the
forest and tried by roaring to stampede
the herd.

The herdsman manifested great
bravery. He shouted, beat his heavy
quarter-staff on the ground, and tried
to scare the brute off, not thinking of
his own danger, but of that of his herd.
Suddenly the tiger rushed forward,
sprung upon the man, knocked him
down and stood over him growling.

The bull of the herd, a pugnacious
creature, now charged savagely upon
the tiger, and rolled him over and over.
The bull was so quick in his motions
that the tiger, taken unawares, was at
a disadvantage. He neither bit nor
scratched the bull, but gathered him-
self up and galloped off into the forest.
The bull shook himself, belched, pur-
sued his enemy a few yards and then
sued his quarry to feeding as if vanquish-
ing a tiger were an everyday occur-
rence.

The herdsman was not injured by the
tiger, but received a wound in the leg
from the bull's sharp horn, inflicted
when the bull knocked over the tiger.

FIRESIDE FRAGMENTS.

—A freshly cooked steak for breake-
fast smothered in finely minced tur-
key or chicken, is particularly good
and appetizing.—Field and Farm.

—Broiled oysters.—Select large plump
oysters; wipe dry; season with salt and
a sprinkle of cayenne; lay on a very
hot gridiron; let brown first on one
side, and then on the other. Take up
on a heated dish, and pour over melted
butter.—Harper's Bazar.

—Veal Cutlets.—Salt and pepper both
sides of the cutlets and spread a little
melted butter on both sides also. Put
on a hot greased and grilliron and broil.
Turn three or four times, and when
done serve with a maitre d'hotel sauce.
—Boston Budget.

—Apple snow is as good as it is
handsome. Steam three large tart ap-
ples and wash through a colander.
Beat the whites of three eggs to a very
stiff froth. Add half a cup of powdered
sugar by degrees, and beat again. Add
the apple and beat until like snow.
Pile lightly in a glass dish, and garnish
with holly leaves. Serve with
boiled custard made with the yolks of
the three eggs.—Home Queen.

—Ring Jumbles.—One pound of but-
ter, one pound of sugar, four eggs, one
pound of flour or enough to make soft
dough, three teaspoonsful of extract of
rose. Mix all together, adding a few
well beaten whites of eggs. Mix thor-
oughly with buttered paper. Bake in
shallow tins with buttered paper. Bake
quickly and sift fine sugar over them
as soon as you take them from the oven.
With a teaspoon form rings of the
dough.—Farm, Field and Forest.

—German Bread.—In the evening set
out a couple of loaves of bread, and
roll out in pieces the size of a saucer.
Place a tablespoonful of the mixture
in the center, lay over one side and
pinch the ends together. Place this
side down on a baking pan, cut three
small slits in the top and bake twenty
minutes. Sprinkle sugar over the top
before baking.—Housekeeper.

—English Calves.—For filling, which
is made first, take one cupful each of
butter, currants and jelly, one-half
cupful of chopped citron, the grated
rind of one orange, one cupful of
chopped figs and one small tablespoon-
ful each of cloves, nutmeg and cinna-
mon. Mix together and keep for use.

To use, make a rich puff paste, and
roll out in pieces the size of a saucer.
Place a tablespoonful of the mixture
in the center, lay over one side and
pinch the ends together. Place this
side down on a baking pan, cut three
small slits in the top and bake twenty
minutes. Sprinkle sugar over the top
before baking.—Housekeeper.

—Dainty Bedsprings.—The best material for
embroidering Art.

Among the revivals of antique fash-
ions, the old-time coverlet, wrought in
cotton, with a tracery of fine em-
broidery or a printed pattern, is one of
the most attractive. Fashionable pat-
terns are imported special pat-
terns in delicate silks, which are suitable
for the bedspread and bolster cover.

The most beautiful bedsprings, how-
ever, are those embroidered by the
patient fingers of the artistic needle-
woman.

While it takes some time to work
one of these coverlets, the time will only
count if the work is done at odd min-
utes, picked up at times when the
fingers might otherwise be idle. Ger-
man women accomplish an immense
amount of needlework in this way.

For drawing, the needle always of hand,
and picking it up at odd minutes while
they are waiting for the fire to come up
or the kettle to boil.

The best material for embroidering a
counterpane is Bolton sheeting, which
comes in cert in a twenty-five cents
about one-dollar and a half yard at
a yard. There is also a pretty repped
cloth of the same width which is used
by artistic needle-women for counter-
panes as well as for hangings. The
best patterns for this purpose are all-
over design, conventionalized leaves
and flowers, and dainty blinets for a blue
room. Again, the design, instead of
flowers, may represent an arabesque of
either pink, blue or yellow, to corre-
spond with the room. Like the hand-
somest coverlets of the day, these
counterpanes are not intended to be
tacked in, but are finished with a wide
border of knotted fringe or of some
rich linen lace, like Russian or Mal-
tese, which hangs over the edge of the
bedstead in something of the effect of
the old-time valance.—N. Y. Tribune.

How He Worked It.
Bass—That was a cute idea of Sel-
am's.

Cass—What was that?
"He had a big lot of sofa cushions on
hand, and they didn't sell worth a cent.
He tried all sorts of ways to work them
off. Finally, he told his wife in strict-
est confidence, and made her swear
never to tell a soul, that he had a few

than any ever before sold in the city.
He said he wanted to keep the thing
secret to avoid a rush."

"Well?"
"His store was packed with women
for two weeks and he sold his cushions
and twice as many more.—Last
Transcript.

Very Likely.
"I should like to have a chance to
frit him."
"I know you would. You'd accept
him."—Life.

Marched Down the Street with Him.

SAVED BY A BUFFALO.
How a Pugnacious Bull Put a Savage
To Rest.

The forest land of southern India
possesses a breed of buffaloes vastly
superior to the bare-skinned, ungainly
creatures common to the plains of In-
dia. They are shaggy-haired, massive
and short-jointed, with short, thick,
symmetrically-curved horns. They are
trained as beasts of burden and pos-
sess immense strength. A bull of this
breed is a match for a tiger.

A herd of buffaloes was grazing on
the outskirts of the forest at Noonah,
with the herder on guard a short dis-
tance away. A tiger came out of the
forest and tried by roaring to stampede
the herd.

The herdsman manifested great
bravery. He shouted, beat his heavy
quarter-staff on the ground, and tried
to scare the brute off, not thinking of
his own danger, but of that of his herd.
Suddenly the tiger rushed forward,
sprung upon the man, knocked him
down and stood over him growling.

The bull of the herd, a pugnacious
creature, now charged savagely upon
the tiger, and rolled him over and over.
The bull was so quick in his motions
that the tiger, taken unawares, was at
a disadvantage. He neither bit nor
scratched the bull, but gathered him-
self up and galloped off into the forest.
The bull shook himself, belched, pur-
sued his enemy a few yards and then
sued his quarry to feeding as if vanquish-
ing a tiger were an everyday occur-
rence.

The herdsman was not injured by the
tiger, but received a wound in the leg
from the bull's sharp horn, inflicted
when the bull knocked over the tiger.

Once a Slave of Henry Clay.
A colored woman who was once a slave
of Henry Clay died at Springfield, Ill.,
recently, at the advanced age of 107
years. Her name was Maria Todd. She
was born in Kentucky March 24, 1786,
and was a slave until Lincoln's procla-
mation made her free. At an early age
she was sold to Henry Clay, then a
practicing lawyer near her birthplace.
Her master was indebted to Clay for
seven hundred dollars, and Maria was
transferred to him to liquidate the
debt. When she was nine years of age
Mr. Clay sold her to Paul Christian,
of Randolph county, Missouri. She
passed into his hands and remained
a property until her race was freed.
The oldest of her living children, Lu-
cinda Perkins, now living somewhere
in Missouri, is 78 years of age.

As Good as a Dog.
In South America, a boy who wants
to own a pet animal gets a monkey in-
stead of a dog. Sometimes he can buy
a monkey already trained, and if he
can do so he is a very happy boy, be-
cause wild monkeys are ugly little fel-
lows and it takes a long time to teach
them how to live with civilized people.

A South American boy has to pet a
monkey because there are not enough
dogs in South America. But with the
South American boy a nice tame mon-
key with soft fur hair and snapping
black eyes is very highly prized, and
he becomes attached to it, just as an
American boy becomes attached to his
collie or his Newfoundland; so he does
not feel the need of a good dog.

Very Likely.
"I should like to have a chance to
frit him."
"I know you would. You'd accept
him."—Life.

Marched Down the Street with Him.
did not know him, but he knew small
boys when he saw them, and had no
love for any of them.

The boy, named Billy, kept on
eating. The boy went nearer and
nearer the curb and at last reached
over and tickled Billy's nose with the
straw.

Billy made believe at first that he
did not feel it, and the boy became
bolder and bolder and tickled harder.
Billy finished eating, and then had
time to attend to him. Suddenly he
tossed his head, caught the boy by the
back of his jacket, lifted him off his
feet and marched down the street
with him. The boy screamed, but no
one was near enough to seize him.

They did not go far, and before any
one interfered Billy stopped and shook
that boy exactly as a man might have
shaken him for punishment, then
dropped him, turned and walked back
home.

No small boy dared to meddle with
Billy after that, and although the lad
was not hurt, he had one of the worst
scars of his life.—Louisville Courier-Journal.

SAVED BY A BUFFALO.
How a Pugnacious Bull Put a Savage
To Rest.

The forest land of southern India
possesses a breed of buffaloes vastly
superior to the bare-skinned, ungainly
creatures common to the plains of In-
dia. They are shaggy-haired, massive
and short-jointed, with short, thick,
symmetrically-curved horns. They are

CHEATING THE GODS.

The Chinese Are Not Slow When It Comes
to Getting a Fake-Off.

A correspondent of the North China
Herald, writing from the interior of
Szechwan province, mentions that one
of the industries there is the manufac-
ture of muck money for offering to the
dead. Formerly the Chinese burnt
silk paper money, but in these days
of enlightenment and foreign inter-
course the natives of Szechwan, Hang-
chow and other places have come to
the conclusion that dollars are more
handy to the ghosts than clumsy paper
money; hence they now, to a great ex-
tent, supply their ancestors and de-
ceased friends with real dollars.

These are only half the size of real dol-
lars, but there appears to be no more
harm in cheating the dead than in
cheating the living. Besides, the de-
ceased are not supposed to know the
difference, for many of them departed
this life before silver dollars were im-
ported into China. A hundred mock
dollars, done up in boxes, are
sold for thirty-four dollars cash. The
operation for making this money is in-
teresting. First of all, there are blocks
of wax in which are melted down and
refined between boards lined with Chi-
nese paper, and when the upper board
is pressed down on the lower a thick-
ness of tin remains. This is next cut
up into strips four inches long, one
wide and eight of an inch thick. Some-
times these strips are placed evenly
together, one on top of the other, and
then one is held between the fingers,
while the workman proceeds to ham-
mer them out till he has beaten them
so fine that they are now three feet
long and one foot broad, and so thin
that they are not thicker than the
thinnest paper. This is next pasted
on common cardboard, which is then
cut with a punching machine to the
size of half-dollars, and this having
been done, a boy takes the cut out
pieces in hand, and with two dies, one
representing the one side and the other
the reverse, hammers impressions
of dollars on them, and the money is
ready for use. Another very curious
instance of the practice of cheating
the gods is recorded in the same jour-
nal, but from quite a different part
of the country. It appears that dis-
tinctly of the Anhui province have lately
been ravaged by an epidemic, so that
in many places the people were unable
to attend to the harvesting of the
crops. An attempt was then made to
deceive the gods by "playing at" New
Year's day and pretending that Sep-
tember 1 was the first day of the new
year. Every preparation for celebra-
ting the bogus new year was made,
such as burning firecrackers and past-
ing happy sentences in red paper on
the doors. The object was to make
the gods of sickness think that he had
made a mistake in the seasons and had
erred in bringing an epidemic on the
people at a time when no epidemics in
the course of nature should appear. As
any action contrary to nature done by
the gods is liable to punishment by the
King of Heaven, the actors in this
farce thought that spirits of sickness
would gather his evil spirits back to
him for fear of the displeasure of his
superior divinity. This child's play re-
ceived the permission and co-operation
of the local authorities, but so far no
visible effects for the better are ap-
parent.—London Times.

DAINTY BEDSPREADS.
The Best Material for Embroidering Ar-

Among the revivals of antique fash-
ions, the old-time coverlet, wrought in
cotton, with a tracery of fine em-
broidery or a printed pattern, is one of
the most attractive. Fashionable pat-
terns are imported special pat-
terns in delicate silks, which are suitable
for the bedspread and bolster cover.

The most beautiful bedsprings, how-
ever, are those embroidered by the
patient fingers of the artistic needle-
woman.

While it takes some time to work
one of these coverlets, the time will only
count if the work is done at odd min-
utes, picked up at times when the
fingers might otherwise be idle. Ger-
man women accomplish an immense
amount of needlework in this way.

For drawing, the needle always of hand,
and picking it up at odd minutes while
they are waiting for the fire to come up
or the kettle to boil.

The best material for embroidering a
counterpane is Bolton sheeting, which
comes in cert in a twenty-five cents
about one-dollar and a half yard at
a yard. There is also a pretty repped
cloth of the same width which is used
by artistic needle-women for counter-
panes as well as for hangings. The
best patterns for this purpose are all-
over design, conventionalized leaves
and flowers, and dainty blinets for a blue
room. Again, the design, instead of
flowers, may represent an arabesque of
either pink, blue or yellow, to corre-
spond with the room. Like the hand-
somest coverlets of the day, these
counterpanes are not intended to be
tacked in, but are finished with a wide
border of knotted fringe or of some
rich linen lace, like Russian or Mal-
tese, which hangs over the edge of the
bedstead in something of the effect of
the old-time valance.—N. Y. Tribune.

How He Worked It.
Bass—That was a cute idea of Sel-
am's.

Cass—What was that?
"He had a big lot of sofa cushions on
hand, and they didn't sell worth a cent.
He tried all sorts of ways to work them
off. Finally, he told his wife in strict-
est confidence, and made her swear
never to tell a soul, that he had a few
cushions that were better and cheaper
than any ever before sold in the city.
He said he wanted to keep the thing
secret to avoid a rush."

"Well?"
"His store was packed with women
for two weeks and he sold his cushions
and twice as many more.—Last

RATES OF SUBSCRIPTION:
The Republican is published every Thursday morning at the following rates:
One copy one year, \$1.00
One copy six months, .50
One copy three months, .25
One copy one month, .10
Single copies, .05

ADVERTISING RATES.
First insertion for space of ten nonpareil lines, each additional insertion after first, 5 cents per square of ten nonpareil lines. Subsequent insertion will be made from the above rates.

REMITTANCES:
Remittances made by money order, postal note, registered letter or bank draft will be at our risk, if made otherwise, at the risk of the sender. Address, THE REPUBLICAN, Oakland, Mo.

THURSDAY, JAN. 25, 1894.

THE BILL introduced by Senator Ravenscroft in the Legislature to refund Garrett county \$1,502 of the State school fund, passed both houses at Annapolis yesterday.

Gone Democratic.
We are informed that a cut of 33 1/2 per cent was made in the wages of the miners at Thomas and Coke-ton yesterday. Considerable excitement is reported but no trouble is feared.

KILL THE Wilson bill and you will unchain the wheels of progress, bring the sunshine of prosperity back to the homes of the people and give work and wages to every workingman in America within thirty days.

THE PERSONS throughout the county who have the petitions in charge urging the General Assembly to pass a law giving the people of Garrett county the right to elect the County School Commissioners by ballot are requested to send the petitions to Mr. A. F. George, Annapolis, as soon as practicable.

ONE DAY last week Mr. Lamar introduced a bill in the Maryland Legislature providing for the payment of the employees on the Chesapeake and Ohio canal, contracted from 1877 to 1890, and which the books show still to be due. For this purpose \$70,000, or so much thereof as may be necessary, is to be appropriated. Mr. Lamar says many of the men to whom this money is due, and who are scattered all along the line of the canal are sadly in need of it at this time, and that as the state can lose nothing, it would not only be just, but charitable, to liquidate this indebtedness.

ON TUESDAY our new electro-vapor engine was put in successful operation by Messrs. Samuel Lawton and Edward M. Spedden. This is a wonderful piece of machinery, requiring neither fire or water to operate it. The vapor is drawn through an iron pipe into the cylinder of the engine from a tank containing gasoline placed under the ground. After the vapor has accumulated in the cylinder it is exploded by an electric spark, which, after the explosion, acts in the same capacity as steam.

The little wonder drove our large cylinder press to-day on which this issue of THE REPUBLICAN was printed.

The Sugar Paraphernalia
It was rough sledding for the Wilson bill Tuesday. The paragraphs devoted to the sugar duties were handled in such a way that the majority of the house, that at the end of a seven hours' wrangle nobody knew "where they were at." It is a most beautiful mix, of which the end cannot be foreseen.

The revolt of the absolute free traders was so conspicuous against Mr. Wilson Tuesday, as it had been last week. The trouble is growing, based upon the great fact that Republican members will not help protection Democrats to fix up the Wilson bill in isolated details. The gravity of the situation as to the fate of the Wilson bill is made more pronounced by the rumor that the income tax measure is to become an integral part of the bill in the form of a rider. The opposition to that source of taxation is so strong that nothing will save it except making

the questionable resource a part of the general plan to stand or fall with it. Nothing definite can be done until the chief features of the sugar schedule are ascertained, and these may perhaps be mixed up with the iron and coal paragraphs.

THE NECESSITY of new school buildings in various parts of the county and the inability of the school authorities to provide proper accommodations for the children with the resources at hand, are two facts which must impress every citizen of the county. How to provide for the needs of the school board is a question of paramount importance just now.

We are advised that an effort will be made to have the General Assembly pass an act authorizing the issuance of bonds to the extent of thirty thousand dollars as a means of providing the necessary funds with which the purpose of the School Board can be carried out.

We do not know if the County Commissioners, by the terms of the act, will be authorized to issue the bonds or not. This is a matter for consideration and serious thought. The people of the county are vitally interested in this question and upon the educational advantages and facilities which are offered to the rising generation depends the future welfare of the community.

Certain it is, the present accommodations are not sufficient, but on the other hand totally inadequate to the growing demands of the attendance of the children upon the public schools.

We are not in favor of placing this additional debt upon the county unless proper safeguards are thrown around the expenditure of the money. We believe that the best results can be obtained by incorporating in the proposed bill the provision that this money shall be expended under the joint direction of the County Commissioners and the Board of School Commissioners, and that all contracts for buildings and improvements to be provided for out of this fund shall first be submitted to and approved by them.

This, in our judgment, will be the means of allaying any opposition that might be raised to the measure.

The Sugar Bounty is Profitable.
Whether the bounty upon sugar production should be withdrawn is a question that should be answered, not by men's prejudices, but by simple consideration of the profit or loss that the system brings to the American people. It is not a matter of small importance that we should try to produce at home all the sugar we consume. In the year 1891 we paid to foreigners for sugar nearly \$106,000,000. In that year our exports of wheat were valued at a trifle more than \$106,000,000. Thus the whole of our surplus wheat crop was exchanged in foreign lands for sugar, every pound of which could have been grown and manufactured by our people. To accomplish such a result for the profit of the farmers, for the diversification of agricultural industry, for the employment of idle men and for the closer approach to industrial independence, surely is worth a considerable annual expenditure in the shape of bounties.

There is a popular sentiment against direct bounties, but to pay public money for the industrial advantages alluded to above may be as commendable as to pay it for the promotion of navigation. If we may tax a bachelor for a public school fund upon grounds of high public interest, why may we not tax the nation for the promotion of an industry which will benefit the nation as a whole? Alexander Hamilton spoke wisely when he said: "There is no purpose to which public money can be more beneficially applied than to the acquisition of a new and useful industry—no consideration more valuable than a permanent addition to the general stock of productive labor." The truth of this assertion has been positively demonstrated in the best sugar industry. It was created in Europe by the fiat of Napoleon. It was built up by what may be called artificial means; sheltered by tariffs

and nourished by bounties and to-day it produces nearly 2 1/2 per cent of the world's sugar supply, having permanently lowered the price to all consumers.

It would be profitable in the long run for the American people to lose money for a time by bounty payments upon sugar, if by such means they could retain at home \$106,000,000 now spent in other countries. But the fact is they save money under the bounty system instead of losing it. Mr. C. D. Meiklejohn, of Nebraska, in a recent very able speech in the House of Representatives, showed that by removing the duties upon sugar under the McKinley tariff the price was so depressed that the people after paying the bounty to domestic producers, have kept the amount of the old duties in their pockets with \$3,000,000 dollars besides! That is to say, estimating the bounty at \$10,000,000, the American consumers are better off under the bounty system by about \$43,000,000 than they were under the duty system.

In this view of the matter, the American sugar grower, and the advantages of promoting the industry, might be left out of consideration altogether, and yet the bounty system would be far more profitable, as a mere business arrangement than the duty system. If the people patiently endured for decades after decades the burdens imposed by duties upon sugar, why should they complain of the burden of a new arrangement which requires of them nearly fifty million dollars less every year? To denounce in the shape of public policy a method of operation which every man would eagerly adopt in his private business, if he could, would be most unreasonable. But to denounce it when the facts show that it not only saves money for consumers, but is bringing about the home production of a necessity of comfortable existence for which we expend more than a hundred million dollars a year in other countries, would be to indulge in an exhibition of intolerable foolishness.

Any new and useful industry is to be coveted. But particularly is it desirable that we should introduce to our agriculture some measure of that large and wide diversification which has been the good fortune of our manufacturers. The beet sugar industry, marvelously developed under the bounty system is full of rich promise to the farmers of nearly every part of the country. That the Democratic party is trying to strike when a war of extermination is waged by that party against the wool growing business, and when an attempt is being made to open the door to free competition from Canadian farm products, should consolidate the farmer vote for the party which stands firmly by American interests. —N. Y. Press.

Our Imports of Wool.
The greatest amount of wool ever imported in any single year was under the McKinley law for the year ending June 30, 1893, so Justice, Bateman & Co., points out. The imports of raw wool then were over 158,000,000 pounds, or 32 per cent. more than the importations of any previous year. This refutes any disposes of the charge, so often made by free traders, that it is necessary to put wool on the free list in order to give American manufacturers cheap foreign wool for mixing. They never imported so much foreign wool as under the last year of the McKinley law, the schedules of which were so wisely drawn that under it the woolen mills of the United States were employed to their full capacity, so that the entire American clip of 1892 was not only all consumed in our home market, but 168,000,000 pounds of foreign wool besides.

Bucklen's Arnica Salve.
The best salve in the world for cuts, bruises, sores, ulcers, salt rheum, fever sores, tetter, chapped hands, chilblains, corns, and all skin eruptions, and positively cures piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cents per box. For sale by H. J. Mayers.

A LETTER FROM "W."

Replies to the "Democrat's" Aburdities in "Plain Unvarnished English."

"W." is not "growing rich by employing a class of laborers at starvation wages."

His men are not "compelled to accept pay in store goods at two prices out of his little West Virginia store."

"W." does not make it a condition that "none but those who will accept pay in store goods at two prices out of his little West Virginia store."

It is not "currently reported" so, and when the thing that does the editorials for the Democrat makes these assertions it does not mean to be taken seriously. It simply means to write itself an unmitigated ass, otherwise it would not gratuitously propagate a family of idiotic, malicious, baldheaded lies like the foregoing when the proof of their character is so easily acceptable.

"W." employees are not the "growing, despicable 'class' the Democrat insultingly paints them."

They are sober, honest and industrious and their most limited intellect has more good honest everyday common sense in half a minute than the Democrat would have in a million years.

"W." pays liberal wages; one dollar and fifty cents for a ten hour day being the lowest.

When times seemed to justify it under the McKinley law he increased the pay voluntarily.

Some of his former employees are now living on farms bought and paid for out of their wages. Others are saving their money for the same purpose.

"W." pays every pay day about \$1500 to his men in cash.

They spend this when, where and as they please.

He pleads guilty to the delicate insinuation that he is a "small-fry manufacturer."

Perhaps the Democrat doesn't like it.

It would naturally drive a pro-British ex-rebel sheet to the verge of rabies to see a native American employing young men of his own class in the prosecution of an American industry and all making a decent living.

The Democrat has doubtless heard it "currently reported" that "W." treats his employees fairly, but it chooses to publish a lie rather than the truth.

"The Democracy of to-day has no more interest in or sympathy with the Confederacy of thirty years ago than a Zulu or a Hottentot."

"The Confederacy is dead with all its ambitions and its institutions."

So says the Democrat, but the fact that the Democratic party is dominated to-day by the very same men who in the Confederacy thirty years ago were under arms against the United States government, and the fact that the essence and spirit of the Confederate constitution was incorporated in the Chicago platform, and notwithstanding the manifestly ruinous results of that policy fully demonstrated by the general collapse of business, the Democratic continues resolutely to pursue its destructive course, would seem to argue differently.

This may be high toned reputable journalism and then again it may not.

In Place of Hornblower.

WASHINGTON, D. C., Jan. 22.—The President to-day sent to the Senate the nomination of Wheeler H. Peckham, of New York, to be Associate Justice of the Supreme Court of the United States. Wheeler H. Peckham, nominated for Associate Justice of the Supreme Court, is a brother of Judge Rufus Peckham, of the New York Court of Appeals. He was appointed district attorney by Mr. Cleveland when he was governor of New York, but subsequently resigned. Although the New York Senators decline to talk, it is understood the nomination is distasteful to them, but that they would have been glad to have seen the name of the brother sent in for the place. The indications seem to be that the Hornblower struggle will be renewed against this nominee.

California Excursions.
The well known Phillips Excursion Company have arranged to run weekly excursions to all principal California and other Pacific Coast cities from all points on the Baltimore & Ohio R. R.

The parties will leave the East on Wednesday of each week, commencing January 17th, and passengers will be booked through to destination. There are no Pacific Coast tours offering as good accommodations at less expense. For full information address A. Phillips & Co., No. 111 S. 9th Street, Philadelphia, or call on nearest ticket agents B. & O. R. R. Co.

"RULE BRITANNIA."

A Very Popular Air With the Present Administration.

Since March 4, 1893, on the incoming of the present administration, both the foreign and internal policy of the country appears to have been formulated with a view to a consideration of the interests of foreign countries rather than of our own country. This has appeared not only in one instance, but in many instances. Setting aside such little matters as the exclusion of China or Japan tea from the White House kitchen and the exclusive use of Ceylon tea, because it is English, you know, we find that a similar policy only on a larger scale and one of greater significance has been carried into our affairs of state.

The most important feature was the tariff measure formulated on English free trade lines, without any regard or consideration for the interest of American labor or American industries. Having changed our system of currency to conform with that of England, it was only natural that the same model should serve on which to fashion our methods of revenue. The result, it has been found, would have been insufficient to supply an income equal to the expenditures of our country. This also is English.

We also have the suggestion made to forestall the revenue by an issue of short term treasury bills. This method of spending one's income before it is earned is also of English origin.

The latest Anglomaniac development that has emanated from Washington this year has appeared in connection with the Hawaiian middle. It appears that the first published report of the secretary of the state on this subject was shown to and approved by the British ambassador at Washington before it was handed out for publication for the information of the American people. We thus have a plain case of an act undertaken by the United States government and supposed to be for the best interests of the United States and of the American people first submitted for the consideration and approval of the representative of a foreign country, and that country England.

Not only has this most extraordinary step been taken, which was decidedly uncalled for and merely an act to carry favor with what is English, you know, but at the same time the secretary did not even have the common courtesy to submit a copy of his report, even after publication, to the lawfully recognized representative of the Hawaiian Islands, who is located at the seat of government. There was a direct insult given to the other country concerned, for which the report was made, while servile flattery was offensively displayed to the representative of England, who had no earthly concern in the matter so far as either the United States or the Hawaiian Islands were concerned.

Such are some of the gross exhibitions of un-Americanism on the part of the present Democratic administration, as offensively and offensively displayed to the American people. For other instances we need only examine carefully the new tariff measure, formulated on English Free Trade lines and designed mostly to assist foreign trade at the expense of our own. The remarkable utterances of Benjamin Folsom, cousin-in-law of President Cleveland, that were made on our national birthday to the manufacturers at Sheffield, are very surely becoming realizations, and his congratulations to the English manufacturers were by no means out of place from his own standpoint, or that of his cousin-in-law, or their party. There are no words of congratulation for American manufacturers or for American laborers. They may console with one another while waiting for the congressional elections of 1894.

CHARLES R. BUCKLAND.

Savage River.

I have not heard from our old correspondent for a long time and wish that he would waken up and let us hear from him.

We are sorry to note that our old neighbor and excellent farmer, Steve Wilt, contemplates moving to Florida where he expects to go into the orange business. I presume he thinks it is an easier situation for an old gentleman but his fellow neighbors wish him to remain with them as he is a useful man.

Thomas I. and Charles O. Wilt are engaged in handling bark while others are handling crossties.

There has been some trading done in land here.

H. B. Durst and family have moved into their new house.

Mr. Sarah Blubaugh, of Pennsylvania is visiting friends and relatives here.

Mrs. Rose M. Wilt, accompanied by her sister-in-law Miss Ella, were visiting friends and relatives in this vicinity.

Otho H. Fazenbaker is on the

sick list.

W. H. Durst, of Backwoods, has returned from Dobbin, where he was visiting his brother and sister.

We are having a grand meeting in this neighborhood with good attendance and good behavior. Mr. Enlow is the pastor.

Dentistry.
Dr. I. L. Ritter, proprietor of the Frostburg Dental Parlors, will be in Cranberry, Feb. 5th and 6th; in Terra Alta, Feb. 7th and 8th at Terra Alta Hotel; Oakland, Feb. 9th and 10th, at Commercial Hotel. Teeth extracted without pain. 2t

Local Institute.

A local institute will be held at Oakland on Saturday, February 3d. The following programme will be rendered:

Penmanship, Mr. Kelson; interesting your pupils, Miss Kepler; language, Miss Boyer; papers by Miss Leary, Miss Nina Clements and Mr. Howard Nethku.

MORTGAGEE'S SALE

—OF VALUABLE—

REAL ESTATE

NEAR BITTINGER, MD.

Under and by virtue of a power of sale contained in a mortgage from Joel J. Brennemman and wife to John J. Brennemman and others, dated the 10th day of June, 1892, and duly recorded in Liber W. H. T., No. 6, folio 18, etc., one of the land records of Garrett county, the undersigned will sell at public auction, to the highest bidder, in the town of Grantsville, in front of the Livingston hotel, at the hour of 2 o'clock p. m., on

SATURDAY,

THE 24TH DAY OF MARCH, 1894,

all those lots of ground situated about one mile south of Bittinger, known as

Lots Nos. Two Thousand Four Hundred and Twenty-one (2421), Two Thousand Four Hundred and Twenty-two (2422), Two Thousand Four Hundred and Twenty-three (2423), Two Thousand Four Hundred and Twenty-four (2424), and Two Thousand Four Hundred and Twenty-six (2426), containing fifty acres of land each.

Said lots are improved by a good farm with all necessary buildings thereon and belong to the property where the said Joel J. Brennemman now resides.

TERMS OF SALE:—Cash on the day of sale.

JOHN J. BRENNEMAN,
DANIEL J. BRENNEMAN,
45-td Two of the Mortgagees.

ORDER NISI.

William Pearce vs. Richard Graham and Wm. H. Hoffman.

No. 626 Equity, in the Circuit Court for Garrett County.
Ordered this 18th day of January, 1894, by the Circuit Court for Garrett County, in equity, that the sale of the property mentioned in the above report and reported by William Pearce, trustee, be ratified and confirmed, unless cause to the contrary thereof be shown on or before the 3rd day of February, 1894. Provided a copy of this order be filed in some newspaper printed in Oakland, Garrett County, Md. once in each of two consecutive weeks before the said 3rd day of February, 1894.

The report states the amount of sale to be \$218.

H. W. HOFFMAN,
True copy. Test: E. Z. Towler, Clerk.

COMMISSIONERS' MEETING

OFFICE OF THE GARRETT COUNTY SCHOOL COMMISSIONERS.

OAKLAND, MD., Jan. 15, 1894.
The County Commissioners, for Garrett county will meet at their office in Oakland on

Thursday, February 8, 1894,

for a hearing in Bond Case No. 129.

The appeal session commencing Monday, February 12. All persons wishing to take appeals on assessments shall observe the following days and dates by Districts and attend accordingly:

Monday, February 12, Districts 1, 4, 11 and 10.

Tuesday, " 13, " 2, 6, 5 and 3.

Wednesday, " 14, " 7, 8, 9 and 12.

All supervisors and constables who have not executed their bonds shall do so and have the same filed in the office of the Commissioners before the above dates.

By order of Board, J. S. MEYERS, Clerk.

EDUCATIONAL MEETINGS

—AND—

Teachers' Institutes.

OFFICE OF THE GARRETT COUNTY SCHOOL COMMISSIONERS.

OAKLAND, MD., Dec. 27, 1893.
Educational meetings will be held in Garrett county as follows:

Deer Park, January 5th, 1894, at 7 p. m.

Grantsville, January 12th, 1894, at 7 p. m.

Accident, January 19th, 1894, at 7 p. m.

Schellsburg, January 26th, 1894, at 7 p. m.

The public cordially invited and earnestly requested to attend said meetings.

A Teachers' Local Institute will be held at each of the above mentioned places on the following day (Saturday) at 10 o'clock a. m.

All teachers are expected to attend at least one of these meetings and as many more as they conveniently can.

The following are the programs for the said meetings:

DEER PARK.—Paper by Marion Leary, member by Essie Dyer; grading and classifying by J. E. Kelson; teachers' preparation by Howard Nethku; topical talk, "Attention," by W. A. Moffet.

GRANTSVILLE.—Paper, Katie Thompson; primary work, Jennie Miller; school discipline, S. W. H. McKenzie; the teacher out of school, Jas. W. Felt; grading and classifying, Mollie Dyer.

ACCIDENT.—Language work, Virgie Blubaugh; how to teach reading, J. E. Miller; needs of Garrett county in public school work, John L. Englehart; what is the relation of the teachers' work to the development of character in his pupils, H. K. Friend; grading and classifying, E. E. Schmor.

SHELLSBURG.—Primary work, Asa E. Riley; grading and classifying, Norval Speelman; what is county and local institutions, Jasper Bartholomew; topical talk, "Attention," G. B. Frazee; reading, Elson Welch.

12-24. W. M. HENDERSON, Secretary.

showing that for that very reason

he was so very particular in all his official acts up to the formation of the provisional government...

The bond issue announced by Secretary Carlisle has turned the Populists and a majority of the southern and western Democrats...

Secretary Carlisle was a proper one is a question that your correspondent will not deal with at present...

even putting the strictest construction upon the authority conferred by the act of 1875...

That act authorizes the issue of bonds for the purchase of gold for the redemption of Treasury notes...

Of course everybody knows that this bond issue is really to get money to meet current obligations...

the democratic tariff policy having resulted in causing the revenues to fall below the amount needed...

It must be plain to the humblest student of finance that it will be a very easy matter for Mr. Carlisle to comply with the letter of that act...

His friends, the Wall Street bankers, present Treasury notes for redemption in sufficient amounts to require all the gold received from the sale of bonds...

leaving him the treasury notes to pay the expenses of the government. True, there will be a little trickery about such a plan...

but that will be nothing new from the Democratic administration.

Representative Tom Johnson, of Ohio, who glories in being a Democrat-Free-Trade-Monopolist...

is still very much in favor of protecting the personal interest of Tom Johnson. He makes steel rails...

in an attempt to monopolize the manufacture of these rails he was recently defeated in the courts by other steel rail manufacturers...

Having substantial protection for the rails made by his company, through the ownership of a number of patents...

he tried to destroy the business of his rivals by offering an amendment to the Cleveland tariff bill...

to put steel rails on the free list, an attempt in which he failed, thanks to the exposure made by Representative Dalzell of Pennsylvania...

and to the solid Republican vote in the House.

The House committee on Pensions has made a favorable report on a bill repealing the law that prohibits the payment of a pension to any person who voluntarily engaged in or aided the rebellion against the United States.

Bayard.

The mills along the line of the W. Va., are running on three-quarter time; tanneries are running full time at Gorman, Bayard and Davis...

miners have been cut 5 percent. on the ton at Cockton and Thomas; drivers' and day laborers' wages has also been reduced.

A fire occurred at Parsons, W. Va., on Thursday of last week. The fire caught in the "Parson City Hotel," from a defective flue and five or six other buildings were consumed...

There being no water works in the town the flames could not be checked, and the fire continued until it completed its course of destruction.

While tumbling along over the rugged W. Va. C. I. occasionally met with some of our Oakland people. On Thursday of last week I met at Thomas our hawking dry goods and notion drummer, Mr. Chas. J. Kelly...

and also the auctioneer and racket man, Mr. Jno. Shortzer, who had been at Parsons and was en route for home...

while at Bayard I met with a former Oakland druggist, Mr. Wm. Nydegger, who is engaged in the same business here.

TRAVELING MAN.

North Glade School.

Notwithstanding a considerable amount of sickness, we herewith make the following favorable report for the second month of school:

Scholars present every day: Maggie, Bessie, Ettie and Willie Fitzgibbe, Harry and Mattie Garlitz, Estella Baldwin, Estella Hamill, Elsie Howell, Noella Pitts, Annie Custer and Willie Williams; enrollment, 42; average, 34; average first month, 31.

Examiner Hinebaugh visited our school recently and gave us some good advice.

From Two Garrett County Boys.

ST. JOHN'S COLLEGE, ANNAPOLIS, MD., Jan. 19, 1894.

At a meeting of the Senior, Junior and Sophomore classes held in McDowell Hall, St. John's College, on Monday evening, the 9th instant, the following resolutions were adopted:

WHEREAS, The practice of "hazing," which has so long been a feature of the inner life of St. John's, has been shown to be highly detrimental to the progress and welfare of our Alma Mater...

apart from an amount of indignity too often inflicted upon the sufferer, and as we believe that the students should in all cases do all in their power to further the prosperity of the college...

since it is to the college that they look to supply them with many of the guiding principles of their life's career...

Be it resolved, By the Senior, Junior and Sophomore classes of St. John's College, in meeting assembled, that hazing in every form or kind shall cease to exist within the precincts of St. John's College...

and that nothing will be done to support or encourage the continuance of this practice, if it be again attempted.

True copy, ROY H. SNYDER, Secretary.

This hazing has been indulged in by the three classes above mentioned for many years. While it was not considered as a great evil by the students it was found to be injurious to the growth of this institution...

The "Knights of the Slat" had attained quite a wide reputation by the artistic manner in which "Freshies" were frescoed, made to chase smiles under the table, make love to chairs, etc.

After the student becomes familiar with the college life he looks at hazing from a different point of view. He sees its good points as well as its bad ones. Many boys, we believe, have been kept away from this institution through fear of being hazed and on account of this, it was thought best to abolish the custom.

However, the present "Freshman" class is larger than it has been for many years. They can now lie down at night with a reasonable assurance that their slumbers will not be disturbed and no longer needs to dread the weird summons of the "Grand Order."

Of course the distinctions between the classes will remain the same as before and the "Soph" will still continue to consider it their exclusive right to keep the Freshman in their respected places.

THURSDAY, JAN. 25, 1894.

THE BILL introduced by Senator Ravenscroft in the Legislature to refund Garrett county \$1,562 of the State school fund, passed both houses at Annapolis yesterday.

Gone Democratic.
We are informed that a cent of 33 1/2 per cent was made in the wages of the miners at Thomas and Coke-ton yesterday. Considerable excitement is reported but no trouble is feared.

KILL THE Wilson bill and you will unchain the wheels of progress, light the furnace fires of industry, bring the sunshine of prosperity back to the homes of the people and give work and wages to every workingman in America within thirty days.

THE PERSONS throughout the county who have the petitions in charge urging the General Assembly to pass a law giving the people of Garrett county the right to elect the County School Commissioners by ballot are requested to send the petitions to Mr. A. F. George, Annapolis, as soon as practicable.

ONE DAY last week Mr. Lamar introduced a bill in the Maryland Legislature providing for the payment of the employees on the Chesapeake and Ohio canal, contracted from 1877 to 1890, and which the books show still to be due. For this purpose \$70,000, or so much thereof as may be necessary, is to be appropriated. Mr. Lamar says many of the men to whom this money is due, and who are scattered all along the line of the canal are sadly in need of it at this time, and that as the state can lose nothing, it would not only be just, but charitable, to liquidate this indebtedness.

ON TUESDAY our new electro-vapor engine was put in successful operation by Messrs. Samuel Lawton and Edward M. Spelden. This is a wonderful piece of machinery, requiring neither fire or water to operate it. The vapor is drawn through an iron pipe into the cylinder of the engine from a tank containing gasoline placed under the ground. After the vapor has accumulated in the cylinder it is exploded by an electric spark, which, after the explosion, acts in the same capacity as steam.

The little wonder drove our large cylinder press to-day on which this issue of THE REPUBLICAN was printed.

The Sugar Paragraphs
It was rough sledding for the Wilson bill Tuesday. The paragraphs devoted to the sugar duties were handled in such a way by the majority of the house, that at the end of a seven hours' wrangle nobody knew where they were at. It is a most beautiful mix, of which the end cannot be foreseen.

The revolt of the absolute free traders was so conspicuous against Mr. Wilson Tuesday, as it had been last week. The trouble is growing, based upon the great fact that Republican members will not help protection Democrats to fix up the Wilson bill in isolated details. The gravity of the situation as to the fate of the Wilson bill is made more pronounced by the rumor that the income tax measure is to become an integral part of the bill in the form of a rider. The opposition to that source of taxation is so strong that nothing will save it except making

the questionable resource a part of the general plan to stand or fall with it. Nothing definite can be done until the chief features of the sugar schedule are ascertained, and these may perhaps be mixed up with the iron and coal paragraphs.

THE NECESSITY of new school buildings in various parts of the county and the inability of the school authorities to provide proper accommodations for the children with the resources at hand, are two facts which must impress every citizen of the county. How to provide for the needs of the school board is a question of paramount importance just now.

We are advised that an effort will be made to have the General Assembly pass an act authorizing the issuance of bonds to the extent of thirty thousand dollars as a means of providing the necessary funds with which the purpose of the School Board can be carried out.

We do not know if the County Commissioners, by the terms of the act, will be authorized to issue the bonds or not. This is a matter for consideration and serious thought. The people of the county are vitally interested in this question and upon the educational advantages and facilities which are offered to the rising generation depends the future welfare of the community.

Certain it is, the present accommodations are not sufficient, but on the other hand totally inadequate to the growing demands of the attendance of the children upon the public schools.

We are not in favor of placing this additional debt upon the county unless proper safeguards are thrown around the expenditure of the money. We believe that the best results can be obtained by incorporating in the proposed bill the provision that this money shall be expended under the joint direction of the County Commissioners and the Board of School Commissioners, and that all contracts for buildings and improvements to be provided for out of this fund shall first be submitted to and approved by them. This, in our judgment, will be the means of allaying any opposition that might be raised to the measure.

The Sugar Bounty is Profitable.
Whether the bounty upon sugar production should be withdrawn is a question that should be answered, not by men's prejudices, but by simple consideration of the profit or loss that the system brings to the American people. It is not a matter of small importance that we should try to produce at home all the sugar we consume. In the year 1891 we paid to foreign sugar nearly \$106,000,000. In that year our exports of wheat were valued at a trifle more than \$106,000,000. Thus the whole of our surplus wheat crop was exchanged in foreign lands for sugar, every pound of which could have been grown and manufactured by our people. To accomplish such a result for the profit of the farmers, for the diversification of agricultural industry, for the employment of idle men and for the closer approach to industrial independence, surely is worth a considerable annual expenditure in the shape of bounties.

There is a popular sentiment against direct bounties, but to pay public money for the industrial advantages alluded to above may be as commendable as to pay it for the promotion of navigation. If we may tax a bachelor for a public school fund upon grounds of high public interest, why may we not tax the nation for the promotion of an industry which will benefit the nation as a whole? Alexander Hamilton spoke wisely when he said: "There is no purpose to which public money can be more beneficially applied than to the acquisition of a new and useful industry—no consideration more valuable than a permanent addition to the general stock of productive labor." The truth of this assertion has been positively demonstrated in the best sugar industry. It was created in Europe by the fiat of Napoleon. It was built up by what may be called artificial means; sheltered by tariffs

and nourished by bounties, and today it produces nearly three-fifths of the world's sugar supply, having permanently lowered the price to all consumers.

It would be profitable in the long run for the American people to lose money for a time by bounty payments upon sugar, if by such means they could retain at home \$106,000,000 now spent in other countries. But the fact is they save money under the bounty system instead of losing it. Mr. C. D. Meiklejohn, of Nebraska, in a recent very able speech in the House of Representatives, showed that by removing the duties upon sugar under the McKinley tariff the price was so depressed that the people after paying the bounty to domestic producers, have kept the amount of the old duties in their pockets with 33,000,000 dollars besides! That is to say, estimating the bounty at \$10,000,000, the American consumers are better off under the bounty system by about \$43,000,000 than they were under the duty system.

In this view of the matter, the American sugar grower, and the advantages of promoting the industry, might be left out of consideration altogether, and yet the bounty system would be far more profitable, as a mere business arrangement than the duty system. If the people patiently endured for decade after decade the burdens imposed by duties upon sugar, why should they complain of the burden of a new arrangement which requires of them nearly fifty million dollars less every year? To denounce in the shape of public policy a method of operation which every man would eagerly adopt in his private business, if he could, would be most unreasonable. But to denounce it when the facts show that it not only saves money for consumers, but is bringing about the home production of a necessity of comfortable existence for which we expend more than a hundred million dollars a year in other countries, would be to indulge in an exhibition of intolerable foolishness.

Any new and useful industry is to be coveted. But particularly is it desirable that we should introduce to our agriculture some measure of that large and wide diversification which has been the good fortune of our manufacturers. The beet sugar industry, marvelously developed under the bounty system is full of rich promise to the farmers of nearly every part of the country. That the Democratic party is trying to strike when a war of extermination is waged by that party against the wool growing business, and when an attempt is being made to open the door to free competition from Canadian farm products, should consolidate the farmer vote for the party which stands firmly by American interests.

—N. Y. Press.
Our Imports of Wool.
The greatest amount of wool ever imported in any single year was under the McKinley law for the year ending June 30, 1893, so Justice, Bateman & Co., point out. The imports of raw wool then were over 158,000,000 pounds, or 32 per cent more than the importations of any previous year. This refutes any disposes of the charge, so often made by free traders, that it is necessary to put wool on the free list in order to give American manufacturers cheap foreign wool for mixing. They never imported so much foreign wool as under the last year of the McKinley law, the schedules of which were so wisely drawn that under it the woolen mills of the United States were employed to their full capacity, so that the entire American clip of 1892 was not only all consumed in our home market, but 168,000,000 pounds of foreign wool besides.

A LETTER FROM "W."

Replies to the "Democrat's" Aburdities in Plain Unvarnished English.

"W" is not "growing rich by employing a class of laborers at starvation wages."

His men are not "compelled to accept pay in store goods at two prices out of his little West Virginia store."

"W" does not make it a condition that "none but those who will be sent to be paid in this manner secure employment."

It is not "currently reported" so, and when the thing that does the editorials for the Democrat makes these assertions it does not mean to be taken seriously. It simply means to write itself an unmitigated ass, otherwise it would not gratuitously propagate a family of idiotic, malicious, baldheaded lies like the foregoing when the proof of their character is so easily perceptible.

"W's" employees are not the "inferior, despicable 'class'" the Democrat insultingly paints them. They are intelligent, self-respecting men who would not be imposed on.

They are sober, honest and industrious and their most limited intellect has more good honest everyday common sense in half a minute than the Democrat would have in a million years.

"W" pays liberal wages; one dollar and fifty cents for a ten hour day being the lowest.

When times seemed to justify it under the McKinley law he increased the pay voluntarily.

Some of his former employees are now living on farms bought and paid for out of their wages. Others are saving their money for the same purpose.

"W" pays every pay day about \$1500 to his men in cash.

They spend this when, where and as they please.

He pleads guilty to the delicate insinuation that he is a "small-fry manufacturer."

Perhaps the Democrat doesn't like it.

It would naturally drive a pro-British ex-rebel sheet to the verge of rabies to see a native American employing young men of his own class in the prosecution of an American industry and all making a decent living.

The Democrat has doubtless heard it "currently reported" that "W" treats his employees fairly, but it chooses to publish a lie rather than the truth.

"The Democracy of to-day has no more interest in or sympathy with the Confederacy of thirty years ago than a Zulu or a Hottentot."

"The Confederacy is dead with all its ambitions and its institutions."

So says the Democrat, but the fact that the Democratic party is dominated to-day by the very same men who in the Confederacy thirty years ago were under arms against the United States government, and the fact that the essence and spirit of the Confederate constitution was incorporated in the Chicago platform, and notwithstanding the manifestly ruinous results of that policy fully demonstrated by the general collapse of business, the Democracy continues resolutely to pursue its destructive course, would seem to argue differently.

This may be high toned reputable journalism and then again it may not.

In Place of Hornblower.

WASHINGTON, D. C., Jan. 22.—The President to-day sent to the Senate the nomination of Wheeler H. Peckham, of New York, to be Associate Justice of the Supreme Court of the United States.

Wheeler H. Peckham, nominated for Associate Justice of the Supreme Court, is a brother of Judge Rufus Peckham, of the New York Court of Appeals. He was appointed district attorney by Mr. Cleveland when he was governor of New York, but subsequently resigned. Although the New York Senators decline to talk, it is understood the nomination is distasteful to them, but that they would have been glad to have seen the name of the brother sent in for the place. The indications seem to be that the Hornblower struggle will be renewed against this nominee.

California Excursions.
The well known Phillips Excursion Company have arranged to run weekly excursions to all principal California and other Pacific Coast cities from all points on the Baltimore & Ohio R. R.

The parties will leave the East on Wednesday of each week, commencing January 17th, and passengers will be booked through to destination. There are no Pacific Coast tours offering as good accommodations at less expense. For full information address A. Phillips & Co., No. 111 S. 9th Street, Philadelphia, or call on nearest ticket agents B. & O. R. R. Co.

"RULE BRITANNIA."

A Very Popular Air With the Present Administration.

Since March 4, 1893, on the incoming of the present administration, both the foreign and internal policy of the country appears to have been formulated with a view to a consideration of the interests of foreign countries rather than of our own country. This has appeared not only in one instance, but in many instances. Setting aside such little matters as the exclusion of China or Japan tea from the White House kitchen and the exclusive use of Ceylon tea, because it is English, you know, we find that a similar policy only on a larger scale and one of greater significance has been carried into our affairs of state.

The most important feature was the tariff measure formulated on English free trade lines, without any regard or consideration for the interest of American labor or American industries. Having changed our system of currency to conform with that of England, it was only natural that the same model should serve on which to fashion our methods of revenue. The result, it has been found, would have been insufficient to supply an income equal to the expenditures of our country. This also is English.

We also have the suggestion made to forestall the revenue by an issue of short term treasury bills. This method of spending one's income before it is earned is also of English origin.

The latest Anglomaniac development that has emanated from Washington this year has appeared in connection with the Hawaiian middle. It appears that the first published report of the secretary of the state on this subject was shown to and approved by the British ambassador at Washington before it was handed out for publication for the information of the American people. We thus have a plain case of an act undertaken by the United States government and supposed to be for the best interests of the United States and of the American people first submitted for the consideration and approval of the representative of a foreign country, and that country England.

Not only has this most extraordinary step been taken, which was decidedly uncalled for and merely an act to carry favor with what is English, you know, but at the same time the secretary did not even have the common courtesy to submit a copy of his report, even after publication, to the lawfully recognized representative of the Hawaiian Islands, who is located at the seat of government. There was a direct insult given to the other country concerned, for which the report was made, while servile flunkeydom was effectively displayed to the representative of England, who had no earthly concern in the matter so far as either the United States or the Hawaiian Islands were concerned.

Such are some of the gross exhibitions of un-Americanism on the part of the present Democratic administration, as effectively and offensively displayed to the American people. For other instances we need only examine carefully the new tariff measure, formulated on English Free Trade lines and designed mostly to assist foreign trade at the expense of our own. The remarkable utterances of Benjamin Folsom, cousin-in-law of President Cleveland, that were made on our national birthday to the manufacturers at Sheffield, are too surely becoming realizations, and his congratulations to the English manufacturers were by no means out of place from his own standpoint, or that of his cousin-in-law, or their party. There are no words of congratulation for American manufacturers or for American laborers. They may console with one another while waiting for the congressional elections of 1894.

CHARLES R. BUCKLAND.

Savage River.

I have not heard from our old correspondent for a long time and wish that he would waken up and let us hear from him.

We are sorry to note that our old neighbor and excellent farmer, Steve Wilt, contemplates moving to Florida where he expects to go into the orange business. I presume he thinks it is an easier situation for an old gentleman but his fellow neighbors wish him to remain with them as he is a useful man.

Thomas I. and Charles O. Wilt are engaged in hauling bark while others are hauling crossties.

There has been some trading done in land here.

H. B. Durst and family have moved into their new house.

Mr. Sarah Blubaugh, of Pennsylvania is visiting friends and relatives here.

Mrs. Rose M. Wilt, accompanied by her sister-in-law Miss Ella, were visiting friends and relatives in this vicinity.

Otho H. Fazanbaker is on the

sick list.

W. H. Durst, of Backwoods, has returned from Dobbin, where he was visiting his brother and sister.

We are having a very nice winter thus far. A winter that pleases most of the farmers.

We are having a grand meeting in this neighborhood with good attendance and good behavior. Rev. Mr. Enlow is the pastor.

Dentistry.
Dr. I. L. Ritter, proprietor of the Frostburg Dental Parlors, will be in Cranestown, Feb. 5th and 6th; Terra Alta, Feb. 7th and 8th; Terra Alta Hotel, Oakland, Feb. 9th and 10th, at Commercial Hotel. Teeth extracted without pain. 2t

Local Institute.
A local institute will be held at Oakland on Saturday, February 2d. The following programme will be rendered:
Penmanship, Mr. Kelso; interesting your pupils, Miss Kepler; language, Miss Boyer; papers by Miss Leary, Miss Nina Clements and Mr. Howard Nethkin.

MORTGAGEE'S SALE —OF VALUABLE— REAL ESTATE NEAR BITTINGER, MD.

Under and by virtue of a power of sale contained in a mortgage from Joel J. Brennenman and wife to John J. Brennenman and others, dated the 30th day of June, 1892, and duly recorded in Liber W. H. C. No. 6, folio 181, etc., one of the land records of Garrett county, the undersigned will sell at public auction, to the highest bidder, in the town of Cranestown, in front of the Lyceum Hotel, at the hour of 2 o'clock p. m., on

SATURDAY,
THE 24TH DAY OF MARCH, 1894,

all three lots of ground situated about one mile South of Bittinger, known as

Lots Nos. Two Thousand Four Hundred and Twenty-one (2421), Two Thousand Four Hundred and Twenty-two (2422), Two Thousand Four Hundred and Twenty-three (2423), Two Thousand Four Hundred and Twenty-four (2424), and Two Thousand Four Hundred and Twenty-six (2426), containing fifty acres of land each.

Said lots are improved by a good farm with all necessary buildings and other improvements where the said Joel J. Brennenman now resides.

TERMS OF SALE.—Cash on the day of sale.

JOHN J. BRENNEMAN,
DANIEL J. BRENNEMAN,
45-4d Two of the Mortgagees.

ORDER NISI.
William Pearce vs. Richard Graham and wife.

No. 626 Equity, in the Circuit Court for Garrett County.
Ordered this 19th day of January, 1894, by the Circuit Court for Garrett County, in equity, that the sale of the property mentioned in the above report and reported by William Pearce, trustee, be ratified and confirmed, unless cause to the contrary thereof be shown on or before the 3rd day of February, 1894. Provided a copy of this order be inserted in some newspaper printed in Oakland, Garrett County, Md., once in each of three successive weeks before the said day of February, 1894.

The report states the amount of sale to be \$210.

H. W. HOFFMAN,
True copy, Test: R. Z. TOWNE, Clerk.

COMMISSIONER'S MEETING

OFFICE OF THE GARRETT COUNTY COMMISSIONERS.
OAKLAND, Md., Jan. 18, 1894.
The County Commissioners for Garrett County will meet at their office in Oakland on Thursday, February 8, 1894, for a hearing in Bond Case No. 120.
The appeal session commencing Monday, February 12. All persons wishing to take appeals on assessments shall observe the following days and dates by Districts and attend accordingly:
Monday, February 12, Districts 1, 4, 11 and 10.
Tuesday, " 13, " 2, 6, 5 and 3.
Wednesday, " 14, " 7, 8, 7 and 12.
All superior appeals consisting of less than one hundred dollars shall be heard and have the same filed in the Commissioners office before the above date.
By order of Board: J. S. MEYERS, Clerk.

EDUCATIONAL MEETINGS

—AND—
Teachers' Institutes.

OFFICE OF THE GARRETT COUNTY SCHOOL COMMISSIONERS.
OAKLAND, Md., Dec. 27, 1893.
Educational meetings will be held in Garrett County as follows:

Deer Park, January 25, 1894, at 7 p. m.
Cranestown, January 26, 1894, at 7 p. m.
Ashtown, January 27, 1894, at 7 p. m.
Scholey, January 28, 1894, at 7 p. m.

The public is cordially invited and urged to attend said meetings.

A Teachers' Local Institute will be held at each of the above mentioned places on the following day (Saturday) at 10 o'clock a. m. All teachers are expected to attend at least one of these meetings and as many more as they conveniently can.

The following are the programs for the said meetings:

DEER PARK.—Paper by Marion Leary, paper by Bessie Davis, grading and classifying by A. J. Kelso, teachers preparation by Howard Nethkin; topical talk, "Attention," by W. A. Smith.

CRANESTOWN.—Paper, Katie Thompson, paper by Bessie Davis, grading and classifying by W. H. McKenzie, the teacher out of school, Jas. W. Fitch; grading and classifying, Katie Percy.

ASHTOWN.—Language work, Virginia Hinge; how to teach reading, J. E. Miller; needs of Garrett county in public school work, John H. Englehart; what is the relation of the teachers' work to the development of character in the pupil, B. K. Friend; grading and classifying, E. C. Schuler.

SCHOLEY.—Primary work, Ann E. Riley; grading and classifying, Norval Speelman; value of county and local facilities, Jasper Hornblower; topical talk, "Attention," G. H. Frazier; reading, Brison Welch.

W. M. LUSHER, Secretary.

THE WHEELING INTELLIGENCER

West Virginia's Brightest and Best Newspaper.

1894 will be an eventful year in the history of the country. The Democratic party which for the first time since the war, is in control of all branches of the government, is pledged to revolutionary and radical policy. The proceedings of Congress will therefore be fraught with matters of the greatest public interest. The Intelligence will follow and daily report the great debates of the session. A new Congress and State Legislature is to be elected this year. The Intelligence will keep its readers thoroughly posted on the progress of this campaign.

All foreign and home news of the year will be faithfully chronicled in the Intelligence's large columns.

MEXICAN PENSION ROLL.

One Which is Not "Purged," and in Which There Are No Suspensions.

From the National Tribune.

On the Mexican Pension Roll there are the names of 15,315 survivors and 7,282 widows, and something over 3,000 cases were pending at latest reports. This makes a total of 25,479, or several thousand more men than the United States had in Mexico at any one time during the war.

These all receive either \$8 or \$12 a month.

Among the names are those of the widow of Gen. Samuel Cooper, a New Yorker by birth, who was Adjutant-General of the United States at the outbreak of the war, and used his position to aid the rebels in preparing for the struggle. He resigned his position to become Adjutant-General of the Southern Confederacy, and officiated as such until the rebellion collapsed. Mrs. Cooper has been drawing a pension since June 6, 1887.

The widow of Thomas J. ("Stonewall") Jackson, who was next to Lee the most popular commander of the rebel army.

The widow of Maj.-Gen. George E. Pickett, who commanded a division in the rebel armies.

The widow of Maj.-Gen. Gideon Pillow, who commanded a division in the rebel army.

The widow of Lieut.-Gen. A. P. Hill, who commanded one of the three corps of Lee's army.

The widow of Sydney Smith Lee, who was dismissed from the Navy for "going over to the enemy," and afterward became a Commodore in the rebel navy.

Brig.-Gen. Jas. R. Chalmers, who was Forrest's chief lieutenant.

Maj.-Gen. Dabney H. Maury, who commanded the rebel troops at the battle of Chickasaw Bayou.

Hon. S. B. Maxey, late United States Senator from Texas, who has been drawing his pension since May 27, 1887. He was a Major-General in the rebel army.

Hon. Jas. Z. George, Senator from Mississippi, who served in the rebel army as a Colonel. The number of his certificate is 17,214.

Hon. A. H. Colquitt, Senator from Georgia, who was a Major-General in the rebel army, draws a pension under certificate 19,199.

The widows above mentioned are of men who were educated at the Government's expense, and afterward fought to destroy the Government. They went on the roll at once, while last April there were pending the claims of 145,530 widows of Union soldiers who had not yet been able to get on the roll.

OUR WASHINGTON LETTER.

(From Our Regular Correspondent.)

WASHINGTON, Jan. 22, 1894.

The Cleveland-Hill feud has taken a fresh start and now promises to turn into a war of extermination. Hill appeared to be quietly allowing himself to be snubbed by acquiescing in the confirmation of the nominations of his personal enemies to federal offices until the Supreme Court. Then he began to prepare to fight back, ending with a knockdown blow for Mr. Cleveland by securing the rejection of the Hornblower nomination.

While Hill was receiving the congratulations of his followers, in and out of the Senate, Mr. Cleveland saw his opportunity for revenge and promptly took advantage of it by vetoing the New York and New Jersey Bridge bill, a measure in which Senator Hill and many of his most prominent New York henchmen were known to be deeply interested, some people say, in a financial as well as a political way.

Hill and his Senatorial supporters are not doing any talking for publication, about their plans, but when the Cleveland tariff bill emerges from the Senate the effect of their next blow will be visible to all the world without the use of a microscope. Republicans are enjoying the combat and are perfectly willing to shout "go it Cleveland, go it Hill" with sufficient energy to keep "em fighting.

The I. Democratic tariff "kickers" have one more week in which to try to amend the Cleveland tariff bill, and it will include the sugar, iron and coal clauses, to say nothing of the income tax, which they will try to attach to the tariff bill as an amendment; but if the result of their efforts during the last week is an indication of their voting strength their efforts will only result in talk; they have succeeded in securing only one amendment that was opposed by the Democrats of the Ways and Means committee—that making the free wool clause go into effect on the passage of the bill.

Ex-Minister Stevens gave some very interesting testimony to the Senate committee on Foreign Relations, on Saturday, concerning happenings in Hawaii during his period in office as Minister. He went over the whole business, frankly stating that he favored annexation and

showing that for that very reason he was so very particular in all his official acts up to the formation of the provisional government that the annexationists thought him opposed to them. It is almost amusing to hear of the anger felt by Mr. Cleveland and the cuckoo Democrats because of President Dole's plain language to Minister Willis concerning his intrigues with the ex-queen and his lack of frankness in dealing with the provisional government. If Mr. Willis had not deserved receiving such a letter it would perhaps never have been written.

The bond issue announced by Secretary Carlisle has turned the Populists and a majority of the southern and western Democrats in Congress into howling derisives, and wild and inflammatory talk is indulged in by them, some of which will be given an escape valve by the resolution of Senators Peffer and Allen which will be made the text for some speeches in the Senate this week.

Whether the action of Secretary Carlisle was a proper one is a question that year correspondents will not deal with at present, but there is no doubt of its legality, even putting the strictest construction upon the authority conferred by the act of 1875. That act authorizes the issue of bonds for the purchase of gold for the redemption of Treasury notes. Of course everybody knows that this bond issue is really to get money to meet current obligations, the democratic tariff policy having resulted in causing the revenues to fall below the amount needed, but it must be plain to the humblest student of finance that it will be a very easy matter for Mr. Carlisle to comply with the letter of that act by having his friends, the Wall Street bankers, present Treasury notes for redemption in sufficient amounts to require all the gold received from the sale of bonds, thus leaving him the Treasury notes to pay the expenses of the government. True, there will be a little trickery about such a plan, but that will be nothing new from the Democratic administration.

Representative Tom Johnson, of Ohio, who glories in being a Democrat-Free-Trade-Monopolist, still very much in favor of protecting the personal interest of Tom Johnson. He makes steel rails, and in an attempt to monopolize the manufacture of these rails he was recently defeated in the courts by other steel rail manufacturers.

Having substantial protection for the rails made by his company, through the ownership of a number of patents, he tried to destroy the business of his rivals by offering an amendment to the Cleveland tariff bill, to put steel rails on the free list, an attempt in which he failed, thanks to the exposure made by Representative Dalzell of Pennsylvania, and to the solid Republican vote in the House.

The House committee on Pensions has made a favorable report on a bill repealing the law that prohibits the payment of a pension to any person who voluntarily engaged in or aided the rebellion against the United States.

Bayard.

The mills along the line of the W. Va., are running on three-quarter time; tanneries are running full time at Gorman, Bayard and Davis; miners have been cut 5 percent, on the ton at Coketon and Thomas; drivers' and day laborers' wages have also been reduced.

A fire occurred at Parsons, W. Va., on Thursday of last week. The fire caught in the "Parson City Hotel," from a defective flue and five or six other buildings were consumed. There being no water works in the town the flames could not be checked, and the fire continued until it completed its course of destruction.

While tramping along over the rugged W. Va., I occasionally met with some of our Oakland people. On Thursday of last week I met at Thomas our hustling dry goods and notion drummer, Mr. Chris. Feltz and also the auction and racket man, Mr. Jno. Shartzer, who had been at Parsons and was on route for home; while at Bayard I met with a former Oakland druggist, Mr. Wm. Nydegger, who is engaged in the same business here.

TRAVELING MAN.

North Glade School.

Notwithstanding a considerable amount of sickness, we herewith make the following favorable report for the second month of school:

Scholars present every day: Maggie, Bessie, Etta and Willie Fitzwater, Harry and Mattie Garlitz, Estella Baldwin, Estella Hamill, Elsie Howell, Noella Pitts, Annie Custer and Willie Williams; enrollment, 42; average, 34; average first month, 31.

Examiner Hinebaugh visited our school recently and gave us some good advice.

Geo. W. Moon, Teacher.

R. H. McDONALD & CO.,

Druggists and Chemists, San Francisco, California, and cor. of Washington and Charlton Sts., N. Y.

Sold by all Druggists and Dealers.

From Two Garrett County Boys.

ST. JOHN'S COLLEGE, ANNAPOLIS, Md., Jan. 19, 1894.

At a meeting of the Senior, Junior and Sophomore classes held in McDowell Hall, St. John's College, on Monday evening, the 9th instant, the following resolutions were adopted:

WHEREAS, The practice of "hazing," which has so long been a feature of the inner life of St. John's, has been shown to be highly detrimental to the progress and welfare of our Alma Mater, apart from an amount of indignity too often inflicted upon the sufferer, and as we believe that the students should in all cases do all in their power to further the prosperity of the college, since it is to the college that they look to supply them with many of the guiding principles of their life's career; therefore,

Be it resolved, By the Senior, Junior and Sophomore classes of St. John's College, in meeting assembled, that hazing in every form or kind shall cease to exist within the precincts of St. John's College, and that everything will be done to suppress the continuance of this practice, if it be again attempted.

True copy, Roy H. Snyder, Secretary.

This hazing has been indulged in by the three classes above mentioned for many years. While it was not considered as a great evil by the students it was found to be injurious to the growth of this institution. The "Knights of the Slat" had attained quite a wide reputation by the artistic manner in which "Freshies" were frescoed, made to chase smiles under the table, make love to chairs, etc. After the student becomes familiar with the college life he looks at hazing from a different point of view. He sees its good points as well as its bad ones. Many boys, we believe, have been kept away from this institution through fear of being hazed and on account of this, it was thought best to abolish the custom. However, the present "Freshman" class is larger than it has been for many years. They can now lie down at night with a reasonable assurance that their slumbers will not be disturbed and no longer need to dread the worst summons of the "Grand Order." Of course the distinctions between the classes will remain the same as before and the "Sophies" will still continue to consider it their exclusive right to keep the Freshman in their respected places.

H. H. SHAFFER, '96.

C. ELLWOOD OFFUTT, '97.

Sharpsburg.

Please allow me space in your valuable columns for a few items from this quiet little village.

Weather wet and cold.

Mud knee deep.

Roads almost impassable.

Joseph Beeghley, our good carpenter, just finished Jacob Mosser's wagon shed.

Masters Asa and Ernest Beeghley expect to take a trip to Buffalo Run before long.

Our hustling farmer, Jno. Spoerline, whipped out a piece of his wits.

Hiram Bowser is talking about building a commodious barn next summer.

Misses May and Ada Beachy were the guests of Jonas Beeghley last Sunday.

Jacob Beeghley was attacked with the grip last week. He said it gripped him hard.

Joseph Beeghley is making preparations for building a house.

Democratic hard times struck things hard at this place.

Popesville.

The recent rains have kept the roads in very bad condition.

G. W. Blocher has purchased a valuable horse.

Winfield S. Durst and family were visiting at Henry Blocher's Sunday last.

Charles and Scott Layman were the guests of Peter Pope Sunday evening.

George Pope, sr., has taken a contract of grubbing for T. H. Layman.

Our school is progressing nicely under the care of E. E. Friend.

Mrs. Catharine Smalley is on the sick list.

Farmers of this vicinity are very busy hauling lime, regardless of the muddy roads.

J. J. Michael is attending protracted meeting at Savage River.

Charles Chaney visited G. W. Blocher's Sunday past. His coming is always hailed with delight.

W. L. Turner made a business trip to Frostburg last week.

CASTORIA

for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. ANCKER, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTELL, D. D., New York City.

THE CASTORIA COMPANY, 77 MURRAY STREET, NEW YORK CITY.

Castoria cures Colic, Constipation, Sour Stomach, Diarrhoea, Eruption, Kills Worms, gives sleep, and promotes digestion. Without injurious medication.

"For several years I have recommended your 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results." HOWES F. PALMER, M. D., 1804 Street and 7th Ave., New York City.

SINCELL BROS' New Year's Greeting.

Any Dress or Apron Gingham on our shelves at 7 1/2 cents per yard.
Piedmont Unbleached Muslin at 7 cents per yard.
Best Bleached Muslin at 9 1/2 cents per yard.
Good Bleached Muslin at 7 cents per yard.
Good Sheeting at 10 cents per yard.
Toweling at 4 cents per yard.
Four pairs of Ladies' Hose, the best in town, 25 cents.
Three pairs of Men's Hose, the best in town, 25 cents.
Cashmere, Crapons, Hop Sacking, Henriettas and Ladies' Cloth, 18 cents to \$1 per yard.
Best Merino Underwear for men and women, 40 cents per piece.
Extra Good Red Flannel Shirt and Drawers, 80 cents each.

Ladies' Men's and Boys' Shoes at ANY PRICE.

\$5 PANTS FOR \$3.50
3.50 PANTS FOR \$2.

Extra Heavy Jeans Pants Lined Throughout, only \$1.

These pants are guaranteed and if a button pulls off we will refund you your money.
Men's and Boys' Hats for a mere song.
Granulated Sugar, 5 cents per pound.
Flour, from \$3 to \$5.25 per barrel.
Best Brooms in town for 25 cents each.
Rice, 5 cents per pound.
Navy Beans, 4 cents per pound.
Tea, 25 cents per pound.
3 cans of Tomatoes for 25 cents.
3 cans of Corn for 25 cents.
Pears, per can, 18 cents.
Peaches, per can, 18 cents.
We have some Fine Queensware and Glassware which we are selling at a sacrifice.
We mean to sell goods and you can save 20 per cent. by buying of us.<

THE BLUES CURE.

What the Great Golden Remedy Did for the Patients.

There was a Water cure, a Rest cure, and a Mind cure in the same town; but all three together did not do half the business of the Blues cure. In fact, those three establishments complained bitterly that the Blues cure took away many of their patients. They did all they could to crush it out; they declared it to be a humbug, a mere quack, and with its mysterious "Great Golden Remedy."

In truth, there was a mystery connected with the Blues cure. It was in no respect something like the Loistete Memory system, for every patient had to sign a bond that he would never reveal to anyone the secret of the "Great Golden Remedy." But, in spite of this, the Blues cure prospered extraordinarily, and people thronged to it from far and near. The Blues cure could proudly affirm that in all its career a case had never been lost.

The Blues cure office was a small, sunny room opening from a large, cheerful waiting room.

One fine October afternoon the clock was just striking three as the doctor, accompanied by a patient, entered the office and closed the door behind him.

The doctor was a jolly little man with a bald head, and a beaming smile so much like sunshine that on rainy days his great black cat would stretch herself out before him, as though she were really warming herself in its beams.

The patient was a tall, thin theologian, with a lugubrious expression of countenance, suitable for a chronic attendant of funerals.

"What's the matter?" said he. "I am subject to depression of spirits," replied the theologian, with a deep sigh that roused the black cat from its slumbers.

"When do these attacks come on?" said the doctor, looking at him with half-closed eyes, as an artist surveys a picture.

"Every evening," replied the theologian, "I use my eyes then, and I fall to thinking of my theological questions, and I get extremely down in my spirits."

"What kind of questions?"

"Oh, the most important and interesting which can stir a man's mind," said the theologian, with such unworldly animation that the black cat again was startled. "Whether Moses wrote the Pentateuch; whether the Levitical code came in with Ezra or before; the doctrines of original sin, future probation, and many others. I am so upset in my old ideas (for I was taught to question anything about such matters) that I get terribly blue."

"Oh, ho!" said the doctor, jumping up and feeling a little gilt box from a table. "I see what you need! You must drop your studies for a time and devote yourself to taking this great golden remedy. Follow the directions as if your life depended on it and you'll be cured of the blues."

"Is that all?" said the theologian, in astonishment.

"You'll find it enough!" replied the doctor, as he showed him the door.

"Next!" he called through the ante-room door, much as a lecturer directs his assistant to throw the next picture on the screen.

In came a young woman of perhaps seven and twenty, attired according to the latest fashion.

"Oh, doctor, how can I get over the blues?" she asked, in the jerky, chopped-off, broad-A style of enunciation so fashionable among feminine "blues."

"What gives them to you?" said the doctor, looking at her with a magnifying glass, as if to see to what genius she belonged.

"My looking glass," frankly answered the young woman. "It shows me that I'm getting plainer every day. I've got three gray hairs and one crow's foot."

"Well, what of that?" asked the doctor.

"What of that?" repeated the patient. "It shows I'm growing old, and that's enough to make anybody blue. There are lots of 'buds' coming out every year in society, and I'm getting to be one of the old girls. I just hate to be an old girl and be laid on the shelf. I had an enormous time at my last ball, and life isn't worth living, and I'm sick of it."

"Humph!" said the doctor. "We'll cure you, if you will obey me implicitly. You must follow this prescription faithfully. Take the Great Golden Remedy whenever you feel the symptoms coming on, and you won't have a single blue."

So saying he handed her a little gilt box like the one he gave the theologian, and she too passed into the street.

Next came a widow buried in crepe.

"Well, Mrs. Hellet, I suppose you've come to report?" said the doctor.

"Yes," replied the widow. "The Golden Remedy has worked wonders with me. I thought it would be so low at first. I persevered, and it has done me an enormous amount of good. I've slept and eaten as I haven't since John's death."

"You've given up reading your letters of condolence and wiping your eyes, then?" said the doctor.

"Oh, yes!" said the widow. "I don't have any time now."

"How often do you take the remedy?"

"Oh, nearly all the time," she replied. "If I go an hour without it, I get to thinking about John and how I miss him, and it gives me the blues terribly."

"Well, keep on the same way," said the doctor, heartily. "Keep it up."

No sooner had the widow departed than in came a pale young man.

"What gives you the blues?" said the doctor, with one of his most sunny smiles. The cat left the window and stretched herself out in front of him.

The young man hesitated in answer-

ing this question, but as the doctor pressed him he finally admitted the cause.

"I can't help thinking about myself," said he. "When I go among people I am pursued by thoughts of my own awkwardness and stupidity and am keenly sensitive to every little slight. This shuts my mouth and makes me doubly uninteresting, and naturally people don't enjoy me; and then I come home and brood over it, and it really seems as if everybody were laughing at me, and I get as blue as indigo."

"Yes, you're right," said the doctor; "it's an aggravated case of morbid self-centeredness; but if you take this Golden Remedy every time you get to thinking about yourself, and take large doses of it when you are in company, you'll be cured as sure as fate."

The young man looked incredulous as he took his little gilt box and his departure, and went his way.

"Oh, doctor!" said the next, a poor little dressmaker with so sad a voice that the black cat again retired to the sofa. "I'm so blue! When I get through my work and sit alone in my little room evenings, I feel so lonely I'd most like to kill myself. I haven't a relation or a friend in all the town, and it's something dreadful to have no one to turn to, nobody to say good night or morning to you. Why, sometimes I kiss my own arm, I feel so desolately lonely!" and she burst into tears.

"Poor thing! poor thing!" said the doctor, in a cheerful voice, as if he were saying, "Fine day! fine day! We'll fix you up." Now, my dear, just follow the directions in this little gilt box whenever you begin to feel lonely; and take a specially large dose in the evening when you come home from work."

The young girl smiled a feeble little smile as she thanked him for the box and left the room.

"What in the world is the matter with you?" inquired the doctor of his next patient, an elegantly-attired young man, who looked as sleek and well-to-do and as intellectually as a well-fed, well-curved horse.

"I'm bored to death," drawled the young fellow. "I was so bored with balls and parties and racing and cards and shooting and theaters and everything else in that line, I was positively sick of it. I had the blues; for it was a new sensation. But I've had them so long now, I'm bored with them, too, and I've come here to get cured."

"Well," said the doctor, looking at him through his magnifying glass till his patient actually blushed, "you'll find my remedy so hard to follow it will be like drawing teeth; but I can assure you it will be a new sensation, and if you stick to it it will cure even you."

"I'll take it at my price!" said this afflicted representative of boredom.

"No price," said the doctor, "except secrecy. The remedy does no good if anyone else learns that you are trying it for such a purpose."

The young man signed the bond, and departed with a more animated expression on his blue countenance, and a small gilt box in his pocket.

The next arrival was an invalid in a rolling chair. Her pale face beamed with pleasure.

"Oh, ho! So you're back! Remedy don't work?" said the doctor, knowing better.

"I should think it did work," she answered, gravely. "You know how long the days were as I lay in my bed or sat in this chair, knowing I could never take a step, and brooding over every ache and pain. Well, now the days are not half long enough to do all I want. The remedy has given me so much to do, and made life entirely different to me. How can I thank you, doctor?"

"Behave, child!" said the good man. "Don't thank me. It's the remedy. Keep it up; just keep it up."

Next came a very intellectual-looking young woman, who had obtained a degree from a university. She complained of a lack of interest in the studies to which she devoted her life for the cultivation of her mind, there ran an undertone of melancholy which, whenever she stopped work, culminated in an attack of the blues.

As usual, the doctor dispatched her with his universal prescription, and also the other half dozen patients who called that afternoon. One was a man made miserable by his own selfish jealousy of any attention paid his wife. Another got the blues because she was so discontented with her husband, and she devoted her life for the cultivation of her mind, there ran an undertone of melancholy which, whenever she stopped work, culminated in an attack of the blues.

At last the clock struck six, and the doctor closed his office door and settled himself comfortably by the fire. The black cat jumped up in his lap, and the doctor took one of the mysterious little boxes from the table. As he, in an absent-minded way, removed the cover, a little paper fluttered out. Not a pill nor a powder was to be seen, and the Great Golden Remedy consisted only of the little paper, which were printed in golden letters these words:

WHENEVER YOU ARE FEELING BLUE, SOMETHING FOR SOME ONE ELSE GO DO.

"How silly people are!" said the doctor to himself. "They travel miles to get here, take no end of trouble, sign that bond and all that nonsense just to get what they could have learned from the book of the Great Physician. The idea is dressed up in a poor rhyme and a gilt box, and there's a mystery about it, and it's the fashion to come here, and all the world is running after my Great Golden Remedy." And the black cat switched her tail and said amen, as well as she knew how.—N. Y. Independent.

—During the years from 1835 to 1850 poisoning by means of arsenic became so common in England that parliament in 1851 passed very stringent laws regulating the sale of this poison.—Philadelphia Record.

MISCELLANEOUS.

—Mullhall says that of our national wealth \$31,150,000,000 are owned by native born Americans, being over six-sevenths of the whole.

—What a queer boy that is of Tompkins! "Yes, Tompkins says his boy is the only symptom he has of paresis."—Harper's Bazar.

—Tetrahedron read and wrote day and night. On the table where he dined and by the side of his bed pen and ink were always ready.

—What is your daughter's dowry? asked Jimpon. "Just about enough to pay the gas and fuel bills of your courtship period," retorted the cautious father.

—Harmony of Color.—"Palette"—"No Smoore got mad when you criticized his picture. I suppose he got red in the face, as usual?" Danber—"No; madder."—Truth.

—The translation of Quintus Curtius by Vaugelas occupied thirty years. The translator rendered every sentence five or ten different ways and finally chose that which pleased him best.

—A value containing the manuscript of a sermon was lost by an express company. The owner, a Chicago clergyman, made claim for the value of the sermon and received \$417.

—The largest fresh water lake is Lake Superior. It is 400 miles long, 160 wide, and has an area of 32,000 square miles, or about half that of Missouri. Its surface is 634 feet above sea level.

—A Clear Case.—Mrs. Farmer—"I think that young man from the city is trifling with our daughter." Mr. Farmer—"I'm sure of it. He's the most trifling man I ever saw."—Detroit Free Press.

—Drapers and others, showing window goods liable to lose color by fading are advised to put yellow colored glass in their windows, as the bleaching is caused by the white rays of the sun's light.

—Some ingenious burglars, while blowing open a safe at Lehigh, Ill., closed a big stick of dynamite that the explosion started the town. Everybody seemed to have been awakened, and the burglars were easily captured.

—The most wonderful machine is that which makes pins. It measures a reel to make up one morning and it had the blues; for it was a new sensation. But I've had them so long now, I'm bored with them, too, and I've come here to get cured."

"Well," said the doctor, looking at him through his magnifying glass till his patient actually blushed, "you'll find my remedy so hard to follow it will be like drawing teeth; but I can assure you it will be a new sensation, and if you stick to it it will cure even you."

"I'll take it at my price!" said this afflicted representative of boredom.

"No price," said the doctor, "except secrecy. The remedy does no good if anyone else learns that you are trying it for such a purpose."

OLD-TIME FURNITURE.

What Capt. Kidd Ate From Sat and Slept On.

Up to the time of the revolutionary war there were no carpets on the floors of the houses in New York City. At least, there were so few, that it may be said there were none without much exaggeration. What few there were, in the houses of the wealthiest citizens, were curiosities, and the citizen of moderate means would as soon have thought of keeping a private balloon for his travels as of buying a carpet for his hall.

Sand was sprinkled over the floor, and the host, that were fastidious, but as it was from this there was no objection.

It was not until the modern carpet came into use that all to the drug store, which was a sort of state, because of the presence of the guests, the table would be laid under the table to it, and the table would be carefully secured and was a expensive piece of furniture, which was invariably and its appointments, the modern sense, was said in the handsomest bed room in the house.

The sleeping room of the household. The bedsteads were of wood, as costly as the purchase of the owner would permit, and commonly of the old four-post kind. It was not, however, until the luxury of England had modified the simple customs of the Knickerbockers that such a thing was known as the mahogany bedstead, with carved wood ornaments—eagle's claws, and the like. Before that expensive woods were used and the carving was unheeded.

It is well known that our ancestors deemed it almost essential to have curtains inclosing their beds. A canopy over them as they slept, and from these depended the curtains which in earlier times were of "killdeer" material, and later of "sarsnet." The cost of a full set of these was often as much as twenty-five or thirty dollars. The feather pillows were covered as to-day with cases which were usually of a check or other fancy pattern. Later, silk curtains, silk bedsteads, silk coverlets, and pillow-cases came in vogue, and the most extravagant of the aristocracy would spend as much as two hundred dollars on the entire outfit of a bed. In early times, or before the accession of the English, the prevailing custom was to have between two feather beds of different sizes, the larger being underneath and the smaller and thinner one being used for a cover. A small rug in front of the bed was the usual substitute for the modern carpet in the bedroom.

Bureaus were unknown. Among the earliest settlers there was not even known any such thing as the chest of drawers. Chests, or boxes of expensive wood, handsomely finished, were used by the Dutch housewives, in which to store their household linen, and which, as the Dutch name, the bureau, seems to be a thing of evolution from this, the change beginning with the fashion of storing one chest upon another.

A sideboard, as it is now called, is the modern incarnation of one of the principal articles of furniture in the houses of the olden time. Our ancestors called it a cupboard, and this ancient composition of substantives has come in time a word, used as the name of any small apartment used for the storage of small things. A cupboard of the forefathers was as such thing as the "cupboard" of to-day. It was a leading article of furniture in the domestic. It stood in the parlor, when there was a parlor. When there was no parlor it adorned the principal corner of the kitchen. It was usually made of what we now call French walnut. They called it, aforesaid, French nut-wood. It was made in all styles. The more ambitious pieces had glass doors. All had shelves of wood, on which were displayed the best dishes of the household, which they were of silver, pewter, china, delft, or the commonest earthenware. The best of these cupboards were built so well that they remained in a family from one generation to another, and became time-honored as family relics. In the hands of some few of them are still extant, and are known among dealers in "antiques" as "Holland cupboards."

Later than this—in fact almost a modern thing, by comparison—was the "scrutator." It was a chest of drawers underneath, with a folding lid that could be used as a desk. Two solid bars were made, which slid in and out, and which served to support the lid. The upper structure was a small bookcase, simple then to hold all the books of the average household. These pieces are to be found to-day in a great many New York houses.

Tables were formerly used only for the purpose of holding things to eat and drink. Even after the Dutch New Yorkers were supplanted by the English there were none of the various tables which are now used. It was not until 1720 that there are any mentions made in the old chronicles of the subsidiary tables. Before that all that which stood in the great dinner table of the house for use at meals. It had what are now called folding leaves, which hung down perpendicularly when not in use to the floor, and which were propped up by moveable legs when it became necessary to enlarge the table.

In 1720 there was imported from Europe the fashion of having small tables. These were of jappanized wood, and were used first for the tea service. Later, and the smaller tables were used almost of necessity, to provide facilities for the new form in which the old vice was flourishing.

In regard to chairs it is only necessary to go so far back as Valentine to get a good account. He says: "The best kind of chairs in the times of the Dutch were those of Russia leather, which were adorned with brass nails in double and single rows."—N. Y. Times.

HOMEMAKING.

The Duties of the Wife in the Domestic System.

Virtues, like roses, have thorns that protrude and promote discomfort, piercing when and where you are unprepared. The virtue of homemaking may be sadly marred in various ways. Every woman knows in her inner consciousness, to just what extent her home is a burden. If she carries it on her shoulders, as Atlas did the world, she is then battling with one of the opposing forces which fate stations at every corner ostensibly to thwart her designs. Home should be a haven of rest, a resort to which we may all repair to escape the conflict and strife of the outside world. It should be a place where everything is free and everyone in it should be individualized and the motto should be "unity in diversity."

The woman who works about in the pocket measure of home all day, seeking only the diversion which one duty acting as a foil to another duty can furnish, is on the wrong track. She is growing a thorn on the rose of virtue, turning of itself which will one day pierce her heart. She will feel a pang when her children tell her she is behind the times, for in the minds of the progressive young iconoclasts of the day the quality of selfishness. It won't do for the mother to be a monopolist in this matter of selfishness.

It is a demonstrable fact that the woman who is thoroughly absorbed in her home, living for a domestic system, chasing the aspects of dust, plodding along like a plow horse in the same groove her mother and grandmother did before her, is not the woman who instills into her children the greatest love of home. Selfishness is a maternal monopoly is a very dirty thorn on the virtue of homemaking.

The mental, moral, physical and financial slavery of mothers to children is another thorn. There is a distinction to be made between devotion and slavery. The tendency of the American woman to lose sight of her duties of self, allowing herself to be absorbed in the capacity of mother, is one of the forces that threaten to undermine our social and domestic system. England has a race of home-loving people, and the world over there revolves for the grown-ups more than for the children live in a nursery, and the boys go away to school, and reunions are a feature of the annual round of events. Individual interest in things without the home is a great element to the bond within it. There is a woman in this city who has put her children to practical execution by sending the children to different places in the summer time for their outing. Each child has a well-selected friend, and in pairs they separate, one to the mountains, one to the seashore. They are glad to go and infinitely happy to return, and then such visiting as there is and such relating of experiences! It takes a year to tell all they have absorbed.

Too much of home is an abomination. Freedom in it is the all-to-be-desired quality. Freedom in it is more apt to generate self-respect and self-reliance outside of it than subjection to automatic rules of method and system that vie with the old-time laws of the Medes and Persians.

The mother of all persons, has the least right to become self-centered. Concentration of thought and energy is to a certain degree necessary to the success of the home, but that the mind of the mother be in a receptive state to outer conditions and events is equally essential. The home must not be a fortress, but a place to expand, for the world needs it. The circumference of love which does not penetrate beyond the four walls of home is a negative force which militates against the science of home-making.—Baltimore Sun.

LIFE HISTORY OF CORALS.

The Process by Which Massive Great Islands are Created.

To Reannur is due the improving legend that coral islands are built by the accumulated efforts of an industrious insect. Pliny, in like manner, quite gravely records the ancient belief that a little sucker fish could hold a ship against the impelling violence of a storm, and apostrophizes the deplorable vanity of mankind when confronted with the fact that their armored vessels could be held bound and immovable by a little fish six inches long! The wonder of nature is not only real, but the imagination embellishes it.

The life history of corals is sufficiently remarkable in its sober facts. Like other animals, they produce eggs, from which free-swimming young are hatched. They have two other methods of propagation—namely, gemination and fission. Between animals and plants in general there is no distinction which makes itself more prominent and obtrusive than the free individual life of the one and the fixed colonial life of the other. By gemination, the successive putting forth of buds, an industrious vegetable, starting with a seed of insignificant size, may build a massive structure, sometimes four hundred feet in height, the result of individuals almost immovable, belonging to hundreds or thousands of generations, all of them the living members of a single family, successively sacrificing their individuality to promote the common good and to share it.

This procedure in plant life is illustrated by an endless diversity of examples, great and small. Whatever exceptions there may be, this, to the ordinary observer, is the customary, the commonplace, the distinctive habit in the vegetable kingdom. Thus it came to pass that those did not believe in animals behaving in a way that seemed to be the patent right of vegetables. The isolated sea anemone was well understood, but creatures of precisely similar structure, which took to sprouting out of stems and branches, had been inconspicuously handed over to the botanist.—Edinburgh Review.

SCIENCE AND INDUSTRY.

Pig Iron Production Increased in November to Nearly 100,000 Tons Weekly.

—Pig iron production increased in November to nearly 100,000 tons weekly, nearly 25 per cent., and nearly 50 per cent. since September 1, when capacity of furnaces in blast was lowest—about 74,000 tons. Present production of pig iron at 47 per cent. less than it was one year ago.—Baltimore Sun.

—A pound of rice is shown by chemical analysis to contain 86.00 per cent. of nutritive matter. The same quantity of wheat contains 82.54 per cent.; rye, 82.79 per cent.; oats, 74.2 per cent.; corn, 82.07 per cent.; potatoes, 23.24 per cent.; fat beef, 40.03 per cent.; lean beef, 25.83 per cent.

—Late photographs of the moon developed by the astronomer photographer of the Pech Astronomy exhibit some unaccountable peculiarities. The plate shows hundreds of walls or embankments, seemingly about 200 feet high and from 125 to 300 yards in width on top. They run parallel to each other and appear to be from 1,000 to 1,300 yards apart.

—Add a half-ounce of ammonia and a half-ounce of alcohol to a cup of sea salt, and mix these ingredients with a quart of hot water. Bottle the whole and let it stand for a day. When you wash use a little of the liquid with the water in the bowl. Sponge your skin well, and you will be surprised at the revelation, however clean, apparently, the skin was before.

—Vice President Hartshorn, of the Lehigh Valley railroad, has prepared estimates to be submitted to the board of directors, showing the losses occasioned by the strike. He estimates the total loss at from \$700,000 to \$800,000, while Vice President Sayre fixes the loss to traffic alone at \$1,000,000, in addition to the damage to property, which is variously estimated at from \$400,000 to \$600,000.—Pittsburgh Chronicle Telegraph.

—Traffic through the "Soo" canal increased enormously this year, although the season was twelve days shorter than in 1912. Fewer vessels were locked. Going east are recorded 7,480,474 barrels of flour, a gain of 51 per cent.; 35,451,633 bushels of wheat, a gain of 8.5 per cent.; 588,543,000 feet of lumber, a gain of 15 per cent.; 87,560 net tons of copper ore, a gain of 24 per cent. Coal went west to the extent of 3,008,000 net tons, an increase of about 3 per cent. over 1912.

—The experiments made by the United States Fish commission have established the fact that forms of sea-life inhabiting the upper waters may be used to about 1,200 feet below the surface. Below this level for from 300 to 350 feet is a barren zone in which no manner of life is found. But still deeper there he found an abundant and varied fauna, new to science, living under conditions of tremendous pressure and paucity of the life-sustaining elements of oxygen.

—The modes by which moths escape from their cocoons vary. Mr. Latimer, according to Nature, that the puss moth produces, probably from the mouth, a solution of caustic potash for the purpose of softening the cocoon. The solution was obtained for analysis by causing the moth to perforate artificial cocoons made of filter paper. In commenting on these results Prof. Meldola said that the caterpillar of the same moth secretes formic acid, and that the fact that any animal secreted a strong caustic alkali was a new discovery.

—Two French scientists say that a current of electricity does not always kill when it appears to do so. It simply produces an appearance of death, from which the subject may be restored by artificial respiration. In commenting on this statement, the New York Gazette suggests that this may be the case with the criminals who are executed by electricity in this state, and that they are really killed not by electricity, but by the doctors who afterward make an autopsy on them.

—After receiving a shock of 2,500 volts and twenty amperes, a shock more powerful than is given in the execution of murderers.

—Interesting psychological experiments by the aid of a mechanical apparatus are in progress at Yale. Heretofore all the experiments performed have been upon persons laboring under hallucinations, confined to the sense of temperature. As soon as apparatus can be provided persons subjected to hallucinations of hearing and sight will be experimented upon, and thus a new field for original investigation opened. Again, people under abnormal conditions will be treated, such as persons thoroughly hypnotized or asleep, or insane persons, the latter including those suffering from monomania and kindred mental states, which have always baffled medical science. Dr. Scripture and his corps of assistants will continue their investigations in this line throughout the year.

Riding Down a Wolf.

It has been often noticed in India how fast a wolf travels by means of a lounching, loping trot, that is by no means suggestive of speed. While one gallops after it as hard as a good horse can go, the wolf pursued, never apparently hurrying, llops along at a pace that equals that of the following steed. I have heard it said that no horseman ever rode a wolf down, but in this statement I must demur, inasmuch as I have done this thing. Perhaps my horse was sick. Be that as it may, I did, when out pig-sticking in the Gangetic country over against Calcutta, follow a wolf, and that wolf turned sharply and closed with it, and the horse I rode (a rare good one), kicked it over with his fore feet, and made the matter of spearing my wolf simplicity itself. One of my companions of that day found explanation of this performance in the fact that I had ridden another man's horse with my own spurs.—Blackwood's Magazine.

The Monkey's Side.

—First Monkey—Did you hear those explorers conversing just now?

—Second Monkey—Yes.

—I wonder if we could manage to learn their language?

—I am sure we could. But where's the use? They don't look to me as if they had any ideas worth communicating.

—Washington Star.

February Forecast, 1894.

The month is most likely to open fair, attended by a relaxing temperature which will grow in warmth till the disturbing forces culminate in storms; in the east the cold snap starting at the closing of January will still be holding a tight rein, and in the west storms will be in process of organization. From the 2nd to the 9th threatening conditions of weather will prevail, which will be attended by storm paroxysms that may form daily repetitions through much of the period. Rain, sleet and snow will materialize—however, not in excessive quantities. About the 6th the weather will clear, when some freezing and excessive white frosts, freezing all objects within its touch with its silver like gems, will prevail. Threatening weather will be renewed about the 7th, 8th and 9th, attended by rain and snow, and then a cold wave will follow the last section of the storm train. About the 12th the weather will soften and grow warm, with storm manifestations in sight, which will center on the 14th, then another cold snap will follow about the 15th or 16th, which will hold its grip to the next period of storms, which will center on the 20th, which is likely to manifest much rigor in the sense of cold in the west and north, whence the disturbance will reach the proportions of a northern blizzard. The last period of storms will be from the 25th to the close of the month, which will make its exit in ice. February is not likely to be so interesting a month as January has been to many of our citizens, except coal merchants. Storms of more violence, magnitude and wider spread are likely to be realized in February than were in January. Much of March will see cold weather, especially the first part, while the latter part will be changeable and wet.

P. R. SMITH.
January 20, 1894.

A Test of Civilization.

Not simply comfort and convenience in the daily intercourse of social life, but economical considerations of vast importance are involved in the question of improved roads throughout our country. The most cursory study of statistics showing the distance over the average wagon roads of our country through which a load of wheat will pay its own transportation is a convincing object lesson to any man concerning the wealth producing, labor saving, food cheapening effect of good roads. A farm 12 miles from a railroad station in a district with good roads is worth more than one equally good three miles removed from the railroad where the roads are as bad as they are in many farming districts where the land is rich.

Civilization has been well defined as the "aggregate manifestation of the mastery which mind has attained over matter among a given people at a given time." This definition will bear careful thought and a few physical tests more immediately indicate the degree of civilization which a community has reached than does the condition of its streets and roads.—Merrill E. Gates, President Amherst College.

Co-operative Roadmaking.

The system in New Zealand of constructing roads is by what are called co-operative contracts. In these a small party of men, generally six in number, is allotted a certain section or length of road; one of them is elected a "gauger" and trustees for the others to deal for them with the government. The government engineer states a price for the portion of work, and as this is done by an unprejudiced officer it is generally accepted without a murmur by the men. The results usually have been very satisfactory. Progress payments are made fortnightly for the benefit of the men's families, and the whole amount is paid up in cash on the work being passed by the engineer. It is the intention of the government to provide small farms of 10 or 15 acres each for these workmen in village settlements so that they may be induced to make their homes in country districts and thus in some degree neutralize the centralizing tendency of modern industrial life.—Pall Mall Gazette.

Pine Grove.

Not seeing any items from this place, I will write the happenings of the past week.

Mrs. Lucinda Sines and Mrs. Susan Sines last Saturday.

Mrs. Resa Lewis was visiting at J. G. Sines' Tuesday.

Mr. and Mrs. Marshall Sines were visiting friends at Swanton Saturday and Sunday.

Misses Mary and Hattie Johnson made a flying trip to Sang Run on Tuesday.

Mr. and Mrs. Samuel Sines are visiting friends at Maple Glade.

Mr. J. C. Yost returned from Pittsburgh Monday evening.

Mr. David Savage and wife attended church here last Sunday.

FIRST BLOOD AT SHILOH.

THE SIXTEENTH WISCONSIN IN THE ALL DAY FIGHT OF APRIL 6.

Wisconsin Pickets Opened the Battle and Gave the Alarm—Stubborn Defense of the Camp—Brilliant Work of the Regiment at Corinth and Atlanta.

(Copyright, 1893, by American Press Association. Book rights reserved.)

Rank of the Union Army of the Tennessee.

The plan of the enemy was to turn the left flank of Grant's line and roll it up to the right, hence he began on Prentiss' division, at least, was not caught napping, neither were his men. On the evening of the 5th, Saturday, he doubled his guard and sent out pickets a mile or more to the front.

Among the pickets were four companies of the Sixteenth, under command of Lieut. Col. Cassius Fairchild. Before daylight on Sunday, the 6th, the pickets reported on the line, and the enemy was seen. The pickets were in a line to reconnoiter. Seeing some cavalry at a distance they moved toward them, but the skirmishers, on approaching a rail fence, were startled to see behind it, hanging the pickets, a full line of Confederate troops ready for battle. The Confederates opened fire and the captain and orderly sergeant of a company of the Sixteenth were killed. The Confederates evidently belonged to the Second Arkansas, of Hindman's division. Two companies of the Twenty-first Missouri (Union) were on picket with the Sixteenth, and may have participated in the skirmish, but the record is clear that the Wisconsin men suffered at the first fire in that much disorganized battle. They got in early, and they stood and fought on long and hard, and their losses in killed and wounded exceeded those of any other regiment in Prentiss' division.

On receiving the fire of the enemy Col. Fairchild marched his men back, and with some reinforcements the enemy was detained in his advance until Prentiss got his troops in line to defend his camp. The Sixteenth formed its line eighty rods in front of the main engagement. The enemy took the line, firing as they slowly made the backward step. When the Sixteenth reached there the cartridge boxes of the men were empty, and after these had been refilled it took its place in line. Prentiss placed his troops so as to cover the main road of the region as it passed diagonally across his front.

They were screened from the enemy by a growth of scattered trees standing on the edge of a dense thicket of bushes. The Confederates charged, firing rapidly and mildly, but their bullets went over the heads of Prentiss' men, who lay flat on their stomachs in the thicket. The entire Union line blazed with merriment, and at intervals the artillery was given play. At the first taste of this deadly fire the Confederates fell back. Very soon, however, reinforcements reached them, and for hours the battle raged about that thicket, and the southerners aptly named it the "Hornet's Nest."

All the energies of the south were concentrated there for the time, for Prentiss' division would have to be wiped out before the Confederate line of battle could sweep forward. Gen. Albert Sidney Johnston received his death wound while inspiring renewed attacks on Prentiss' last stronghold. Grant visited the line there and saw the heroic efforts of Prentiss' men to cope with the enormous odds in the field against them.

In the first assault the Confederates marched boldly through the fringe of wood toward the "Nest," and only learned what a magazine of death shots was planted there when the Union bullets began to rip and strike. Then, seeing what they had stirred up, they cried out "Hornet's Nest!" and retired. Again and again the

Ripans Tabules relieve headache.

Ripans Tabules cure jaundice.

charge was renewed, always with the same general result—that Prentiss' men held the ground, though his ranks were fast thinning out, while the Confederates made their enormous losses good and more by sending in supports. Their columns converged at that point from three directions, and after some hours' fighting Prentiss had his flanks bent back so that the lines crossed at certain points. Yet he held on, and, though he lost nearly everything but honor, he doubtless saved the day on that field.

His men were as daring as himself. When the horses had been shot down on the advance batteries, with hands drawn the cannon back and placed in the enemy's ranks. Then a Prentiss' man, with the yielding of a detail of his own regiment, about 1000 men, he fell back, and the enemy's ranks were broken. The fight began in earnest about 6 in the morning.

After Prentiss was shot and his line of defense broken the Sixteenth was led out of action by its adjutant, Allen, and three captains having been wounded in defending the "Hornet's Nest." The brigade in which the Sixteenth fought at Shiloh lost 113 killed and 186 wounded. The Sixteenth lost 18 killed and 30 wounded. The mortally wounded and the number killed and wounded among the dead and the living shows the disparity of the ground. The Sixteenth's line of battle taken up by the Sixteenth during the day. Its heaviest loss was in the defense of its camp early in the fight.

The Sixteenth has few battles to its credit, only three worthy the name—Shiloh, Corinth and Atlanta. The Sixteenth lost 183 killed and 300 wounded in the record in losses that places it among the Three Hundred Fighting Regiments. It first met the enemy at Shiloh. Corinth was its next engagement, and there, for fifteen minutes, under a galling, enfilading fire, it stood to the rank without support. This cost 7 killed, 20 wounded and 10 missing, and of the wounded and missing 7 were ultimately reported dead. Fifteen minutes was not a long time, but where bullets flew so thick that the regimental flag was cut into strips by them, no doubt the Wisconsin boys thought it would do.

After that affair the ten companies of the regiment were consolidated into five, and with clipped wings the Sixteenth went through the marching campaigns of 1863 down to Atlanta, June and July, 1864. Here follows a fair sequel to their record at Shiloh. The regiment was in Force's brigade, Leggett's division, Seventeenth corps. Sherman was drawing his lines so close about Atlanta that bloody battles, which formed the southern extremity of the west and east, not over a mile from the outskirts.

On July 21 Force's brigade was put to the assault of an elevation, high and bald, which formed the southern extremity of the Confederate line of defense. It was a key position, well entrenched and manned by the division of the celebrated fighter, Patrick J. Cleburne. The Sixteenth had the picket line on the right of the line. The first few rods led through a cornfield

ASSAULT ON BALD HILL.

For hours the fight raged on the crest. Finally the brink was reached, bayonets were lowered, and with a savage cry the line swept forward up to and, in places, across the barricade. Then and there, for the first time, the Sixteenth broke through the lines of one corps and swept across the southern extremity of the hill, and before the day ended repulsed four distinct efforts on the part of Cleburne's men to retake it.

The next day, July 22, when the Confederate commander, Hood, made his famous second sortie against Sherman's lines, Force's brigade was again put on the defensive to hold Bald Hill, as it is known to this day. Strange to say, the defense was made at times by the Wisconsin men standing back to back. The Confederates broke through the lines of one corps and swept across the southern extremity of the hill, and before the day ended repulsed four distinct efforts on the part of Cleburne's men to retake it.

Four times Force's men were driven from front to rear, and vice versa, in their work, and at last, exhausted, they were met a driving assault on the flank that swept everything before it, batteries and all, and it reached Bald Hill. In meeting this last assault the Sixteenth and its companion regiments, the Twelfth Wisconsin, side by side, received the enemy at short range with volleys that checked their impetuous rush even at the very parapets so dearly coveted.

In those three days at Bald Hill the Sixteenth lost 20 killed outright, 83 wounded and 11 missing, the deaths amounting to the end of 48. Thus in the three battles, Shiloh, Corinth and Bald Hill, the total dead was 126; in all other engagements 11, making 147 in all. The killed and wounded in its whole career numbered 460. For a regiment that fought only in the west, where great battles were fewer than in the east, the Sixteenth made a noble record.

THE BABY CROP.

It has been computed that between 35,000,000 and 37,000,000 babies are born into the world each year, or about 70 per minute. A line of cradles containing them would encircle the world unbroken, but the silence would be broken in several places.—Boston Globe.

From Theory to Practice.

"What, you put all men in the world, going to marry?"

"Yes."

"Well, of course I've always known you were a woman, but I didn't think you'd make it a personal grudge."—Life.

GOOD ADVICE.

Every patriotic citizen should give his personal effort and influence to increase the circulation of his home paper which teaches the American policy of Protection. It is his duty to aid in this respect in every way possible. After the home paper is taken care of, why not subscribe for the AMERICAN PROTECTIVE Tariff League? One of its correspondents says: "No true American can get along without it. I consider it the greatest and truest political teacher in the United States."

VOLUME 17.

OAKLAND, MD., THURSDAY, FEBRUARY 1, 1894

NUMBER 47.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

An effort is being made to erect a church at Crellin.

Snow to the depth of several inches fell in Oakland on Monday.

The B. & O. R. R. Co. are having electric lights placed in the station here.

Clerk Tower has granted marriage licenses to eleven couples since our last report.

J. M. Davis & Son have just received a car load of Orchilla guano and other fertilizers.

Rev. Wagner, of Mountain Lake Park, is holding a series of meetings at Crellin with some success.

Mr. William H. Hagans, deputy circuit clerk, was confined to his house several days last week by illness.

Specially low prices on flour, meat, and all kinds of family groceries at Henry E. Felty's, Railroad street. 45 4t

Coal at from 75 cents to \$1.12 per ton, cash or trade at Deal's mine three miles north of Oakland on the Yough. 43 8t

Sciatica and lumbago readily yield to Salivation Oil. A few applications will produce the desired result. Try it. 25 cts.

Thousands sink into an early grave for want of a bottle of Dr. Bull's Cough Syrup. This great remedy would have saved them.

I have a lot of clothing, boots, shoes, blankets and men's underwear that I will close out at cost. 44 4t G. W. LEEGE.

Families will do well to now lay in a supply of groceries while prices are so extremely low at Henry E. Felty's grocery on Railroad street, Oakland. 45 4t

The ice harvest commenced in Oakland Monday morning but was interrupted by the heavy fall of snow in the afternoon and work in that line almost ceased.

Garthright will pay the highest cash price for nice solid apples and buckwheat flour delivered at Mt. Lake Park at once. Come at once and tell your friends to do likewise.

A. D. Naylor has two one-horse road wagons on hand, bed spring seat, everything complete for \$39 each. Also a good pair of hobs seds for sale. Mattocks by the wholesale. 45 3*

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-lyr

You can get your garden seeds at Henry E. Felty's grocery store. These seeds will be fresh and a great deal cheaper than sending off for them. A new variety of seed potatoes also on hand. 45 17t

The Mountain Lake Park authorities closed a contract with the Oakland Electric Company last Saturday to light the grounds and auditorium at the Park with electricity. This is a move in the right direction.

The Preston Lumber and Coal Company's mills at Crellin are undergoing extensive repairs. All new machinery of a late pattern is being put in the mill. When the alterations are completed the mill will be of double capacity.

Rev. Henry Carrington Alexander will preach in the Garrett Memorial church, Oakland, on next Sabbath at 11 o'clock a. m. and 7.30 o'clock p. m. The subject of the discourse to be delivered Sunday evening will be "Jacob."

The people of Keyser are very much worried over the probable removal of all the Baltimore and Ohio freight engines to Cumberland, in which event a very large number of employees of that company will have to move to the latter city.

The members of the Oakland Independent band are arranging to give a concert in Offutt's Hall, Oakland, two weeks from Thursday and Friday nights. The public should patronize this affair and thus encourage the members. A good band is a help to any community and the Oakland band is a good one and getting better every day.

When you are in need of printed stationery of any kind send your orders to THE REPUBLICAN. Prompt attention will be given all work and satisfaction guaranteed. We make a specialty of envelopes at \$2 per thousand. These envelopes are white and of good quality.

Money is so plentiful in New York that twelve months' loans can be made at 4 per cent., the lowest rate ever touched for a year. One per cent is the rate for short loans. The lack of demand for money means that business men are watching and waiting.

Benjamin H. Sincell, proprietor of THE REPUBLICAN, has put an engine in his printing establishment, and his presses and other machinery will all be operated by steam. We are glad to note this evidence of prosperity.—Oakland Corr. Cumberland News.

Owing to the drifts of snow in the Accident road Tuesday morning, the star route mail from Oakland to points in the northern part of the county could not get through. The mail carrier started on his route, but was forced to turn back before he had gone three miles.

At a meeting of the board of directors of the Oakland Electric Light and Power Co., held on Tuesday afternoon, a contract was closed with the Edison General Electric Co. for two new incandescent dynamos of double the capacity of those now in use at the electric station here.

Mr. David Marshall, of Sharpsburg, Washington county, had been suffering with a diseased toe which gave him great pain. While it was aching pretty badly he made up his mind that sharp measures were in order, so he got a sharp chisel and a heavy hammer and made himself ready for a surgical operation. He put the chisel on the toe, raised the hammer and brought it down with a firm whack and parted with the disagreeable member.

The memorial recently sent to Oakland by the Maryland State Temperance Alliance, has been returned to the secretary of the Alliance in Baltimore, Rev. G. H. Herbert. Through the diligent effort of those having the petition in charge one hundred and eighty-six legalized voters in Oakland signed it. In reply to a communication sent to Rev. Herbert he stated that the special election clause had been stricken from the bill.

The ladies of the Women's Auxiliary, connected with St. Matthew's church, Oakland, will give an "Oriental Tea" and musicale in the dining hall of the Glades Hotel on Friday evening, February 2d, from six until ten o'clock. A full supper, consisting of ham, chicken salads, rolls, coffee, tea, jellies, etc., will be served for 25 cents. Oysters, ice cream and cake will also be served. The music will be under the management of Mrs. Rosa Ward Johnson. Admission free. The public cordially invited.

Representative Dockery's bill for a change in the manner of transmitting money through the mails has passed the joint commission of Congress appointed for that purpose. By this bill the postal note is abolished and a money order system is created by which orders can be secured at rates as low as those now charged by express companies. For orders not exceeding \$2.50 the charge is three cents and the fee increases until it is 50 cents for sums over \$75 and under \$100. July first next is the date for the new law to take effect.

The Baltimore and Ohio railroad company's World's Fair exhibit has been presented to the Field Columbian Museum of Chicago. The managers of the museum have appropriated \$25,000 for additions to the collection. The exhibit includes 55 models of locomotives and 1,709 pictures. The Baltimore and Ohio railroad company was anxious for the city of Baltimore to take the exhibit and provide a suitable place for its display, but the city officials did not seem to take any interest in the matter nor to appreciate the importance of the collection.

Died.—On yesterday morning at an early hour, Mrs. David Glaze at her home in the east end. The deceased leaves three small children to mourn her loss. The interment will take place this afternoon at three o'clock in the Old Fellow's cemetery.

HERE AND ELSEWHERE.

Movements of Prominent Persons Known to the Readers of "The Republican."

Mr. W. Grant Martin, of Crellin, was in the city on business yesterday.

School Examiner Wm. Hinebaugh spent several days last week in Annapolis.

Mr. Reed Smouse, formerly of Mountain Lake Park, is clerking for Henry E. Felty.

Miss Kate C. Spedden was at home last Thursday attending the wedding of her sister.

Mr. F. P. Strawn, of Addison, Pa., was in the city Tuesday and made THE REPUBLICAN a paying call.

Mr. James R. Anderson, of Newburg, W. Va., spent Sunday in Oakland as the guest of Mr. and Mrs. S. T. Jones.

Mr. John P. Judge, of Baltimore, representing the Edison General Electric Company was here on business Tuesday.

Mr. Wm. A. Beavers, of Terra Alta, representing the Grafton Grocery Co., was in the city Tuesday calling on his patrons.

Mrs. Thomas Turner arrived in Oakland from Baltimore Saturday night joining her husband here, who is employed at the electric plant.

Mr. D. C. Pogue, who recently moved to the Park from near Wheeling, was in the city yesterday and made THE REPUBLICAN a very pleasant visit.

Prof. S. C. Smith, who was at his home in Preston county two or three days this week to see his father, returned to Oakland Saturday evening.

Mr. Paul A. Putzki, of Washington, D. C., is registered at the Central. Mr. Putzki is an artist of rare ability and is here with the hope of recuperating his health.

Editor Litzinger, of the Democrat, returned from Wheeling on last Thursday morning and was confined to his room several days since with an attack of the grip.

Mr. George Fulmer, of Oakland, who spent two or three weeks with relatives and friends at Accident and other points in the county, returned home Saturday evening.

Mr. Simon E. Bolden, who was at Cumberland two or three weeks assisting his brother to erect a steam heating apparatus, returned to Oakland last week.

Rev. Chas. W. Baldwin, of Washington, President of the Mt. Lake Park Association, was in the city on last Friday attending a meeting of the board of directors of the Association.

Dr. H. W. McComas arrived in the city Sunday morning from South Canadian, Indian Territory, where he had been for several weeks at the bedside of his brother Lee. He was accompanied home by Lee, whose condition is somewhat improved.

The many friends of the family of our esteemed fellow-citizen, Dr. J. Lee McComas, have been very much alarmed at the condition of his son J. Lee, Jr., who was stricken with disease at his home in South Canadian, Indian Territory. Lee is now at his father's home in this city, having been accompanied on the long journey by his brother, Dr. H. W. McComas, who went to South Canadian to see him. His condition is better and eminent specialists who have been consulted and who have also examined him say that he will entirely recover. His sickness has been brought on by over work and hard mental application, but with the care he is now receiving and the professional skill being exerted in his behalf, it will only be a short time until it is thought a complete recovery will be effected. The high social position of his family here and the well known uprightness of Lee makes his case one of general interest to the people of this community, and all sincerely join with us in hoping for his speedy and complete recovery.

Read THE REPUBLICAN.

When on Woollens.

Professor Wilson, of West Virginia, has been very determined, in framing the tariff measure, to secure cheap woolen clothing for the masses of the people. The only trouble with him is that he goes about it in a theoretical instead of a practical way. This was to be expected from a college professor who is not a business man.

He first set to work to ruin the farmers who produce wool, so that they would have little or no money with which to buy woolen goods. He next went to work to ruin our woolen manufacturing industry, so that the 70,000 workers in the woolen mills will not be able to buy woolen goods. He has also set to work to ruin the thousands of other operatives in other mills, so that they will have no money with which to buy woolen goods.

We remember the touching solicitude with which Professor Wilson, in a recent paper, referred to samples of cheap English woolen goods, on his desk, that would afford warm and comfortable clothing to the poor working girl. But if Professor Wilson has closed down the factory where the poor girl worked and has taken from her the opportunity of earning a living, how is she going to pay his 40 per cent. tax on the cheap English woolen goods, let alone the price of the material and the profit of the importer.

We have already shown in the American Economist how the woolen manufacturers of Bradford, England, state that they will, under the Wilson bill, secure better control of our market of 70,000,000 people than they have ever had, and what a boon to them the free wool to us will be. Let us now look at the prospects for cheap woollens from the standpoint of a New York importing house, as quoted by Messrs. E. H. Van Ingen & Co., who have always been interested in securing Free-Trade for English goods. In a recent circular this firm said:

"We are having many inquiries from our customers as to the effect upon prices if the tariff bill now before Congress shall become a law. The bill proposes to place wool upon the free list and to make the duty upon woolen goods 40 per cent. ad valorem."

"With such rate of duty fine grades of foreign goods would be reduced in price about 15 per cent. and medium grade perhaps 20 to 25 per cent. With free wool American goods would probably be reduced about 10 per cent. possibly in some classes 15 per cent. But the new tariff on woollens will certainly not take effect before July 1, and therefore spring and summer goods will not be affected in prices at all."

"Highly exaggerated ideas will prevail among tailors' customers, we suspect, as to the reduced prices of garments when the change of tariff does come. If wages remain as now the reduced cost of cloth will warrant no more than 5 per cent. reduction in the tailors' prices, or say \$2 to \$3 on a suit."

"During the coming six months the tailor will, no doubt, be able to modify the expectations of those customers who may be looking for a greater reduction."

"With a reduction of from 30 to 100 per cent. in the cost of raw wool, and of 25 to 140 per cent. in the cost of woolen products, as the Free-Traders have promised in their new tariff, is it not astounding to learn from such a high trade authority as we have quoted that if wages remain as now, the reduced cost of cloth will warrant no more than 5 per cent. reduction?"

What is to become of the rest of the reduction? The English manufacturers have assured us that they will control our woolen trade. Will they take the other 40, 50 or 100 per cent. that the Wilson bill lops off the tariff? Or will it go into the pockets of the English goods, such as Messrs. Van Ingen & Co.'s? The matter has evidently been arranged between these two parties or this firm would not be so positive that "the reduced cost will warrant no more than 5 per cent. reduction."

But if wages go lower there may be a lower price, though there is no promise to this effect, nor is it stated what proportion the decline in cloth will bear to the decline in wages. How about the poor working girl, Professor Wilson, whom you deprive of work and to whom you have promised nice English cloth at 10 per cent. less than the present price? Will you pay the difference 40 per cent., Professor,

to all the working girls who want English cloth at your theory prices?—American Economist.

Dentistry.

Dr. I. L. Ritter, proprietor of the Frostburg Dental Parlors, will be in Cranesville, Feb. 5th and 6th; Terra Alta, Feb. 7th and 8th at Terra Alta Hotel; Oakland, Feb. 9th and 10th, at Commercial Hotel. Teeth extracted without pain. 2t

Mountain Lake Park.

C. S. May has gone to Zanesville, O., and will conduct business there under the firm name of C. S. May & Co.

The Electric Light & Power Co., of Oakland, will light up the Park next summer with electricity.

The Board of Directors of the Mountain Lake Park Association held a business meeting last Friday.

L. A. Rudisill made a business trip to Morgantown, W. Va., the early part of the week.

W. A. Liller, of Keyser, has a contract to build a \$1,000 cottage on E street.

Jake Echard and wife are visiting his father at McHenry. Jake is hauling logs to the saw mill to get lumber for a cottage at the Park. He will be at home next summer on D street.

Messrs. Rudisill and Johnson gave their illustrated lecture last week at Barnum, Brunswick and Knoxville to full houses.

Rev. C. W. Baldwin, of Washington, and Mr. C. W. Connor, of Wheeling, were at the Park Friday.

Rev. Lee and family, returned missionaries from India, have been spending the past two summers at the Park. They are trying to raise money to establish a school for girls in India. Mine host Dennett, of the Dennett Hotel, has given them \$15,000 toward this enterprise.

Dr. W. L. Davidson lectured at Pittsburgh, Friday. W. S. Johnson, of the Park, illustrated the lecture for him.

Wm. Murphy is spending a month at Barnum.

C. H. Bischoff, a Garrett county boy, is the owner of a nice farm near Barnum. He is doing well and will make a success of his farm. Garrett county may feel proud of such boys.

The smiling face of Reed Smouse was seen on our streets last week. He was soliciting orders for Henry Felty. Reed has many friends at the Park.

Married.

KISSER—CHISHOLM.—On Jan. 24th, 1894, at the Smithsonian House, by Rev. Benjamin Ison, D. D., Mr. Joseph Albert Kissner to Miss Belle Rebecca Chisholm, both of Garrett county.

ASHBY—FREELAND.—On Tuesday, Jan. 23, at Cumberland, Mr. William A. Ashby, of Crellin, and Miss Annie Freeland, daughter of Mr. Geo. W. Freeland, of Huttous.

Licenses to Wed.

Marriage licenses have been granted the following parties by Clerk Tower since our last report: William Arthur Metzler and Sadie R. Wolfe.

John Wesley Gooding and Alice B. Hardesty.

William Ogilvie and Minnie Helena Stickle.

Robert Luther Fries and Ophelia Alice Friend.

Joel M. Mann and Tillie Beachy.

Gustavus Adolphus Bolden and Sarah V. Spedden.

James Hervey Burt and Lillie Chittier.

James W. Johnson and Nora Isabelle Keefover.

William Washington Tasker and Sarah Harvey.

Three licenses were granted with the request not to publish.

Altamont and Vicinity.

Weather cold.

Get your sleighs, boys.

Mrs. Anna Browning is visiting at Mr. J. Z. Browning's.

Miss Bertha Stemple, of Frankville, was visiting her sister Miss Minnie last week.

There must be some attraction for Tom at the village as he goes up quite often.

We understand that R. Cole is about to sell out.

Mr. Clayton is going to move on his farm near here.

Misses Daisy Lashorn and Ada Tharsher were visiting at L. T. Friend's one day last week.

Mrs. Chadderton was visiting in our city this week.

LADIES.

Needling a tonic, or children who want building up, should take

BROWN'S IRON BITTERS.

It is pleasant, cures Malaria, Indigestion, Biliousness, Liver Complaints and Neuralsgia.

OAKLAND, MD.

To Night, February 1st, at Seven O'clock.

Is the commencement of Hyde's great auction sale. Everybody likes jewelry, especially good jewelry. Come to the auction and you can have your choice, plated or solid gold. I have every kind and you will know just what you are buying before you bid. This will be an honorable, straight forward sale. I have employed a man of that stripe to conduct the same. I stand here ready to guarantee and support any and every statement my auctioneer sees fit to make. This is a sufficient guarantee that you are not to be humbugged. Everybody come; you will never regret it. Every man and woman that purchased at my auction last spring got more than double the worth of their money. I have everything you can mention in the jewelry and music line. Anything you want you can have. I ask you to come and take in a mid-winter show. Ladies, come out to the sale. There will be nothing to mar your feelings. Everything will be conducted as pious as a prayer meeting. Please remember the date. The first sale will be Thursday, Feb. 1st, at 7 o'clock in the evening, and continue every afternoon and evening at 2 and 7 p. m. Further particulars will be made known at the first sale. Everybody come; you are all welcome. Remember I have thousands of useful articles and you can have them at your own price. I will guarantee it will be the best time you ever spent and the most profitable to take in the auction from beginning to end.

Very respectfully,

N. B. Be sure you read one of the hand bills. You can see them everywhere.

Real Estate Transfers.

The following real estate in Garrett county has changed owners since our last report and the transfers made on the record books by Clerk Tower of the Circuit Court: George's Creek Coal and Iron Company to Jarvis Custer, 234 acres of ground; \$325.

John Shartzer and wife to John M. Davis, lot No. 6 in Shartzer's subdivision of the town of Oakland; \$50.

H. G. Davis and others to J. G. Wilson, 634 acres of "Armistead Farm"; \$1,065.

Godfrey Felty and others to Henry E. Felty, an undivided one-half interest in the "Brooks' Storehouse Property" in the town of Oakland; \$1,400.

John W. G. Lewis to John W. Beckman, military lot No. 4058; \$400.

H. S. Boucher and wife to Flora A. Wellington, 2 acres and 10 perches of a tract of land known as "Smooth Valley"; \$5 and other considerations.

Chas. W. Swalp and wife to William Swalp, military lots Nos. 2607, 2608, 2609 and 2610; \$900.

Mountain Lake Park Association to Minnie Wolf, lot No. 1173 on the plat of Mountain Lake Park; \$65.

Nina A. Wolf to C. M. Rathbun and P. T. Garthright, lot No. 1173 on the plat of Mt. Lake Park; \$583.

Georgiana Taggart and others to Martha J. West, the "Taggart Hotel Property" in the town of Oakland; \$3,400.

Edward H. Sincell and wife to Martha E. Miller, 75 acres of "Swan Meadows"; \$262.50.

Samuel Pritts and wife to J. L. McRobie, military lot No. 1954; \$800.

Samuel P. Specht and wife to Lorenzo D. Thrasher, a lot of ground in the town of Deer Park; \$1,000.

J. L. McRobie and wife to Hattie Pritts, military lot No. 1964; \$800.

Elizabeth Osborne Jones to the Empire Coal Company, of Allegany county, the undivided one-half part of two portions of a tract of land called "Leatherwood Bottom," containing 291 acres; \$500.

George's Creek Coal and Iron Company to John Shaw, 385 acres of land in Garrett county; \$133.12.

Edward Hove trustee, to Daniel Chisholm, all his interest in military lot No. 1996; \$25.

Silas Warnick and wife to Alice Warnick, military lots Nos. 3886 and 3885; \$500.

Valuable Advice.

Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardene Cottage, opposite the bank, Oakland, Md. 41-4t.

THE REPUBLICAN.

OAKLAND, MD., THURSDAY, FEBRUARY 1, 1894

NUMBER 47.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

An effort is being made to erect a church at Crellin.

Snow to the depth of several inches fell in Oakland on Monday.

The B. & O. R. R. Co. are having electric lights placed in the station here.

Clerk Tower has granted marriage licenses to eleven couples since our last report.

J. M. Davis & Son have just received a car load of Orchilla guano and other fertilizers.

Rev. Wagner, of Mountain Lake Park, is holding a series of meetings at Crellin with some success.

Mr. William H. Hagens, deputy circuit clerk, was confined to his house several days last week by illness.

Specially low prices on flour, meat, and all kinds of family groceries at Henry E. Felty's, Railroad street.

Coal at from 75 cents to \$1.12 per ton, cash or trade at Deal's mine three miles north of Oakland on the Yough.

Sciatica and lumbago readily yield to Salvation Oil. A few applications will produce the desired result. Price 25 cents.

Thousands sink into an early grave for want of a bottle of Dr. Bull's Cough Syrup. This great remedy would have saved them.

I have a lot of clothing, boots, shoes, flannels and men's underwear that I will close out at cost.

Families will do well to now lay in a supply of groceries while prices are so extremely low at Henry E. Felty's grocery on Railroad street, Oakland.

The ice harvest commenced in Oakland Monday morning but was interrupted by the heavy fall of snow in the afternoon and work in that line almost ceased.

Garthright will pay the highest cash price for nice solid apples and buckwheat flour delivered at Mt. Lake Park at once. Come at once and tell your friends to do likewise.

A. D. Naylor has two one-horse road wagons on hand, bed spring seat, everything complete for \$39 each. Also a good pair of bobsleds for sale. Mattocks by the wholesale.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church.

You can get your garden seeds at Henry E. Felty's grocery store. These seeds will be fresh and a great deal cheaper than sending off for them. A new variety of seed potatoes also on hand.

The Mountain Lake Park authorities closed a contract with the Oakland Electric Company last Saturday to light the grounds and auditorium at the Park with electricity. This is a move in the right direction.

The Preston Lumber and Coal Company's mills at Crellin are undergoing extensive repairs. All new machinery of a late pattern is being put in the mill. When the alterations are completed the mill will be of double capacity.

Rev. Henry Carrington Alexander will preach in the Garrett Memorial church, Oakland, on next Sabbath at 11 o'clock a. m. and 7.30 o'clock p. m. The subject of the discourse to be delivered Sunday evening will be "Jacob."

The people of Keyser are very much worried over the probable removal of all the Baltimore and Ohio freight engines to Cumberland, in which event a very large number of employees of that company will have to move to the latter city.

The members of the Oakland Independent band are arranging to give a concert in Offutt's Hall, Oakland, two weeks from Thursday and Friday nights. The public should patronize this affair and thus encourage the members. A good band is a help to any community and the Oakland band is a good one and getting better every day.

When you are in need of printed stationery of any kind send your orders to THE REPUBLICAN. Prompt attention will be given all work and satisfaction guaranteed. We make a specialty of envelopes at \$2 per thousand. These envelopes are white and of good quality.

Money is so plentiful in New York that twelve months' loans can be made at 4 per cent., the lowest rate ever touched for a year. One per cent is the rate for short loans. The lack of demand for money means that business men are watching and waiting.

Benjamin H. Sincell, proprietor of THE REPUBLICAN, has put an engine in his printing establishment, and his presses and other machinery will all be operated by steam. We are glad to note this evidence of prosperity.—Oakland Corr. Cumberland News.

Owing to the drifts of snow in the Accident road Tuesday morning, the star route mail from Oakland to points in the northern part of the county could not get through. The mail carrier started on his route, but was forced to turn back before he had gone three miles.

At a meeting of the board of directors of the Oakland Electric Light and Power Co., held on Tuesday afternoon, a contract was closed with the Edison General Electric Co. for two new incandescent dynamos of double the capacity of those now in use at the electric station here.

Mr. David Marshall, of Sharpsburg, Washington county, had been suffering with a diseased toe which gave him great pain. While it was aching pretty badly he made up his mind that sharp measures were in order, so he got a sharp chisel and a heavy hammer and made himself ready for a surgical operation. He put the chisel on the toe, raised the hammer and brought it down with a firm whack and parted with the disagreeable member.

The memorial recently sent to Oakland by the Maryland State Temperance Alliance, has been returned to the secretary of the Alliance in Baltimore, Rev. G. H. Herbert. Through the diligent effort of those having the petition in charge one hundred and eighty-six legalized voters in Oakland signed it. In reply to a communication sent to Rev. Herbert he stated that the special election clause had been stricken from the bill.

The ladies of the Women's Auxiliary, connected with St. Matthew's church, Oakland, will give an "Oriental Tea" and musicale in the dining hall of the Glades Hotel on Friday evening, February 2d, from six until ten o'clock. A full supper, consisting of ham, chicken, salads, rolls, coffee, tea, jellies, etc., will be served for 25 cents. Oysters, ice cream and cake will also be served. The music will be under the management of Mrs. Rosa Ward Johnson. Admission free. The public cordially invited.

Representative Dockery's bill for a change in the manner of transmitting money through the mails has passed the joint commission of Congress appointed for that purpose. By this bill the postal note is abolished and a money order system is created by which orders can be secured at rates as low as those now charged by express companies. For orders not exceeding \$2.50 the charge is three cents and the fee increases until it is 30 cents for sums over \$75 and under \$100, July first next is the date for the new law to take effect.

The Baltimore and Ohio railroad company's World's Fair exhibit has been presented to the Field Columbian Museum of Chicago. The managers of the museum have appropriated \$25,000 for additions to the collection. The exhibit includes 55 models of locomotives and 1,500 pictures. The Baltimore and Ohio railroad company was anxious for the city of Baltimore to take the exhibit and provide a suitable place for its display, but the city officials did not seem to take any interest in the matter nor to appreciate the importance of the collection.

Died.—On yesterday morning at an early hour, Mrs. David Glaze at her home in the east end. The deceased leaves three small children to mourn her loss. The interment will take place this afternoon at three o'clock in the Old Fellow's cemetery.

When on Woollens.

Professor Wilson, of West Virginia, has been very determined, in framing his tariff measure, to secure cheap woollen clothing for the masses of the people. The only trouble with him is that he goes about it in a theoretical instead of a practical way. This was to be expected from a college professor who is not a business man.

He first set to work to ruin the farmers who produce wool, so that they would have little or no money with which to buy woollen goods. He next set to work to ruin our woollen manufacturing industry, so that the 50,000 workers in the woollen mill will not be able to buy woollen goods.

He has also set to work to ruin the other operators in other mills, so that they will have no money with which to buy woollen goods.

We remember the touching solicitude with which Professor Wilson, in a recent paper, referred to samples of cheap English woollen goods, on his desk, that would afford warm and comfortable clothing to the poor working girl. But if Professor Wilson has closed down the factory where the poor girl worked and has taken from her the opportunity of earning a living, how is she going to pay his 40 per cent. tax on the cheap English woollen goods, let alone the price of the material and the profit of the importer.

We have already shown in the American Economist how the woollen manufacturers of Bradford, England, state that they will, under the Wilson bill, secure better control of our market of 70,000,000 people than they have ever had, and what a boon to them the free wool to us will be. Let us now look at the prospects for cheap woollens from the standpoint of a New York importing house, as quoted by Messrs. E. H. Van Ingen & Co., who have always been interested in securing Free-Trade for English goods. In a recent circular this firm said:

"We are having many inquiries from our customers as to the effect upon prices if the tariff bill now before Congress shall become a law. The bill proposes to place wool upon the free list and to make the duty upon woollen goods 40 per cent. ad valorem.

"With such rate of duty fine grades of foreign goods would be reduced in price about 15 per cent. and medium grade perhaps 20 to 25 per cent. With free wool American goods would probably be reduced about 10 per cent. possibly in some classes 15 per cent. But the new tariff on woollens will certainly not take effect before July 1, and therefore spring and summer goods will not be affected in prices at all.

"Highly exaggerated ideas will prevail amongst our customers, we suspect, as to the reduced prices of garments when the change of tariff does come. If wages remain as now the reduced cost of cloth will warrant no more than 5 per cent. reduction in the tailors' prices, or say \$2 to \$3 on a suit.

"During the coming six months the tailor will, no doubt, be able to modify the expectations of those customers who may be looking for a greater reduction.

With a reduction of from 30 to 100 per cent. in the cost of raw wool, and of 25 to 140 per cent. in the cost of woollen products, as the Free-Traders have promised in their new tariff, is it not astounding to learn from such a high trade authority as we have quoted that 'if wages remain as now, the reduced cost of cloth will warrant no more than 5 per cent. reduction?' What is to become of the rest of the reduction? The English manufacturers have assured us that they will control our woollen trade. Will they take the other 40, 50 or 100 per cent. that the Wilson bill lops off the tariff? Or will it go into the pockets of the New York importers of the English goods, such as Messrs. Van Ingen & Co.? The matter has evidently been arranged between these two parties or this firm would not be so positive that 'the reduced cost will warrant no more than 5 per cent. reduction.'

But if wages go lower there may be a lower price, though there is no promise to this effect, nor is it stated what proportion the decline in cloth will bear to the decline in wages. How about the poor working girl, Professor Wilson, whom you deprive of work and to whom you have promised nice English cloth at 10 per cent. less than the present price? Will you pay the difference 5 per cent., Professor,

to all the working girls who want English cloth at your theory prices?—American Economist.

W. A. Liller, of Keyser, has a contract to build a \$1,000 cottage on E street.

Jake Echard and wife are visiting his father at Melhenry. Jake is hauling logs to the saw mill to get lumber for a cottage at the Park. He will be at home next summer on D street.

Messrs. Radisill and Johnson gave their illustrated lecture last week at Barnum, Brunswick and Knoxville to full houses.

Rev. C. W. Baldwin, of Washington, and Mr. C. W. Connor, of Wheeling, were at the Park Friday. Rev. Lee and family, returned missionaries from India, have been spending the past two summers at the Park. They are trying to raise money to establish a school for girls in India. Miss host Dennett, of the Dennett Hotel, has given them \$15,000 toward this enterprise.

Dr. W. L. Davidson lectured at Pittsburgh, Friday. W. S. Johnson, of the Park, illustrated the lecture for him.

Wm. Murphy is spending a month at Barnum.

C. H. Bishoff, a Garrett county boy, is the owner of a nice farm near Barnum. He is doing well and will make a success of his farm. Garrett county may feel proud of such boys.

The smiling face of Reed Smouse was seen on our streets last week. He was soliciting orders for Henry Felty. Reed has many friends at the Park.

Married.
KISSER—CHISHOLM.—On Jan. 24th, 1894, at the Smithman House, by Rev. Benjamin Isom, D. D., Mr. Joseph Albert Kissner to Miss Belle Rebecca Chisholm, both of Garrett county.

ASHBY—FREELAND.—On Tuesday, Jan. 23, at Cumberland, Mr. William A. Ashby, of Crellin, and Miss Annie Freeland, daughter of Mr. Geo. W. Freeland, of Huttons.

Licenses to Wed.
Marriage licenses have been granted the following parties by Clerk Tower since our last report: William Arthur Metzler and Sadie R. Wolfe.

John Wesley Gooding and Alice B. Hardesty.

William Ogle and Minnie Helena Stickle.

Robert Luther Fries and Ophelia Alice Friend.

Joel M. Maust and Tillie Beachy.

Gustavus Adolphus Bolden and Sarah V. Spedden.

James Hervey Burt and Lillie Clutter.

James W. Johnson, and Nora Isabelle Keefover.

William Washington Tasker and Sarah Harvey.

Three licenses were granted with the request not to publish.

Altamont and Vicinity.
Weather cold.

Get your sleighs, boys.

Mrs. Anna Browning is visiting at Mr. J. Z. Browning's.

Miss Bertha Stemple, of Frankville, was visiting her sister Miss Minnie last week.

There must be some attraction for Tom at the village as he goes up quite often.

We understand that R. Cole is about to sell out.

Mr. Clayton is going to move on his farm near here.

Misses Daisy Lashorn and Ada Tharsher were visiting at L. T. Friend's one day last week.

Mrs. Chadderton was visiting in our city this week.

LADIES.
Needing a tonic, or children who want building up, should take BROWN'S IRON BITTERS. It is pleasant; cures Malaria, Indigestion, Biliousness, Liver Complaints and Neuralgia.

OAKLAND, MD.

To Night, February 1st, at Seven O'clock,

Is the commencement of Hyde's great auction sale. Everybody likes jewelry, especially good jewelry. Come to the auction and you can have your choice, plated or solid gold. I have every kind and you will know just what you are buying before you bid. This will be an honorable, straight forward sale. I have employed a man of that stripe to conduct the same. I stand here ready to guarantee and support any and every statement my auctioneer sees fit to make. This is a sufficient guarantee that you are not to be humbugged. Everybody comes you will never regret it. Every man and woman that purchased at my auction last spring got more than double the worth of their money. I have everything you can mention in the jewelry and music line. Anything you want you can have. I ask you to come and take in a mid-winter show. Ladies, come out to the sale. There will be nothing to mar your feelings. Everything will be conducted as pious as a prayer meeting. Please remember the date. The first sale will be Thursday, Feb. 1st, at 7 o'clock in the evening, and continue every afternoon and evening at 2 and 7 p. m. Further particulars will be made known at the first sale. Everybody come; you are all welcome. Remember I have thousands of useful articles and you can have them at your own price. I will guarantee it will be the best time you ever spent and the most profitable to take in the auction from beginning to end.

Very respectfully,
F. G. HYDE.

N. B. Be sure you read one of the hand bills. You can see them everywhere.

Real Estate Transfers.

The following real estate in Garrett county has changed owners since our last report and the transfers made on the record books by Clerk Tower of the Circuit Court: George's Creek Coal and Iron Company to Jarvis Custer, 234 acres of ground; \$225.

John Shartzer and wife to John M. Davis, lot No. 6 in Shartzer's sub division of the Louisa J. Bartlett lots in the town of Oakland; \$50.

H. G. Davis and others to Jenes G. Wilson, 634 acres of "Armistead Farm;" \$1,065.

Godfrey Felty and others to Henry E. Felty, an undivided one-half interest in the "Brooks' Storehouse Property" in the town of Oakland; \$1,400.

John W. G. Lewis to John W. Beekman, military lot No. 4058; \$400.

H. S. Boueher and wife to Flora A. Wellington, 2 acres and 10 perches of a tract of land known as "Smooth Valley;" \$5 and other considerations.

Chas. W. Swalp and wife to Witson Swalp, military lots Nos. 2507, 2608, 2609 and 2610; \$900.

Mountain Lake Park Association to Minnie Wolf, lot No. 1173 on the plat of Mountain Lake Park; \$65.

Nina A. Wolf to C. M. Rathbun and P. T. Garthright, lot No. 1173 on the plat of Mt. Lake Park; \$385.

Georgiana Taggart and others to Martha J. West, the "Taggart Hotel Property" in the town of Oakland; \$3,400.

Edward H. Sincell and wife to Martha E. Miller, 75 acres of "Swan Meadows;" \$262.50.

Sammuel Britts and wife to J. L. McRobie, military lot No. 1964; \$800.

Sammuel P. Specht and wife to Lorenzo D. Thrasher, a lot of ground in the town of Deer Park; \$1,000.

J. L. McRobie and wife to Hattie Pitts, military lot No. 1964; \$800.

Elizabeth Osborne Jones to the Empire Coal Company, of Allegany county, the undivided one-half part of two portions of a tract of land called "Leatherwood Bottom," containing 291 acres; \$500.

George's Creek Coal and Iron Company to John Shaw, 385 acres of land in Garrett county; \$153.12.

Edward Hoyo trustee, to Daniel Chisholm, all his interest in military lot No. 1996; \$25.

Silas Warnick and wife to Alice Warnick, military lots Nos. 3880 and 3885; \$500.

Valuable Advice.

Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "contesting titles" before paying for Military Lots. Charges reasonable. Office in Colardeau Cottage, opposite the bank, Oakland, Md. 41-1f.

SHE MARRIED BOTH.

BY JULIUS WEDEKIND.

[Copyright, 1904, by the Author.]
Mr. Wilberforce Trott, lawyer, of the firm of Lumkenstein & Trott, was the picture of prosperity and contentment, sitting in his office in the most luxuriously-appointed office building in town. His private office, where he was usually to be found, was a room of stucco, but its spire and span cleanliness denoted its newness. In fact, Mr. Trott had not always occupied quarters like these. Indeed, as he sat in his rotary chair puffing the smoke from a colored maduro with a sultanic air of indifference, Mr. Trott's elegant surroundings bore the gloss of a week's existence and not a day more. Not that he wore the new conditions with any the less grace on that account, however. Anyhow, to have observed him critically, would have acknowledged the aristocratic repose of his regular features and the exquisite taste of his fashionable apparel. But the fact remains that Mr. Trott, a week before, had been a struggling young attorney with an inchoate practice and an unreliable sequence as to meals.

As there are no such things as fairy wands to change hungry lawyers into well-fed barristers, the truth may as well be admitted—Mr. Trott had hit the races. The ten thousand dollar retainer from a delightfully mysterious corporation in the west, which he assured his friends was the last of his new magnificent fortune, was in reality a stinging of that amount on a cluster of horses upon whose combined speed he had made a bet after the manner current among the pool rooms. For all this, Mr. Trott was by no means a "sport." He was unquestionably a young man of means, who would be heard from one of these days, and who knew what it meant to "talk terribly."

The reason that he did not find him at work with his books directly concerns our interest in this lucky youth. For Mr. Trott's thoughts were flitting back over five long years of professional vicissitudes, as dreamily as the smoke that curled aloft over his blonde head, until they rested upon a face of dark, healthy beauty, surmounted by curling locks as black as the tender eyes whose depths he had once explored in a feeble quattrain, with the opinion that they revealed the glories of a starlit night. He had truly been deservingly in love with Alice Monroe, a fact that had been fully appreciated by that dainty little dotes, who not only accepted all his attentions in the way of theater tickets, balls and bouquets, but pointed for more. All of these things had been the despair of poor young Mr. Trott, who wondered how he was ever to marry a girl whose trivial expenses per week exceeded his income at the bar per month. To render the situation even more poignant, she repeatedly declared that the man she married would have to have money. In her heartless opinion love in a cottage was unequalled bosh. Often he had exclaimed to the four walls of his dingy room:

"She is vain, flustering, extravagant, and unworthy an honest fellow's love!"
On every fine Sunday afternoon, for her sweet sake, he had hired a yellow cart and a large black horse with a stride like the course of empire, whose tan-colored harness was the sweetest thing that graced the Clifton drives on that day. The sweetest! Alas, no. There was one rig that excelled that of Mr. Trott, even as the white glory of the diamond excels the dull gray of the topaz. And in that rig sat the belle of the town—Miss Monroe, the one being on earth whom he hated with the cheerful, cordial hate of a lover for a rival.

The name of this party was Messerschmidt, a cool, imperturbable gentleman, the untroubled impudence of whose small, steady eyes had taken Mr. Trott's measure on the night that they had first met in Miss Monroe's parlor, and were ever since noting the details of Mr. Trott's exit, with a stolid Teutonic amusement that betokened their owner's confidence in his own supremacy. As a rival, Mr. Messerschmidt was, indeed, peculiarly dangerous in the possession of a gigantic soap factory, inherited from his mother's father, who would have turned in his grave with astonishment had he seen what his son had done for the old concern since its founder's death, for the plant

LOOKED WISTFULLY AT THE LATEST TROTT.

had undergone the mysterious process known only to the subtle promoter who capitalizes a small enterprise into a colossal one by the hocus-pocus of the "street."
Never in his life had Mr. Trott claimed the society of the capricious Miss Monroe on one of those bright afternoons but what Mr. Messerschmidt could be seen in his gorgeous tunic, riding insolently alongside or else taking the road, in a manner even more insolent, just in front. This gentleman's presence was not only obtruded upon them at these times, but seemed to divine by a diabolical instinct just when and where to find them together. If Mr. Trott took Miss Monroe to the theater, the other party invariably had a seat nearby, which he would change for one immediately next to the couple, and engage them in conversation with a mild, insinuating young lawyer to the point of insanity. When he took Miss Monroe to the art museum—a favorite ruse of his to get her away from possible intruders—his

ubiquitous rival was there also, suave, calm, unassuming, agitating! Accidentally his eyes rested on the polished oak cover of his typewriter in the corner, and he smiled bitterly at the associations conjured up by that implement of modern correspondence. Well he remembered a certain morning when Miss Monroe took it into her capricious head to visit him at his palatial quarters—as he had represented them to her in order to keep pace with the plutocratic Messerschmidt. As usual, that worthy was tagging placidly at her side.

Mr. Trott shuddered with retrospective horror as he thought of the hideous catastrophe of that visit, and pictured the scene before him. There was Alice, as blooming and richly handsome as a Jacqueminot rose, radiating a delicate perfume, like the dower itself, which fairly intoxicated the young lawyer. The complaisant and phlegmatic Messerschmidt nearby wore his usual smile of vacant urbanity, but in his small gray eye shone the light of a demagogical triumph; and as he watched Alice sweep the office with her keen eyes and gather in every shabby detail of the office, from the bare floor to the dilapidated desks, he visibly exulted at the disgust in her eyes. Then she spoke. She had dropped in to pay her respects as she passed the building. She was delighted to find his quarters so comfortable-looking! Then Messerschmidt sniffed at the atmosphere like a war-horse that scents the aroma of battle. Unceremoniously he cast his eyes fastened upon the cover of Mr. Trott's typewriter.

"What make of typewriter do you prefer, Mr. Trott?" asked Mr. Messerschmidt, innocently raising the cover

"WHAT MAKE OF TYPEWRITER DO YOU PREFER?"

and disclosing—not a typewriter—but the meager and unsightly remains of some corned beef and cabbage on which Mr. Trott had been dining. That had been five years ago, and Mr. Trott had not tasted a dish of corned beef and cabbage since. The color of that barbarous mixture used thereafter to make him both sick at his stomach and sick at heart—he, who had once been so fond of it!

Messerschmidt married her that fall, but Mr. Trott had never called upon them since the event.

Suddenly he threw his cigar from him and exclaimed:

"Hang it! What do I care? I'll hunt her up and call for the sole purpose of showing her that—"

His vehemence came to an abrupt stop. He started erect and listened, like a man transfixed, to the sound of a soft, anxious voice in the other office, that was inquiring:

"Is this a lawyer's office?"

"Yes, madam," returned Mr. Trott's partner, affably. "What can we do for you?"

"I wish to get a divorce," said a voice, more timidly still, and trembling on the verge of tears. "My husband is a wreath."

Mr. Trott interrupted the speech, radiant, precipitate, his voice vibrating with unmistakable joy.

"Alice!" he cried, as he opened the door with a rush.

The young lady rose in astonishment at the figure before her.

"Is it possible?" she faltered.

He took her hand and drew her inside his office with gentle force, leaving his mystified partner staring speechlessly at the vacant chair.

"What has been doing to you, Alice?" cried Mr. Trott, holding her hand and looking as vindictive as a Corsican.

"He's been deserting me," she said, with a faint hysterical laugh, but with a relieved look in her eyes, like a hunted fawn that has found a protector.

"What, that harmless-looking moon-faced idiot?"

"Was a horrid, despicable scoundrel!" retorted Mrs. Messerschmidt, with appropriate tact.

And then while Mr. Trott listened—and held her hand—she poured forth a tale of such heartrending cruelty that he wept also.

"Did you ever hear anything like it, Wilber?" she asked, appealingly, contracting his name as she used to do when he had pleased her.

Mr. Trott replied with an impulsive embrace and unexpected kiss.

"But I am Mr. Trott, holding her hand and looking as vindictive as a Corsican."

"He's been deserting me," she said, with a faint hysterical laugh, but with a relieved look in her eyes, like a hunted fawn that has found a protector.

"What, that harmless-looking moon-faced idiot?"

"Was a horrid, despicable scoundrel!" retorted Mrs. Messerschmidt, with appropriate tact.

And then while Mr. Trott listened—and held her hand—she poured forth a tale of such heartrending cruelty that he wept also.

PUNGENT PARAGRAPHS.

—Wife—"What are you coming home at this time in the morning for?" Husband—"Be quick!"—Detroit Tribune.
—Why did Ethel Robinson marry Harold Smithers, I wonder? "She admired his monogram." It looks so like the dollar sign—Harper's Bazar.
—May—"They say Miss Stegley, of Chicago, gives a great deal of money." Bell—"What does she give?" May—"Her old shoes."—N. Y. Herald.

—She—"I must ask you to please me from ear engagement." He—"I am the man who won all his money." Indianapolis Journal.

—Two of a Kind.—"Misses 'Bridget, I don't want you to go at this evening." Maid—"Nathaniel Pathrick, meen; he's coming to my meen."—Detroit Free Press.

—Too True.—"First class Chaparones are more averse to engagements than any one else, don't you think so?" Second Girl—"No; according to my observations men are."—Truth.

—Hicks—"What a curious setting chap Aberrate is! Sometimes I think his mind cannot be right." Hicks—"Don't you think it too bad for me on his mind?"—Boston Transcript.

—"I suppose you have been popping all day again," said Mr. Sana to his wife at the supper table. "I suppose you have been popping all day again," retorted she. Pittsburgh Chronicle.

—Merchant—"I believe we ought to get more than fifty cents a yard for that goods."—Shepard Clerk.

—There's just one way to do it. "How?" "Cut it up in fragments and sell it on the remnant counter."—Cleveland Plain Dealer.

—Worse Yet.—"Bill the Bond Throver (waiting for the group to assemble): 'There won't be many of us here tonight. It's raining pitchforks.' Dynamite Dick—"Rainin' pitchforks? Great Scott! It's rainin' soap-suds!"—Chicago Tribune.

—"No," said Mrs. Bivens, in reply to her little daughter's beseeching for a little sister; "no, we can't have a new baby." "But," persisted the child, "won't the doctor make a reduction if you take twins?"—Pittsburgh Chronicle.

—Longwood (meditatively).—"The man who refuses to take no for an answer may be blooming bright, or he may be a blundering clump." Neighbor—"Speaking from personal experience?" Longwood—"I was just thinking of my numerous proposals to Mrs. Longwood."—Buffalo Courier.

—Fangle—"Young Barlow has selected his vocation." Gunso—"What is his choice?" Fangle—"He has decided to become a poet." Gunso—"Nonsense! What qualifications has he?" Fangle—"He has one very important qualification." Gunso—"Name it." Fangle—"An assumed income."—Harper's Bazar.

—What do you think of this socialistic idea that people should receive pay in proportion to the effort they put forth?" "It's a very impracticable idea. Why, under such a rule, that girl next door who is trying to be a singer would be entitled to about \$1,000 a day."—Indianapolis Journal.

—Tommy—"I guess you'd better clean the spots off my Sunday suit today." Mamma—"Why, dear?" Tommy—"Because I don't want to give a big party tonight." Mamma—"Well, it's only for ladies and gentlemen." "I know; but she always invites her Sunday-school class in to eat up the scraps."—Inter Ocean.

SHE KEPT A VARIED SUPPLY.

No Need for Him to Go to a Drug Store for Poison.

At eight o'clock the other evening a hunched, plainly-dressed woman about forty-five years of age walked into a Grand River avenue drug store and asked:

"Has a man been in here within an hour and asked for poison?"

"No, ma'am," was the reply.

"Rather small man, with a red goatee and freckled face?"

"I don't remember any such man."

"Got a squeaky voice, and he'd long for rest?"

"No; no such man has been in here, ma'am."

"Well, he may come. It's my husband. Every week or two he comes to blimp me, and when he can't he threatens to poison himself."

"He went away this morning saying I would never see him again and that I would read of his death in the evening papers."

"Yes, ma'am."

"You'll know him the minute he walks in. He'll ask you for arsenic—ten times worth of arsenic."

"Yes, ma'am."

"He'll begin to blow about me while you are putting it up, saying as how I make life miserable and full of woe, and that he has decided to die."

"Yes, ma'am."

"Then he'll begin to shed tears and clasp his arms about me, and he'll say that he loves me more than life itself, and the result will be that he'll walk out and leave you ten cents out of pocket."

"I see. He'll be on watch for him."

"Yes, you'd better. He's played that trick on every druggist within a mile of here. I keep laudanum and rough on rats and strychnine in the house all the time, besides three or four ropes stowed enough for him to hang himself, and there's no earthly need of his beating a drug store."

"He just does it to get sympathy and have a chance to say that I bought four ten-cent novels in one week."

"I see."

"If he comes just grab him, turn him around and lift him outdoors, and I'll be very much obliged to you, and it may help to make a better man of him. Good evening."—Detroit Free Press.

TO A BROADWAY RESTAURANT.

Proprietor.—Any one waiting for you.

Miss Hayseed (blushing).—Ill, Ill, Ill.

Perkins is kind or purring.

He hasn't talked business yet.

SCIENCE AND INDUSTRY.

—New Zealand is reported to be in a condition of unprecedented prosperity, owing to the rapid strides in land reclamation, the enormous increase in the exports of frozen mutton, the impetus given to the dairy industry by the opening of British markets and the increase of population induced by these conditions.

—The United States consul-general at Frankfurt, Germany, reports the hop crop of that empire for 1893 to be less than half the usual average. There was a similar shortage in all Europe except Russia, Bohemia, Holland and Belgium, where the yield was in excess of the preceding crop. The net deficit is estimated at 27,000,000 pounds.

—The discovery of a new disinfectant more powerful than any heretofore known is announced. The process of manufacture consists of extracting the chlorine from sea water by electricity. The residuum, the disinfectant in question, will be extensively used in and about New York City in guarding against an outbreak of cholera.

—The largest irrigating flume in California was completed last week. It is in Fresno county, and is fifty-two miles long, extending from Stevenson creek, at an elevation of 500 feet, to Corvis, twelve miles from Fresno, at an elevation of 400 feet. It will carry a cubic foot of water per second, and will irrigate 40,000 acres of new land under cultivation. Many million feet of lumber will also be floated down annually.

—Corals increase by eggs, spontaneous division and germination. The rate of growth in the Pacific is fully determined. Prof. Agassiz indicates the growth of reefs at Key West at the rate of six inches in one hundred years, and adds that if we double that amount it would require seven thousand years to form the reefs in that place and hundreds of thousands of years for the growth of Florida.

—A prominent physician of New York argues earnestly against the visiting of the monkey houses in the parks in winter. He says that consumption is a prevalent disease in the monkey species, and the degree of contagion and the poor ventilation make the houses places of danger. The fact that consumption is contagious is now accepted, and intelligent people protect themselves and others against the possibility of breathing a contaminated atmosphere.

—The owl is hated by all birds. Where one is discovered by other day-loving species they subject it to the direct persecution. Owls could scarcely live as a day-loving bird under the present order of things. They would be driven from the earth, supposing it took on gradually its thieving habits for a living. It has had to love darkness rather than light because of these evil deeds. At any rate, the naked facts seem to be that night-working creatures can generally see well in the daylight when they want to.

—The trade in agricultural implements is reported to have been very good in southeastern Russia for the season just past. There was special activity in reapers, on account of the scarcity of hands, the outbreak of cholera having driven them away. Over four thousand reapers were sold, of which one thousand were American, the remainder of Russian make, finding their way to Russia because they were cheaper. The hay crop was very poor, and only about two hundred reapers were sold, all being of American manufacture.

—The eleventh annual report of the Northern Pacific (Employees') Beneficial association for the year ending June 30 last has just been issued. The association has hospitals at Brainerd, Minn., and at Missoula, Mont. These hospitals treated during the year 3,399 cases and 16,117 were treated by the surgeons outside the hospitals. A number of the officers of the railroad have made important contributions of books for the use of the patients at the hospitals. The receipts of the association for thirteen months were \$105,934, of which about \$92,640 was ordinary revenue from members. The average cost per patient per day was, at the Brainerd hospital, \$1.67; at Missoula, \$2.26; outdoor and office patients, \$1.25. The total average cost per patient was \$44.17 at Brainerd and \$57 at Missoula.—Railroad Gazette.

Supposed Payment.

The bullying manner sometimes assumed by certain barristers in cross-examination, in order to confuse a witness and make his replies incoherent, questions hesitating and contradictory, is notorious, and many are the tales told of "cute" witnesses who have turned the tables on their persecutors. The following relates to a case of this kind:

In a civil action in money matters the plaintiff had stated that his financial position was always satisfactory. In cross-examination he was asked if he had ever been bankrupt.

"No," was the answer.

Next question was: "Now, be careful; did you ever stop payment?"

"Yes," was the reply.

"Ah," exclaimed the counsel, "I thought we should get you at last. When did that happen?"

"After I paid all I owed," was the answer.—Green Bag.

A Celestial Clock.

Wynn Molesworth has invented and constructed a very ingenious "celestial clock." The entire face of the clock rotates under a wire bar, representing the equatorial horizon, and is regulated to perform one revolution in twenty-three hours, fifty-six minutes, four seconds, this being the time in which the earth turns once upon its axis. The apparent annual motion of sun, moon and planets in the opposite direction is effected by movable pins, while the north and south polar stars, that do not rise or set for us, revolve simultaneously with the rest, by a separate movement. Thus may be seen the heavens and constellations in their actual places, ever rising and setting, as they rise and set in the heavens.—Pall Mall Budget.

Comfort from the Conductor.

The train had stopped at a station and several men had alighted, as was their custom, to stretch their legs on the platform, and when it started again one of the men, who had strayed a little too far off, was left behind.

In a minute or two there was a loud scream and a woman rushed up to the conductor and exclaimed excitedly: "You left my husband behind at that last station."

"Never mind, madam," replied the official; "calm yourself. We shall be at Chicago in three hours and then you can get another husband."—Judge.

A Landlord in Gloom.

Wife—Who was that who called? Husband—One of my tenants came to pay his rent.

"Did he pay it?"

"Yes."

"Then why do you look so gloomy?"

"He didn't say a word about wanting five or six hundred dollars' worth of repairs."

"What of it?"

"That shows that he's going to leave."—N. Y. Weekly.

Not to the Message.

Office Boy—Mr. Gayman sent me to tell you not to keep dinner waiting for him this evening. He's got to go to the hotel on important business.

Mrs. Gayman—To the lodge? O, yes. He is going to "ride the goat," I suppose.

Office Boy—No, I don't think it's a goat. I heard 'im tellin' Mr. Quickstep he was going to eat a little lark.—Chicago Tribune.

SHE WOULD MAKE AN EFFORT.

"Now, Neddie, learn your lessons and mamma will love you."

"Will you love me as much as you do the pug?"

"I'll try to, dear."—Demorest's Magazine.

A Careless Vigil.

The Coptic patriarch of Alexandria is never allowed to sleep more than fifteen minutes at any one time, and if the attendant should allow the holy one's nap to extend beyond the allotted time the penalty is decapitation. Upon being aroused at the end of each quarter hour the patriarch arises and spreads his rug upon the floor, kneels upon it, bows his head three times to the east and then again retires.—St. Louis Republic.

Amending the Motions.

"He was a small man, the conductor of an electric car, and she was a large, powerful-looking woman."

"I want you to put me off at Dundas street," said she.

He viewed her majestic figure for a moment and replied:

"Madam, I will stop the car and let you get off."—Toronto Empire.

A Firm Conviction.

The lady had implied no doubt as to the statement of the dairymaid.

"Madam," he said, indignantly, "my reputation rests upon my butter."

"Well," she replied, testily, "you needn't get ugly about it. The foundation is strong enough to keep it up forever."—Detroit Free Press.

The Only Possibility.

"Binkins went out hunting this morning."

"All alone?"

"Yes, didn't even take a dog."

"Suppose he'll kill anything?"

"No. Not unless he gets melancholy and commits suicide."—Washington Star.

A True Conservative.

"I see that you have been elected a member of the chamber of deputies, and I would like to know what policy you intend to adopt."

"Oh, I shall do as the others do. In other words, I am determined not to sever one inch from the path of tradition."—Paris Figaro.

Evolution of Football.

Father—How did your football game result today?

Boy—The Hangtowners beat us.

"You have always beaten them before, haven't you?"

"Yes, but today they had a trained Billy goat in their team."—Good News.

The World Grows No Better.

"If Theodore Thomas is a musician," said Banks, "why isn't that nobody ever saw him play a cornet, for instance?"

"He doesn't have to," said Rivers.

"He can always find some subs to 'foot.'"—Chicago Tribune.

A Thought Disclosed.

Tom—I can read your thoughts. I know just what you are thinking about now.

Daisy (blushing indignantly)—Nonsense! If you did propose I'd refuse you. So there.—Chicago Record.

The Advantages of a Go-Between.

"You must tell him I don't love him."

"Why don't you tell him so yourself?"

"Oh, he would believe it if I told him."—Life.

He Was Wining.

Miss Keedick (after his proposal)—I'll be a sister to you.

Mr. Dolley—That's right. Every true wife ought to be a sister to her husband.—Truth.

Not a Flatterer.

FARM AND GARDEN.

A SENSIBLE OFFER.

How a Missouri Farmer Proposes to Secure Good Roads.

Hon. John Walker, of Howard county, Mo., ventilates a plan which has the merit of originality and probable feasibility also. Mr. Walker says:

"I will give \$1 per acre on every acre of land I own toward the building of a gravel road from Rocheport to Jackman's mill. My farm consists of 450 acres—hence I will take stock in said road to the amount of \$450. I will also give the same amount for a gravel road from Rocheport to Ashland church or from the church to Fayette.

"If we could get the farmers once interested in such an enterprise, it would be but a few years until we could have the best roads in the west. The building of these roads can be accomplished with less cost in the long run than the present system of road working is now costing the farmer. It must also be remembered that each individual who pays in as much as \$100 becomes a

A ROAD NEAR CHICAGO.

(Driving on such a highway makes life worth living.)

stockholder in the road. In fact, stock can be issued at \$100 a share, and I will venture the assertion that this money will return a larger dividend than in any other way invested."

This has the right ring. It hits the nail squarely on the head and shows that Mr. Walker knows what he is talking about. Next to railroads, substantial and lasting public highways are worth more to a country, including both the farmers and the townsmen, than any other single investment that could be made. The press and citizens of Missouri and Kansas should take this question up and not cease agitating it until the principal towns of every county within the two states are joined by lasting macadam or gravel roads.—Kansas City Times.

GARDEN CONVENIENCE.

How to Construct a Combined Barrow and Garden Cart.

The illustration represents a home-made garden convenience that has a variety of uses. It can be used as a plain barrow, either end being fitted for such use, as the wheels are placed well inside the position of the uprights, thus throwing the weight of the load upon the wheels, rather than upon the handles. It is also a veritable cart to be pushed or drawn as one may wish.

It also serves handily as a table or bench when one is planting a garden and greatly needs some such arrangement.

To make of this an inclosed barrow or cart, one may fit thin boards to the uprights at the ends, and also fit light strips to the sides in the position of the dotted lines. These strips can be attached in a moment by driving iron staples in the outside of the outer uprights, left projecting far enough to pass through slots in the strips, which

BARROW AND GARDEN CART.

are held securely in place by wooden pins or keys, slipped through the projecting staples. The lower strip on either side can be hinged to the frame-work if desired, to be folded down out of the way when such side pieces are not desired. Round iron is used for braces and for the attachment of the wheels. The latter should have wide rims, and may often be found in sets in the heaps of old iron, broken machines, etc., to be seen about machine shops, foundries and shops where iron implements are sold. The whole should be lightly but strongly made, when this combination of cart and barrow will be found a most serviceable friend to the gardener.—Webb Donnell, in American Gardener.

The Secret of Success.

The most important secret in successful fruit-growing is this: The trees should be fed with as much liberality and care as the best of all the crops grown in the fields. The demands of the tree are not only for the fruit, but for itself, the increased growth of it taking from the land each year quite as much of the fertility of the soil as a crop of wheat or corn. Of course, it will be admitted that only a healthfully growing tree will bear a full crop, and doubtless the reason why trees bear only alternate years is that the tree itself takes the first contribution from the soil, and this being imperative, nothing is left for the fruit in the second year, the crop of the preceding year, with the increase of the tree, having exhausted the land. And as the mineral elements are mostly needed, nothing else will be so useful as lime, applied freely to the land.—Rural World.

This dairyman who permits his corn fodder to get partly ripe or frost-bitten before he cuts it up is the same man who never gets around to his hay-making until the grass is mature.

THE FINANCIAL SIDE.

How Col. Albert A. Pope Would Raise Funds for Good Roads.

During the past year thousands of articles on the subject of the betterment of the highways have appeared in the newspapers of the country. The great value and importance of good roads to intelligent person questions, but how to raise money to obtain them is a difficult problem about which opinions widely differ.

I beg leave to suggest in your columns a plan which I believe to be the least burdensome and the most effectual and equitable for providing good roads. Let each state establish a graduated succession tax on legacies and inheritances. Such a tax might be arranged as follows: On all estates valued at \$10,000 up to \$1,000,000, 1 per cent; on estates over \$1,000,000 and up to \$5,000,000, 2 per cent; on the first \$1,000,000, 2 per cent; on the remainder, on estates over \$5,000,000 up to \$10,000,000, 1 per cent; on the first \$1,000,000, 2 per cent; on the remainder, on estates over \$10,000,000 up to \$25,000,000, 3 per cent; on the first \$1,000,000, 3 per cent; on the remainder, on estates over \$25,000,000 up to \$50,000,000, 4 per cent; on the first \$1,000,000, 4 per cent; on the remainder, on estates over \$50,000,000 up to \$100,000,000, 5 per cent; on the first \$1,000,000, 5 per cent; on the remainder, on estates over \$100,000,000 up to \$500,000,000, 6 per cent; on the first \$1,000,000, 6 per cent; on the remainder, on estates over \$500,000,000 up to \$1,000,000,000, 7 per cent; on the first \$1,000,000, 7 per cent; on the remainder, on estates over \$1,000,000,000 up to \$5,000,000,000, 8 per cent; on the first \$1,000,000, 8 per cent; on the remainder, on estates over \$5,000,000,000 up to \$10,000,000,000, 9 per cent; on the first \$1,000,000, 9 per cent; on the remainder, on estates over \$10,000,000,000 up to \$50,000,000,000, 10 per cent; on the first \$1,000,000, 10 per cent; on the remainder, on estates over \$50,000,000,000 up to \$100,000,000,000, 11 per cent; on the first \$1,000,000, 11 per cent; on the remainder, on estates over \$100,000,000,000 up to \$500,000,000,000, 12 per cent; on the first \$1,000,000, 12 per cent; on the remainder, on estates over \$500,000,000,000 up to \$1,000,000,000,000, 13 per cent; on the first \$1,000,000, 13 per cent; on the remainder, on estates over \$1,000,000,000,000 up to \$5,000,000,000,000, 14 per cent; on the first \$1,000,000, 14 per cent; on the remainder, on estates over \$5,000,000,000,000 up to \$10,000,000,000,000, 15 per cent; on the first \$1,000,000, 15 per cent; on the remainder, on estates over \$10,000,000,000,000 up to \$50,000,000,000,000, 16 per cent; on the first \$1,000,000, 16 per cent; on the remainder, on estates over \$50,000,000,000,000 up to \$100,000,000,000,000, 17 per cent; on the first \$1,000,000, 17 per cent; on the remainder, on estates over \$100,000,000,000,000 up to \$500,000,000,000,000, 18 per cent; on the first \$1,000,000, 18 per cent; on the remainder, on estates over \$500,000,000,000,000 up to \$1,000,000,000,000,000, 19 per cent; on the first \$1,000,000, 19 per cent; on the remainder, on estates over \$1,000,000,000,000,000 up to \$5,000,000,000,000,000, 20 per cent; on the first \$1,000,000, 20 per cent; on the remainder, on estates over \$5,000,000,000,000,000 up to \$10,000,000,000,000,000, 21 per cent; on the first \$1,000,000, 21 per cent; on the remainder, on estates over \$10,000,000,000,000,000 up to \$50,000,000,000,000,000, 22 per cent; on the first \$1,000,000, 22 per cent; on the remainder, on estates over \$50,000,000,000,000,000 up to \$100,000,000,000,000,000, 23 per cent; on the first \$1,000,000, 23 per cent; on the remainder, on estates over \$100,000,000,000,000,000 up to \$500,000,000,000,000,000, 24 per cent; on the first \$1,000,000, 24 per cent; on the remainder, on estates over \$500,000,000,000,000,000 up to \$1,000,000,000,000,000,000, 25 per cent; on the first \$1,000,000, 25 per cent; on the remainder, on estates over \$1,000,000,000,000,000,000 up to \$5,000,000,000,000,000,000, 26 per cent; on the first \$1,000,000, 26 per cent; on the remainder, on estates over \$5,000,000,000,000,000,000 up to \$10,000,000,000,000,000,000, 27 per cent; on the first \$1,000,000, 27 per cent; on the remainder, on estates over \$10,000,000,000,000,000,000 up to \$50,000,000,000,000,000,000, 28 per cent; on the first \$1,000,000, 28 per cent; on the remainder, on estates over \$50,000,000,000,000,000,000 up to \$100,000,000,000,000,000,000, 29 per cent; on the first \$1,000,000, 29 per cent; on the remainder, on estates over \$100,000,000,000,000,000,000 up to \$500,000,000,000,000,000,000, 30 per cent; on the first \$1,000,000, 30 per cent; on the remainder, on estates over \$500,000,000,000,000,000,000 up to \$1,000,000,000,000,000,000,000, 31 per cent; on the first \$1,000,000, 31 per cent; on the remainder, on estates over \$1,000,000,000,000,000,000,000 up to \$5,000,000,000,000,000,000,000, 32 per cent; on the first \$1,000,000, 32 per cent; on the remainder, on estates over \$5,000,000,000,000,000,000,000 up to \$10,000,000,000,000,000,000,000, 33 per cent; on the first \$1,000,000, 33 per cent; on the remainder, on estates over \$10,000,000,000,000,000,000,000 up to \$50,000,000,000,000,000,000,000, 34 per cent; on the first \$1,000,000, 34 per cent; on the remainder, on estates over \$50,000,000,000,000,000,000,000 up to \$100,000,000,000,000,000,000,000, 35 per cent; on the first \$1,000,000, 35 per cent; on the remainder, on estates over \$100,000,000,000,000,000,000,000 up to \$500,000,000,000,000,000,000,000, 36 per cent; on the first \$1,000,000, 36 per cent; on the remainder, on estates over \$500,000,000,000,000,000,000,000 up to \$1,000,000,000,000,000,000,000,000, 37 per cent; on the first \$1,000,000, 37 per cent; on the remainder, on estates over \$1,000,000,000,000,000,000,000,000 up to \$5,000,000,000,000,000,000,000,000, 38 per cent; on the first \$1,000,000, 38 per cent; on the remainder, on estates over \$5,000,000,000,000,000,000,000,000 up to \$10,000,000,000,000,000,000,000,000, 39 per cent; on the first \$1,000,000, 39 per cent; on the remainder, on estates over \$10,000,000,000,000,000,000,000,000 up to \$50,000,000,000,000,000,000,000,000, 40 per cent; on the first \$1,000,000, 40 per cent; on the remainder, on estates over \$50,000,000,000,000,000,000,000,000 up to \$100,000,000,000,000,000,000,000,000, 41 per cent; on the first \$1,000,000, 41 per cent; on the remainder, on estates over \$100,000,000,000,000,000,000,000,000 up to \$500,000,000,000,000,000,000,000,000, 42 per cent; on the first \$1,000,000, 42 per cent; on the remainder, on estates over \$500,000,000,000,000,000,000,000,000 up to \$1,000,000,000,000,000,000,000,000,000, 43 per cent; on the first \$1,000,000, 43 per cent; on the remainder, on estates over \$1,000,000,000,000,000,000,000,000,000 up to \$5,000,000,000,000,000,000,000,000,000, 44 per cent; on the first \$1,000,000, 44 per cent; on the remainder, on estates over \$5,000,000,000,000,000,000,000,000,000 up to \$10,000,000,000,000,000,000,000,000,000, 45 per cent; on the first \$1,000,000, 45 per cent; on the remainder, on estates over \$10,000,000,000,000,000,000,000,000,000 up to \$50,000,000,000,000,000,000,000,000,000, 46 per cent; on the first \$1,000,000, 46 per cent; on the remainder, on estates over \$50,000,000,000,000,000,000,000,000,000 up to \$100,000,000,000,000,000,000,000,000,000, 47 per cent; on the first \$1,000,000, 47 per cent; on the remainder, on estates over \$100,000,000,000,000,000,000,000,000,000 up to \$500,000,000,000,000,000,000,000,000,000, 48 per cent; on the first \$1,000,000, 48 per cent; on the remainder, on estates over \$500,000,000,000,000,000,000,000,000,000 up to \$1,000,000,000,000,000,000,000,000,000,000, 49 per cent; on the first \$1,000,000, 49 per cent; on the remainder, on estates over \$1,000,000,000,000,000,000,000,000,000,000 up to \$5,000,000,000,000,000,000,000,000,000,000, 50 per cent; on the first \$1,000,000, 50 per cent; on the remainder, on estates over \$5,000,000,000,000,000,000,000,000,000,000 up to \$10,000,000,000,000,000,000,000,000,000,000, 51 per cent; on the first \$1,000,000, 51 per cent; on the remainder, on estates over \$10,000,000,000,000,000,000,000,000,000,000 up to \$50,000,000,000,000,000,000,000,000,000,000, 52 per cent; on the first \$1,000,000, 52 per cent; on the remainder, on estates over \$50,000,000,000,000,000,000,000,000,000,000 up to \$100,000,000,000,000,000,000,000,000,000,000, 53 per cent; on the first \$1,000,000, 53 per cent; on the remainder, on estates over \$100,000,000,000,000,000,000,000,000,000,000 up to \$500,000,000,000,000,000,000,000,000,000,000, 54 per cent; on the first \$1,000,000, 54 per cent; on the remainder, on estates over \$500,000,000,000,000,000,000,000,000,000,000 up to \$1,000,000,000,000,000,000,000,000,000,000,000, 55 per cent; on the first \$1,000,000, 55 per cent; on the remainder, on estates over \$1,000,000,000,000,000,000,000,000,000,000,000 up to \$5,000,000,000,000,000,000,000,000,000,000,000, 56 per cent; on the first \$1,000,000, 56 per cent; on the remainder, on estates over \$5,000,000,000,000,000,000,000,000,000,000,000 up to \$10,000,000,000,000,000,000,000,000,000,000,000, 57 per cent; on the first \$1,000,000, 57 per cent; on the remainder, on estates over \$10,000,000,000,000,000,000,000,000,000,000,000 up to \$50,000,000,000,000,000,000,000,000,000,000,000, 58 per cent; on the first \$1,000,000, 58 per cent; on the remainder, on estates over \$50,000,000,000,000,000,000,000,000,000,000,000 up to \$100,000,000,000,000,000,000,000,000,000,000,000, 59 per cent; on the first \$1,000,000, 59 per cent; on the remainder, on estates over \$100,000,000,000,000,000,000,000,000,000,000,000 up to \$500,000,000,000,000,000,000,000,000,000,000,000, 60 per cent; on the first \$1,000,000, 60 per cent; on the remainder, on estates over \$500,000,000,000,000,000,000,000,000,000,000,000 up to \$1,000,000,000,000,000,000,000,000,000,000,000,000, 61 per cent; on the first \$1,000,000, 61 per cent; on the remainder, on estates over \$1,000,000,000,000,000,000,000,000,000,000,000,000 up to \$5,000,000,000,000,000,000,000,000,000,000,000,000, 62 per cent; on the first \$1,000,000, 62 per cent; on the remainder, on estates over \$5,000,000,000,000,000,000,000,000,000,000,000,000 up to \$10,000,000,000,000,000,000,000,000,000,000,000,000, 63 per cent; on the first \$1,000,000, 63 per cent; on the remainder, on estates over \$10,000,000,000,000,000,000,000,000,000,000,000,000 up to \$50,000,000,000,000,000,000,000,000,000,000,000,000, 64 per cent; on the first \$1,000,000, 64 per cent; on the remainder, on estates over \$50,000,000,000,000,000,000,000,000,000,000,000,000 up to \$100,000,000,000,000,000,000,000,000,000,000,000,000, 65 per cent; on the first \$1,000,000, 65 per cent; on the remainder, on estates over \$100,000,000,000,000,000,000,000,000,000,000,000,000 up to \$500,000,000,000,000,000,000,000,000,000,000,000,000, 66 per cent; on the first \$1,000,000, 66 per cent; on the remainder, on estates over \$500,000,000,000,000,000,000,000,000,000,000,000,000 up to \$1,000,000,000,000,000,000,000,000,000,000,000,000,000, 67 per cent; Remittances made by money order, postal note, registered letter or bank draft will be accepted. All orders must be accompanied by the name of the sender. Address: THE REPUBLICAN, Oakland, Md.

THURSDAY, FEB. 1, 1894.

It is said that Cleveland "is full of fight." So was Mitchell.

Avoid the sign "imported," avoid things "imported," avoid the tailor who carries nothing but "imported" suitings; avoid the shops that announce nothing but the "imported" silks, the "imported" glassware, the "imported" china, the "imported" bric-a-brac, the "imported" textiles; avoid the cigar dealer who would sell you only "imported" cigars, which may carry the fifth of foreign countries; avoid the grocer who would sell you "imported" dried fruits, which may carry the germs of disease, and avoid the newspaper which teaches the "imported" idea and advocates Free-Trade.

The President is reported to have made up his mind not to send any more nominations to the Senate until the nomination of Mr. Peckham for the Supreme Bench and a large number of others that have been pending for a long time have been disposed of. He is said to have stated to a Western Representative that out of sixteen names recently sent to the Senate nine were so-called Hill men and seven were accounted to entertain strong sentiments of loyalty for Cleveland. The nine Hill men were promptly confirmed, the seven Cleveland men are still waiting the pleasure of the Senate.

The Hawaiian snarl is playing the part of Barquo's ghost for the Senate. Notwithstanding the efforts of the friends of the President to keep the matter under the surface as much as possible, the enemies of the administration manage to bring the Hawaiian question up every few days in a way that shows that they do not propose to wait until the committee on foreign relations has completed its investigation of the case. But the indications now are that the Senate committee engaged in the work of investigating Hawaiian affairs is approaching the conclusion of its labors, and that their report will probably be made within the next ten days or two weeks.

Demand Free Speech.
The Cleveland policy of cowardice has succeeded the Cleveland policy of infamy.

According to advices from Washington on Tuesday the Administration, aided by the ever faithful "cuckoos," proposes, in defiance of the explicit understanding between Republican and Democratic leaders in the House, to suppress all debate on Hawaii in that body for an indefinite period.

No more humiliating confession of guilt could well be imagined than this conspiracy to strangle free speech and prevent all discussion in regard to a matter which concerns the honor of the Republic and the maintenance of the rights and dignities of Congress against usurpation. If the President and his advisers were not afraid of condemnation and punishment, they would have no reason for stifling debate on the conduct of the Administration.

The Republican Representatives should indignantly refuse to be gagged in pursuance of this outrageous plot.

Valuable Records.
During the past six years there has been so much adverse, if not malicious, criticism of the re-

searches of Mr. H. P. Tasker that we called at his office to learn the facts as they really exist.

A careful examination of his "Abstracts of Titles" convinced us as it will convince all fair-minded and impartial men, that he has accomplished a Herculean task of great value to the tax-payers of Garrett county. In 1887 he began where Mr. Pennington left off and took up the list of thirteen hundred military lots left blank and "undefined" in Mr. Pennington's Field Book in the Commissioners' office. Mr. Tasker's researches, which are copied and indexed in large record books, include all the transfers affecting the untaxed tracts and military lots which mostly belong to non-residents from the dates of their award to officers and soldiers, including all the warrants, patents, wills, deeds, public sales by trustees, sheriffs, constables, tax collectors, false claimants, etc. He has also analyzed the assessment books and demonstrates the fact that there are 126,000 acres of platted areas or 155,000 acres by actual surveys that are not assessed at all and which it will be utterly impossible for the assessors to get at without the use of his abstracts, etc. At a low valuation these untaxed lands, belonging to non-residents, who have no local agents to give them in to the assessors, will amount to upwards of half a million dollars, or from \$5,000 to \$6,000 in taxes annually.

Taking all the facts into consideration it strikes us as remarkably strange that so many prominent tax-payers, business men, lawyers and politicians should have thrown all the obstacles they could invent in the way of Mr. Tasker's work which has no politics in it and which is a God-send to all tax-payers regardless of party politics.

It is not very often THE REPUBLICAN puts itself on a level with the blackguard who edits the *Argus*, a weekly sheet published at Baltimore, but the time has come when we are compelled to descend to his level as it is beyond his power to ascend to the elevation occupied by a man.

This week's issue of THE REPUBLICAN contains an article wherein this blackguard assails Garrett county's schools and the manner in which the money is provided for them out of the State school fund. The article in question published by us is supplemented by some remarks made by Representative George on the floor of the house. This week the editor of the blatant *Argus* comes back at Mr. George and not only calls him a thief, but tries to besmear the character of every voter and taxpayer in Garrett county and asserts that to get this extra appropriation from the school fund "it is really the test of a man's election in that (Garrett) county."

This man Richardson, if we may be allowed to call him a man, who is editor of the *Argus*, holds the position of Senate door keeper at the State house in Annapolis. He is paid by the people and it seems that he is allowed to do and say what he has a mind to and there is no hand put forth to restrain him. He disgraces the position he holds and is a public disgrace to every citizen of the State.

It should become the duty of every Senator and Delegate at Annapolis to have this low, despicable cur removed from the position he occupies and thus confer an everlasting favor upon the people and remove a strain from the fair name of the State of Maryland.

Notice.
All taxes remaining unpaid by the 15th of February, 1894, will be placed in the hands of the Sheriff for collection.

Ripans Tabules relieve headache.

That Commission.
To the Editor of The Republican.
The excuse of the despoilers now is that they are simply executing the mandate of the people.

Cleveland has declared time and again and Chairman Wilson and others reiterate it, that the Democratic Administration and Congress are commissioned to reform the Tariff on the lines of the Chicago platform.

A great many Democrats, perhaps a majority of them are not Free Traders and would prefer to see the Tariff let alone. They voted the ticket simply because they believed themselves Democrats but who have now discovered their mistake.

It would be a serious mistake to know that sort of a reason the Democrats of Garrett county thought they were excused when voting the present Administration into power.

The Democratic farmers probably meant to say, "Look here, Mr. Cleveland & Co. we are getting along better than we think we ought to; we are actually getting 25 cents per pound for our wool and 41 cents per pound for our lambs. We want you to change this. We want wool put on the free list so that we will get no more for our wool than the Australian and the South American gets for his. They produce wool which, on account of its great abundance, they are glad to get 12 1/2 cents per pound for, and we wish to compete with him. We also wish to have the pleasure of helping to pay the \$16,000,000 which the foreign producer pays our Government for the privilege of entering his wool in our markets."

"The 41 cents per pound we got for our lambs under Harrison was very nice, but we commission you to close the mills and shops to reduce the pay of the wage-earner so that he cannot afford to buy lamb, and so that we will get but 2 1/2 to 3 cents per pound for lambs and 2 to 2 1/2 cents per pound for old sheep. Of course the more sheep, lambs and wool we produce at these prices the poorer we will be; it virtually means the confiscation of one-third of our property, but we are Democrats and this is the policy of our party, so just drive on your horses. The platform said 'for revenue only,' but that don't count in this neck 'o' woods."

The miners who voted for Cleveland and reform are presumed to have said by their votes, "We are having a 'soft snap' of it—too good a thing by a large majority. We get good pay but don't have work all the time, we therefore commission you to remove the duty from coal so that we will have less work, less pay and more competition. We dig about all the coal consumed in this country now, but we want the thing changed, for there is a candidate of big New York and Boston millionaires who have purchased everything in sight in Nova Scotia, and we want them to become greater millionaires. Our mines may be closed, it may take the bread out of our children's mouths; we may be reduced to beggary, but such being the policy of the Democratic party we as Democrats demand that it be carried out."

When the lumberman voted the Democratic ticket he probably meant to say, "There is now a great deal of competition in the lumber trade, a great many firms fail because their product cannot be sold for enough to pay expenses, but we must look after the interests of Canada. Yes, Mr. Cleveland, and you the Democratic Congress, are Democrats, and you are supposed to be running this government in the interest of every other country but the United States, and we therefore command you to violate your anti-election pledges and put lumber on the free list so that Canada will get our trade, and the wholesale dealers will have chance to make bigger profits. We know it is not patriotic, but as Democrats we are against the interests of our section, and our people and we therefore commission you to put lumber on the free list and injure the business all you can."

And last but not least by any means are the patriots gentlemen of the Democratic persuasion who run the local machines, gentlemen in the higher walks, gentlemen who in this latitude are addicted to the holding of places of trust or profit (profit preferred,) gentlemen who believe in office by appointment—as being sure; gentlemen found occasionally in the editorial chair of the cuckoo press, they have issued their commission and if put in blank verse it might read something like this:

"August Sire, and Company: You are the Government and we are the Democratic party. Do what you will, we are with you. We are not sitting up nights to protect anything in our section of the country. You can't be too sweeping in your Tariff policy to suit us. We are not running any sort of business, which accounts for the fact that we know so much

about it. Not being personally interested we take a calm, judicial view of such matters. There are some protected industries carried on in these parts, but we have never uttered a word in their behalf. It is all well enough to protect the labor of New York, New England and the great labor centers, for they have unions and things there, but we want none of it here. Put iron ore, coal, lumber, wool and everything this section produces on the free list and ruin these industries if it will, but no word of protest will ever be uttered by us. We draw our substance from these people, and these are the only industries that make any business or bring any money among them. They declare it will cripple or destroy their prosperity, but being simply business men or ignorant farmers what do they know about it? We are Democrats and demand that the party policy be carried out."

The Democratic administration and law making power understand the above to be the voice, the command of the people. If they are mistaken it would be a good idea for the people whose commission they bear to send them an interpreter.

The Issuance of Bonds for School Purposes.
A correspondent living in Oakland sends THE REPUBLICAN the following communication, wherein he favors the issuance of bonds for the purpose of securing money with which to build and equip new school buildings:

To the Editor of The Republican.
In the issue of THE REPUBLICAN of last week I noticed an editorial advocating the issuance of bonds for the purpose of securing means with which to erect school houses in Garrett county.

I want to say, as a citizen and a tax-payer, that I am in favor of issuing the bonds and if it comes to a vote I will vote for it, but at the same time I am against the issuance of such bonds unless the question is first submitted to the people of the county, and hope our representatives at Annapolis will frame the bill so as to allow the people of the county to say whether or not the bonds shall be issued.

I also hope that our representatives will be able to get a bill passed allowing the people of Garrett to elect the School Board by ballot. This is a right that belongs to the people and I cannot see how any true American citizen can be opposed to the measure.

I hope that the tax-payers will take the bond question into consideration and express themselves freely through the press, so that our representatives may know the will of the people.

Oakland, Md., Jan. 30, 1894.

North Glace.
The beautiful snow has come at last. Girls, get ready for a sleigh ride; we will now see who drives the best rig.

The Rev. Royer is holding a series of meetings at Meadow Mountain which are largely attended. May much good be accomplished.

J. L. McKelvie and Daniel Mosser went to Westport Tuesday on business.

A. C. Browning and son Wallace killed three foxes the past week.

Mrs. M. Fargeson is visiting her sister, Mrs. G. W. Moon, of this place.

La grippe has left our neighborhood at last. Everybody is now well.

Col. Wm. McKelvie is visiting his old friends and neighbors at and around Chestnut Grove, in District No. 4. The Colonel is smart for a man of his age. He is in his 82nd year.

George H. Beckman took in Thayerville on Saturday and Sunday.

If this appears in the columns of THE REPUBLICAN ye editor shall hear from us again.

With best wishes to THE REPUBLICAN in its new home, I am,
Respectfully,
SUBSCRIBER.

Dentistry.
Dr. D. O. McKinley, of Elk Lick, Pa., will visit in Garrett county, Md., at the following places: Deer Park, February 6th, 7th and 8th; McHenry, February 10th; Isaiah Friend's (Elder), February 12th; Friendsville, February 13th and 14th. Teeth extracted without pain.

District No. 11.
Mr. John Merrill, Miss Etta Brennenman and Miss Rachel Greig visited Mrs. Mary J. E. Broadwater last Sunday.

H. J. Crow paid Henry Broadwater a visit last Sunday.

Mr. Stephen Broadwater, of Minnesota, is visiting his father.

Mr. Peter McIntyre has pleasant smiles these days—it is a boy.

Mr. Enoch Robinson is repairing Mr. Gregg's flouring mill.
Ripans Tabules cure jaundice.

THE SCHOOL FUND.

A Few Extracts from the Report of the Commission.

The report of the Maryland School Tax Commission is on our table, with the compliments of Robert Shriver, Esq., Secretary of the Commission.

This commission was appointed under the act of 1892, with authority to thoroughly investigate the matter of the distribution of the school tax under existing laws and ascertain its practical operations and effects in the various counties of the State and the city of Baltimore, and how far the same works inequality, hardship and injustice, and the cause or causes thereof and the proper remedy.

The existing law requires the Comptroller to distribute the State school tax in proportion to the respective population of each county and the city of Baltimore between the ages of five and twenty years. Under this rule the distribution to pupils per capita has been exceedingly unfair, as may be instance in the cases of Garrett and Charles counties respectively. The former received \$1.81 per capita, while the latter received \$5.81.

Of the total expense of the schools for 1892 Charles supplied only twelve per cent., Calvert thirteen, St. Mary's eighteen, Somerset twenty, while others ranged from thirty-two to seventy-eight per cent. Allegany paid sixty-four per cent., Cecil sixty-seven, Baltimore sixty-eight, Washington sixty-nine, and Baltimore city seventy-eight per cent. Of these, Calvert, Charles, St. Mary's, Baltimore and Baltimore city had ten months' school; Allegany had eight and three quarters, Cecil had nine, and Washington seven and one-half. Garrett paid forty-four per cent., and had but five months' school.

As against the theory of "getting back what we pay," which is advanced as an argument in favor of the present mode of apportionment, the following is quoted from the report:

Cecil received back what she paid, and 1.8 per cent. of same in addition, or 101.8 per cent., which gave her pupils, respectively as above, per capita, \$2.32, \$2.30 and \$2.48, (or less than the average of the State.)

Washington received back what she paid, and 3.6 per cent. of same in addition, or 103.6 per cent., which gave her pupils, as above, per capita, \$1.18, \$2.11 and \$3.47, (or less than the average of the State.)

Allegany received back what she paid, and 14 per cent. of same in addition, or 114 per cent., which gave to her pupils, respectively as above, per capita, \$2.32, \$2.30 and \$2.48, (or less than the average of the State.)

Garrett received back what she paid, and 45 per cent. of same in addition, or 145 per cent., which gave her pupils, respectively as above, per capita, \$1.81, \$1.51 and \$1.88, (or but little more than one-half of the average of the State.)

Prince George received back what she paid, and 116.7 per cent. of same in addition, or 216.7 per cent., which gave to her pupils, respectively as above, per capita, \$4.26, \$4.23 and \$4.31, (or about fifty per cent. more than the average of the State.)

Worcester received back what she paid, and 180.8 per cent. of same in addition, or 280.8 per cent., which gave to her pupils, respectively as above, per capita, \$3.22, \$3.09 and \$3.52, (or more than the average of the State.)

Calvert received back what she paid and 327 per cent. of same in addition, or 427 per cent., which gave to her pupils, respectively as above, per capita, \$4.27, \$4.86 and \$3.65, (or about fifty per cent. more than the average of the State.)

Charles received back what she paid, and 365.7 per cent. of same in addition, or 465.7 per cent., which gave to her pupils, respectively as above, per capita, \$5.81, \$6.70 and \$5.05, (or about 100 per cent. more than the average of the State.)

St. Mary's received back what she paid, and 387.7 per cent. of same in addition, or 487.7 per cent., which gave to her pupils, respectively as above, per capita, \$5.03, \$5.47 and \$4.50, (or nearly 100 per cent. more than the State average.)

Thus it will be seen that while the present mode of distributing the fund has been a pretty good thing for the little tide water counties of Charles, Calvert and St. Mary's, it has worked an outrageous wrong upon the counties of Allegany and Garrett.

It is not a matter of surprise that such an unequal distribution of the free school fund should result in something approaching the nature of a sham in Garrett. How it has affected the scholastic term explains.

The one having the shortest is Garrett, since its existence as a separate county, has had seven

and one-half months of school for two years only; has been as low as two and one-half months for three years, and has averaged only four and seven-eighths months for the time of its separate existence, 1874 to 1892, inclusive. For the whole time, 1870 to 1892, Garrett had a total of 1194 months of school; Baltimore, Howard, Kent and Baltimore city had each 230 months; Calvert had 229 months, and the other counties varied from 172 1/2 to 225 1/2 months. The average scholastic year, 1870 to 1892, was nine months.

In the year 1892, one county, Garrett, had five months' school; three had seven and one-half; one had eight and three-quarters; four had nine; and twelve, counting Baltimore city as one, had full ten months.

Of late years, about six to eight counties and Baltimore city had the full term of ten months. During the period from 1873 to 1892, inclusive, only two counties and the city of Baltimore averaged the full ten months. During the same period, one county, Garrett had no colored school during seven years, and only two and one-half months to five months for all the rest of that time.

ON TO WASHINGTON.

Another Opportunity to Visit the Capitol of the Nation.

On Thursday, February 8th, the B. & O. R. R. Co. will run the second of the series of mid-winter excursions to Washington from points on its lines between Pittsburgh, Wheeling, Parkersburg, Lexington and Hagerstown. The same arrangements that proved so satisfactory for the former excursion, will be continued. Those who could not take advantage of the first excursion should use every endeavor to go this time. Washington is an instructive city as well as a beautiful one, and every citizen of this great Republic will feel proud of his country after a visit to its Capitol. Congress will be in session and it will be specially interesting to watch the part your representative takes in the questions that now occupy its time and are so freely discussed by the press of the country. The numerous public buildings, Art Galleries, Museums, etc., are open to visitors free of charge, and Mt. Vernon, Annapolis, Baltimore and Old Point Comfort, all within easy reach, offer the tourist additional attractions to fill up the ten-day itinerary.

We give below a list of stations in this vicinity showing time of trains and rates of fare.

LEAVE	TIME	TIME	TIME
Garrett	6:45 a.m.	4:05 p.m.	5:50 p.m.
Wheeling	7:15 "	4:35 "	6:20 "
Parkersburg	7:45 "	5:05 "	6:50 "
Lexington	8:15 "	5:35 "	7:20 "
Hagerstown	8:45 "	6:05 "	7:50 "
Frederick	9:15 "	6:35 "	8:20 "
Gettysburg	9:45 "	7:05 "	8:50 "
Washington	10:15 "	7:35 "	9:20 "

Correspondingly low rates from other stations.

Tickets will be good ten days, and will be valid for passage from Washington to Baltimore at any time within the life of the ticket.

For Pullman Car accommodations and guide to points of interest in Washington, address nearest B. & O. Agent.

A Card.
To the Editor of The Republican.

Having received several communications regarding Prof. Albin (Jones), I wish to state for his benefit and the benefit of the people in Oakland that he taught music to one of the largest classes in New Britain, Connecticut, for about 18 months and lived with me during that time. He was always well respected and is a perfect gentleman and a fine musician.

WM. B. BENFORD.
New Britain, Conn., Jan. 22, 1894.

A Church Wedding.

St. Mark's Ev. Lutheran church, Oakland, was the scene last Thursday evening of a very pretty wedding, the principals of which were two of Oakland's best known and highly esteemed young people, Mr. Gustavus A. Bolden and Miss Sarah V. Spedden, youngest daughter of Mr. George A. Spedden. Although the weather was very cold and disagreeable the beautiful edifice was crowded to the doors. Promptly at 7:30 o'clock the ceremony was performed by the Rev. Wm. L. Leisher, pastor of St. Mark's. The wedding march was played by Miss Lottie Low. The ushers were Messrs. Hamill Spedden, Edward H. Bartlett, Jr., D. E. Offutt, Jr., and Richard E. Sharpes. The bride was becomingly attired in a brown broad-cloth suit, trimmed with velvet, with hat and gloves to match. She carried a beautiful bouquet of roses. The groom was attired in black. Immediately after the ceremony a reception was held at the bride's home, after which the couple left on train No. 4 for Meyersdale and Pittsburgh to spend a few days. Upon their return they will reside in Terra Alta, W. Va., in which town Mr. Bolden is employed as editor of the *Oracle*. The couple received many presents from admiring friends, all of which are useful and some valuable.

WAKEMAN'S WANDERINGS.

The Poet Travels Closes His Eight Years of Famous Wanderings.

LONDON, Jan. 22. —The interiors of Norwegian peasant homes never present that warm, cheery, snug, restful and almost somnolent atmosphere of the Cumberland statesman's home, but it is still a place of simple comfort and plenty, and is often most characteristically and picturesquely. If the ceilings be low, there is always plenty of room. I have come upon many a bonder's kitchen from twenty to thirty feet square and houses in whose great living-rooms the whole family, and I mean by this the three or four families of each guard or farm-house, with a goodly part of the neighborhood, could all be fed at a wedding or funeral supper, or engaged in dancing, of which they are very fond, at one time without serious inconvenience of the assemblage.

These old kitchens are very ancient. Some are from 300 to 400 years old, and were the original and sole dwelling places of the founders of the family. Some have the remains of the central cone-shaped holes in the roof through which air and light once exclusively came, as is still found in some of the Scottish crofter huts of Lewis and Skye. The corner chimney and open fire-place which now are seen are comparatively modern, though still often from one to two hundred years old. Tiny windows are now round in these ancient kitchens; but the floor is usually of beaten earth nearly as hard as stone. A few rude wooden shelves, the heavy iron pots and kettles, a strong pine table and a stool or two, complete the scant and cumbersome furniture.

The living-room is a more pretentious apartment. Huge pine rafters stretch from wall to wall and their natural reddish tint is deepened by age to the rich hue of rosewood. Often the windows have deep casements, with little diamond-shaped panes, and in the summer time they are bright and winsome with plants and flowers. This room always has its wide fire-place, and occasionally two of them on opposite sides of the room. In one corner, near the fire-place is a cupboard, wide, deep and extending from floor to ceiling, and if not flaming with paint it will be covered with a profusion of carving, often in imitation of various articles of tableware.

In the angle where the stairs ascend to the second story another curious closet or cupboard is let into the projection. This will contain the family store of books and what-not for the long winter nights' amusement. A big pine table stands in the center of the room, and its legs will be fairly domed with carvings. Usually a smaller pine table is placed at the side of the room with the best chair or stool behind it, against the wall. This is the seat of honor, but no guest must ever occupy it without invitation from the bonder or his wife.

There are a number of shelves always laden on pegs or perched on grotesque carved brackets; and the stools and chairs are a curious collection of home hand-work. I have seen in many peasants' houses more than a score of chairs carved out of solid cross-sections of huge pine trees. The seat is hollowed deep and wide; the back is worked out thin and round with a fine oval top in which is cut a curved hole for the hand, in order to easily move the chair from place to place; wide well-fashioned and carved arm-rests are at each side; and the bottom of this curious piece of furniture is always worked out as true, thin and perfect as an inverted chopping-bowl or candlestick.

Usually the heads of the household sleep in this comfortable living-room, and the bed will always be found in the long recess behind the angle of the stairs. In many instances the beds are simple bunks built against the wall, and in most of these the chief portion of the bed clothing observable will be skins of sheep, or of the reindeer, beautifully dressed and the hide itself cured as soft as loosely woven wool. In not a few of the more pretentious peasant homes the beds in these recesses are sufficiently wonderful for exhibition at world's fairs. They are big enough for giants to rest in, and are from four to five feet above the floor. Steps up to them, and the single corner post and the side rail which shows, in addition to being carved or painted in the most fantastic manner, will be covered, along with the sides of the ascending steps, with painted texts and mottoes, while a gaily painted rind panel let down from the ceiling above the front of the bed bears in flaming letters the names of the bonder and his wife and the date of their marriage.

In the larger guards there will be a heat room, usually the length of the living-room, but narrow, and if this is not possessed, the chamber above the large living-room bears the same relation to the Norwegian

peasant home. It is in either case a sort of show room, where the possessions of the female members of the family are on exhibition, and a sort of huge family closet. Its furniture is always as rude and simple and of as primitive construction as that in other portions of the house, but it is more gaudily painted. Curious old pine bureaus and chiffoniers are here marvelous in design and coloring, red, yellow and blue paint predominating. These contain the family underwear and all the general drapery.

One always has painted upon it the maiden name of the housewife and the date of her marriage, forming a sort of permanent marriage certificate; and undoubtedly in this, packed carefully away in aromatic leaves and bits of ancient finery, will be found that most glorious bauble to eyes and heart of all Norwegian women, the huge bridal-crown of hand-wrought silver or gilt. I have been shown some which were said to be over 600 years old, and no doubt there are hundreds of these huge and gaudy relics in Norway which have descended in unbroken line from mother to daughter since the days of Olaf the Saint and Hakon the Good.

The inbred sturdiness and independence of character of all Norwegian peasants are best illustrated in the simple yet skillfully made belongings of these hamlet-like homes. Their handicraft is wonderful. The timber for their homes has been felled and fashioned by themselves. Every structure in the country—furnhouse, storehouse, dairy, bakehouse, barn, smithy, shed and bell tower, is built by the peasant himself. Every article of furniture he possesses has been wrought by his own hand. He beats out his cutlery on his own anvil, and carves its handles. All the utensils of the dairy—cheese-molds, tubs, firkins, bowls, churns, milking-pails, and presses are of wood and of home manufacture. Yokes for the seater-girl's necks, baskets, saddles, harness, snow-ploughs, and even comfortable stolecarts and sledges are all made in the little family workshop during the long winter months.

If the Norwegian peasant knows little else than labor from childhood to old age, it is still a labor which brings the immediate and continuous reward of sufficiency and ample content. The brief summer of but three and at the best of but four months, is one of tremendous effort for all the members of the household; for in that little time grows on must be made for an almost endless winter of eight to nine months' duration. The crops of grain, the vegetables, the butter and cheese that are his, are provided among the mountain slopes all require incessant labor; and more important than all else is the supply of hay and other fodder for the winter needs of the then helpless herds. I never before realized how great a value could be set by any people upon a few blades of grass.

EDWARD L. WAKEMAN.

OUR WASHINGTON LETTER.

(From our Regular Correspondent.)

WASHINGTON, Jan. 29, 1894.

Democratic turmoil is to-day at its height. Threats of bolting the tariff bill on account of the income tax amendment are heard on all sides, but the party whip is being vigorously wielded and by Thursday, when the final vote is to be taken, it is probable that a sufficient number of "kickers" will be whipped into line to get the measure, income tax and all, through the House. The vote that is dreaded most of all by the Democratic managers, if they can be said to be managers of the inharmonious majority of the House, is that on the motion to re-commit the bill. The Republicans of the House have not fully decided how they will vote on that motion, but they have been importuned by many influential members of the party to support it, if it can be shown that a sufficient number of Democrats will vote for it to pass it with the aid of the solid Republican vote, and they may do so, although many of them have expressed themselves against it because the result would prolong the uncertainty as to tariff legislation which has already been so disastrous to the business interests of the country.

The steering committee of Republican Senators has fully decided not to oppose the bill for the admission of Utah to Statehood, and from the talk at the conference it may be stated upon good ground that there will be no general opposition from Republicans to the admission of any of the territories.

The Senate Judiciary committee at its regular meeting to-day took up the nomination of Mr. Peckham, of New York, to the Supreme Court vacancy. Senator Hill claims that the nomination will be rejected by a larger majority than was cast against Hornblower, notwithstanding the alleged attempt of Boss Croker, of Tammany, during his

presence in Washington, to make deal that would allow the nomination to be confirmed.

The support of the Republican on the Senate committee on Foreign Relations was obtained for the Gray Hawaiian resolution which was favorably reported to the Senate last week, through a misunderstanding—some do not hesitate to say misrepresentation. Senator Gray opened the eyes of the Senate when he interpreted the resolution to mean that the Senate endorsed the Cleveland policy toward Hawaii. He not only opened the eyes of the Senators, but he made it impossible for his resolution to be passed until it has been amended so as to leave no doubt of its exact meaning. Senator Dolph has stirred up the Senators by proposing the amendment of the following as an amendment—and with a view of restoring amicable relations between the U. S. and Hawaii, the present minister of the U. S. to Hawaii should be immediately recalled.

Representative Bourke Cockran of New York, was charged by Democratic colleagues from the same state, Amos Cummings, who, having, as the attorney for a large number of diamond importers, used his position as a member of the Ways and Means committee to get that committee to recommend an amendment to the tariff bill, reducing the duty on diamonds to 10 per cent. That charge which was backed by documentary evidence, and the shaming which the Republicans gave Democrats for desiring to lower the tariff on diamonds in behalf of the toiling masses, resulted in the defeat of the committee amendment and the adoption of one making the duty 30 per cent.

The most unique tariff protest yet seen was that presented by Senator Culberson, signed by 82 citizens of Streeter, Ill., and reading as follows: "We cannot feed, clothe and educate our families and compete against the poorer paid labor of Europe. We are proud and don't want to be humiliated by asking for charity. How would any of you like to go to a soup house and sit down to free soup? We have pride as well as you. We ask you to defeat the Wilson bill, and we will take care of ourselves."

For some reason the Free Trade Democrats who have stood together for free coal, free iron, and numerous other free things split upon the vote on Breckenridge's amendment—Breckenridge favors numerous free things, as the country doubtless remembers,—providing for putting tin plate on the free list and that amendment was defeated, saving a duty of 1 1/5 cents per pound on tin plate, just half of the McKinley duty. The most significant feature of the tin plate debate was the admission of Democrats that the protection afforded to American tin plate by the McKinley law had resulted in building up a new American industry of large proportions.

The selection of Senator Mills to take the place on the Senate Finance committee of Senator McPherson, of N. J., who has gone away in a pretended huff because of alleged bad health, is only a part of the administration program to force the Cleveland tariff bill through the Senate. McPherson is a warm personal friend of Mr. Cleveland, but his interests are such that he is opposed to the tariff bill, so he is going to straddle the question by going away and remaining away until the fate of the bill is settled. Mills can be depended upon to obey orders.

Mr. George Says Some Things.

On Wednesday of last week Mr. George asked to have the bill re-funding Garrett county the April installment of \$1,572.01 for school purposes for 1893 and 1894 taken up for its third reading, and on his request being granted had a marked article in the *Baltimore Argus* sent to the clerk's desk and asked to have it read. The article in question is as follows:

"Among the regulars of the Legislative session the Garrett county school fund bill turned up this week like the minute hand of grandfather's clock. This is an old dodge, biennially perpetrated, to the injury of the other counties' schools, and is not only a robbery, systematic robbery, of the school funds, but it makes the state law a ridiculous farce. If Garrett county does not choose to impose a tax upon itself sufficient to enable it to comply with the law governing the state school fund, why should the senators of other counties be willing to take the money from their counties and reward Garrett county, which for many years to our own knowledge has been evading and violating the school fund law?"

On this subject Mr. George said, among other things: "Mr. Speaker, I think I would prove recreant to the trust confided in me by the people I have the honor in part to represent did I not give this House some idea of the true condition of affairs in our county, and being charitably inclined I can but think

that the writer of that article was ignorant of the facts in the case and if not so, then a man of that calibre ought not set himself up as an educator of the people. It has been asserted that our people ought to tax themselves so as to keep the schools open the length of time required by law. The fact is, Mr. Speaker, that Garrett county is paying more, according to the taxable basis, for educating her children than any other county in the state, and that while several of the counties are paying but ten and twelve cents on the one hundred dollars, Garrett county is paying a fraction over thirty-three cents on the one hundred dollars. There is no county that is doing so much for its children according to its ability as Garrett county, and I present any imputation upon my people that seems in the least unjust does; also I want it distinctly understood that our people are not down here holding out the hat so as to receive alms. We are simply demanding our right. While in 1873 we had but fifty-five school houses, to-day we have one hundred and fifty-five. We have built thirty-five school houses in the last five years, and another fact I remember is that Garrett county is the largest in area of any county in the state, and being sparsely settled, it costs more in proportion to run our schools; and yet there are other counties which pay in a great deal less to the state school fund than we and yet get double the amount out that we do. On last night I took the trouble to look through the journal of the House and of the Senate of the different sessions when a similar bill has been before the Legislature, and I have failed to find a single negative vote against this measure. It is not charity, but only just and right and I hope and believe that the members of this House will not vote against giving back to Garrett county what has been withheld, and to which it is justly entitled."

Glade Valley.

"More snow!" is the cry of the farmers.

Mrs. J. H. Roth was the guest of Daniel Guegy last Friday. Samuel Guegy was the guest of Wm. Bittner last Sunday.

J. S. Guegy was the guest of J. H. Roth last Thursday.

The Glade Valley literary society did not meet last Saturday evening.

The Mosser Bros. cleared their yard of logs one day last week, but quite a number of logs have been hauled in since.

Mr. E. W. Roth has recovered from his sickness, but is not able to do any work yet.

The X-road literary society met Saturday evening. Able speeches were made on both sides on the subject, *Resolved*, That a man gains more knowledge by reading than by traveling.

Messrs. Shaffer & Smith are gradually increasing their line of store goods.

Wm. Bittner is hauling saw logs. He expects to build a new house next summer.

A spelling match will take place at the Ganer school house this week.

O. K.

Fayette County, Pa., Moving for Good

Donnstown, Pa., *Genius of Liberty*, Jan. 11.

We are glad to see that the people of Fayette county are ready to join in the march of progress, in road improvement. It is said that the character of the roads is an emblem of the civilization of a people. The best roads in the world are to be found in France, Germany and England. In all these countries the roads early came under the national supervision, and this government aid has made the best roads in existence.

Good roads are always to be desired, and are a source of comfort and convenience to all who use them. They attract a good class of population, improve land values and encourage exchange of commerce.

We are pleased to note that the committee recently appointed at the Farmers' Institute to devise means for the betterment of our roads, have taken prompt action and have called a public meeting for the exchange of ideas. This agitation of the road question will bring good results, and the men who are joining their forces to accomplish the object sought for, are the leaders of thought in the sections they represent.

Let the good work go on until our road-ways are the equal of those in any land, symbolizing the most advanced civilization known on the earth.

When Baby was sick, we gave her Castoria.

When she was a Child, she cried for Castoria.

When she became Miss, she clung to Castoria.

When she had Children, she gave them Castoria.

CASTORIA

for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTIN, D. D., New York City.

Castoria cures Colic, Constipation, Sour Stomach, Diarrhea, Eructation, Kills Worms, gives sleep, and promotes digestion. Without injurious medication.

"For several years I have recommended your 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results." EDWIN F. PARKER, M. D., 125th Street and 7th Ave., New York City.

THE CENTRAL COMPANY, 77 MURRAY STREET, NEW YORK CITY.

Poor Printing

Pays

Poor Profits.

We get out a class of printing that is superior to the "general run." Good printing pays, and that is the only kind we furnish our customers and patrons.

The Republican Job Printing Department, Oakland, Maryland.

WINTER

Weather has come at last, and our prices on winter goods are so low that you can buy them at one-half the price that you would pay at any other store in the country.

Best flannels for 33 cents per yard; heavy muslin reduced from 10c. to 6c.; heavy muslin reduced from 9c. to 5 1/2c.; heavy hose reduced from 30c. to 20c.; heavy shirts, all wool, reduced from \$1.50 to \$1.; heavy shirts reduced from \$1.25 to 90c.; heavy blankets, all wool, reduced from \$6.50 to \$4.75, from \$5. to \$3.50 and from \$2.50 to \$1.90, overcoats reduced from \$7.50 to \$5.75, and from \$6.50 to \$4.75; comforts reduced from \$2.25 to \$1.50; all wool clothing at a sacrifice: rubber shoes, boots and felts at almost half price; ginghams reduced from 10c. to 7 1/2c. and from 8c. to 5 1/2c.; four skeins yarn for 25c.; all wool underwear at prices to suit the closest buyer; calicos at 4 1/2c. to 7 1/2c.; Turkey red table cloth, all linen, from 43c. to 47c. per yard; flour from \$3.25 to \$5. per barrel; 3 cans tomatoes 25c.; 21 lbs. granulated sugar \$1.; 6 cakes best soap 25c.; 21 lbs. rice, \$1.; 13 lbs. pitted cherries, \$1.; 22 beans, \$1.; 12 lbs. best evaporated peaches, \$1.; 33 lbs. hominy, \$1.; peaches, pears and apricots, 18c. per can; tapioca, 9c. per lb.; gelatin 15c. per package; Fox's corn starch, 9c. per package; Vanhoute cocoa, 15c. per package; Baker's chocolate, 19c. per cake.

The above are quotations on a few of our goods, and a call from you will be sufficient to convince you that we mean business.

Respectfully yours,

SINCELL BROS.

FOR YOUNG PEOPLE.

WHEN IT'S COLD.

Then needles are in your fingers and toes; When hives hang from the snow-man's nose; When the frost on the pane makes sunny trees, And wagon-wheels over the hard ground wheeze; When the toughest old farmer finds round his arms; As if he'd throw them across two farmers; When cars are rubbed and noses are red, And sheets are like ice in the spare-room bed; When water-pipes burst and wells freeze up, And the tea isn't hot when it leaves the cup; When stray dogs come along the street, Never stand for a second on all four feet; When little boys cry if they have to be out, And are heard for a full half-mile if they shout; When the day is as clear as the thought in the head; Out into the world from Shakespeare's head; When the air about seems as still as a rock, And a sudden noise is a sudden shock; And the earth seems deserted, lonely, and cold; You are pretty sure that it's pretty cold.

"PARACHUTE JOE."

How He Climbed the Steeple of Rusden Church in England.

We give here some sketches of a daring feat just performed at Rusden, Northamptonshire, says the Westminster Budget. A man named Ingram, known as "Parachute Joe," having obtained possession of the keys of the parish church, was soon afterwards seen on the battlements and speedily commenced to climb to the top of the lofty spire by means of the stone crotches. A crowd of spectators gathered in the street below. Having reached the weather-cock, which he swung round several times, he pulled off his necktie and threw it to the ground. He then turned round, and, pinning his back to the masonry, waved both his arms to his horrified audience below. He succeeded in returning safely to the ground, to the

RUSDEN PARISH CHURCH.

relief of all who witnessed the dangerous exploit.

"Parachute Joe" has written the following description of the adventure: "On Monday, about two o'clock, Ingram made a catlike ascent up the Rusden church spire. He climbed to the very top, where he balanced himself on one foot, holding the other in his hand. He then took a leisurely view of his surroundings from the lofty position. Being apparently satisfied he commenced the descent, and having reached the topmost crotches, to the horror of the crowd below he deliberately turned his back to the steeple and stood motionless with extended arms, his feet alone resting on the slight projection of the crotches. Fancy a man standing with his back to a rock resting on a narrow ledge of inches in width, with a yawning chasm close on 200 feet deep. Into which he might plunge headlong at any moment, and you feel Ingram's position! A horrible stillness reigned below throughout the crowd, who every moment expected to see Ingram plunge headlong down through the awful space. To the surprise of all Ingram swiftly turned round again, catching hold of the steeple by one hand, and began making the descent in a swinging cat-like action. To the relief of all onlookers, Ingram warns any persons from imitating his action up this special spire, as the crotches are nearly worn through by the action of the weather. Ingram says he never intends ascending another spire only for the purpose of working thereon, Rusden being the last of many spires he has ascended."

A Curious California Weed.

In Santa Clara county, Cal., there grows a weed called the rattlesnake weed. It is so named from the story that when rattlesnakes go to fighting and bite each other, this weed, if eaten by them, will prevent death. It grows about six inches tall, has a red stalk and slender leaves. On the top of the stalk comes a head of flowers, and the seeds of these flowers are said to be very annoying to one in passing through a mass of them, as they are furnished with sharp barbs, commonly called stickers. The early settlers who had herds of sheep, always made their herdsmen keep with them a bottle of strong tea made of rattlesnake weed, and when any of the sheep were bitten they were drenched with this tea, which always saved them.

Perhaps.

"I have just been thinking about George Washington," said Mr. Curno. "What about him?" asked his wife. "I was wondering if Martha ever asked him if her hat was on straight."—Detroit Free Press.

The Wrong Shop.

Penelope—Well, what's the latest gossip? Perilla—Dear me, the latest gossip always comes from you, and it's just what I came here to find out.—Truth.

A REMARKABLE DOG.

This Strange Story Is Said to Be True in Every Particular.

My grandfather once owned a dog that was a cross between a mastiff and Newfoundland. He was large in size as the largest-mentioned breed, and in color that of an African lion, and strange to say, had a mane like one. His eyes, also, had the intensest look of that animal.

Mars was his name. He was noted for his almost human intelligence. He never was known to bark as dogs are wont to do, but, when angry, rattled his teeth by shaking his head violently, so that they could be heard at a distance. This he never did except as a warning, and was mild to the intruder that passed and even playful with those of the household, but friend or foe never approached the house unchallenged at night. Mars had a deep, sonorous voice, when he chose to let it out, which was very seldom, then it was more akin to a lion's roar than to anything else earthly. He seemed to know instinctively what was his duty, and when and where his vigilance was needed.

Our grandfather, who was a clergyman, was recommended to reside in the country on account of feeble health; hence the family retired for several years to a beautiful farm in

AGAIN THE DOG LEAPED UP.

Indiana. It was there that Mars' finest faculties were developed. His usual place at night was the large barn that stood about four hundred yards from the dwelling. The master of the house had frequent occasions to be absent several days and nights. Without word or sign from anyone, during the nights on these occasions Mars would invariably lie across the threshold of grandmother's door, which opened out into a wide passage; but as soon as the master returned Mars resumed his usual place in the barn.

Our grandfather was co-partner in a dry goods establishment in the village, about a mile from his home. Our uncle, who resided with him, was chief clerk. Mars was much attached to him and would frequently attend uncle there, then return.

Again, the dog would go to the store, as if to guard him on his return. In winter or in stormy weather, uncle would often ride on horseback to and from the place of business. One stormy winter evening, with Mars, as usual, in waiting, he hastily closed the store, locked the door, and leaped onto his horse to ride home. When Mars saw the horse wheeled for home, he jumped and gently held uncle by the pants. Thinking that Mars was only glad at seeing him start, he shook him off and proceeded briskly on his way. Again the dog leaped up and rattled his teeth ominously. Uncle stopped. Mars gently wagged his tail and trotted a few steps back. Uncle pondered as to what he meant. He knew the dog well enough to know that something was wrong, but what? With his eyes fixed on Mars, he slowly started again homeward. In an instant Mars arrested him as before. He then turned his horse's head and retraced his way toward the store; while Mars, full of apparent joy, ran on before, still rattling every moment to see if he was followed. On they went. On coming again in front of the store, uncle perceived at once the cause of the dog's strange actions: for, although he had locked the door, he had forgotten to take the key out. He instantly dismounted and secured the key, seeing which Mars ran homeward without further pause, out with a look of assured content in his splendid eyes which uncle never forgot.—Chicago Field.

Disqualified.

To be a great historian one must be endowed with what is known as the "historic imagination," but he must also be on his guard against abusing it. "John," said the teacher, "in your essay upon George Washington you say that he was not fond of fishing. What is your authority for that assertion?" "Why," answered Johnny, "we have always been told that he could not tell a lie."

The Comic Valentine.

Saint Valentine! They call him saint! Yet when you get a dash of paint, Of horrid shame and fruitful face, With verses set to suit your case, You mingle with your wild complaint The question why they call him saint.

Extraordinary Punishment.

A Frenchman was teaching in a large school, where he had a reputation among the pupils for making some queer mistakes. One day he was teaching a class which was rather disorderly. With the best and the trouble, some boys he was very snappish. Having punished several boys and sent one to the bottom he at last shouted out in a passion: "Ze whole class go to ze bottom!"

An Expensive Drug.

Angry Man—That prescription you gave me to have filled for my wife cost me a pretty sum. My dog ate it. Physician—It certainly will not cost you much to have it refilled. Angry Man—That is not the point. The dog died; and he cost me a hundred dollars.—Puck.

FIRESIDE FRAGMENTS.

Baked Cranberry Pudding.—Place a quart of berries in an earthen bake dish. Add two cups of sugar. Cover with a light crust. Bake in moderate oven one-half hour. Serve with hard sauce.—Good Housekeeping.

Stewed Prunes.—Wash the prunes in cold water. Soak them in tepid water about two hours, and set the whole on the fire and boil gently. When half done, add sugar to taste. If the water boils away too much add more.—Boston Budget.

Chocolate Caramels.—Dissolve over a fire one cupful of molasses and two ten-pennyfuls of sugar; add one-quarter of a pound of grated chocolate and a piece of butter the size of an egg; boil for fifteen or twenty minutes; pour into flat, buttered dishes to the depth of a quarter inch, and when cold cut into squares an inch in size.—N. Y. World.

Liver Nat Cake.—One-fourth pound butter, one pound sugar, one cupful sweet milk, three-fourths pound of flour, whites of seven eggs, two teaspoonfuls baking powder, one teaspoonful extract of lemon, one-half teaspoonful of cornstarch. Cream butter and sugar, add milk with cornstarch, flavoring, flour, and lastly, the eggs, beaten stiff. Bake in layers. Packed in tins. Beat the whites of two eggs stiff with four ounces of sugar, one and one-half teaspoonfuls hickory nut meats.—Orange Judd Farmer.

Beef Stew.—Procure a five or ten-cent soup bone, which is usually half meat. Cover with boiling water and place where it will simmer for several hours until the bone can be removed, leaving the meat. Cut this in small pieces, add salt, pepper, a few raw potatoes sliced, sliced onions if one likes. If not a small pinch of celery seed, thyme or other flavoring. Simmer an hour or longer, then add dumplings instead of rolled. Cover closely and boil for fifteen minutes, when it is ready to serve.—Housekeeper.

Small Almond Cakes.—Chop half a pound of citron and mix with it a quarter of a pound of sugar, and a half pound of flour. Pour the mixture into long, shallow tins, which have been well buttered. Bake in a quick oven. When done roll in powdered almonds and sugar. Packed carefully in tin these cakes will keep almost indefinitely.—N. Y. World.

Fried Nasty Pudding.—Put one quart of water on to boil. Mix one pint of corn meal, one heaping tablespoonful of flour and one teaspoonful of salt, with one pint of cold milk. Stir this gradually into the boiling water and boil three-quarters of an hour, stirring often. Fill a buttered pan with cold water and let it stand a few minutes. Throw out the water and pour in the mush. When cold turn out on a platter, cut in slices three-quarters of an inch thick, roll them in flour and brown each side in hot fat in a frying pan. Dip in egg roll in crumbs and fry in deep fat.—Boston Budget.

ENGLISH PHEASANT SHOOTING.

The Fancie of Hunting the Birds as a Sport.

Why does anyone go to the expense and bother of hunting out birds and keeping them on the premises—whether by means of coops or "non-straying mixtures"—until they are ready for shooting, when they can be bought ready-made for the purpose? One enterprising tradesman was advertising the other day:

"Two thousand full-wing young cock pheasants for shooting. Also two thousand last season's pheasants; price low this season."

"Good pheasants for shooting" means, I take it, birds properly bred and fattened, and educated in the business. And a great convenience it must be to those who have to entertain royal and noble sportsmen, to be able to lay in the raw material for big bags at a few days' notice.

What I want to know is, why the shooting of beasts cannot be brought up to date, as the shooting of birds has been? Why does not the Zoological society undertake to send out lions, tigers, and big game generally, properly fattened up, and not too fresh to be "battered" in the parks of the aristocracy and plutocracy? Why should it be necessary to travel all the way to South Africa, and undergo all sorts of fatigue and inconveniences—possibly even personal danger—in the pursuit of sport?

At the German imperial hunt it is now the practice to keep a careful record of the names of the sportsmen and of the game killed by each of them. A guest may get possession of the antlers of a stag, the horns of a buck, or the tusks of a wild boar, if he wants to carry any such mementoes of the sport; but the body of an animal cannot be obtained unless its full market value is paid to the treasury of the court hunting office. Even the emperor is subject to the rule, and the whole of the game which is killed is sold on bloc to dealers, under the superintendence of the chief forester in whose district the hunt has taken place.—London Truth.

Daily Conservative.

An old woman of undoubted Celtic origin entered a downtown savings bank the other day and walked up to the desk. "Do you want to draw or deposit?" asked the gentlemanly clerk. "No, I don't. O! wants to put some in," was the reply. The clerk pushed up the book for her signature, and, indicating the place, said, "Sign on this line, please." "Above it or below it?" "Just above it." "Me whole name?" "Yes." "Before O! was married?" "No, just as it is now." "O! can't write."—Boston Transcript.

ROYAL BAKING POWDER CO., 105 WALL ST., NEW-YORK.

DURING hard times consumers cannot afford to experiment with inferior, cheap brands of baking powder. It is NOW that the great strength and purity of the ROYAL stand out as a friend in need to those who desire to practise Economy in the Kitchen. Each spoonful does its perfect work. Its increasing sale bears witness that it is a necessity to the prudent—it goes further.

N. B. Grocers say that every dollar invested in Royal Baking Powder is worth a dollar the world over, that it does not consume their capital in dead stock, because it is the great favorite, and sells through all times and seasons.

Very Plausible.
Mother—Why, Johnny, how is this? It is past seven o'clock. I told you to come in when the street lamps were lighted.
Johnny—Well, mamma, they are lighted.—Judge.

Frank Forester.
Mrs. Jackson—I don't see yer nt church no mo', Uncle Silas. How comes dat?
Uncle Silas—Dat ere new pulpit done sot me ngn him, an' sayin' I ain't got no souls. How dey gon a git chickens inter hebbin, den, I'd like ter know!—Puck.

Chronicle.
Walker—I won't wait on dat ole chump no longer!
Head Walker—Why not, Walker?
Walker—Yesterday he licked 'cause de soup was cold, an' to-day he complained ob der ice cream bein' too warm.—Truth.

\$5,800 from Ten Acres. [K]
A. M. Lamb, a market gardener in Pennsylvania, cleared \$5,800 on five acres of cabbage and five acres of onions. The reason of this, he says, was because Salzer's seeds are so extremely early and wondrously productive. Lightning Cabbage and King of the Earth Onions he had in the market three weeks ahead of any other home-grown sorts, and consequently received fancy prices. Salzer seeds 35 packages earliest vegetable seed, sufficient for a family, for \$1, postpaid.

IF YOU WILL CUT THIS OUT AND SEND IT TO SEED CO., LA CROSSE, WIS., YOU WILL RECEIVE THEIR MAMMOTH CATALOGUE AND A TRIAL PACKAGE OF "GET THERE, ELLI," THE SIXTEEN-DAY RADISH.

"I suppose you had a high old time in Europe?" "Yes," replied the returned tourist, "I was done up at Monte Carlo, held up in the Argentine and laid up in Rome."—Washington Star.

Remember.
That the Wisconsin Central has the unequalled endorsement of all, it being the quickest and best line between Chicago and Milwaukee, St. Paul, Minneapolis and the Northwest; it is recognized as the Pullman Line between Chicago and Milwaukee, Ashland, Duluth and Lake Superior points. That the Wisconsin Central touches the most prominent points in Wisconsin, having more business centers than any railway to and from the Northwest. That its dining car service is unsurpassed by any other line, and that its representatives will cheerfully furnish any information that may be desirable. For full details regarding Rates, Routes, Folders, Maps, etc., address your nearest ticket agent or
Jas. O. Fox, Gen. Pass. Agent, Milwaukee, Wis.

"There's one thing I didn't like about the circus," said grandma, "and that was the man that twisted himself all out of shape. I never did admire these extortionists."—Atlanta Constitution.

The Most Pleasant Way
Of preventing the grippe, colds, headaches, and fevers is to use the liquid laxative, known as Syrup of Figs, whenever the system needs a gentle, yet effective cleansing. To be benefited one must get the true remedy manufactured by the California Fig Syrup Co., only. For sale by all druggists in 5c and 25c bottles.

"Have you met that elderly girl that Smith has married? He says she is a sample of Virginia beauty." "A sample! I should call her a remnant."—Vogue.

Give a boy address and accomplishments, and you give him the mastery of palaces and fortunes where he goes.—Emerson.

Those Pimples

Are tell-tale symptoms that your blood is not right—full of impurities causing a sluggish and unsightly complexion. A few bottles of S. S. S. will remove all foreign and impure matter, cleanse the blood thoroughly and give a clear and rosy complexion. It is most effectual, and entirely harmless.

Chas. Heaton, 73 Laurel St., Phila., says:—"I have had for years a humor in my blood which made me dread to shave, as small boils or pimples would be cut thus causing shaving to be a great annoyance. After taking three bottles of S. S. S. my face is all clear and smooth as it should be—appetite splendid, sleep well and feel like running a foot race, all from the use of S. S. S."

Send for Treatise on Blood and Skin Diseases mailed free. SWIFT SPECIFIC CO., Atlanta, Ga.

"Fit Live as Long as I Can."

Is the burden of an old song. If you want to live as long as you can, count on your future decay. If you are young or middle aged, or less than the infirmities of life's decline if you are growing old, use Hostetter's Stomach Bitters, a genuine restorative of vigor, and a helpful stay and solace to the old, the weak and convalescent. Incomparable in bilious, dyspeptic, rheumatic and malarial complaints.

There is more Catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease, and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circulars and testimonials. Address: F. J. Cheney & Co., Toledo, O. Sold by Druggists, 25c.

"WONDER WHAT THIS IMAGE REPRESENTS?"
"The god of humor, probably. Don't you see it is full of little funny cracks?"—Indianapolis Journal.

There is no more effectual remedy for Coughs, Colds, etc., than Brown's Bronchial Trochies. Sold only in boxes.

JINKS.—"Don't you believe that spirits are all moonshiners?" Filkins—"Oh, no; some of them pay internal revenue taxes."—Kato Field's Washington.

Dr. Hoxie's Certain Croup Cure
Sent postpaid with beautiful souvenir spoon. Send 50c to A. F. Hoxie, Buffalo, N. Y.

Fees without Feathers.—"I'm onto your little game," said the indignant guest, sending back the English sparrow the waiter had brought him for feed birds.—Chicago Tribune.

FIRED DESTLINE. Mr. F. DESTLINE, Alexander, Genesee Co., N. Y.

Sure Cure for Sprain, Bruise or Hurt!

Use **ST. JACOB'S OIL**

You'll Use it Always for a Like Mishap.

The Greatest Medical Discovery of the Age.

KENNEDY'S MEDICAL DISCOVERY.

DONALD KENNEDY, of ROXBURY, MASS.,

Has discovered in one of our common pasture weeds a remedy that cures every kind of Humor, from the worst Scrofula down to a common Pimple.

He has tried it in over eleven hundred cases, and never failed except in two cases (both thunder humor). He has now in his possession over two hundred certificates of its value, and within twenty miles of Boston. Send postal card for book.

A benefit is always experienced from the first bottle, and a perfect cure is warranted when the right quantity is taken.

When the lungs are affected it causes shooting pains, like needles passing through them; the same with the Liver or Bowels. This is caused by the ducts being stopped, and always disappears in a week after taking it. Read the label.

If the stomach is foul or bilious it will cause squeamish feelings at first. No change of diet ever necessary. Eat the best you can get, and enough of it. Dose, one tablespoonful in water at bedtime. Sold by all Druggists.

THURSDAY, FEB. 8, 1894.

CHAIRMAN WILSON seeks consolation in the thought that Free Trade "reform" is right. A mind that discovers "right" in a policy that makes beggars of hundreds of thousands of his countrymen is in need of both moral and political reconstruction.

THE FEAR has been expressed that in some of the more feverish Democratic quarters of the earth the closing performance in the House on the tariff debate would be accepted as a model and a precedent. It seems that the somewhat exuberant enthusiasm of the gentlemen who seized Hon. Wm. L. Wilson, lifted him to their shoulders and carried him about triumphantly like a banner or a parlor stove, are now regarded by many of their compatriots as statesmen of extraordinary talent and perception. It is not impossible to sympathize in this view of the matter. The occasion was exciting. The great auditorium was full to suffocation; beautiful and wealthy women thronged the floor; the very atmosphere sizzled with electricity. The time seemed ripe for hyperbole. The opportunity called for horseplay. It is comforting to reflect that the precedent cannot be adopted by all political sects. There is the Hon. Thomas Bully Reed for instance, who may again become the leader of his party on a majority in the House. He may easily create a furor and make the echoes groan and rumble. But he will be lifted on no man's shoulders and be made ridiculous by no unnatural elevation. He may be the Moses, the Solomon, the David and the Joshua of his party, but never at his present weight, its Balaam.

The Hawaiian Mess.

The Hawaiian policy of the administration is a nauseous dose to the Democrats in Congress, but party necessity compels them to swallow it. The case is a remarkable exhibition of the power of an administration and the strength of party discipline. What makes the dose more bitter is that it was concocted by a renegade Republican. Secretary Gresham's remarkable behavior can be accounted for only on the ground that spite against President Harrison blinded him. Instead of dealing with the situation as he found it, he underook to review and reverse the acts done by a previous administration. The result was a signal instance of falling into the pit dugged for another, as his crazy undertaking has been a series of grotesque and humiliating blunders.

Queen Lil's obstinacy was a great piece of Cleveland lek, for it prevented the monarchical restoration whose accomplishment would have damned the administration. The breakdown of the original program enabled the administration to unload the dirty business on Congress and as soon as the Democratic party finishes its work as Gresham's scullion, the matter will be disposed of. The stain of it will however remain and constitute an ugly blemish on the party record.

Inefficient, Cowardly, Imbecile. No newspaper in this country or in England exerted itself more than *Harper's Weekly* did to help the Democratic party into power. This is what makes the shock so rude when we read in this "journal of civilization," under the head of "The Failure of the Democratic Party," such cold and truthful

words as these: "The people are growing weary of the Democratic party. They are out of patience with it because of its inefficiency, its cowardice, its lack of principle and consistency, and imbecility."

A political organization which to a lack of principle adds inefficiency, cowardice and imbecility, is manifestly unfit to govern a prize fight. Having been out of power so long that a generation had arisen which knew it not and was unwilling to learn of it from the elders, that organization was shrewd enough to bunco the people and get control of the government. It has been in command for less than a year, and in that time it has made a record of disaster. Being insufficient, cowardly, imbecile and without principle, what better could have been expected of it? A peasant stand could not be run successfully without more back of it than this.

When the late George William Curtis, then the accomplished editor of *Harper's Weekly*, said in 1884 that the Democracy was "a party without a single redeeming principle," he said in effect just what *Harper's Weekly* says ten years later. The Democratic party has not changed its unchangeable nature; and those who like *Harper's Weekly* and Mr. Curtis in his time, who have been trying to make it the subject of a miracle of grace, may as well give up the effort.

Our Fences Need Fixing.

With the assurance that the present Legislature will pass an assessment bill it becomes highly important that Garrett county know where her lines are and the extent of her territory.

The act creating a division of Allegany county, passed in 1872, provided that the division line between Allegany and the proposed county of Garrett should begin at the mouth of Savage river and run thence to the highest point on Great Savage mountain where it was crossed by the Mason & Dixon line.

We are informed that the line provided for never was run or that in running it the surveyor did not go to the highest point on the Savage mountain, and as a result the matter has never been settled to the satisfaction of either county. This has had the effect of creating a disputed territory on our eastern boundary somewhat similar in character to the contention now before the Supreme Court of the United States between Maryland and West Virginia with regard to our western boundary.

Large areas of valuable mineral and timber lands lie in this disputed zone and we believe that Garrett county has been the loser of thousands of dollars in taxes which belong to and should have been collected by her on this property. In view of the above facts we do not see how a proper and intelligent assessment of either Allegany or Garrett counties can be made until the line as originally provided for shall have been established and settled. To us it seems highly proper that the people of this county should urge upon their representatives the importance of having an act passed to settle this question. The County Commissioners should also take an interest in this matter because we are confident that thousands of dollars will be added to the taxable basis if the line is properly run.

Notice.

All taxes remaining unpaid by the 15th of February, 1894, will be placed in the hands of the Sheriff for collection.

46-td. S. LAWTON, Treas.

The Late John G. Brant.

John G. Brant departed this life February 3, 1894, at Elk Garden, aged 84 years, eleven months and three days. He was well known in Mineral, Garrett and Allegany counties, where he spent most of his long life. Deceased was never known to violate a contract and his fervent hope of a blessed reward beyond the grave made him willing and rather anxious to quit this life. Several months before his departure he appointed his son, C. B. Brant as his executor without bond with almost unlimited powers over all his property. He was much esteemed in Elk Garden.

WILSON TRIUMPHS.

A Majority of Sixty-Five for His Tariff Bill.

THE GREAT FINAL STRUGGLE.

The Rival Leaders Close the Prolonged Debate.

ALL WILDLY APPLAUDED.

Reed Makes a Stirring Protest on Behalf of the Republicans—Crisp and Wilson Make Vigorous Replies and Appeal to the Democrats to Stand Firm—An Extraordinary Demonstration at the Close of the West Virginian's Speech—Carried About on the Shoulders of Three of His Colleagues—The Closing Scenes of the Long Fight in the House—The Galleries and the Chamber Packed With Enthusiastic Spectators.

WASHINGTON, February 1.—The great debate on the Wilson Tariff bill, which has occupied the attention of the House for four weeks, closed to-day with an unrivaled burst of oratory. Crisp, Reed and Wilson, the giants of the House, came forward in the closing hours to prosecute or defend the great issue—the inauguration of a new economic system in the greatest republic of the world.

Attracted by the anticipation of the field day and the speeches of the leaders, the Washington populace turned out en masse to witness it. Long before 10 o'clock the public galleries, the "bleachers" of the American forum, were black with people. Behind the seats, banded against the doors and walls, were others straining to get a sight of the arena. The reserved galleries also were thronged, and even in the President's gallery there was not a vacant seat. The crowded galleries looked down upon a sea of faces.

THE BILL REPORTED.

Speaker Crisp ascended the rostrum and the gavel was passed to him. Richardson moved around to the area in front of the speaker's chair, and, according to the parliamentary formula, reported that the committee of the whole had under consideration House bill 4864—the Tariff bill—and reported it to the House with sundry amendments. The speaker then announced that three hours would be allowed for closing debate. "The chair recognizes the gentleman from Maine," said the speaker, with a last rap of the gavel for order.

Mr. Reed rose from the center of the Republican side amid the wild cheering and hand-clapping of the galleries and the huzzas of his party friends about him. Mr. Reed frowned and shook his head as though the demonstration was distasteful to him. He waited for the applause to cease. Standing in the aisle, clad in a long Prince Albert coat, with head erect and defiant, he looked the physical and intellectual giant that he is. He began to speak at last, slowly and deliberately, in the voice that has become so familiar to the people. There is an aggressiveness in Mr. Reed's speech which counts far more than rhetoric. He spoke to-day with his back to his friends, and his face to the foe across the aisle. Save for his ringing voice, the drop of a pin could have been heard.

EX-SPEAKER REED'S SPEECH. Mr. Reed, in opening his speech, said: "In this debate, which has extended over many weeks, one remarkable result has already been reached, a result of the deepest importance to this country. That result is that the bill before us is odious to both sides of the House. It meets with favors and commands in the respect of neither party. On this side we believe that while it pretends to be for protection it does not afford it, and on the other side they believe that while it looks toward Free Trade, it does not accomplish it.

"Those who will vote against this bill will do so because it opens our markets to the destructive competition of foreigners, and those who vote for it do it with a reservation that they will instantly devote themselves to a new crusade against whatever barriers are left. It is evident that there is no ground for

the hope entertained by so many moderate men, that this bill, bad as it is, could be a resting place where our manufacturing and productive industries, such as may survive, can re-establish themselves and have a sure foundation for the future, free from party bickering and strife. Hence, also there can be no foundation for that cry, so insidiously raised, that this bill should be passed at once, because uncertainty is worse than any bill can possibly be. Were this bill to pass both branches to-day, uncertainty would reign just the same."

THE QUESTION OF WAGES.

Mr. Reed spoke of the unexampled prosperity of the United States under Republican administrations, and then, after quoting statistics to show the great rise in wages in 1860, continued:

"I confess that the question of wages is to me the vital question. To insure our growth in civilization and wealth we must not only have wages as high as they are now, but constantly and steadily increasing. This desire of mine for constantly increasing wages does not have its origin in love for the individual, but in love for the nation. The orators of the other side say they are going to it to maintain wages. How can that be possible? All things sell at the cost of production. If the difference between cost of production here and cost of production in England be not equalized by the duty, then our cost of production must go down or we must go out. Our laws have invited money and men and we have grown great and rich thereby. To sum it up, if this protection gives us money and men, and our vast country needs both, it may show why we have so wonderfully prospered. If it does I am inclined to think that the way to have two jobs hunting one man is to keep on making new mills and try to prevent the committee on Ways and Means from pulling down old ones."

HOW IT AFFECTS FARMERS.

"But what do you say about the farmer? Well, on that subject, I do not profess any special learning, but there is one simple statement I wish to make and leave the question there. If, with cities growing up like magic, manufacturing villages dotting every eligible site, each and all swarming with mouths to be filled, the producers of food are worse off than when half this country was a desert. I abandon sense in favor of political economy. If the hope of agriculturists is in the wages of artisans have increased in England \$2.43 per week since 1850, the wages of agricultural laborers have only increased 72 cents, and while the Lancashire operatives in the factories live as well as anybody, except Americans, the agricultural laborers are hardly better off than the continental peasantry. England's example will not do for agriculture."

"We are charged with having claimed that the tariff alone will raise wages. We have never made such a claim in any such form. Free Traders have set up the claim for us in order to triumphantly knock it over. What we do say is that where two nations have equal skill and equal appliances, and a market nearly equal so, and one of them can hire labor at one-half less, nothing but a tariff can maintain the higher wages, and that we can prove. We are the only rival that England fears, for we alone have in our borders the population and the wages, the raw material, and within ourselves the great market which insures to us the most improved machinery. If you wish us to follow the example of England, I say yes, with all my heart, but her real example and nothing less. Let us keep protection as she did, until no rival dares to invade our territory, and then we may take our chances for a future, which, by that time, will not be unknown."

LOOKING TO THE FUTURE.

In concluding his speech, Mr. Reed said: "Nobody knows so well as I do how much I have failed to present, even of my own comprehension, the great argument which should control this vote. I have said not a word of the great fall of prices which has always come from the competition of the whole world. I have said not a word of the great difference between the attitude of employees who find their own workmen their best customers in their own land, and who are therefore moved by their own best interests to give their workmen fair wages, and those who sell abroad and are therefore anxious for low wages at home. These and much more have I omitted for there is a limit to all speaking."

"We know, my friends, that before this tribunal we all of us plead in vain. Why we fail let those answer who read the touching words of Abraham Lincoln's first inaugural and remember that he pleaded in vain with these same men and their predecessors. Where he failed

we cannot expect to succeed. But though we fail here to-day like our great leader of other days, in the larger field, before the mightier tribunal which will finally and forever decide this question, we shall be more than conquerors; for this great nation, shaking off, as it has once before, the influence of a lower civilization, will go on to fulfill its high destiny until over the South, as well as over the North, shall be spread the full measure of that amazing prosperity which is the wonder of the world."

CHEERS AND ROSES FOR REED.

Throughout Mr. Reed's speech he was frequently interrupted with applause, and at times the Democrats joined in the general laughter at his witticisms. When, at 1:30 o'clock, he glanced at the clock, which noted that his time had expired, the eloquent Republican entered upon his brief peroration, there was an intense stillness through the House. His closing reference to that former illustrious leader, Lincoln, was made in a low voice which could hardly have been caught had not every ear on the floor and in the galleries been strained to catch every word.

As Mr. Reed closed, his left hand was raised high in one of the few gestures which had marked his speech. As his hand fell and the speech closed there was a burst of applause which swelled into a tumultuous demonstration as the enthusiastic galleries gave shouts, hurrahs and sharp whistles which are so often heard in theaters, but seldom in the halls of Congress.

Mr. Reed bowed his acknowledgment to the demonstration, and without resuming his seat or waiting for the many hands extended to congratulate him, made his way back to the Republican cloak room. Half way up the aisle he was met by a page bearing a huge basket of American Beauty and La France roses. Again he bowed his acknowledgments as the flowers brought out another burst of applause.

CRISP'S DEFENSE OF THE BILL.

While the Reed demonstration was going on Speaker Crisp relinquished the chair to Mr. Hatch, of Missouri, and assumed the old seat which he occupied in the days before he was elevated to the speakership. When he arose in his place he received an ovation. The speaker is symmetrical in form, dignified in bearing, with a broad, well-poised head, fringed with a touch of silver hair on the sides, upon a pair of square shoulders. He looked the judicial-minded man he is. He warmed up and spoke with the hesitation of a man weighing each word, and with a perceptible tremor of the lip. As he became aroused, however, he displayed more freedom and ease until the words came in a perfect torrent.

As Mr. Crisp proceeded he was given generous applause by his Democratic associates on the floor, but his points were of an argumentative character, which appealed to the students of the question rather than to the galleries. He read from the minority report and criticized that feature which declared that the foreigner paid the tax. In particular the speaker addressed himself to ex-Speaker Reed, although the latter was still held in the cloak room by the congratulatory hand shakes.

"I feel embarrassed," Mr. Crisp said, "by this vast audience here assembled; embarrassed by the idea that I may not be able to fulfill the expectations of my friends when I undertake, in the period allowed by the rules of the House, to reply to and make corrections to this House, of the errors in the argument to which we have just listened. I assume that the cause of protection has no more able advocate; I assume that the arguments for protection can be put in no more forcible form than that to which you have listened to-day; and I shall ask you to dispassionately examine with me that argument and then ask the judgment of the House as to whether the cause attempted to be sustained can be established consistently with right and justice to the people of the United States."

Mr. Crisp declared that an examination of the protective system would show that while it was built up for the ostensible benefit of labor it was in truth constructed for the benefit of the manufacturing classes. He pointed out that the wages of laborers in protected industries went down, and those in unprotected industries went up, as a result of the McKinley act. This was shown, he said, by the statistics gathered by the Senate Committee on Finance. The speaker referred to the artificial conditions created by protection. It took men from their natural channels and diverted them to unnatural channels. The same was true in the diversion made

in the channels of trade. Protection was a Chinese wall, which not only shut out the world, but shut in the United States.

Mr. Crisp was greeted with applause when he said that the 30 years of protection was a period of unrest during which the masses of the people had constantly rebelled against the heavy burdens of taxation. The people had always been stilled at the polls by the Republican promises to reduce the tariff, but, once successful at the polls, the Republican legislators surrendered themselves body and soul to the manufacturing classes. The speaker declared that the gentleman from Maine (Mr. Reed) had throughout his speech refrained from the arguments of reason and had resorted to those of prejudice. He pointed to the Chinese as an example of what had resulted from a protective policy of hundreds of years which had thought to make China rich by trading with itself.

Mr. Crisp said that for 25 years the Democratic party had been trying to get into power. It had told the people that if given power it would reduce the burden of taxation. The people had accepted this promise and given the party power. This tariff was a redemption of these pledges to the people. It was not a perfect bill, but it was a step in the right direction. In referring to various features of the bill he spoke of an income tax, which brought out long and loud applause from the strong income tax element in the House. He cited a speech of Senator Sherman's 20 years ago, to the effect that a tax which fell heaviest on consumption and did not bear heavily on the wealth and incomes of the country was intrinsically wrong.

Mr. Crisp supported the income tax in vigorous terms. He said \$30,000,000 of tax on accumulated wealth was but a small tribute in return for the benefits it received. He closed with an eloquent appeal to his Democratic associates to waive minor objections and to look at the great Democratic principles involved. "Let us stand together," said he; "let us redeem our pledges; let us pass this bill, and it will carry gladness to the consuming masses, to the farmer, the laborer and to the American people."

There was a triple round of applause as the speaker closed. A page walked toward him with a large potted plant, with red flowers above, surrounded with white roses below. The applause continued for more than a minute, during which Mr. Crisp was warmly congratulated. He then left the body of the House and returned to the speaker's desk.

WILSON CLOSES THE DEBATE.

Mr. Wilson at once arose to close the debate, and was greeted with great cheers. He showed no signs of the fatigue to which he has been subjected. He was in fine voice and in animated spirits. Mr. Wilson said that Mr. Reed had forsaken his usual course of congressional procedure and had recited a set oration with the old set praises of protection "sickled over with the pale hue of philosophy."

Turning to the subject in hand, Mr. Wilson eloquently portrayed the advance of freedom. This bill, he said, was but one of those advances. No McKinley bill could stent the advance of human progress. Great causes could not be laughed or ridiculed away, and the gentleman from Maine could not draw from his armory of sarcasm and wit in order to stop the advance of this cause of lightening the burdens of taxation.

Mr. Wilson then related the story of the English herring merchant, who wrote to Sir Roger Peel that he did not favor Free Trade as to herring, as it would let in Norwegian herring, but that on other goods he was a thorough Free Trader. Mr. Wilson appealed to his fellow Democrats not to allow any herring arguments to impede the movement toward the overthrow of the protective system. Referring to an income tax, Mr. Wilson said he had not wanted it attached to this bill, but, once so attached, he supported it with all the loyalty at his command.

There was continued applause as Mr. Wilson denied the charges of sectionalism in the bill. He said that the animating feeling of those who had framed this bill was to make this country one in which one man would not be taxed for another, one in which religion, science, culture and education would go hand in hand as the common, untaxed heritage of every citizen.

Mr. Wilson closed with an eloquent appeal to his fellow Democrats. He told them that the record of the House would permanently record no passing event, but a great epoch in American history. He wanted every Democratic name recorded on that historic roll. In that case, he said, the day would be a proud and happy one for him. His closing words were: "In the name of honor, in the name of freedom, I snuggest every Demo-

erat to vote for this bill."

When he closed there came a remarkable scene. Wave after wave of applause echoed through the chamber. Representative Tucker and several others sprang forward and lifted Mr. Wilson from his feet to their shoulders. He was borne up the aisle, above the heads of his enthusiastic associates. The three who had borne the tariff leader on their shoulders were McMillan, Bryan and Tucker. After this demonstration Mr. Wilson was allowed to return to his seat, where the aisle was choked with members who sought to shake his hand. It was a demonstration seldom exceeded in Congress in enthusiasm and dramatic climax.

THE BARLEY AMENDMENT.
For 20 minutes after Mr. Wilson's speech the house was in such disorder that business came to a standstill. The voting was next in order, but it was not until about 3.30 o'clock that the floors could be cleared, order restored and preparations made for the voting.

The first vote was taken on the barley amendment. On the first call it was defeated by a vote of 170 to 108. It was significant, as the first test vote sustained the bill.

The amendment making barley 22 cents and barley malt 32 cents per bushel was lost by a vote of 120 to 197.

The committee amendment to raise the duty on malt from 20 to 25 per cent, and on barley malt from 25 to 35 per cent, was carried—204 to 114.

Tom Johnson, Dem., of Ohio, asked for a separate vote on the wool schedule; C. W. Stone, Rep., of Pennsylvania, for a separate vote on petroleum, and Mr. Tracy, Dem., of New York, on the internal revenue, including the income tax. All other amendments were agreed to.

WOOL AND OIL.
A standing vote on the amendment fixing the time when the wool schedule shall go into effect on August 2, 1894, was carried by 205 to 47.

A standing vote on the amendment that the manufactured wool schedule go into effect December 2, was carried by 186 to 42.

The vote on the amendment putting petroleum on the free list and striking out reciprocity was carried 170 to 44, without a roll call.

THE INCOME TAX.
The yeas and nays were ordered on the Internal Revenue bill. Bourke Cockran asked unanimous consent to vote on the income tax separate from the other internal revenue schedules, but objection was made. Speaker Crisp ruled that the internal revenue amendment must be voted as one amendment.

The Republicans did not vote on the internal revenue and income tax amendment.

The Internal Revenue bill, including the income tax, was sustained as a part of the bill on an aye and nay vote by 182 to 50.

THE TARIFF BILL PASSED.
Covett, Dem., of New York, offered a motion to recommit the bill to the committee and reported with such amendments that the duties on imports will provide revenues for government. The motion was lost, 103 to 177.

The bill was then put upon its passage. Cheers greeted the Democrats who had been objecting to the bill, but who voted for it on final passage. First of these were Baltimore, of Pennsylvania, Bartlett, of New York, was the Democrat to vote against the bill. Tremendous cheering greeted Bourke Cockran when he voted for the bill.

The vote resulted 200 to 135, so the bill was passed by a majority of 65.

Savage River.
More snow.

The farmers are making good use of the fine sledding by hauling their potatoes and apples to market.

J. W. McIntyre was visiting friends at New Germany the past Sunday.

Rev. Enlow preached an excellent sermon Sunday last.

Johnson Broadwater is numbered among the sick.

Mrs. Hezekiah Knox has returned home from Swanton where she will spend the balance of the winter.

T. J. Broadwater has purchased a fine horse from Albert Wilt.

C. W. Bowers and Miss Carrie Broadwater contemplate going to Grantsville soon.

D. W. Crow passed through our vicinity last week en route for Lonaconing.

Mrs. Elias Merrill has returned home from Westernport where she has been visiting her daughter, Mrs. C. DeWitt.

We are glad to see the smiling face of Mr. Chas. Merrill with us again.

C. W. Broadwater and family and two ladies from Iowa were the guests of W. W. Broadwater Sunday last.

Ripans Tabules relieve serofula

THE COMPROMISE BILL.

A Brief Outline of the Assessment Law Now Pending.

As remodeled the new assessment bill omits some of the features which were considered peculiarly objectionable in the measure previously presented by Senator Hayes. With regard to the listing feature of personal property, which has excited so much discussion, the bill provides that the assessors shall deliver or send by mail to each person in their districts who own personal property subject to taxation copies of schedules of taxable property and interrogatories relating thereto. When the assessor calls the taxpayer is to give under oath a list of his personal property, which is to be written by the assessor in the schedule. Persons upon whom the assessor fails to call must appear before the assessor and cause the schedule to be filled up and swear to the same. The assessors are to "view all goods and chattels in their districts" between the first Tuesday in June and the second Tuesday in September, 1894, and "diligently investigate and inquire by personal inspection and by all lawful means inform themselves of all property therein or belonging to residents thereof and they shall value each item of the same at its full cash value without looking to a forced sale." Persons refusing to answer questions or to be sworn shall be deemed guilty of a misdemeanor and punishable by a fine not exceeding three hundred nor less than fifty dollars for each refusal to answer such questions, or by a fine not exceeding two thousand dollars nor less than two hundred dollars for refusal to be sworn or affirm. The jury in the trial of the case is to find and assess against the defendant as a part of the penalty for said misdemeanor double the amount of taxes that the defendant would have been required to pay under existing law. The act is to be carried into effect by the hands of the Governor.

Garrett county will be divided into two assessment districts. The first shall be composed of the first, fourth, seventh, eighth, tenth and eleventh election districts; the second shall be composed of the second, third, fifth, sixth, ninth and twelfth election districts of the county.

For each district the Governor shall appoint three assessors, who shall enter upon the discharge of their duties on the first Tuesday in June, and shall complete their work by the first Tuesday in September. They must be property owners and tax-payers, and will receive \$3.50 per day for their services.

For each county, and the city of Baltimore, the Governor will also appoint a board of control and review consisting of three persons, whose duty it will be to hear appeals and decide applications for abatements, and generally review the work of the assessors. They will enter upon their duties when the assessors have finished their work, and will receive the same pay.

Every four years, commencing with 1898, the Governor shall appoint a board of control and review for each county, whose duty it shall be to make an assessment of the property liable to taxation, increase or lower the valuation, and generally revise the tax lists of the county. This virtually provides for a new assessment every four years.

As We Now See It.
No political party would dare go before the American people on a platform openly advocating the destruction or the serious embarrassment of the manufactures of this country. The party in power seems to have this end in view, but they do not openly avow their purpose. They declare in favor of what they are pleased to designate as free raw material to enable, as they say, the manufacturers to compete in the markets of the world. But the manufacturers are not longing so much for an open fight against the cheaper labor of Germany, France and England, where the markets are already in the possession of those countries, as they are to keep the American markets which are acknowledged to be the best in the world.

The free raw material racket is simply a clever trick to deceive such as may not be posted on the question for it is a fact that all raw material manufactured into goods for a foreign market is and has been practically on the free list, for the manufacturers are allowed a rebate of 99 per cent. off all duties paid on such raw material. So the real purpose of the tariff smashers is not to help the manufacturer, but to break down the principle of protection, which may be done most effectively by discriminating unjustly against the products of certain classes, and in favor of those

of other classes.

If, for instance, the wool, the grain and the various products of the farm, if the lumber, the coal and the ores are put on the free list the people producing these things will say: "If we are to have none of the benefits of protection although we believe in it on general principles we are opposed to being thus imposed on by this unfriendly discrimination."

The object of protection is to place the American laborer on a higher plane, to give him greater opportunities in this country than he enjoys in any other. But it should treat all alike. The product of the farm, the forest and the mine is entitled to as much consideration as that of the mill, the shop or the factory.

By placing a duty on all foreign products that come in competition with the products of our own people we maintain the price of labor in all occupations alike and this is what makes the American market so desirable. Labor has been well paid, distributing money generally among the masses who spend it freely supplying their wants. The laborer living next door to the farmer and earning two dollars per day, would certainly be a better customer than one living in London or Paris and earning only one dollar per day. Therefore, if the farmers of the country have not had ready sale and good prices for his products it has been because there have not been enough other people doing something else.

Shortly after the passage of the McKinley bill a prominent farmer from Morefield, West Virginia, came into the office of the writer, and though a comparative stranger began declaring in language more vigorous than polite against the outrageous McKinley bill.

After he had relieved himself to some extent he was asked what he would propose as a remedy. "Well," said he, "there are the people in Wales making tin plate. I would have them continue to make our tin plate so that we could sell them their supplies of bread and meat." "That will do very well for an example," I ventured to suggest. "Those people in Wales who make the tin plate are poorly paid. They consume probably on an average 20 cents a day of what the farmer produces. Now the people who supply them buy wherever they can buy the cheapest. If they can buy wheat and beef cheaper in America than in Australia, India or Russia, they come here, but if not they go where they can buy cheapest. Now which would be the best for you as a farmer, to have the producers of tin plate living in this country earning American wages and consuming twice as much, and you supplying all, or to have them in Wales poorly paid with little to spend, and taking your chance of furnishing, say one-third of what they require?" He had never seen the question in that light before, and had to admit that there were two sides to it.

When the McKinley bill was in preparation the farmers demanded protection of their products and it was given. A duty of 25 cents per bushel on potatoes, \$4 per ton on hay, 5 cents per dozen on eggs, 25 cents per bushel on barley, etc., was awarded them and it was millions of dollars in the pockets of the farmers of this country. For a few days before that law went into effect there was a terrible scramble to rush everything possible across the Canadian border under the old law. I happened to be in New York at the time and every means of transportation was pressed into the service, and day and night the rush continued up to the last minute of the duration of the old law.

Americans are not under obligations to furnish a market for what other countries may produce or for what other people may wish to dispose of.

It is the duty of governments to promote the interests of its own people and to let other countries look out for themselves.

If the people had realized before the election as they do now the full meaning of the Democratic policy we would have had a patriot in the presidential chair in place of the representation of foreign interests which is bringing so much distress among the people, and so much discredit on America as an Americanism.

A Sermon in Brass.

A certain minister when preaching on cleanliness mentioned how he had seen a brass monkey in his town set up in a store with a cigar in its mouth. The cigar was lighted, and by machinery the monkey could draw the smoke from the cigar and puff it out again. The works stopped on one occasion, and the monkey was taken apart to discover the cause, when the works were found to be clogged and in a filthy condition. The moral was drawn by the preacher thus: "If tobacco smoke will stop the work of a brass monkey, what will it do for you?" Let our weed indulging people rise in answer.—Ram's Horn.

FARMERS, STOP AND THINK

Why Struggle Through Mud and Mire When Good Roads Cost No More?

The rural population may now exclaim, with the Duke of Gloster, "Now is the winter of our discontent," and may add on its own account that the spring prospect offers no hope that the clouds will be lifted. But with the return of summer and consequent drying up and temporary hardening of the highways the farmer forgets the lesson he has been taught and thinks no more of mud and impassable roads and wrecked wagons and broken down horses. He is like the man who couldn't mend the roof of his cabin when it was raining and wouldn't when the sun shone because it didn't leak.

To a disinterested observer the attitude of the average farmer toward the movement for better roads is inexplicable. Year after year he goes on in the same old rut, ruining his temper and incurring needless expense in wagons and horses simply because he won't stop to think. Experience has proved that enough money is annually expended in useless tinkering by ignorant roadmasters to keep the roads of the country in passable if not first-class condition. Instead of passively submitting to existing conditions the farmers should combine with a view of having the time and money now wasted judiciously and intelligently expended.

The roadmaster, as we know him, is usually wholly incompetent. His knowledge of road building and repairing has been acquired by working out his taxes probably, and his prime object is to finish the work assigned to him with the least outlay of labor consistent with drawing his salary. His method of procedure consists in dumping washings from the roadside into the middle of the highway—which is the very material most injurious to the road—there to remain in stilling dust or sticky mud until kindly rains have again swept it to the ditch, if there be one, or it has been transported to other scenes in the lungs and clothing of passing travelers. I have in mind just such a road and an equally capable roadmaster. In a town on Long Island a stretch of the sandy rocks of that region had, through the action of the rain, been rendered hard and smooth, with a corresponding clogging of the so called ditch. Instead of clearing the ditches and carting away the powdery earth, which had produced a luxuriant growth of grass and weeds, he plowed it up and dumped it, weeds and all, into the middle of the road, wholly destroying what had grown of itself to be a fairly good highway.

What is necessary is to employ a man who has had experience in scientific road-making. Such a one can do much toward making perfect roads and keeping them in repair at little more expense to the community than the incompetent tax worker.

Farmers, stop and think! Get together and take steps to get some return for money expended. Hire a competent man to supervise road construction and repairing, and soon you will rejoice in highways that will keep hard and smooth despite winter's frost and rains of spring.

W. H. BALLINGER.

For Farmers to Consider.
Many farmers to-day send their produce to market by railroad because the roads are so muddy and bad. There is more wear and tear on horseflesh and wagons than could be paid for by the saving on transportation charges. It would be a delight and pleasure to many farmers in the winter and spring to carry their farm products to market by wagon if the roads were hard and smooth. Good roads can be obtained better by the farmers taking an interest in the matter than by state legislation. The latter never accomplishes an object so well as local boards and improvement committees. When farmers have the same amount of local pride that some suburban villagers have, they will make the roads along their farms harmonize with the appearance of their well cultivated fields.

There is a lack of interest in the matter when we see thrifty barnyards, buildings, fields and fences, but wretchedly bad roads. And yet this is the case in many parts of the country. The great essential thing is to devote more attention to one part of the road until it is finished, and not spread out the work over several miles, doing no part any particular good. The labor is then generally lost, for the first winter will destroy all of the improvements. If every farmer would take a piece of road 100 yards in length in front of his house and fix it up into the right shape, finishing it completely before turning his attention to anything else, he would do a lasting benefit to his country. The following year it will need some slight repairs, and then another 100 yards can be finished. In the course of a few years we would have the finest roads in the rural districts that can be found in any part of the country.—American

CASTORIA

for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." J. E. A. AUCHE, M. D., 111 So. Oxford St., Brooklyn, N. Y.

Castoria cures Colic, Constipation, Sour Stomach, Flatulency, Eructation, Kills Worms, gives sleep, and promotes digestion, Without injurious medication.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTIN, D. D., New York City.

"For several years I have recommended your 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results." EDWIN F. PARKER, M. D., 125th Street and 7th Ave., New York City.

THE CASTORIA COMPANY, 77 MURRAY STREET, NEW YORK CITY.

Poor Printing Pays—

Poor Profits.

We get out a class of printing that is superior to the "general run." Good printing pays, and that is the only kind we furnish our customers and patrons.

The Republican Job Printing Department, Oakland, Maryland.

WINTER

Weather has come at last, and our prices on winter goods are so low that you can buy them at one-half the price that you would pay at any other store in the country.

Best flannels for 25 cents per yard; heavy muslin reduced from 10c. to 6c.; heavy muslin reduced from 9c. to 5c.; heavy hose reduced from 50c. to 30c.; heavy shirts, all wool, reduced from \$1.50 to \$1.; heavy shirts reduced from \$1.25 to 90c.; heavy blankets, all wool, reduced from \$6.50 to \$4.75, from \$5. to \$3.50 and from \$2.50 to \$1.90, overcoats reduced from \$7.50 to \$5.75, and from \$6.50 to \$4.75; comforts reduced from \$2.25 to \$1.50; all wool clothing at a sacrifice; rubber shoes, boots and fells at almost half price; gingham reduced from 10c. to 7c. and from 8c. to 5c.; four skeins yarn for 25c.; all wool underwear at prices to suit the closest buyer; calicos at 4c. to 7c.; Turkey red table cloth, all linen, from 43c. to 47c. per yard; flour from \$3.25 to \$5. per barrel; 3 cans tomatoes 25c.; 21 lbs. granulated sugar \$1.; 6 cakes best soap 25c.; 21 lbs. rice, \$1.; 13 lbs. pitted cherries, \$1.; 22 lbs. beans, \$1.; 12 lbs. best evaporated peaches, \$1.; 33 lbs. hominy, \$1.; peaches, pears and apricots, 18c. per can; tapioca, 9c. per lb.; gelatine, 15c. per package; Fox's corn starch, 9c. per package; Vanhoute's cocoa, 15c. per package; Baker's chocolate, 19c. per cake.

The above are quotations on a few of our goods, and a call from you will be sufficient to convince you that we mean business.

Respectfully yours,

SINCELL BROS.

The Republican.

OAKLAND, GARRET CO., MD.

A SONG OF CHEER.

There are many will tell you "The best has been done."
There is nothing worth striving for under the sun.
There is no hope for achievement when all of the past
is piled against you—an army so vast,
Drearily in numbers and deeds of renown,
It were foolish to struggle and waste to lie down.
But turn a deaf ear when these croakers come near.
Keep steadily at it and be of good cheer.

"The height you can climb is nothing at all.
So why make the effort and risk the rude fall?"
Oh, take but the breath of that sweet mountain air
And having inhaled it you'll never despair!
But striving still upward and onward each day,
"The labor I love it" at last you will say.
Then turn a deaf ear when the croakers come near.
With face toward the summit, oh, be of good cheer.

Think not for a moment all songs have been sung!
There are sorrows and joys that have never found tongue.
There are hearts today waiting the message you bring:
They listen for songs that you only can sing.
So think not of Shakespeare or Milton or Burns,
But sing as they sing, make your sweetest returns.
And turn a deaf ear when the croakers appear:
Sing life as you live it and be of good cheer.
—William S. Lord, in Chicago Record.

THE SECRET OF A MURDER

By EMILY S. HOWARD

(Copyright, 1914, by Emily S. Howard.)

"What hast thou done, Peppino?"

Peppino does not answer.

"Speak, Peppino," urges again the priest. "The Holy Virgin cannot forgive thee, if thou refusest to confess thy sin."

"Reverend father," falters the man, trembling and shivering with cold, but not from the damp and chilly atmosphere of the cathedral, with its granite pillars and marble floors. The shepherd of the Roman Campagna is accustomed to the drizzling rains that wet him to the skin as well as the burning rays of the sun.

Peppino has cast off the coarse round cloak in which his shivering form was wrapped. Prostrated before the confessional, he clutches convulsively the arm of the priest.

"Reverend father, I—"

"Speak, Peppino; was it thy neighbor's chattel?"

The shepherd shakes his head with proud disdain.

To aid him in the difficult task the aged priest winds his arm kindly around the sturdy shoulders of the man at his feet. "Speak," he urges again, "was it the knife, Peppino?"

Peppino nods his head.

"Who was thy victim, my son?"

The shepherd whispers: "Count Ludovico Porziano."

An expression of horror passes over the priest's pale face. "Count Ludovico Porziano, for whose slayer the Carabinieri have been hunting the mountains for the last three years?"

"It is he."

Peppino smiles grimly, as he reveals his handsome teeth behind a black mustache. He seems proud to have confessed a secret which the arm of the king has vainly sought to ferret out.

"Count Ludovico Porziano! A most pious gentleman! Peppino!" exclaimed the priest.

"A pious gentleman, he? Corpo di Dio! A very pious gentleman, indeed!"

"Is it thus you rue the sin, Peppino?"

"Porgive me, reverend father! He had stolen my sweetheart, and would have fared no better at another's hand!"

"Peppino!"

"The provocation was great, reverend father, yet on that day on my return to the city I saw him again, he before me sweltering in his cloak, and I knew nothing that could rid me of the horrible night-ware but a confession of the deed!"

"My son, sincere repentance will appease the most gruesome ghosts, and

an humble confession assures you absolution. Come, tell me how it happened!"

"Hear me then, reverend father! She was a lovely child, scarcely seventeen years of age. Sweet and tender, and as pure as the Madonna. Signor, her eyes were as clear as the light of the moon, and her soul as white as the mountain snows. She had promised to be my wife. Her father was a peasant of the Campagna, who lived at Formello. One day, as I drove my goats to pasture, I saw her standing near the fountain, with her long, black hair twisted into a simple knot, and a red kerchief wound around her white forehead. A bunch of asphodel blossoms, of which the ladies of the Campagna are so fond, was pinned to her crimson breast-cloth. She smiled at me, rever-

end father, as I walked by, and such a sweet and coy smile!

"There came a day, when the count rode by Mariana's humble hut on his return from the chase. He saw her coming from the well, carrying a jug on her head. Her sight was pleasing to his blue eye, and, alighting from his horse, he asked her for a drink of water. Mariana chatted with him. It was the first time in her life that she had met so rich and grand a gentleman, and he himself perhaps had never seen a prettier lass. Her father, he poured into her ear soft, caressing words. Old Min, her neighbor, informed me that Mariana met the count not far from the fountain three times in succession. From that time on she worked me. After that I carried my earthenware every day. I went to the trysting-place, where a dense cluster of cypresses covers a pile of debris, at an hour which Min had named to me. They were not there. Not far away, where the lane describes a sharp turn, I came upon them sitting on a stone under an olive tree. She saw me first and jumped to her feet like a frightened fawn. My face, my gun, told her own tale. The count escaped into the adjacent orange grove. My hands trembled nervously, reverend father. I could hardly hold the carbine. I raised it like a flash, for I saw him crouching behind some shrubs. My aim was good, and I would have killed him then, had not Mariana thrown herself before the muzzle of my gun. I dropped it, caught her by the shoulder, and threatened both with instant death, if I ever found them together again."

"She pleaded with me, and promised to heed my warning. But he had already won her heart with caresses and allurement, and it was useless abroad that the two still met clandestinely, here and there, in the many hiding-places among the debris, the ruins and the dark pine forests of the Campagna."

"I sought the count one evening in his palace, but his servants refused to let me enter, and drove me with gibes and curses from his door. Several days later I laid in waiting for him, as he strolled through his park. I sprang from the laurel bushes which had concealed me, and implored and threatened him to keep away from my promised wife. I told him that Mariana and I were soon to be married. He laughed at me and repulsed me with disdain. I grasped my knife—and caught him by the throat. He vowed then not to molest the girl again."

"Signor," I cried, "there will be murder, if you forget what you promised me this day!"

"I returned to my home and put my little house in order. The wedding was to take place a fortnight later. But

"I clutched him by the throat,"

the count still knew where to find Mariana. I never met them in each other's company again. His true, but my heart was full of ominous misgivings. Three days before the wedding-day I hurried to my sweet one's home, to find no one but her aged father sitting gloomily before the hearth.

"Forget that you knew her, Peppino," said he. "She is not worthy of you. She went away during the night, and we do not even know where she has gone. All her belongings are here, and she has taken nothing with her but my curse."

"My heart was filled with bitterness. I went away, and drove my goats up into the mountains as I had always done. Every night I hung around the count's palace for more than a year, but his servants informed me that the signor had gone away."

"When he returned, he came alone; Mariana was not with him. I met him several times, in the fields and on the country roads, and he, too, recognized me. But he was never alone. He was exceedingly cautious, and refrained from hunting through the woods, as had been his custom formerly. I always greeted him politely, and wore a smiling countenance, as if I had forgotten his treachery, and the sorrow it had caused me."

"In course of time the count's fears were allayed. He was afraid of me no longer, and resumed his old habit of riding through the country. Ere long, too, he roamed again in the shadowy avenues of his park."

"Two years had gone by since Mariana's disappearance. One evening I came upon him in the same spot, where he had given me his solemn pledge, not to see her again."

"Above us expanded the same blue sky; the same soft breezes played with the leaves of the plane-trees, and nothing but the mournful cry of an owl, nesting in the ruins of an old pagan temple not far away, disturbed the profound silence. The count recognized me at once, but this time, ere he could take to flight, I clutched his throat—and buried my knife in his treacherous heart."

"A French author, noted in his own time, produced in the seventeenth century a folio volume on 'Noses,' in which he described all kinds, and told what sort of nose every saint in the calendar must have possessed."

"According to the bureau of statistics the United States in 1909 exported goods and products valued at \$1,078,818,430, and the imports of the same year amounted to \$997,057,002."

WILD BILL'S IRON NERVE.

Riding Single-Handed Into a Hostile Camp and Capturing His Man.

By 9 o'clock in the morning fully three hundred Indians had gathered at the agency. Every one of them was armed with rifle or revolver, and many of them had bows. There was no drinking and but little talking. Near Faced Charlie had escaped from the guard-house at the fort the night previous and sought their protection. They were ready to fight a whole regiment sooner than give him up. They expected the soldiers to come, and they had planned how the attack should be made. Near Faced Charlie, armed with a Winchester, revolver and hunting knife, was the center of a group at the four-house. To reach him the soldiers would have to ride across the agency grounds between the lines of Indians. They would have to pass five sheds and houses behind which the Indians could find shelter. The excavator for a new storeroom would make a rifle pit for fifty redskins. At 9 o'clock the agent telegraphed over to the fort:

"Don't come. You couldn't take him with five hundred men."

At 10 o'clock a single white man came up the road with the Indians going at an easy canter. While he was yet a mile away the Indians recognized him as Wild Bill, and there was an uneasy movement among them. Every man was watching him as he turned to the left and rode into the agency. He might have a dispatch for the agent, or he might want to make a purchase. When he did not draw rein at the store the uneasiness was more marked. The Indians gathered in groups and conversed in whispers. As the rider reached these groups he uttered a brief "hooey," but did not check his pace. At that same center, and with his gaze fastened on the group at the four-house, the famous scout rode down the avenue and made no halt until he reached the group. He nodded to two or three Indians whom he knew and then said to Near Faced Charlie:

"I have come after you. It is not far, and my horse will carry double."

There was the man who had sworn never to be taken alive. Around him were three hundred friends who had promised to wipe out any force sent to capture him. Instead of his hundred horsemen, however, there were only one man. Everyone looked at him in blank amazement. He knew they had assembled, and yet he had dared take the risks. He had knife and revolver, but he did not dare put a hand to either.

"I returned," he replied the half-breed, but there was indecision in his tones.

"I am sent for you. I shall take you dead or alive. Give up your arms and come along."

For thirty seconds every Indian seemed to hold his breath. Then one well-aimed bullet wound the scout's arm, but not a gun was raised to fire it. Half a dozen of those stalwart men could rush him off the grounds, to return at his peril, but not a foot moved. A regiment would have been wiped out with a volley. A squad would have been hacked to pieces with tomahawks. But one man, and that man Wild Bill!

Near Faced Charlie looked to the right and left and raised his rifle. Then he handed it to the man on his right, followed it by the revolver, cast his knife to the ground with a curse, and stepped forward and mounted behind the scout. The latter had entered the agency with a smile on his face. It was there as he rode up to the four-house, there as he delivered his message; there he rode away with his prisoner behind him. When they were out of sight behind the ridge the Indians broke up into small groups and returned to their camps. They had been awed and overcome by a man more than a regiment of soldiers.—Kansas City Times.

Army Tests as Ferry Boats.

Some curious experiments have recently been made with the new tents which the German soldiers carry with them. The end in view is to make the tents, or rather their cloth, serve as a means of defense for the soldiers' construct ferry boats for the soldiers' baggage. To swim a stream in full equipment is not without danger even for the best swimmers. In future, however, the soldiers will be relieved from this necessity by the folding tents, which they will carry with them. They will collect brushwood as small branches with which to weave light framework; the tent cloth will be unfolded, laid over the framework and fastened to it in such a manner that the water cannot pass through. The men will then strip and put all their baggage and accoutrements into the sailcloth ferry boats, which will effectively preserve them from getting wet. The soldiers then swim across, pushing the ferryboats before them, so that they will reach the opposite shore with all their belongings dry. These experiments have been made on a large scale by the pioneers on their recently terminated autumn exercises, and have led to very favorable results, both as to the time required and the trouble occasioned by the transportation.—London Standard.

Effect of Inositol Teeth on Speed.

Many horses, it appears, have imperfect teeth, and their owners often fail to find what is the matter. The famous pony trotter, David L. with a record of 2:19 1/4, fell behind for a whole season. An examination of his mouth showed that two of his teeth were cutting him. He was operated upon, and he at once trotted again with his former speed. Rosalind Wilkes, with a record of 2:14 1/4, was another case in point. Not until her teeth were repaired did she resume her former rate of racing speed.—N. Y. Sun.

A Reason.

Mistress—If you don't like your place, what do you stay for?

Maid—For four dollars a week, ma'am.

Detroit Free Press.

SCIENCE AND INDUSTRY.

"One deplorable result of excessive meat eating," says Mrs. Ernest Hart, in the London Hospital, is the ill-temper, which is said to be a chronic complaint in England. In less meat-eating France urbanity is the rule; in fish and rice-eating Japan harsh words are unknown, and an exquisite politeness to one another prevails, even among the children who play together in the streets.

Children should be trained to eat slowly, no matter how hungry or how important business is pressing. Much safer a little food well ground than a hearty meal swallowed in haste. Cold food is even more difficult to digest than hot, if taken too rapidly. The normal temperature of the stomach is about ninety-eight degrees; food has to be raised to this temperature before digestion can take place.—People's Health Journal.

According to the state board of health of Michigan the statistics of sickness have demonstrated the law that generally influenza (the gripple) is quantitatively related to the amount of the more influenza, the more ome, the more influenza; and the law that intermittent fever is inversely related—the more ome, the less remittent fever.

The cultivation of both coffee and the rubber tree (Castilleja elastica) is increasing rapidly on the isthmus of Tehuantepec, Mexico. In ordinary coffee plantations, trees otherwise useless are planted to shade the coffee trees, but the substitution of the rubber tree provides a shade that in seven years pays all the expenses of the plantation—both coffee and rubber. One rubber tree is planted for every four coffee trees.

It is reported from France that M. Egnasse, of Archevillers, in the department of Eure et Loire, produced an average crop of eighteen tons of potatoes per acre on forty acres. The potatoes were what Americans call "long tons" of six pounds. This result was attained by heavy manuring, the land having received in addition to farmyard manure, a dressing of 280 pounds of superphosphate, 234 pounds each of sulphate of potash and nitrate of soda per acre.

In the process of extracting gold from its ores molten lead is used instead of mercury. The lead is melted on a shallow hearth and the powdered ore is fed in at one end and carried forward as a film over the surface of the lead by means of an agitator moving over it. It is thus brought to the other end, where it escapes through a hopper. In order to prevent oxidation of the lead, the chamber is kept filled with carbonic oxide from a gas producer.

Between 60,000,000 and 100,000,000 collisions are taken from the land every year. A single coal yields something like 3,500,000 eggs each year, and over 8,000,000 eggs have been found in the roe of a single cod. A herring of six or seven ounces in weight is provided with 30,000,000 ova. After making all reasonable allowances for the destruction of eggs and of the young, it has been calculated that in three years a single herring will produce 154,000,000.

Scientists affirm that red hair means an abundance of iron in the blood. And the analyst says that it is the matter that enters the red hair that imparts vigor, the elasticity, the great vitality, the overflowing, thoroughly healthy animal life which runs through the veins of the red-haired, and is what renders their more intense in their emotions than their more languid fellows—crustaceans. Philosophers notice it is a peculiar fact that red-haired old maids are very rare.

Experiments are in progress at Yale to determine the relation of muscular action to the nerves. Tests will be made on some of the most celebrated swordsmen of the country to determine the exact time it takes the mind to realize that a certain action has taken place and how long a time is required to make a simple muscular action. The theory that is known as muscular strength does not depend upon the size of the muscle, but upon the strength of the nerve center and the quality of the muscle.

Round to Kick.

The man with two cork legs was in a bad humor because he couldn't go skating, and he growled when he landed his fare to the street car conductor.

"Well, it is pretty hard," admitted the conductor, "but you have one advantage."

"I'd like to know what it is."

"Perhaps not in the day time," he admitted grudgingly, "but I am at night."

"O, come off," protested the conductor.

"It's true, I tell you," he said sharply.

"Get out; you haven't any feet to be cold."

"Possibly not, but my wife has," and the conductor rang up seven fares before he recovered from the shock.—Detroit Free Press.

Four Sweetening.

Alliteration is a grace which may easily be abused. Even in poetry it should not be laid on too heavily a brush. Such successions of sibilants as we sometimes see in second-class sermons should be sedulously shunned. Alliteration was probably an unintentional alliteration, an exchange tells the story.

"Got any good molasses, George?" asked a farmer's wife of the grocer.

"Good! I ever had in the store, Miss Littlefield," answered the grocer.

"Waal, put me up two gallons."

A week or so later Deacon Littlefield called the grocer to account for selling his wife poorer molasses than usual.

"It's good 'nough in linj pudd'n," he said, "and in brown bread; but, George, I gin ye my word as a dekin, it's terrible tedious in tea."—Youth Companion.

From a New Point of View.

"I see by the papers, Miss Dovecoat," said young Spooner, "that there have never been so many newly-wedded couples at the English lakes as at present."

"Indeed, Mr. Spooner," said Miss Dovecoat, "how perfectly stupid it must be to others. I can't imagine one looking at a more foolish sight than a collection of insipid honeymoon brides. I couldn't stand it."

"Not if you were one of them, Miss Dovecoat?"

"Mr. Spooner! Sir!"

"I—I mean, Miss Dovecoat—Araminta—dearest—will you go to the lakes with me?"

"Oh, Mr. Spoon—Alonso—this is so—so sudden—so unex— Yes, Alonso, I will."—Answers.

Why He Died.

This is what the physician said: "Take sixteen grains every day at intervals of two hours."

And this is what the patient understood him to say: "Take sixteen grains at intervals of two hours every day."—Chicago Record.

May Not Be Enough for Him.

First Lawyer—What do you think of the inheritance tax?

Second Lawyer—Well, there's one thing I want to know. In case of a disputed will does the government expect to come in before the lawyers?—Puck.

Regulating with Luxuries.

Mamma—Now, Teddy, we must all try and give up something while times are so hard.

Teddy—I'm willing.

Mamma—What will it be, dear?

Teddy—Soap.—Boston Globe.

Abandonment, Only.

Jack—I have a confession to make, and you shall be my priest. I—I love you.

Jess—I forgive you freely; but—priests don't know!—Puck.

A Happy Death.

"Yes, she's dead; but she died happy and under the happiest circumstances."

"Indeed! How did she die?"

"She was crushed to death at a bargain counter."—N. Y. Press.

Cause and Effect.

"Wholly's verses always seem so flat."

"That's because every critic in the country has sat down on them."—Chicago Tribune.

Blank Egotism.

Wicks—Your heart goes out in sympathy for the poor?

Wicks—Yes; though it sounds like blank egotism to say it.—Boston Transcript.

Her Attractions.

Nell—Miss Passe hasn't a very beautiful form, has she?

Belle—No, but she makes up for it.—Philadelphia Record.

A Testimonial.

"I understand you tried the faith cure with success."

"I did. My faith was cured."—Life.

THE CONSIDERATE GIRL.

"A kiss upon this Valentine."

"I pressed it underneath this line; I hope you won't despair."

"I do not want the kiss you sent."

"She answered, 'not at all! But just because it was well meant I'd keep it till you call.'"

—Tom Mason, in Life.

Chilling Gratitude.

Mr. Goodrich—Mary, I've had my life insured to-day, and now, at my death, you'll receive twenty-five thousand dollars.

Miss Goodrich (enraptured)—Oh, you dear, dear good man! How thoughtful of you! You not only try to make me happy while you are alive, but you fix it so I'll be happy after you're dead!

—Puck.

Perhaps So.

"What is your philosophy in regard to lending money?"

"My opinion is that the man who lends grudgingly is the man who lends most generously—for he is the man who never expects to get his money back."—Truth.

By the Best.

"Don't you think Lella's complexion is lovely?" said one dear girl to another.

"Yes; that's one thing that I admire about her. She always buys the best in the market."—Washington Star.

Recipe for a Valentino.

A heart and an arrow, a rose and a vine; A basket of fruit, and a goblet of wine. Tears that bedew them; a serpent that twines; Or, of and of, they make valentines. With Vesper.

TEMPERANCE NOTES.

THE HELPLESS LITTLE ONES.

A fair-haired, healthy baby,
Bright-eyed and rosy cheeked,
On whom the dew of whisky
Has horrid vengeance wreaked—
Across my dull horizon
She haunts her golden curls,
As fair as petals of fashion
Or odorous daisies girls.

I clasp the dimpled fingers
And snarl her on the lines.
"What is your name, my beauty?"
She looks at me with eyes
In soft contentment
By asking, "Don't you know?"
My name is mamma's darling!
Her daisy told you so."

"Where is your mamma, precious?"
She pines beyond the door.
"Why, there she is, a-sleepin'!"
See! down there on the floor!
"Where is your papa, daisy?"
"Why, papa, he is drunk!"
"Come, daisy," calls the mother,
To wreck and ruin sink!

Oh, weak and useless people,
Who never feel the pain,
Behold this helpless angel
Within the tempter's snare!
"Why, he is drunk," she utters,
With never thought of sin,
No more than thought the sentence
Were one of joy and fun.

Ah, dread the coming future,
When judgment takes her seat
How will she bear temptations
That all must surely meet!
The earth so strong and given
To save her from despair,
Unless the bending Heaven
Responsive is to prayer.

O God! You must assist us
Our labor is too great;
We can not save the children
Or shun this cruel fate.
This sad and stern indictment
Will follow all her years,
Burnt in through all her tissues,
The faint of future tears.

"Thistle," in Chicago Dispatch.

IN A BARROOM.

Heart-Rendering Evidence of the Fell Work of Drink.

The usual amount of distress among the poor and unemployed in this city has opened a new and truly worthy field of enterprise for some of our daily journals, one of which has established a free employment bureau, while another has collected a fund for a gratuitous distribution of food among the people of the tenement districts. The same newspaper which has undertaken the latter task has also sought to awaken interest in behalf of its work by publishing long and circumstantial accounts of the daily life of the people of the tenement districts.

These sketches are interesting and significant as showing, among other things, the large part which the drink evil plays as a producing factor in the awful misery and degradation prevalent in these places. A few pictures from one of these descriptive articles will suffice to show the drift of the whole. It is everywhere the same—rum and misery, misery and rum. Here is what the writer saw one cold night recently in a New York saloon. "Eight or nine big stalwart 'long-shoremen' came in, lined up at the bar and one and all ordered whisky. They had put in a good day's work. They were spending their money. Each man left money enough there to be able to pay for all the stew that was cooked in that place that day. In the midst of the cursing, swearing, and rough jolting a little girl pushed her way through the side door, her hair in hand, wanting free lunch. She could not have been more than five years old. She wore a little cotton frock and shoes through which her toes peeped. She got as much of the lunch as was left.

"Please, Pat, she replied, 'can't you give me some more?'
"No more tonight, Susie; that is the last. But hold your dress."
The child held up her skirt as if it were an apron. Two little naked, weather-beaten legs were exposed. In the dress Pat poured cheese, crackers, nickels, onions—everything that was left on the lunch counter.

"We lose nothing by this," explained Pat. "When the men are working they spend more money than enough to pay for the little I give them."

"Do you trust much here?"
"The men we do. That is, when they are working. It would never do to trust them when they are not working."

"Why not?"
"Well, they would run up a bill here, another bill at the next corner, and so on. They would not so deeply in debt they would never pay us. It is not the amount we would lose by the bill, but we would lose the man's trade. When he had money to spend he would go somewhere else to spend it rather than come to the place where he might expect to pay for what he had had here. Here he got any more. But take the general run of men, when they are working they will come in and pay up every Saturday night. They don't run up much. In the morning they come in and get a big bill. They go to work then, and in the evening they get another big bill. Then a few pints during the night. Saturday night perhaps they will owe two or three dollars. They pay that first, and then we get a good part of what is left."

I counted six children who came in to that barroom who wore no shoes. And the snow that night covered the ground. Not one of these children was dressed to resist the biting wind that swept up from the East river, searching and blinding the rents and tears in the wretched messenger's garments and chilling their very marrow. There's no exaggeration here; mind you. When these children came into the barroom they stamped their half-frozen toes in a pitiful dance on the sawdust-covered floor and sought to warm their benumbed bodies at the red-hot stove that was shut out from them by the loafers who surrounded it—who toasted themselves at it.

These children, boys and girls, were brazen. A curse was their retort, worse than curses their jests. One boy, who could not have been more than six years old, looked critically at the pint of beer the bartender handed him the pint of beer. The froth of the beer bubbled scarcely to the rim of the pail. The

boy weighed the pail in his hand and then looked at the bartender with a cunning leer.

With an oath he exclaimed, spitting through his teeth: "Dat's a dandy pint to give a feller."

The remark was much applauded. The bartender burst into guffaws. A red-faced old man in a chair by the stove laughed until his face was purple, until he could scarcely keep his equilibrium.

"He's a dandy, that youngster," cried the purple-faced old man, "a chip of the old block."

Some of the children as soon as the side door—the "family entrance"—as soon as this month to hell was shut behind them, put the pail of beer or ale to their lips and drank from it. One boy and a youngster who was with him drank from the pail full of ale they carried. Then he filled up the pail with water from a hydrant in the alley.

"What will your mother say?" I asked him.

"Aw, she's drunk," he retorted. The night grew older, still in a chain that was almost endless these children passed to and fro between Double alley and the tenements round about it and the saloons.—Christian at Work.

A Terrible Record.
Archdeacon Farrar lately delivered a mid-day discourse at St. Michael's church, Cornwall. He contended that the abuse of drink was the deadliest form of national evil and calamity with which at present we had to struggle, and it was also the most prolific cause of the pauperism and misery in our midst. It was estimated that the working classes alone now spend \$70,000,000 a year in intoxicating drink. He put it to them as businessmen whether they did not believe that if that large sum, or a considerable portion of it, was expended on the ordinary necessities of life, pauperism throughout England would not in a great measure disappear? The police court mission, in behalf of which he had been asked to speak, could not put an end to the drink curse, but could remedy it to a large extent and save people from falling lower and lower. In the last year alone it has helped no fewer than 15,000 of the most wretched people; 1,600 men, women, boys and girls had been redeemed from a life of misery and placed in situations; 791 women and girls have been rescued from shame and drunkenness, 530 special cases from magistrates have been dealt with.—London Times.

BITS AND BREVITIES.

"Timorous drink there are half a million homes into which happiness never comes."—A brewer, one hundred years ago.

In spite of the diminishing population of Ireland it is found that there is in that country an increasing expenditure for intoxicating drinks.

The quantity of fermented liquor consumed last year in this country was nearly one-half barrel for each man, woman and child of our population.

DR. GERBERT, writing to a Havre journal, states, as a result of his experience, that habitual drunkards are never cured of their habit of recovering from an attack of cholera.

PROF. LEVI has made a calculation that the wage-earning classes of England spend eighty-five million dollars a year in drink, and to-day there are thousands of them homeless and starving.

A CIVIL engineer in India, in writing to a brother in England who proposed joining him, said that unless his total abstinence principles were well established he had better bring his coffee with him.

SIR BENJAMIN RICHARDSON, in an address on "athletic life," says that abstinence from alcoholic fluid is absolutely necessary. "As long as you are in course of training, don't touch any kind of drink. It will undermine all the qualities on which you depend for success, will injure your present, and your decision, your presence of mind and your endurance."

In the old days total abstainers were scoffed at, and we total had no excuse for drinking water; now we find constantly people murmuring something like an apology for drinking wine in our presence. The change is coming slowly and steadily, and when we are beginning to be disinterested in our individual effort, we must look to the change that is taking place all over the world, take courage and thank God.—Canon Witherforce.

WHILE we are all talking about the Matabele, it is interesting to note in the above connection that Klans, whose names have figured once or twice in the Matabele complication, said to Sir Sidney Sheppard in 1888: "It were better for me that I should lose my country than that it should be flooded with drink. But to fight against drink is to fight against demons, and not against men; I dread the white man's drink more than all the assegaits of the Matabele."—The Christian.

DR. FORER, the famous specialist on mental diseases of the university of Zurich, sent a most valuable paper to the World's temperance congress. "Alcohol," he said, "even when diluted, as in wine, beer and cider, is a poison which changes pathologically the tissues of the body and leads to fatty degeneration. Some poisons are used as medicines such as corrosive sublimate, quinine, etc. I am one who assigns but a very subordinate position to alcohol as a medicine."

THE temperance cause started out well nigh alone, but mighty forces have joined us in the long march. We are now in the midst of the Waterloo battle, and in the providence of God the temperance army will not have to fight that out all by itself, for science has come up with its glittering contingent, political economy deploys its legions, the woman question brings an Amazonian army upon the field, and the stout ranks of labor stretch away far as the eye can reach. As in the old Waterloo against Napoleon, so now against the Napoleon of the liquor traffic, no force is adequate except the allied forces.—Frances Willard

ADRIET IN MIDAIR.

A Frenchman's Adventure in Sydney, Australia.

It was near midnight and the gates of the exposition would soon be closed. In the various pavilions, with their multitudinous attractions, the orchestras were already attacking that "God Save the Queen" of an altogether conventional loyalty without which no British ceremony ends. And as, with the fort, where I thought more easily to regain my vessel in the roadstead, I had made the tour of the galleries, I found myself unexpectedly before the circular grating of the captive balloon.

Planning, but beneath the force of the breeze which had arisen in the evening, quivering greatly, a line of gas permitted me yet to read upon the triumphal panel of the monumental gate: "Government of New South Wales, Australian and Universal Exposition of Sydney. Captive balloon. Visitors ascend four hundred yards."

One hundred more than at the Place du Carrousel! I felt myself led into temptation.

With my hand directed mechanically toward my vest pocket I had approached still nearer. It was the ticket seller for the aerial voyage who decided me by the apostrophe: "Make haste, gentlemen; it is the last ascension of the evening!"

Resolutely I threw him the half pound exacted as the price of the passage, and introduced myself into the ring incumbered with chairs. A loose footboard formed the communication between the platform and the car suspended over a shallow ditch. I passed along it amid the resounding acrobatics of the brasses with a flourish, and scarcely was I installed in the huge osier basket when the footbridge was withdrawn and the door of the car, which was padded on the inside, was closed again. The enormous cable, which alone was to bind us to the earth, began to unroll very rapidly on its windlass at the command of the captain.

It was my first aerostatic debut, and, as I ascended on board the Condor of the Andes, I did not fail to experience a certain apprehension, although, nervous, a sort of involuntary fright, which, by reasoning and force of will, I was able to control. I had felt at first a great sensation of emptiness; my respiration seemed cut off, and as I knew that I was susceptible to vertigo, I only ventured with precaution to look over the elbow rest of the car.

Wholly contrary to my expectations, I found myself instantly at ease. The slides of the osier basket, mounting as high as my head, seemed to me sufficient protection against my ambition, and, completely reassured, I realized that I was restored to myself.

From that time I looked toward the earth, from which the balloon was moving away with a rapidity which I judged to be ghidly, although it was methodically regulated by the number of turns of the gigantic bobbin of the windlass. In the depths of the night below me I sought to distinguish the different streets of the city over which I floated, but the light of the little lantern I noticed that my hands were growing black and swelling. My pulse counted the improbable number of one hundred and thirty to one hundred and forty beatings. Simultaneously with an insupportable desire to sleep, the foreman of apoplexy, cadaveric in its onset, was gaining possession of me.

I had, however, the will to take the lantern in my hand, but on stretching up to reach it I felt myself enveloped by terrible cold. Ice coated the Condor of the Andes. The mercury of the thermometer had fallen to twenty-four degrees below zero.

I then clearly comprehended that the end had come, and, without further striving to recover, closed my eyes and gave myself up.

When I returned to the knowledge of a magnificent moon was shining in the night. My eyes, turning slowly to the rim of the car, I noticed a small silk balloon fastened by a strap. It bore a label: "At seventy-five per cent." And I noticed my scientific attainments being to understand that this was a "captivity balloon."

A few lines of that over-oxegenated air restore me with life, with the little balloon as quickly capable of doing, and, care-crawling its way after mother, I was able to breathe. I afterwards of Miss Arabella, and introduced slender neck between her and I saw were horribly black.

As she returned to life, I from her again, and then, as a strange struggle of a, vanished creature, I was completely restored, I sidering the quickest way to end our adventure. The more saved from apoplexy and I, Miss Lipton kept shouting ears in a deafening tone: "I descend, Monsieur Frenchman! it to you that I want to descend!"

At losing time in answering her to maneuver the ropes; I hem one's way after mother, thus to discover that which I had with the escape valve. I had not yet noticed. But I could not judge of the balloon and its mass of vented air, I noticed a small silk balloon fastened by a strap. It bore a label: "At seventy-five per cent." And I noticed my scientific attainments being to understand that this was a "captivity balloon."

"There are only three of us and the balloon is inflated for thirty. That's the medium number of passengers. You will have only the annoyance of passing two or three hours more than you calculated in my company, and doubtless the inconvenience of not getting back to Sydney until to-morrow morning."

"In that case, captain," I replied, "I am doubly delighted at the accident; the ascension has grown exciting, and we could not desire a more courteous pilot than yourself. Is it not so, madam?"

"Miss, if you please," rectified the very slight and slender lady, "Miss Arabella Lipton, at your service." And she added: "But I shall miss my last car for Koolomooloo!"

From vibrations the captain conjectured that we were carrying suspended below us nearly the whole of the broken cable. Its weight visibly impeded the ascent of the Condor of the Andes, and there was reason to fear that on the descent it would occasion very grave dangers.

The aeronaut was, fortunately, prompt in decision. Like a true captain, he armed himself with penknife, and, hoisting himself over the interior abyss of the osier basket, strove to saw away the thick rope.

"How high are we?" he asked, without interrupting his difficult and perilous task.

"Twelve hundred and twenty-five yards," responded Miss Arabella, getting ahead of me again.

"Fanning greatly, the aeronaut added, addressing himself to me: 'As soon as the cable is detached with a bound we will ascend to two—' The sentence remained unfinished.

At a slight cry I turned around, ceasing to observe the barometer. Over the gaping void I could no longer see either the man or the cable. In the captain's supreme effort, one drawing the other, both had fallen! Above us, toward the profound night, still stretched the unfathomable space.

I had not much time for pity; the balloon suddenly freed, sealed the inaccessible with a prodigious, bound. And without any idea of aerial navigation, lost in space and darkness, I found myself alone with an ignorant young girl, as unconscious as she of the danger, unable to attempt the slightest maneuver.

Into, but terrified—I divined it without seeing her, for her fingers had plunged their nails into my garments and flesh—Miss Arabella had seized my arm. Suddenly she let go her hold from atop, and I saw that she was throwing our suit overboard.

I was about to grasp her unceremoniously by the waist—logically convinced that unbalanced we would mount higher yet—when of themselves her arms fell; I realized that she was inert. A prey also to very painful forebodings, I cast a glance of anguish at the barometer. The atmospheric pressure had sensibly diminished—we had passed four thousand yards! In the air the oxygen had rarefied. I experienced a sensation I had already felt on high summits.

Crawling, I dragged myself to the barometer and saw with terror that the thermometer had gone down to zero—32°. That was the equivalent of sixty-five hundred yards in height, the altitude of Chimborazo or of the Koonal Loun deau. By the light of the little lantern I noticed that my hands were growing black and swelling. My pulse counted the improbable number of one hundred and thirty to one hundred and forty beatings. Simultaneously with an insupportable desire to sleep, the foreman of apoplexy, cadaveric in its onset, was gaining possession of me.

TRAVELING IN ANNAM.

Queer Modes of Locomotion Experienced by an English Tourist.

Though the French have been in full possession of the Empire of Annam for a considerable number of years, they have not sensibly modified the life and customs of the country. The Hon. George N. Curzon, M. P., an Englishman who recently traveled through French Indo-China, found the traveling custom very peculiar. One of the most ordinary means of locomotion for the European traveler is the palanquin, which is a sort of crimson cords, having a roof and screens of richly lacquered ends. It is carried by four or eight men.

The ordinary Annamite is a very small man, and the palanquin is constructed to suit his size. Mr. Curzon was six feet high, with the usual proportions of robust Englishman; and he found the palanquin insupportable. "The most telescopic contraction of my lower limbs," he says, "rendered it impossible for me to occupy one for longer than a very short time. Seasoned travelers, however, sleep in them with ease, while being carried along. The coolie bearers march at a jog trot, which enables them to cover the ground with great rapidity, accomplishing at least four miles an hour."

For a part of the journey Mr. Curzon was obliged to travel a considerable distance on the back of a little Annamite pony; and he found that this method had its inconveniences also. The roads in places were a "horrible bog" after the rain. The natives ride the pony with a wooden saddle, and they grip in the cleft between the big toe and the remaining toes. This style of holding on a horse had its disadvantages for a European.

Frequently the traveler came to a river or lagoon, which had to be crossed by a very narrow iron stirrup, which they grip in the cleft between the big toe and the remaining toes. This style of holding on a horse had its disadvantages for a European.

At a slight cry I turned around, ceasing to observe the barometer. Over the gaping void I could no longer see either the man or the cable. In the captain's supreme effort, one drawing the other, both had fallen! Above us, toward the profound night, still stretched the unfathomable space.

I had not much time for pity; the balloon suddenly freed, sealed the inaccessible with a prodigious, bound. OAKLAND, MD., THURSDAY, FEBRUARY 15, 1894

NUMBER 49

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Take your furs to Sincell Bros. They pay big prices.

A fine crayon portrait free for thirty days. Loar & Co.

"Babies a success" at photo gallery. See ad. Loar & Co.

Take your furs to Sincell Bros. They pay big prices. 49 1

Bring the babies and children to photo gallery. See ad. Loar & Co.

Mr. Frank Jameson, of Piedmont, was here Sunday visiting relatives.

Senator Wm. G. Worley, of Kingwood, was in the city Monday evening.

Mr. J. C. Shaw, of Grantsville, was in the city Tuesday and Wednesday.

If in need of bolts go to J. M. Davis & Son's. They have 10,000 in stock.

Mr. Joseph E. Harned was in Cumberland Sunday last on a visit to friends.

Mr. Edward P. Anderson spent last Sunday in Newburg, W. Va., visiting his parents.

Five hundred pairs of scissors and razors to select from at J. M. Davis & Son's.

Messrs. James Stark and Jonas Hetrick, of Bittering, were in the city Tuesday.

Mr. John A. Wilt, of Westernport, was here Monday and called to see THE REPUBLICAN.

For thirty days we will give a fine life-size crayon portrait with each dozen cabinets. Loar & Co.

Those desiring fine photographs should call at once for we will remain here only a few weeks. Loar & Co. 49 31*

Mr. Daniel E. Offutt returned from a business trip to Baltimore and other eastern cities Monday evening.

Cool at from 75 cents to \$1.12 per ton, cash or trade at Deal's nine three miles north of Oakland on the Yough. 43 81*

Dr. D. A. Cross, of Piedmont, spent Sunday in Oakland, the guest of Mr. and Mrs. King Delawder on Second street.

Mr. Wilfred S. Dunlap, who recently removed from Oakland to Wilmington, N. C., was in the city two or three days this week on business.

Miss Muggie Porter, who has been a sufferer for many years with rheumatism, is lying dangerously ill at her home in Oakland and her recovery is doubtful.

The Rev. H. P. F. King preached two very excellent sermons to large and attentive congregations in St. Mark's Lutheran church on Sunday last.

Mr. James W. Leathers, who has been confined to his bed for a number of weeks suffering from the effects of a wound received during the war, was able to be out Sunday.

Mr. Edward M. Spedden went to Baltimore Monday to attend the annual session of the Grand Lodge of Maryland, Knights of Pythias, to which body he was elected by Garrett Lodge, No. 113, as their representative.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-17

You can get your garden seeds at Henry E. Felty's grocery store. These seeds will be fresh and a great deal cheaper than sending off for them. A new variety of seed potatoes also on hand. 45 171

Rev. Henry Carrington Alexander will preach in the Garrett Memorial church, Oakland, on next Sabbath at 11 o'clock a. m. and 7:30 o'clock p. m. The subject of the discourse to be delivered Sunday evening will be "Pharaoh."

All schools that have not contributed and intend to the Prof. M. A. Newell Memorial Fund will please send in their contributions at once, so that we can send in the amount for Garrett county.

JAS. D. HAXILL,
President Board School Com's

Our stock of plows are complete. All sizes and prices J. M. Davis and Son.

WANTED TO RENT.—In the central portion of Oakland one or two rooms suitable for millinery store. Miss Mary Cunningham, Lonaconing, Md. 49 31*

Mr. James O. Cleveland returned to Oakland from Frostburg Sunday after a stay of ten days in that city on business. He brought with him a fine bay horse which he purchased there for his son Will.

It is rumored that train No. 3 on the Baltimore and Ohio will arrive in this city two hours earlier after the first of next month. It is also said that the time of express train No. 4 eastbound will also be changed.

Prof. Samuel G. Simmons, of Valley Head, not far from Elkins, W. Va., had a thrilling experience with a panther one day last week. He was walking through the woods near his home when he was attacked from the rear by a very large panther. The animal sprang at him and dealt him a heavy blow with one of its paws, which almost knocked him down. Prof. Simmons was entirely unarmed, and being unable to fight the savage beast without a weapon, at once took flight. He dodged in and out among the trees for awhile until the panther gave up the chase, and he escaped unhurt but very much frightened.

Rev. Wm. L. Leisher preached to the St. Paul's Lutheran congregation Sunday morning last and at the Trinity Lutheran church in the evening. Rev. Leisher will remain in Akron until next Sunday when he will preach again for the mission church. He may be extended a call by the latter congregation.—Akron (O.) Daily Democrat.

The members of the Junior Order at Accident, assisted by members of Victor Council, of Selbyport, will present a bible to the school at the building on the 23d inst. Quite a crowd of Juniors from different sections of the county is expected to be present at the presentation and participate in the exercises.

Mr. James Fredlock, of Westernport, was in the city Sunday last on his way home from Terra Alta at which place he recovered his team which had been hired on Friday by a man representing himself to be a traveler for a western house but who it is alleged tried to steal the horses. The team was driven from here to Piedmont on Sunday by John Sweeney.

Mary, daughter of J. E. Gnagney, of this place, slipped and fell on an icy sidewalk last Friday and fractured a bone in one of her lower limbs. The fracture is doubtless painful and a great hindrance to the unfortunate sufferer but it is not likely that serious consequences will come from it, young and vigorous persons being generally able to fully recover from such injuries.—Grantsville corr. Meyersdale Commercial.

Work on the Baltimore and Ohio improvement at Harper's Ferry is getting near completion now. Workmen are engaged on the last span of the bridge and the track is being laid on the new embankment along the bluffs. It is said that the trains will run over the new line in about a month. The site of John Brown's fort has been completely buried by the roadbed. Some Harper's Ferry people think that if there is another flood in the Shenandoah river the change in the road will cause serious damages to the lower part of the town.

Jacob Stullenger, who lives near Piedmont, W. Va., lost a good many chickens last November, owing to a big owl's fondness for poultry. He set a steel fox trap in the top of a cherry tree, fastening it with a wire, to catch the owl. One night the trap disappeared, and after that the chickens were not molested. Stullenger supposed the owl would starve to death with the trap on his leg, but he was mistaken, for on the 9th of January the owl was caught again, twenty miles from Piedmont this time by Ebenezer Kitzmiller. Ebenezer had been annoyed by an owl since Christmas, and set a trap for the bird near his chicken house. The owl got caught and found two traps too much to carry away. It had one on each leg.—Uniontown Stand.

AN AWFUL HOLOCAUST.

The Residence of Samuel Wotring Burns and with it Two of His Children.

The residence of Mr. Samuel W. Wotring, residing about a mile from Anurora, W. Va., near the Garrett county line, was burned to the ground at three o'clock Monday morning, together with all its contents, but the loss of the house is as nothing compared with the burning of the unfortunate man's two children, both boys, aged seven and twelve years.

From what can be learned it seems that the conflagration was caused by a defective line, and before the inmates of the house were aroused the flames had gained such headway that Mr. and Mrs. Wotring escaped with only their night clothes. They were sleeping on the first floor and their children were in an upper room to which a stairway led but which burned before they could make their escape. The father raised a ladder to the window and called his children to climb down. The oldest boy climbed the ladder and was descending when he became confused and jumped back into the flames. The mother was almost frantic and Mr. Wotring could render no aid to his children on that account as it took all his strength to restrain her from rushing up the ladder and meeting the sad fate of her boys. The charred remains of one of the children was found but the other was entirely consumed.

There was no insurance on the house and the loss falls very heavily upon Mr. Wotring. The family in their loss and great affliction have the sympathy of the entire community.

Notice.

All taxes remaining unpaid by the 15th of February, 1894, will be placed in the hands of the Sheriff for collection.

46-td. S. LAWTON, Treas.

Married.

Tuesday evening, Feb. 6, 1894, at St. Michael's church, by Rev. S. J. Clarke, Mr. Benjamin P. Meyers, of Moscow, and Miss Lucy Garlitz, of Garrett county, Md.—Frostburg Journal.

Eyes Examined Free.

Sam'l S. Little, the graduate optician of Cumberland, will visit Oakland, March 2, at Dr. H. W. McComas' office. Call and consult him about your eyes, as properly adjusted glasses will relieve many a headache. 49 21

Died.

MARTIN.—On Feb. 4th, at her residence at Sunnyside, Miss Sarah E., daughter of Francis Martin. She was a devoted christian and for a number of years a consistent member of the Ev. Lutheran church and an active worker in the Sunnyside Sunday school until she was so disabled that she could no longer attend. The deceased was aged 48 years 1 month and 9 days. She was an invalid for 41 long years. The remains were interred in the Red House cemetery on the 6th inst., at 11 a. m., Rev. Keller, of Carmel, conducting the obsequies.

In the demise of Miss Martin the family loss is irreparable. She was a kind sister and an affectionate daughter. The family have the sympathy of the entire community during the somber days of affliction.

WHITE.—On yesterday morning about ten o'clock, at his home two miles south of Oakland, Mr. Frank C. White, aged forty-eight years. The deceased leaves a wife and several small children. The funeral will occur to-morrow morning at 10:30 o'clock from St. Mark's Ev. Lutheran church and will be in charge of the members of Garrett Lodge No. 113, Knights of Pythias, of which organization the deceased was an honored and beloved member. Interment in Odd Fellows' cemetery.

The Band Benefit.

Owing to unavoidable circumstances part of the entertainment for the benefit of the Oakland Cornet Band has been disposed of and in consequence only one entertainment will be given—that by the ladies to-morrow night.

The following is the program and has been handed us with the request to publish: Overture; choruses; the three-act comedy drama, "Young Amazon;" duet; recitation; the one-act comedy, "Lord Dunreedy;" solo; three-act comedy, "Bolts and Bars;" tableau.

Flag Presentation at Accident.

On last Thursday, the 23d inst., the Accident Council of the Jr. O. U. A. M., assisted by Victor Council of Selbyport and others, will present a bible and flag to the public school of Accident.

An extensive program has been arranged for the occasion, the following being rather condensed on account of the crowded condition of our columns:

The members of the order will meet and form at the Junior hall at 12 o'clock noon and march to the school building in a body; singing, "My Country, 'Tis of Thee," by the school children; prayer; presentation of the bible by R. H. Findlay, M. D.; speech of acceptance by Mr. William Hinebaugh; raising of the flag and singing "Columbia;" dismissal.

The Bond Question.

To the Editor of The Republican.

I noticed in last week's issue of the Democrat that some of our people are laboring under a mistake, as no one to my knowledge is asking for the passage of a bill authorizing the Mayor and Council to issue bonds for water works; but we are asking the General Assembly of Maryland to pass a bill to allow our voters to say by their ballots whether such bonds shall be issued. We think this the true American way to build up a town, county or state.

I am, always was and always will be opposed to legislation that takes away the rights belonging to the people.

The voters of Oakland have said by their ballots that the Mayor and Council shall issue bonds and improve the town, and if our friends on the other side think that the voters have changed their minds and do not want the bonds issued why not re-submit the question to the people and not seek to turn down the majority. I protest against a minority rule and believe that our rights are secured by the majority of the voters of the town shall rule.

Death of Mr. Daniel Chisholm.

On last Sunday word was received in Oakland stating that Mr. Daniel Chisholm had died in Port Orange, Fla., the Saturday previous. Mr. Chisholm had suffered a long time with chronic stomach trouble, but the immediate cause of his death is supposed to have been hemorrhage. In company with his wife and brother Archibald he went to Florida the last of December for the benefit of his health and to look after his orange groves which are just now producing their fruit.

Mr. Chisholm was forty-eight years of age and leaves a widow but no children. He married a daughter of Mr. Jacob Brown, of Cumberland, and was widely known and greatly respected in both Allegany and Garrett counties. His remains will be interred temporarily on Spruce Creek, the seat of his orange property in Florida.

Photographs.

We have opened the photograph gallery, 3d Street, near Lutheran church, and give the people of Oakland and vicinity an opportunity of getting a finer class of work than they have ever had before. Our pictures are guaranteed to be satisfactory. Give us a call. Loar & Co.

A. B. WILT, Operator.

Rogers' Specific Liniment.

A radical cure for cholera. Sold by A. G. Sargass, Oakland, C. F. White, Hattons; The Co-Operative store, J. O. DeBerry, Corinth; E. A. Weimer, McHenry; Smith & Callis, Johnstown; J. E. Gnagney, Accident; Jonas Frazier, Young Store Co., R. Liston, Selbyport; A. Wass & Son, Mineral Springs; L. E. Friend, Friendsville; P. T. Garthright, Mountain Lake Park and at all other general stores.

Valuable Advice.

Acute lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardean Cottage, opposite the bank, Oakland, Md. 41-11.

For Malaria, Liver Trouble, Prindigence, use BROWN'S IRON BITTERS

Rigous Tablets relieve headache.

Mountain Lake Park.

Mrs. M. E. Howe was summoned to Morgantown to attend the funeral of her sister.

Major Alderson is visiting his family. He spent the Sabbath in our midst.

W. J. Johnson has the contract to build a six room house for Mrs. Davis, of Pennsylvania.

Mrs. R. C. Burton, of Ohio, has rented Fern cottage for the coming summer.

Rev. Lee and family, who go to India next fall, will spend the summer at the Park.

Dr. Jones, of Parkersburg, W. Va., has rented Mrs. Davis' cottage now under contract.

Hot rolls, pies and fresh bread will be delivered daily by the Park bakery next summer. Also hot coffee and a sandwich at the same place.

Supt. Rudisill made a business trip to Keyser Tuesday.

Merchant Garthright has a new clerk—Mr. Feathers. He seems to be a pleasant gentleman.

Mrs. C. S. May has moved to Zanesville, O., where her husband is in business, and we learn is doing well.

Messrs. Rudisill & Johnson gave an illustrated lecture at Burley's building at the depot Friday night. The house was crowded.

Alum Howell has torn down the small building south of Columbian Hotel. He will erect on the site a two-story building 30x40. The first floor will be used as a dining hall and the second for sleeping rooms. The Columbian is a success.

The weather the past week took in all the seasons, rain, sunshine, snow and a small blizzard.

Harry May has the contract to build Frank Arnold's cottage, which will be just outside the Park limits, and will face E street. A good location.

A sister of Mrs. Rathbun, of New York, was here Tuesday.

Swallow Falls.

As there has been nothing in place, I think a few notes will be of interest to some of the readers of your paper.

Lincoln Sines has moved on the farm that he purchased from Wm. Browning. Glad to have him come. There will be a spelling match at this place on Friday evening, February 23. All are invited to come.

Quite a number from this place attended a spelling match at Bray last Friday night. They report having had a good time.

The Rev. Taylor Sines, of this place, departed for Florida on Jan. 22, to spend some time with friends.

Mr. and Mrs. Thomas Haigh, of near Cranessville, were the guests of Wm. Browning last Sunday.

Miss Jennie Browning, who is teaching the Muddy Creek school, was home last Sunday. Miss Jennie is making a success of her school.

Our school is progressing nicely under the management of our efficient teacher, Miss Ettie Frantz.

The Misses Gertrude Browning and Ettie Frantz attended a spelling match at the latter's home at Sang Run. They must have had quite an enjoyable time owing to the smile on their faces when they returned.

Mr. and Mrs. Will Dent, who are spending the winter with her parents, Mr. and Mrs. Thomas Colquhoun in Oakland, spent a few days with Wm. Browning and family recently.

Aaron Sines and wife, of Deer Park, are visiting friends and relatives here and at Pine Grove.

HYACINTH.

Deer Park.

We are not snowed under yet, but from the way the snow is coming at present we may be very shortly.

Joseph Marville is the proudest man here. He is now entitled to the respect of a father—it's a big boy.

Mrs. Will Muller is visiting her father and mother at Broad Glade.

Mr. Calvin Savage will move to Mountain Lake Park shortly.

We don't know who drove the best rig in Altamont during the last snow, but we do know that Mrs. S. P. Specht drove the finest rig here and was the best driven.

When the people of Garrett sent Hon. A. F. George to represent them at Annapolis, they sent the right man to the right place. He is looking well after the interest of our county. He has not missed a vote nor a roll call yet. Very few other members can say this.

We are requested to say that Rev.

N. Hart will preach here next Sunday at 11 o'clock a. m., and at the Chadderton school house at 2 o'clock p. m.

Mr. Ramsey Browning was at W. H. Chadderton's the other day taking the plans of Mr. Chadderton's barn. Mr. Browning is preparing to build a new house and barn. He says without a doubt Mr. Chadderton's barn is the best one in the county. There are feed sheds on each side of the threshing floor, which takes the feed to each manger. This saves so much handling of feed. The barn has a steel roof. Mr. Chadderton made the plan for it; Mr. James Baldwin, of Swanton, did the mason work, and Hon. A. F. George and his men built the barn.

There has been an increase in the family at Charley George's. It's a fine big boy.

Rev. Butts preached a beautiful sermon here last Sunday night. In two weeks from last Sunday he will preach his farewell sermon until after conference. Rev. Butts is a good man and highly respected here. We hope there will be a strong effort made to keep him on this work.

Mrs. Wilson and her children are on the sick list.

Miss Bessie Hoye was unable to be at her school room on Monday. Young Mr. Drooge took charge of her school and makes a manly teacher.

STRANGER.

Accident.

Roads very muddy.

The enterprise skunk hunters have met with considerable success. On last Thursday thirteen of the "varmints" were captured by the Hoffman brothers of this city, besides many others by different persons.

The members of the Missouri Lutheran congregation are preparing to erect a new parsonage for their pastor.

Mr. Chas. C. Speicher will erect a new dwelling house in the near future.

The Accident Union cannot have.

Mr. Nicholas Platter was seen on our streets last Sunday.

Mr. A. S. Craig, of Uniontown, Pa., was in town last week.

Mr. Savage, the mail carrier from Accident to Friendsville, is a very accommodating gentleman.

The farmers of this vicinity did a great deal of hauling during the few days the snow lasted.

Mr. William George passed through this city on last Saturday.

Mr. Louis Miller, of Elk Lick, Pa., was also in the city Saturday.

It is rumored that Mr. Edward Zinkau, of this place, is going west in the spring. We are sorry that Ed. intends leaving us.

Mr. Harry Schlossnagle expects to go to Illinois in a few weeks to work on a farm for Mr. John Fike.

Mr. Jacob Shartzler's horse ran away on last Saturday, but no serious damage was done.

Mr. William Wass, of Mineral Spring, was in Accident last week.

Our public school here is progressing very nicely under the management of Misses Virgie Hinebaugh and Ella Turney.

The people of this place have organized a Young People's Society of Christian Endeavor. We hope good may come out of the organization and that success may crown its efforts.

Our Sabbath school is progressing nicely under the management of Daniel Hinebaugh, our worthy superintendent. I hope that he may continue in his present position. He deserves a great reward for the interest he manifests.

There has been two deaths in this vicinity lately—Mrs. Abraham Turney and Mrs. Moses Lee. They both suffered a long time but now we trust they are both at rest with the angels in heaven.

Mr. David Bittinger recently sold a fine colt to Judge Kamp.

Mr. Edward Margroff is making preparations to build a new barn.

Mr. Alexander Haeudling will also erect a barn.

Mr. Harvey Speicher has purchased a fine colt from Mr. Arthur DeWitt.

Mr. Leonard Shartzler, who broke his arm recently, is improving.

NICK.

Considerable wind prevailed in Oakland on last Saturday and did some damage. Greeley Hyde's big clock was blown from the pole in front of his jewelry store and the front was blown out of Mr. Andrew Shartzler's salt house on Liberty street. Some trees in different parts of the town were uprooted.

THE REPUBLICAN.

VOLUME 17.

NUMBER 49

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Take your furs to Sincell Bros. They pay big prices.

A fine crayon portrait free for thirty days. Loar & Co.

"Babies a success" at photo gallery. See ad. Loar & Co.

Take your furs to Sincell Bros. They pay big prices. 49 1

Bring the babies and children to photo gallery. See ad. Loar & Co.

Mr. Frank Jameson, of Piedmont, was here Sunday visiting relatives.

Senator Wm. G. Worley, of Kingwood, was in the city Monday evening.

Mr. J. C. Shaw, of Grantsville, was in the city Tuesday and Wednesday.

If in need of bolts go to J. M. Davis & Son's. They have 10,000 in stock.

Mr. Joseph E. Harned was in Cumberland Sunday last on a visit to friends.

Mr. Edward P. Anderson spent last Sunday in Newburg, W. Va., visiting his parents.

Five hundred pairs of scissors and razors to select from at J. M. Davis & Son's.

Messrs. James Stark and Jonas Hetrick, of Bittering, were in the city Tuesday.

Mr. John A. Wilt, of Westernport, was here Monday and called to see THE REPUBLICAN.

For thirty days we will give a fine life-size crayon portrait with each dozen cabinets. Loar & Co.

Those desiring fine photographs should call at once for we will remain here only a few weeks. Loar & Co.

Mr. Daniel E. Offutt returned from a business trip to Baltimore and other eastern cities Monday evening.

Cent at from 75 cents to \$1.12 per ton, cash or trade at Deal's mine three miles north of Oakland on the Yough. 43 86

Dr. D. A. Cross, of Piedmont, spent Sunday in Oakland, the guest of Mr. and Mrs. King Delawder on Second street.

Mr. Wilfred S. Dunlap, who recently removed from Oakland to Wilmington, N. C., was in the city two or three days this week on business.

Miss Maggie Porter, who has been a sufferer for many years with rheumatism, is lying dangerously ill at her home in Oakland and her recovery is doubtful.

The Rev. H. P. F. King preached two very excellent sermons to large and attentive congregations in St. Mark's Lutheran church on Sunday last.

Mr. James W. Leathers, who has been confined to his bed for a number of weeks suffering from the effects of a wound received during the war, was able to be out Sunday.

Mr. Edward M. Spedden went to Baltimore Monday to attend the annual session of the Grand Lodge of Maryland, Knights of Pythias, to which body he was elected by Garrett Lodge, No. 113, as their representative.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-1yr

You can get your garden seeds at Henry E. Felty's grocery store. These seeds will be fresh and a great deal cheaper than sending off for them. A new variety of seed potatoes also on hand. 45 171

Rev. Henry Carrington Alexander will preach in the Garrett Memorial church, Oakland, on next Sabbath at 11 o'clock a. m. and 7.30 o'clock p. m. The subject of the discourse to be delivered Sunday evening will be "Pharaoh."

All schools that have not contributed and intend to do so, Prof. M. A. Newell Memorial Fund will place so that they can send in the amount for Garrett county. Jas. D. Hamill, President Board School Com's

Our stock of plows are complete. All sizes and prices J. M. Davis and Son.

WANTED TO RENT.—In the central portion of Oakland one or two rooms suitable for millinery store. Miss Mary Cunningham, Lonaconing, Md. 49 31*

Mr. James O. Cleveland returned to Oakland from Frostburg Sunday after a stay of ten days in that city on business. He brought with him a fine bay horse which he purchased there for his son Will.

It is rumored that train No. 3 on the Baltimore and Ohio will arrive in this city two hours earlier after the first of next month. It is also said that the time of express train No. 4 eastbound will also be changed.

Prof. Samuel G. Simmons, of Valley Head, not far from Elkins, W. Va., had a thrilling experience with a panther one day last week. He was walking through the woods near his home when he was attacked from the rear by a very large panther. The animal sprang at him and dealt him a heavy blow with one of its paws, which almost knocked him down. Prof. Simmons was entirely unarmed, and being unable to fight the savage beast without a weapon, at once took flight. He dodged in and out among the trees for awhile until the panther gave up the chase, and he escaped unhurt but very much frightened.

Rev. Wm. L. Leisher preached to the St. Paul's Lutheran congregation Sunday morning last and at the Trinity Lutheran church in the evening. Rev. Leisher will remain in Akron until next Sunday when he will preach again for the mission church. He may be extended a call by the latter congregation.—Akron (O.) Daily Democrat.

The members of the Junior Order at Accident, assisted by members of Victor Council, of Selbyport, will present a bible to the school at Accident and raise a flag over the building on the 22d inst. Quite a crowd of Juniors from different sections of the county is expected to be present at the presentation and participate in the exercises.

Mr. James Fredlock, of Westernport, was in the city Sunday last on his way home from Terra Alta at which place he recovered his team which had been hired on Friday by a man representing himself to be a traveler for a western horse but who it is alleged tried to steal the horses. The team was driven from here to Piedmont on Sunday by John Sweeney.

Mary, daughter of J. E. Gnagey, of this place, slipped and fell on an icy sidewalk last Friday and fractured a bone in one of her lower limbs. The fracture is doubtless painful and a great hindrance to the unfortunate sufferer but it is not likely that serious consequences will come from it, young and vigorous persons being generally able to fully recover from such injuries.—Grantsville corr. Meyersdale Commercial.

Work on the Baltimore and Ohio improvement at Harper's Ferry is getting near completion now. Workmen are engaged on the last span of the bridge and the track is being laid on the new embankment along the bluffs. It is said that the trains will run over the new line in about a month. The site of John Brown's fort has been completely buried by the roadbed. Some Harper's Ferry people think that if there is another flood in the Shenandoah river the change in the road will cause serious damages to the lower part of the town.

Jacob Stullenger, who lives near Piedmont, W. Va., lost a good many chickens last November, owing to a big owl's fondness for poultry. He set a steel fox trap in the top of a cherry tree, fastening it with a wire, to catch the owl. One night the trap disappeared, and after that the chickens were not molested. Stullenger supposed the owl would starve to death with the trap on his leg, but he was mistaken, for on the 9th of January the owl was caught again, twenty miles from Piedmont this time by Ebenezer Kitzmiller. Ebenezer had been annoyed by an owl since Christmas, and set a trap for the bird near his chicken house. The owl got caught and found two traps too much to carry away. It had one on each leg.—Uniontown Standard.

AN AWFUL HOLOCAUST.

The Residence of Samuel Wotring Burns and with it Two of His Children.

The residence of Mr. Samuel W. Wotring, residing about a mile from Anrora, W. Va., near the Garrett county line, was burned to the ground at three o'clock Monday morning, together with all its contents, but the loss of the house is as nothing compared with the burning of the unfortunate man's two children, both boys, aged seven and twelve years.

From what can be learned it seems that the conflagration was caused by a defective flue, and before the inmates of the house were aroused the flames had gained such headway that Mr. and Mrs. Wotring escaped with only their night clothes. They were sleeping on the first floor and their children were in an upper room to which a stairway led but which burned before they could make their escape. The father raised a ladder to the window and called his children to climb down. The oldest boy climbed to the ladder and was descending when he became confused and jumped back into the flames. The mother was almost frantic and Mr. Wotring could render no aid to his children on that account as it took all his strength to restrain her from rushing up the ladder and meeting the sad fate of her boys. The charred remains of one of the children was found but the other was entirely consumed.

There was no insurance on the house and the loss falls very heavily upon Mr. Wotring. The family in their loss and great affliction have the sympathy of the entire community.

Notice.

All taxes remaining unpaid by the 15th of February, 1894, will be placed in the hands of the Sheriff for collection.

46-td.

S. LAWTON, Treas.

Married.

Tuesday evening, Feb. 6, 1894, at St. Michael's church, by Rev. S. J. Clarke, Mr. Benjamin F. Myers, of Moscow, and Miss Lucy Garlitz, of Garrett county, Md.—Frostburg Journal.

Eyes Examined Free.

Sam'l S. Little, the graduate optician of Cumberland, will visit Oakland, March 2, at Dr. H. W. McComas' office. Call and consult him about your eyes, as properly adjusted glasses will relieve many a headache. 49 21

Died.

MARTIN.—On Feb. 4th, at her residence at Sunnyside, Miss Sarah E., daughter of Francis Martin. She was a devoted christian and for a number of years a consistent member of the Ev. Lutheran church and an active worker in the Sunnyside Sunday school until she was so disabled that she could no longer attend. The deceased was aged 48 years 1 month and 9 days. She was an invalid for 41 long years. The remains were interred in the Red House cemetery on the 6th inst., at 11 a. m., Rev. Keller, of Carmel, conducting the obsequies. In the demise of Miss Martin the family loss is irreparable. She was a kind sister and an affectionate daughter. The family have the sympathy of the entire community during the somber days of affliction. M.

WHITE.—On yesterday morning about ten o'clock, at his home two miles south of Oakland, Mr. Frank C. White, aged forty-eight years. The deceased leaves a wife and several small children. The funeral will occur to-morrow morning at 10.30 o'clock from St. Mark's Ev. Lutheran church and will be in charge of the members of Garrett Lodge No. 113, Knights of Pythias, of which organization the deceased was an honored and beloved member. Interment in Odd Fellows' cemetery.

The Band Benefit.

Owing to unavoidable circumstances part of the entertainment for the benefit of the Oakland Cornet Band has been disposed of and in consequence only one entertainment will be given—that by the ladies to-morrow night.

The following is the program and has been handed us with the request to publish: Overture; chorus; the three-act comedy drama, "Young Amazon;" duet; recitation; the one-act comedy, "Lord Dunsinno;" solo; three-act comedy, "Bolts and Bars;" tableau.

Fire, Explosion at Accident.

On Monday, Thursday, the 22d inst., the Accident Council of the Jr. O. U. A. M., assisted by Victor Council of Selbyport and others, will present a bible and flag to the public school at Accident.

An extensive program has been arranged for the occasion, the following being rather condensed on account of the crowded condition of our columns:

The members of the order will meet and form at the Junior hall at 12 o'clock noon and march to the school building in a body; singing, "My Country, 'Tis of Thee," by the school children; prayer; music by the Victor Council of the flag by Mr. John Matthews; speech of acceptance by Mr. Edward H. Sincell; music by band; presentation of the bible by R. H. Findlay, M. D.; speech of acceptance by Mr. William Hinebaugh; raising of the flag and singing "Columbia;" dismissal.

The Bond Question.

To the Editor of The Republican.

I noticed in last week's issue of the *Republican* that some of our people are laboring under a mistake, as no one to my knowledge is asking for the passage of a bill authorizing the Mayor and Council to issue bonds for water works; but we are asking the General Assembly of Maryland to pass a bill to allow our voters to say by their ballots whether such bonds shall be issued. We think this the true American way to build up a town, county or state.

I am, always was and always will be opposed to legislation that takes away the rights belonging to the people.

The voters of Oakland have said by their ballots the Mayor and Council shall issue bonds and improve the town, and if our friends on the other side think that the voters have changed their minds and do not want the bonds issued why not re-submit the question to the people and not seek to turn down the majority. I protest against a minority rule and believe that our rights are secured by the majority of the voters of the town shall rule. A. S.

Death of Mr. Daniel Chisholm.

On last Sunday word was received in Oakland stating that Mr. Daniel Chisholm had died in Port Orange, Fla., the Saturday previous. Mr. Chisholm had suffered a long time with chronic stomach trouble, but the immediate cause of his death is supposed to have been hemorrhage. In company with his wife and brother Archibald he went to Florida the last of December for the benefit of his health and to look after his orange groves which are just now producing their fruit.

Mr. Chisholm was forty-eight years of age and leaves a widow but no children. He married a daughter of Mr. Jacob Brown, of Cumberland, and was widely known and greatly respected in both Allegany and Garrett counties. His remains will be interred temporarily on Spruce Creek, the seat of his orange property in Florida.

The members of the Missouri Lutheran congregation are preparing to erect a new parsonage for their pastor.

Mr. Chas. C. Speicher will erect a new dwelling house in the near future.

The Accident Union earned hand out a skunk and got skinned in doing so. Mr. Nicholas Hatter was seen on our streets last Sunday.

Mr. A. S. Craig, of Uniontown, Pa., was in town last week.

Mr. Savage, the mail carrier from Accident to Friendsville, is a very accommodating gentleman.

The farmers of this vicinity did a great deal of hauling during the few days the snow lasted.

Mr. William George passed through this city on last Saturday.

Mr. Louis Miller, of Elk Lick, Pa., was also in the city Saturday.

It is rumored that Mr. Edward Zinkan, of this place, is going west in the spring. We are sorry that Ed. intends leaving us.

Mr. Harry Schlossnagle expects to go to Illinois in a few weeks to work on a farm for Mr. John Pike.

Mr. Jacob Shartzler's horse ran away on last Saturday, but no serious damage was done.

Mr. William Wass, of Mineral Spring, was in Accident last week.

Our public school here is progressing very nicely under the management of Misses Virgie Hinebaugh and Ella Turney.

The people of this place have organized a Young People's Society of Christian Endeavor. We hope good may come out of the organization and that success may crown its efforts.

Our Sabbath school is progressing nicely under the management of Daniel Hinebaugh, our worthy superintendent. I hope that he may continue in his present position. He deserves a great reward for the interest he manifests.

There has been two deaths in this vicinity lately—Mrs. Abraham Turney and Mrs. Moses Lee. They both suffered a long time but now we trust they are both at rest with the angels in heaven.

Mr. David Bittering recently sold a fine colt to Judge Kamp.

Mr. Edward Margroff is making preparations to build a new barn.

Mr. Alexander Haunfling will also erect a barn.

Mr. Harvey Speicher has purchased a fine colt from Mr. Arthur DeWitt.

Mr. Leonard Shartzler, who broke his arm recently, is improving.

NICK. Considerable wind prevailed in Oakland on last Saturday and did some damage. Greeley Hyde's big clock was blown from the pole in front of his jewelry store and the front was blown out of Mr. Andrew Shartzler's salt house on Liberty street. Some trees in different parts of the town were uprooted.

MERCEDES.

The Story of a Brave Little Mexican Girl.

It is midwinter, yet the sun blazes down upon Santa Catalina with June-time warmth, and lush grasses stand tall by every water course.

The soft air scarce stirs the leaves of the stately eucalyptus, no sound breaks the silence save the humming of bright-winged insects darting hither and thither and the murmur of breakers along the shore.

Across the restless expanse of waters the Californian coast line is dimly seen, like a gray cloud upon the horizon, and nearer gleams the white sail of a ship outward bound.

Down where the sand has formed in drifts, high heaped by the action of the tide, a child, stretched prone in the sunshine, is watching the course of a fishing smack that is making for the harbor below. At her feet lies a basket filled with treasures that the incoming tide has brought.

This is one of Mercedes' daily tasks, to roam the beach, gathering up feathery sea mosses and the curious, many-tinted shells, to be carried with Mercedes' catch of fish or load of game snared in the canyons to the distant mainland.

When she is so fortunate as to find rare specimens the tourists at San Pedro are often pleased to give her a "bit" for the pretty souvenirs.

"Keep it, Catalina, and buy a bright ribbon for yourself," the father says when she would tender him her nite.

She is the only daughter among seven lusty lads, but that alone is not the reason they are so gentle with her.

Dowered richly with beauty of the dark Spanish type, eyes soft, velvety, appealing, cheeks the vivid hue of the pomegranate blossom, a form slenderly graceful—the halting step alone betrays her pitiful condition, for she is a cripple.

During the summer months Santa Catalina is a stir with merry campers, but at this season the island is seldom visited, except now and then by a stray tourist, who, intent on viewing the beauties of this picturesque retreat, braves the discomforts of a rough passage in the unwieldy fishing boats.

It was in this manner that—a party of five, including a maid—made the voyage from San Pedro, landing at Avalon, a balet on the eastern coast of the island, the latter part of December.

I had just recovered from a lingering illness, and having received "marching orders" from the good old doctor, joined a gang of surveyors bound for the islands. The crisp, salt air seemed to put new life into me at once, and when during our passage the wind died out of our sails, I took my turn at the oar with the rest of them.

"That was a tough pull," said Boyce, the foreman, as our boat beached on the shingle. "I wouldn't most of 'em."

"There may be a hotel in the place," I hazarded. "Perhaps we can get a bite to stay our stomachs before we begin unloading"—a proposition enthusiastically received. At this moment a little Mexican girl who had been watching our awkward management of the boat with wondering eyes drew near, and shyly proffered the desired information in pretty, broken English.

"The hotel, señor? You have only to walk a very short way, pointing toward the good old doctor's intervening bluff, the steep roof of that building was visible. "Shall I show the señor the path?"

So, falling in her wake, we scrambled up the sloping, pebbly-strewn beach, our arms weighted with fishing tackle and sundry portions of a camping outfit, for we were going to explore the length and breadth of this rocky isle, formerly the possession of a powerful Indian tribe and the rendezvous of smugglers in olden time.

The latter fact I learned in subsequent chats with some of the men, who were versed in island lore, as her father was born and bred in the place, and Mercedes herself had never left it save on rare visits to the mainland.

As the days passed, and we became more familiar to her, the little maid lost much of her shyness and constantly accompanied her brothers, who often went with us on our inland expeditions.

From the first she had shown a decided preference for my society, following me about like a shadow.

I had found it a simple matter to win her childish regard—a handful of shells, picked up during my rambles and added to her store, the gift of a gaily scarf, at which she had gazed longingly as it hung in the window of the single shop the place boasted—these secured ready passport to her favor. I afterward had cause to be thankful that I did these trifling acts of kindness—that I made her my friend.

One morning my wife and nine-year-old daughter, Lillian, arrived unexpectedly via the small steamer Falcon, that made occasional trips from San Pedro to the island.

"What foolish freak brought you to Catalina, my dear?" I asked, as we watched from the hotel veranda the antics of Lily and Mercedes, who were already fast friends.

"Why foolish?" she queried, demurely.

"A woman's answer, truly? To-morrow I am to leave these snug quarters and go into camp a dozen miles away; what then is to become of your ladyship?"

"My ladyship will go likewise," she replied, smiling.

"Remember," I argued, "that the burro is the only means of inland transportation, the trail is dangerous if one is not used to riding, and you will find these cool nights very uncomfortable in camp." But the spirit of adventure was rife. Lily clamored to go, and I finally gave in.

During our conversation Mercedes had remained silent, but I noted the wistful look in her eyes.

"I think Mercedes would like to go with us," said I.

"No doubt it would be a treat for her, poor girl," my wife responded. "Come here, little one," beckoning the child to a seat by her side. "Do you never get lonely here by yourself?"

"Ah, no, señora! I have always this," stretching out her hands with a tender gesture toward the sea. "It had murmured her cradle lullaby, and she knew and loved its varying moods."

"Then there are many people here in summer, and often they speak with me, when they come no more I gather my shells and help mend the nets."

"Have you no playmates?"

"I had a sister once—she died," softly.

"I will be your sister, Mercedes," cried Lily, impulsively.

"So you shall, dear," said I. "And there is Pacheco's homeward-bound with a fine string of fish," and, exclaiming the child's father, I told him our plans respecting Mercedes, to which he gave ready consent.

There was quite a gathering of natives about the hotel in the morning to wish us "Buenos dias" as our cavalier, able islander, who was to act in the capacity of cook and general utility man.

We were to make the trip by easy stages, stopping over night at the Indian mounds, a place I had long contemplated visiting.

Joe assumed that he knew the island and locality well, and confident that a rich harvest would reward the diligent explorer—for stone implements, beads, bits of wampum, and even the skulls and bones of departed warriors had been unearthed by the islanders.

I loaded pack and shovel to our camping outfit.

The trail, following the coast, was ascending and sometimes wound perilously near the edge of the cliff. Looking down a hundred feet or more, one could see the foaming breakers dashing on the rocks below. Everything delighted the children; they laughed and chatted and sang until we caught their merry mood, and a gay party we were, indeed.

The sun was high in the heavens when we arrived at the mounds, so with appetites made keen by the long ride in the brazen morning air, we set about preparing the mid-day meal. Old Joe flapped away to gather firewood; my wife summoned the children, who were calling the golden poppies that grew in profusion along the cliff's edge, to help unpeck the lunch, while I, jug in hand, made for a canyon near by in search of water. I found a trickling stream dripping from the moss-clad boulders, and the jug was soon filled. It might have been fifteen minutes before I left the canyon, as soon as I came in sight of camp I knew that something was amiss. Old Joe ran toward me, shouting and motioning wildly; on the verge of the cliff I saw my wife kneeling, Mercedes beside her, but—where was Lily?

In an instant I realized the worst—Lily had fallen from the cliff. My thought, and I called to my wife to see her, but she said that awful place. Why did she still kneel and gaze down upon the mangled form lying on the cruel rocks?

"Señor," the old Mexican was saying, "she choked her throat—she clung to the ledge. We must have ropes!"

Alive! I grasped a sturdy root and swung myself over the abyss. Far below, upon a narrow, crumbling ledge, Lily lay, her fall arrested by a dense growth of brush.

"Grab the ropes!" I shouted to Joe. These used in lashing the burro's pack in place were all we had. Joe was rapidly knotting them together. "Pray God they may not be too short!" gasped the child's mother.

"Ah!" the Mexican exclaimed, "the rope too old. If the señor go down it break."

"Listen!" cried Mercedes. "The rope will hold me. I will go to her!"

Even as she spoke we slipped the noose under her arms, and, as we grasped the rope, swung off the rock. I would not live those moments again for wealth untold.

Would the rope reach Lily? Would it bear the weight of both?

These were the thoughts that almost stopped my heart-beats, while inch by inch was lowered the brave child, perhaps to her death.

At length the strain on the rope ceased.

"She has reached the ledge," breathed the trembling mother. "She slips the noose from her body and fastens it under Lily's arms. Pull! Pull!"

And we pulled, slowly, steadily, until, lying mother arms reached out and drew the unconscious child from the very brink of death, her tiny hand still clenched about the brilliant-hued poppies that had so nearly proved her destruction.

And now for one more effort! Would the frayed strands part under the heavier weight? In breathless silence the rope was lowered, and we waited the signal to pull up.

I remember how, even at that moment, the beauty of the scene appealed to me.

The golden sunshine flooded sea and land.

Above us bent the cloudless blue of a tropic sky; and I could but wonder if our Father, who made all things so fair, would suffer the sun to shine and the birds to sing if that brave young life was to be sacrificed.

That of which I write occurred many years ago. As I pen these closing lines my eyes fall upon a missive received this morning from an eastern convent.

"Mercedes and I will soon be with you," it reads. "We have passed our examination and graduate in June."

The father and mother have long been dead, the brothers are scattered, and Mercedes fills a daughter's place in our hearts and home.—Home Magazine.

—Among the Hawaiian prisoners last year, 2,303 were Hawaiians, 290 English, 166 American, 590 German, 98 French, 16 Portuguese, 213 Chinese, 1,003 Japanese, 207 South Sea Islanders, 83.

THE OLD PIANO.

Other and Better Days Had Been Seen by Both It and the Performer.

It stood in the show window of a large music store on a much frequented avenue, and as its extreme old age and ugliness were accentuated by a price marked some of the passers-by paused to inspect the valuable ruin.

"Papa, did that ugly little fringed piano like that for people to play on?" asked a happy child of her young father.

"Not in my day, child," answered the father, gently amused.

"Is that the thing my grandmother played when she was young?" asked the grassy youngster of a white-haired man beside him.

"Your grandmother was not born when that thing was made, boy," retorted the grandfather disdainfully.

No one admired the ancient outworn carcase, but her light for its awkwardness, and it stood there alone of its kind, stiff and clumsy, showing through its cracked coat of veneer all the landmarks of time, the pitiful helplessness of age.

Presently a quaint old woman with a basket on her arm hobbled up to the window. In earlier days she had been known as a "character," now she was shunned as a crank. Her dress, if it could be called—was the ragged, tattered, and faded garment of a poor old woman.

Her face, too, was a study. Her eyes were dim, her nose was hooked, and her mouth was a mere slit. She had a certain air of being a person who had seen a great deal of life, and who was not at all afraid of it.

"Where did they find it? And how dare they exhibit it here? When I saw it last 'twas in grandfather's room with the tall clock and the old harp."

It was old, old, old. I used to play for the poor old man when I was home from school—that was before I ran away with handsome Larry."

"Where did they find it? And how dare they exhibit it here? When I saw it last 'twas in grandfather's room with the tall clock and the old harp."

THE AUTHORS' SAFE DEPOSIT.

A Library Where All Writers Find Recognition—Copyrights Increasing.

The copyright records in the congressional library show that this has been the most prolific year in the history of the country in the production of copyrightable matter. Each year shows a slight increase in the number of books and other publications over the year before. This year the increase, since the 1st of January last, has been over three thousand. Each year there are issued by Librarian Spofford between fifty and sixty thousand copies of books and other publications of the government service is one of the most interesting of those in Washington, as indicating the trend of public thought, and when you come to think about it, in the addition of from fifty thousand to sixty thousand publications of holding stories which appear in literature, art and music of this country, there is disclosed a record of a marvelous amount of work. The records of copyrights are most interesting in indicating the development of literature and the change of tastes and modes of thought from year to year.

The popular idea that the holiday seasons produce Christmas and Thanksgiving stories and that springtime starts the fountain of poetry, is not verified in these records. The great deluge of holiday stories which appear at this season were probably copyrighted in the spring or during the early months of August, when the contemplation of the cold winds of winter and the snow-capped hills presented a vision of particular attractiveness to the perspiring and exhausted author.

And as to the poets, it is found that all seasons are theirs. The capacity for poetry of the American men and women is something astonishing, and there is no season, month or week in the year that the application for copyrights does not come tumbling in.

Librarian Spofford says that the international copyright law has operated very well, and that a large number of the very best class of foreign works have been published and copyrighted in this country under its provisions. It has not, however, been nearly as widely availed of as was anticipated.

Authors of wide reputation producing works of merit were quick to avail themselves of the American copyright, but the great average writers who produce most of the foreign literature of the day have apparently found it profitable to have their books reprinted and republished in this country for the sake of the copyright. In this country the privilege of the copyright is more and more widely availed of each year, and has come about that there is scarcely anything produced that is not patented for which a copyright is not sought.

The average American, when he thinks he has discovered a new idea, hastens at once to secure the exclusive right to it, and hundreds of applications are received constantly which have to be rejected on account of their being ridiculous or lacking in originality. Copyright applications are received for copyrights on methods of doing things, and on various other things, and a thousand and one little trifles. The practice of copyrighting newspaper articles has become almost universal, and a few newspapers in the country have their daily editions copyrighted throughout the year.

Since the year there is an immense amount of copyrights secured on photographs, and the increase of copyrighted musical compositions is very large.

In literature fiction far surpasses all other work in the number of copyrights secured. The number of short stories produced is constantly on the increase. The tendency of the short stories produced is largely toward psychological and character study, more adventure appearing less prominently in the production. During the past year or two there has been a marked increase in the number of historical and scientific publications. The increase in historical publications is especially marked. They range from short historical sketches and pamphlets to the longer historical histories. A great number of copyrights are issued for histories of states, counties and towns. In the northern and eastern states every county or town or, in fact, everything that has a history seems to have invited the talents of authors. In the south the attention to these historical writings has been less, but the literary field seems to be spreading now in that direction.

The paths, or really tear-starting part, of the copyright records relates to poetry. There are more books of poems in the library than the most careful and diligent student of American literature can imagine, and the saddest part of it is that by all odds the greatest number of these books are published by the authors themselves. In every other class of literature the copyrighted publications are mostly by large publishing houses, and the writers appear to have more or less the support of the reading public; but the poet, who appears to be the most persistent of all producers, appears to have no such support. He publishes his own bills. He publishes as he discriminates as they may, the copyright law has no favorites, and permits all who produce to claim the right of exclusive publication; and in the congressional library the volumes of the poets stand proudly by the side of the works of genius. Thousands of volumes of "Poems published by the author" stand upon the shelves, and it is a revelation how many men and women, who would not attempt to write in prose, think that their wild fancies in irregular rhyme and stilted meter were worth preserving in print for posterity. In this class is found the very poorest example of literary effort. The number of productions of truly good poetry in this country is, however, increasing with considerable rapidity.—Chicago Inter Ocean.

Little girl—Oh, yes, and it's not only a N. cyclopedia, but it has all the other letters, too.—Good News

WHAT IS A MAN?

Some Women Assume the Attributes of the God and the Brute.

"Men!" exclaimed the spinster, with the uplifted snuff traditionally peculiar to her ilk: "what do you chits know about men?"

"I have been engaged to one for two years," the golden-haired art student remarked with a demure argumentative air.

"As if that didn't stultify any possible knowledge you might otherwise have gained of his character?" said the spinster with another snuff. "Listen, my children, and I will explain. I am, as you can scarcely fail to perceive, unengaged of countenance—no, don't interrupt—angular of figure and plain of face. The typical society man must inevitably give the women, or rather, the hypercritical girls of his sex, a cautiously mistaken idea of his sex; to their eyes a man appears to be a creature absolutely incapable of thinking of his own comfort when there is a woman near him whose slightest caprice he could by any effort or sacrifice gratify, a creature dependent for the very breath of his nostrils upon the smile of some woman—Bait!"

"O, but nobody is in the least imposed upon by mere society manners," spoke up the literary young woman; "they are, as you say, a conventional strain of an entirely transparent one; otherwise all of us women as well as men, would be rightly regarded as hypocrites. Nobody, not even the greenest bud, supposes that a man experiences the surpassing joy his face expresses on being permitted to pick up her handkerchief. Don't you see that if she did the belief would reflect upon her as well as upon him? She must realize that she must be an unutterable ninny, both in reality and in the opinion of the man who must assume this slavish submission and inanity of character in order to please her. An ordinary, quick-witted woman must perceive that all the men she meets have not had their special characteristics washed out by the process which produces society manners, as ink spots are taken out by oxalic acid, and that, however cautious and attentive a man may be, his gallantry is merely like the frescoes on the walls of a room, which have nothing to do with the solidity and soundness of their construction."

"My dear girl," broke in the young matron of the group, "I feel constrained to prevent your steering maraudable ideas which might be palmed off on your editor broadcast in this reckless way! Let me give you a pointer or two from a man's point of view. My husband says that men have their hair stand on end if they knew them, and that most men consider their forced decorum in the presence of ladies a frightful nuisance. Moreover, he declares that women's hands are most unjustly compared by him to the hands of the men known to them only through their social capacities. He usually concludes his diatribes by saying: 'Men are pretty much of a muchness the world over. Take my word for it my dear, I am not the only brute and monster in the universe.'"

"After all," said the golden-haired art student gently, "isn't this assumption of a character, which is, perhaps, not quite fulfilled in reality, the highest compliment a man can pay a woman? You know how the lion in the fable forgot his real nature and crouched submissively before the maiden whom he might have crushed with a tap of his paw; so men in the presence of women leave behind them their spirit of over-reaching selfishness and arrogance, and if they are not exactly what they appear to be it is comforting to reflect that they tacitly acknowledge that they ought to be better than they are, for that is the first step toward improvement. If the influence does nothing more than to cause them to assume a temporary thoughtfulness for others and gentleness of manner it has accomplished something not to be despised."

"My dear," remarked the spinster, with unvoiced softness, "I hope that young man is half good enough for you."

The golden-haired art student blushed and smiled. "I don't think," she said, softly, "that he will ever suffer by comparison with the men I may know from a merely social standpoint."—Philadelphia Press.

An Oddity of Skin-Grafting.

After a series of observations extending over a period of twelve years and experimenting on twenty-three individuals of both sexes and of opposite colors, Prof. Thiersch, of Leipzig (Leipzig), has given the following as the result: If a piece of a negro's skin is grafted on the flesh of a white man or woman, the transplanted piece, as soon as it begins to properly adhere, gradually changes color and texture until it becomes indistinguishable from that of the surrounding tissue. The process of change usually occupying a period of from ninety-two to one hundred and twelve days to make the complete transformation. On the other hand, when the skin of a white person is grafted to the flesh of a negro, the change (which it has already been admitted finally takes place) is not nearly so rapid, usually occupying a period of upwards of a year. As to texture, it can be truly said that the white piece, though it changes, to all appearance, to real negro skin, is never as fine and soft as its hoary surroundings.—St. Louis Republic.

Out of the Swim.

Mr. De Style—Why have you cut Mrs. Highmop from your list of acquaintances?

Mrs. De Style—They have lost their money.

"Who says so?"

"No one, but I've learned that she is giving her daughters a thorough education. That shows that she wants them to be school teachers."—N. Y. Weekly.

The most frequent crime in California is burglary.

Price for insertion for space of ten nonpareil lines, each additional insertion after first 5 cents per square of ten nonpareil lines. Positive no insertion will be made from the above rates.

REMITTANCES:
Remittances made by money order, postal note, registered letter or bank draft will be at 5 cents per square of ten nonpareil lines. Positive no insertion will be made from the above rates.

THURSDAY, FEB. 15, 1894.

A Senatorial Good Friday.

Some evangelist really ought to start a Sunday school for the benefit of Senators of the United States. When one of these distinguished gentlemen can rise in his seat on the day following Ash Wednesday, and move that the Senate adjourn until Monday out of respect to Good Friday, and not one of the 50 or 60 Senators on the floor at the time be able to tell the proposer of the motion that Good Friday was many weeks in the future, the need of instruction in such matters is apparent.

It was Senator Voorhees who perpetrated this blunder. Senator Berry was anxious that a session be held to-day, as he had a report he wished to bring up, but he acquiesced in the motion of Voorhees, out of respect for the church festival.

This instance of senatorial ignorance recalls the story of the two Senators who had a wager about the Lord's prayer. One bet the other that he could not repeat that petition. The other began, "Now I lay me down to sleep," and the man who had challenged his colleague's religious knowledge instantly paid over the money.

Degrading the Bench.

Monday's vote of the Judiciary Committee on the Peckham nomination as a vote could be. Three Democrats and two Republicans were for a favorable report, and three Democrats and two Republicans were for a contrary report, and the nomination was sent back to the Senate without recommendation.

This means, of course, that the fight will be in the Senate. It is hard to find trustworthy indications of what the result will be, for both sides seem confident. It is doubtful if Peckham would be as good a judge as Hornblower, if the reports of his infirmities of temper and prejudice are true, and it is very evident that, if Senator Hill has won on Hornblower only to lose on Peckham, he will get decidedly the worst of the contest. If President Cleveland wins, he will not be much better off, because even his supporters recognize plainly that he has done the country a wrong in making a Supreme Court vacancy a test of personal politics. It is utterly beneath him and his high office, and is a grave wrong upon the highest court of our land. People generally will be very glad when the miserable business is ended.

Patronize Home Industry.

The member of a community who habitually ignores his home merchant, mechanic or tradesman and makes his purchases and spends his money in other towns does not deserve the name of a good citizen and should not be countenanced by those who have the best interests of their own locality at heart. That it pays to trade at home is a well established fact, and no town or city ever prospered whose citizens, enticed by the alluring baits held out by the merchant in the big cities, spend their money with them.

The local merchant and mechanic are interested in the progress and development of the town and country in which they live, and every dollar that they amass is reinvested and remains in the neighborhood. As they prosper their taxes increase and just so much those of others are lightened. They assist in keeping up your schools, churches and other public institutions and charities. But the person who spends his money in some distant city puts it beyond assisting in any local enterprise. The man in the city upon whom you bestow your custom has no further interest in you or your surroundings than the cash he receives from you. It is no concern of his whether you are as devoid of social, church or educational privileges as the inhabitants of Borrioboola-Gha, or whether your streets or highways are well made or an original Indian trail. The surplus money which he has to bestow will go to enrich the exchequer of institutions from which you will never receive any benefit and to add to the wealth of communities in which you have no financial interest.

And, further, there is no good reason for this impolitic and unbusinesslike diversion of trade. The business men in the smaller cities and towns can and do sell goods year in and year out as cheaply as do those of the larger places. The lower expenses, cheaper rent and immunity from the exorbitant municipal taxes which prevail in the great cities enable them to do so and still make a living profit. But the shrewd city merchant, by advertising certain goods at ridiculously low prices, manage to attract gullible persons to their places of business, with the knowledge that they will succeed in selling them other goods at advanced prices to reimburse themselves for the loss on the "leader" and leave themselves a handsome profit.

The home merchant is established here and expects to pursue his business among us indefinitely. The continuance of his trade is dependent upon this fair and uniform treatment of his customers and the quality of his goods. His field is limited, and should he resort to shady methods or foist dishonest wares upon his patrons his reputation would be gone and his trade consequently lost. But the metropolitan merchant has a wide and almost unlimited field. His customers come from all parts of the country, and if he can be so fortunate as to get one "good deal" from each one he does not expect them to return. The ideal community is that in which there is a reciprocity of good feeling among merchants in all branches of trade, mechanics, professional men, workmen and farmers, each availing himself as far as possible of the other's services, buying his goods or employing his labor, as the case may be. The community where this practice prevails is always found to be an exceptionally prosperous one, populated by cheerful, honest, neighborly and enterprising people, and a good place for the home seeker to locate in.

The community where this practice prevails is always found to be an exceptionally prosperous one, populated by cheerful, honest, neighborly and enterprising people, and a good place for the home seeker to locate in.

Catastrophe.
When the Chicago fire occurred a few years ago and many millions of property were destroyed in a few hours, the whole nation mourned, men's hearts were deeply moved, and strong efforts were made by philanthropic persons to repair in some measure the disaster.

If a great earthquake should shake the city of New York and tumble hundreds of its buildings in ruins, annihilating wealth and inflicting misery and distress upon thousands of our people, the occurrence would be regarded as an unmitigated calamity which might induce some men to question the justice and mercy of the agency that controls the forces of nature.

If a foreign nation should send its ships into one of our ports and batter down and burn and destroy the property of the people, every loyal man in the nation would have an eager desire to avenge the injury and the wrong at any cost of blood and treasure.

But within less than twelve months, without a conflagration, without a convulsion of nature, without the savage fury of a foreign foe, this nation has witnessed destruction of its wealth compared with which a hundred Chicago fires would be of trifling importance. It has witnessed the infliction upon its people of suffering so intense

that it has filled men's souls with despair and driven many persons to self destruction. Since March 4, 1893, the productive forces of the country have been in a condition of semi-paralysis. During this period the failure of multitudes of men to obtain their accustomed wages has reduced them to a condition of partial pauperism and forbidden the profitable conduct of commercial exchanges. The business of the great railroads has shrunk in such a manner as to deprive the owners of the earnings which have hitherto come to them. Prices of commodities have declined with the result that values have been extinguished upon a scale heretofore unknown. On every side money loss, compulsory idleness and extermination of wealth have appeared where, within a single year, there was prosperity without example in the history of mankind. It is not an extreme statement that the total losses thus produced far surpass the total cost in money of the four years' war for the salvation of the Union. The volume of American business, as shown by the bank clearances, dwindled by more than ten billion dollars in 1893 as compared with 1892.

Where does the responsibility rest for all this frightful human suffering and destruction of property in a time of profound peace? It rests upon Grover Cleveland, President of the United States, and upon the political party of which he is the oracle and the dictator. The business of the nation has been shaken to its foundations because of the threat of a complete revolution of the conditions upon which it has been conducted with unprecedented success for more than thirty years. That threat was first made by Mr. Cleveland in his message of 1887 declaring for Free Trade. It was because of his achievement that the Democratic party, after shuffling over this question in well founded apprehension of the hatred of Free Trade felt by the American people, boldly declared in the Chicago platform that protection is unconstitutional. Mr. Cleveland formed the Ways and Means Committee of the House. He directed the framing of the Wilson tariff bill. His influence forced it through the House, and at this moment the chief factor in its favor in the Senate is the weight of his authority.

Thus any fair judgement must place upon Mr. Cleveland most of the blame for the misery and disaster which have befallen the country. It was his hand that aimed the blow at the prosperity which filled the land when he came a second time into office. Regarded in this aspect, it is difficult to consider him as anything less than the enemy of his countrymen and of the great interests which have been created by their industry.—N. Y. Press.

House Bill No. 4, 11, 44.

This is the correct number of the Wilson bill for deficiency and largess. It is a bill to reduce the Democratic party, provide a deficiency, continue culmination, leave the constitution uninvited, and for other and all other purposes save and except the production of revenue only.

House bill No. 4, 11, 44 is the work of statesmen by accident only, and statesmen for defeat only. It represents the ripe economic culture of alfalfa-grass states, and coward financiers. It is as fair as injustice and as honest as stealing; and it shows a degree of wisdom that might do credit to a cretinous idiot.

It was aired by Republicanism out of Populism; by fraud out of Buncombe, according to hippopotamusologists. Knock it in the head! Take it to the boneyard! It's no good.

Entertainment.
Sherman Post No. 11. G. A. R. will give an entertainment at Friendsville in Custer's Hall, on Tuesday, Feb. 22. Doors open at 10 a. m., and remain open until a late hour at night. Comrade Ford and Rev. Cox will address us. Prof. Davis, Mr. Whetstone and others will furnish the music. Come, old soldiers; come old and young and enjoy our company—we want to enjoy yours. Free admittance and lunch for old soldiers; others a fee of 5 cents will be charged, except small children. Refreshments furnished at reasonable cost.

AN ACT

To Compel the Attendance of Children Upon the Public Schools.

The following is the bill introduced in the House by Hon. Hugh McMillan upon the subject of compulsory attendance upon the public schools of this State:

Section 1. Be it enacted by the General Assembly of Maryland met, and it is hereby enacted by the authority of the same, that every parent, guardian or other person in this Commonwealth having control or charge of a child or children between the age of eight and fourteen years, shall be required to send such child or children to a school in which the common English branches are taught, during at least sixteen weeks of each year in which schools of their respective districts shall be in session, unless such child or children shall be excused from such attendance by the board of trustees of the school district in which parent, guardian or other person reside, upon the presentation to said board of satisfactory evidence, showing such child or children are prevented from attendance at school or application to study by mental or physical or other urgent reasons; provided, that in case there be no public school in session within two miles of the nearest traveled road of any person within the school district, he or she shall not be liable to the provisions of this Act.

Sec. 2. For every neglect of duty imposed by the first section of this Act, the person offending shall be guilty of a misdemeanor, and shall, upon conviction thereof before a Justice of the Peace or Alderman, forfeit a fine not exceeding two dollars on the first conviction and a fine not exceeding five dollars for each subsequent conviction; provided, upon condition the defendant or defendants may appeal to the Court of Quarter Sessions of the proper county within thirty days upon entering into recognizance with one surety for the amount of fine and costs; provided, however, that before such penalty shall be incurred, the parent, guardian or other person liable therefor shall be notified in writing of such liability, and shall have opportunity to comply with the requirements of this Act, then and thereafter to avoid the imposition of such penalty.

Sec. 3. It shall be the duty of the teacher of every district to make in a substantial book, provided by the State for that purpose, a careful and correct list of all children between the ages of eight and fourteen years within his or her districts, giving the name, age and residence of each, and whether in charge of a parent, guardian or other person, together with such other information as may be deemed necessary, which enumeration shall be returned by said teacher to the County Examiner, whose duty it will be to certify to the School Commissioners of the county a correct list of all children in said district who are subject to the provisions of this Act, and it shall be the duty of said Commissioners to at once proceed in accordance with the Act.

Sec. 4. It shall be the duty of each teacher in his or her school district to report to the School Examiner of said county at the close of each school month or quarter, the names of all children on the list previously furnished to the Examiner who were absent without satisfactory cause for five successive days during the month or quarter for which the report may be made, when, if it shall appear that any parent or guardian or other person having control of any child or children, shall have failed to comply with the provisions of this Act after one notification in writing as provided for in section 2, the Examiner, in the name of the Commissioners, shall proceed against the offending party or parties, in accordance with law, by complaint before any Alderman or Justice of the Peace; provided, however, the aforesaid penalty shall not be imposed if it shall be satisfactorily proven, upon the trial of the case, that the parent or guardian or other person so neglecting was unable by reason of poverty or other satisfactory excuse to comply with the requirements of this Act; provided further, that if sufficient cause be shown for the neglect of the requirements of this Act, the costs of said proceeding shall be paid out of the district funds upon a proper voucher approved by the School Commissioners.

Sec. 5. In order that the provisions of this Act may be promptly, uniformly and effectively enforced, the Governor of the State shall cause the Librarian of the library at Annapolis to furnish all Examiners or Secretaries of School Commissioners with all necessary laws and regulations, and furnish the same to all School Commissioners now or hereafter elected or appointed.

Sec. 6. All laws or parts of laws, inconsistent herewith are hereby repealed.

Sec. 7. And be it enacted, That this Act shall take effect from date of its passage.

COMMITTEE.

More Yelping From the Kennel.

To the Editor of The Republican.

The past few weeks quite a snapping and a snarling has been kept up by the *Democrat* at what I have had to say through the columns of *The Republican*.

I have paid no attention to this except when a villainous personal slander seemed to require it for the reason that it is always straining to kick at nothing.

Whenever the *New York World*, with its foreign editor and its numerous American prejudices subsidized as it doubtless is by foreign manufacturers and importers, surpasses itself in one of its venomous assaults against the business of this country, the small falsetto voice of the *Democrat* may be heard piping: "Me too, me too, me too; them's my sentiments."

Latterly, without effort at argument, it seems to content itself repeated poll parrot like, "it's a lie; it's a lie; it's a lie," as though that were the extent of its vocabulary.

It does not seem to require much intellect to say that, and yet, when the ponderous thing supposed to stand for intellect in the *Democrat* is brought down to a focus that is what you find.

When smarting under the chastigation received week before last for proving traitor to the people from whom it draws support it went kicking to the kennel. There was no mistaking its genus or species. "In menagerie vernacular" the capital "D" at the beginning of its name stands for a very different animal from a "What is it."

P. S. There now! That isn't as dirty, isn't it as insulting, it isn't as vile as some of the *Democrat's* arguments (?), but, as a mild type of slangwhanging it must answer. I can't say that I am particularly "stuck" on it.

Roads of China.

An interesting chapter on the topic of public roads is afforded in the results noted by the Shanghai branch of the Asiatic society of some recent extensive investigations made by its agents as to the condition and maintenance of roads in China. It is not, however, a chapter on good roads. Indeed it is much like the famous chapter on the snakes in Iceland, for there seem to be no roads in China worthy the name. Instead of the farmers being interested in the making and maintenance of good roads, as is the case here, the Chinese farmer interests himself largely in the destruction of such roads as may chance to be made. He does not travel himself and is against any one else doing so, at least over his land. There are no public highways made and maintained by law. Travelers may drive where they please, so far as the owner of the land may please, and there is constant warfare between the two classes, so that all there is of roads through the country is just what the one may suffer or the other want.—New York Sun.

The Trend of Trade.

NEW YORK, Feb. 9.—R. G. Dun & Co.'s weekly review of trade: Improvements in business still appears in many directions, but it seems to be in part balanced by loss in others. The gradual decline which began some time ago and was strengthened a little by the success of the treasury loan has scarcely answered expectations. Reports of resumption of work continue to indicate that the industries are doing more than in December, and yet the record of this actual gain is disappointingly small.

The domestic trade does not materially increase, exchanges indicating a decline compared with last year of 19.5 per cent. elsewhere and 14.9 per cent. at New York.

The actual production of pig iron, February 1, was 99,342 tons weekly against 97,087 tons January 1, and 171,201 a year ago.

Textile manufacturers are gaining a little. Sales of wool were decidedly larger last week, 5,776,040 pounds against 6,955,750 last year, and the markets were all more active, but this week are comparatively quiet. Foreign trade does not improve, domestic exports at last falling below those of corresponding week last year, though for the year thus far the increase is 10.7 per cent. while the imports are 30 per cent. less than last year.

The failures for the week were 385 in the United States against 222 last year and 60 in Canada against 44 last year.

Local Institute.

The following is the program for Teachers' Institute to be held in Oakland on Saturday, the 24th day of February, 1894:

The model teacher, W. A. Moffett; history, A. S. Teets; language, Miss Alice DeBerry; ideal school, J. S. Coney.

Come out, teachers, and let us make this our best meeting. The public is cordially invited.

50-24.

Reprints Taboules relieve nausea.

The Good Old Road.

"Build me a road!" quoth the general, "And build well, that the ones may say On all roads that lead to the city The 'green' is the Applan way."

Invoking the Northman's forest, Destroying the Northman's home, Use the road of great General Apples March the terrible legions of Rome.

Build well, build well, oh, Romans! Building "better than ye know," For over that wonderful conveyance The footsteps of angels shall go.

Build well for your general, Romans, And build well for the northern throng That shall wheel at length the proud city, Avenge the known world's wrongs, Build well for your general, Romans! Bidding better for one greater far, To whose errand the roads of the ages Lead, illum'd by the Christmas star.

And ever the song of the angels Sounds clear through the worldly din, And over the road of the wise men Leads straight to the stable inn.

"Glory to God in the highest!" Sing the angels at Christmas then; "Peace on earth," coming slow through the ages, "Peace on earth and good will to men," —Good Roads.

Ten Days' Trip to Washington.

Everybody expects to visit Washington some time; in fact it is a duty that every one owes to himself. What Rome was to every soldier of the Empire, what Athens was to the Greek, Washington is and should be to every citizen of the United States—his glory, his pride, his inheritance, his estate—it belongs to him. All its magnificence, all its glory, all its fame, its public buildings, its paintings, its statuary, its monuments, its gardens, its libraries, its museums, its streets and its parks, and he ought once in a lifetime to take a look at the property. When do you expect to take a look at it?

The best train service of the B. & O. R. is at your service always, but not reduced rates—they come seldom. The third select excursion to the National Capitol via the B. & O. is announced for March 8th, when reduced rate tickets will be sold from points on its lines between Wheeling, Pittsburg, Parkersburg, Lexington and Hagerstown.

We give below a list of stations in this vicinity showing time of trains and rates of fare.

LEAVE	TIME	TIME	RATE
Washington	6:30 a.m.	4:05 a.m.	5:55 a.m.
Greenbelt	7:00 a.m.	4:35 a.m.	6:25 a.m.
Parkersburg	7:25 a.m.	5:00 a.m.	6:50 a.m.
Lexington	7:50 a.m.	5:25 a.m.	7:15 a.m.
Pittsburg	8:15 a.m.	5:50 a.m.	7:40 a.m.
Wheeling	8:40 a.m.	6:15 a.m.	8:05 a.m.
Cambridge	9:05 a.m.	6:40 a.m.	8:30 a.m.
Washington	10:15 a.m.	7:50 a.m.	9:40 a.m.

Correspondingly low rates from other stations.

Tickets will be good ten days, and will be valid for passage from Washington to Baltimore at any time within the life of the ticket.

For Pullman car accommodations and guide to points of interest in Washington, address nearest B. & O. Agent.

Popeville.

Rev. J. H. Enlow delivered a very interesting sermon to a large audience of very attentive people Sunday.

Mr. Bradford Blocher made a flying trip to New Germany Saturday eve.

Mrs. Mollie Turner was visiting her sister-in-law, Mrs. T. W. Frost, one day last week.

Mr. T. H. Layman is in Oakland at this writing.

Miss Rebecca Ravenscroft, who has been staying with her sister for some time, returned home Sunday.

Mrs. B. F. Michael is on the sick list.

Miss Jennie Turner was visiting friends at Grantsville last week.

Mr. Peter Pope is very engaged hauling lumber to Frostburg.

Mr. Wm. Frost still continues ill.

Mr. Scott Layman was the guest of Miss Minnie Boring Sunday.

Valentine day is here at last and we hope the boys will be kind enough not to forget other people.

We can sympathize with "Jolly Box," of Black Hills, for we learn his best and only girl has gone back on him.

Swanton.

Mr. Theo. Beckman received his new saw mill this morning and has moved it out to the place he will cut and run it this winter.

The Rev. Wm. Butts preached his farewell sermon Sunday.

The U. B. protracted meeting closed with four conversions.

C. T. Sweet is in Washington, D. C., canvassing.

Howard Nethken went home last Saturday evening to see his mother, G. S. Hamill, John Michael and A. D. Naylor, of your city, were in our town last week.

Miss Cora Ashenfelter had to close her school last week on account of being sick, but she is now at her post again.

It would be a splendid idea to have a teacher's institute at Swanton, so they can see our school house.

A Democrat was heard to say that the hard times had been sent by God as a curse on the people for not making better use of the good times they had enjoyed. I guess the next time they will vote a Republican ticket.

GARRETT COUNTY.

An Interesting Review of its History and Resources.

OAKLAND, Md., Feb. 7, 1894.
T. Jay in Cumberland News.

Garrett county was created under the provisions of the act of the Maryland Legislature, passed at the session of eighteen hundred and seventy-two, chapter two hundred and twelve, out of all that portion of Allegany county, "lying south and west of a line beginning at the summit of Big Backbone or Savage Mountain, where that mountain is crossed by Mason's and Dixon's line, and running thence by a straight line to the middle of Savage River where it empties into the Potomac River." Garrett is therefore the youngest of the counties of Maryland.

The territory out of which Garrett county was erected includes the extreme western portion of Allegany county, and is nearly surrounded by the adjoining States of Pennsylvania and West Virginia. It is fifty-four miles from Oakland to Cumberland by the Baltimore and Ohio railroad, and I presume the great distance which the people of this section were compelled to travel in order to attend court and look after other county business induced them to vote for a new county. There is a question however in the minds of some whether the formation of the new county has been of any material advantage to the masses. Some people contend to this day that they would have been more prosperous if they had remained with the mother county. I am not prepared to say this is the correct position on the subject, but I am sure gentlemen who entertain this view whose opinions are entitled to respect.

This isolated section of the State was at that time very sparsely settled and had barely population enough to form the basis for a new county under the provisions of the constitution of Maryland. Altogether the outlook for a prosperous county was not very promising at that time in the eyes of many citizens and there was decided opposition on their part to the new county project. Those who took this view of the matter worked and voted against a division of Allegany. Nevertheless the proposition carried and the new county was formed.

OBSTACLES TO DEVELOPMENT.

One of the first obstacles to the progress of the young county was a dispute which arose among the people over the location of the county seat as a number of places were candidates for the honor. Prominent among them were Oakland, McHenry, Accident, Grantsville and others. Oakland was selected by a plurality, and the county government was organized here. The feeling against Oakland grew stronger after the vote had been taken, and those citizens who wanted the county seat at some other point left no stone unturned to accomplish their purpose. The opinion was entertained by many that the county seat could not be selected except by a majority of all the votes cast. Indeed, the Governor of the State adopted that view, and at the January session of the Legislature held in 1874, Governor Wm. Placquet White in his message called attention to the matter. The fight over the question was then transferred to the State House in Annapolis, and it turned out to be one of the most bitter contests in which the people of this county have ever been engaged. The Senator and one delegate were opposed to Oakland while one delegate was favorable to Oakland. With a majority of the delegation in the General Assembly, backed by the executive, against them, it looked very much like the friends of Oakland were engaged in a hopeless undertaking. In the beginning of the session a bill was introduced definitely fixing the county seat at Oakland. Later this bill passed the House and went through the Senate over the opposition of Garrett's Senator. Those who were opposed to Oakland asked that the question be re-submitted to the people. This request from their standpoint was not unreasonable, but the Legislature refused their petition. The settlement of the question by the Legislature did not allay the feeling which existed upon the subject. Unfortunately the effects of that controversy can be seen and felt to the present day.

For several years, the anti-Oakland party, regardless of politics, succeeded in electing a majority of the county commissioners. These officials having been elected on an anti-Oakland platform, refused to erect public buildings for the use of the county, notwithstanding the fact that a law had been passed providing for the erection of such buildings. This state of affairs continued until the circuit court for Garrett county laid its strong arm upon the county commissioners and by mandamus compelled them to erect public buildings for the use of the county government. With the county buildings completed the feeling which had existed, in a

measure subsided, and it will be well for the people when it has forever disappeared.

The second, and by far the most serious obstacle which has, and still does bar the path of Garrett county in her forward march to prosperity, is the small population within her borders. This is much less than is necessary for the development of her vast resources, taking into consideration the fact that Garrett is the largest county in the State, covering as she does, an area of six hundred and eighty square miles. This large territory has a population of only fourteen thousand two hundred and thirteen or less than an average of twenty-one persons to the square mile.

IMMIGRATION NEEDED.

The population of Garrett county during the ten years from 1880 to 1890, increased from twelve thousand three hundred to fourteen thousand two hundred and thirteen, which is the greatest increase made during that period by any county in the State except Anne Arundel. Baltimore county, which is smaller than Garrett, has a population of about seventy-three thousand. At the present rate of increase, Garrett county would scarcely have so great a population as Baltimore county now has, at the close of the next century. Garrett county, therefore, can not look to the natural increase of her population for her prospective prosperity. It seems to me that it must be apparent to the most casual observer that an increase of population is needed and that the need can only be supplied by immigration. Artisans and skilled labor are not so much needed as farmers and farm laborers. Only about ten per cent. of the territory is cleared and under cultivation. The other, ninety per cent., is covered with virgin forests. What is especially needed therefore are purchasers for these forest lands who will fell the timber and develop the agricultural resources of the county.

POSSIBILITIES IN AGRICULTURE.

There is very little old, worn out or abandoned land in Garrett county. The small per centage of the land which is cleared is being farmed, or used for grazing purposes. The soil is highly productive and the farmer can always reasonably expect a fair return for his labor and outlay. The principal crops are buckwheat, oats, wheat and potatoes.

The following may be considered average crops: Buckwheat, twenty to thirty bushels per acre; oats, thirty-five to sixty bushels; wheat, thirty to forty-two bushels, and potatoes three hundred bushels per acre. These crops are raised usually without the aid of fertilizers. In some sections of the county farmers are using large quantities of lime, which acts like a charm upon the soil. Since our farmers began the application of lime, the production of wheat has been more than doubled. Notably is this the case in the section about Accident, which is the garden spot of the county, viewed from an agricultural standpoint. The cultivated farms are usually small, but a great deal of the timber land is owned in large bodies which will appear by reference to several sales which have been made in late years.

"Yough Manor Tract," containing nine thousand acres, was sold for \$45,000. The "Knobel" tract of about six thousand acres, was sold for \$43,000, and the tract called "Swanton," containing over thirty thousand acres, was sold for \$54,000. All these immense bodies of lands were purchased chiefly for their timber, and can now readily be purchased in small quantities by those desiring farms at very reasonable prices. The proportion of farms under cultivation, for sale, is very small. There is a decided advantage to purchasers in buying timber land. In most cases they can pay for the land and support their families from the sale of timber, whilst they are opening up their farms. When they have the land cleared they can raise better crops without the application of fertilizers than can be raised in many other places by a heavy outlay for manures. Whilst the other resources of the county are immense its future lies in agriculture. If a thrifty class of immigrants can be induced to locate here the day is near at hand when Garrett will be one of the greatest farming counties in the State.

Garrett county farms are chiefly owned by those who cultivate them. There are in fact very few farms which are cultivated by renters. The supply of farm labor is nearly equal to the demand for land already under cultivation. Farm hands can be had during the busy season for seventy-five cents per day with board, while farm laborers by the year can be hired for from one hundred and twenty to one hundred and fifty dollars and board. There are a great many men employed about the numerous saw mills and lumber manufacturing which are found in almost every part of the county. Those who

cut the timber and haul, or float it to the mills generally work by contract at so much per thousand feet, and usually make big wages. Those who work about the mills command about one dollar and twenty-five cents to one dollar and a half per day.

The supply of this class of labor is equal to the demand, and will in all probability so remain until there are more purchasers for timber land. Labor in this county is much more efficient and reliable than it is in some sections of the State. This is due chiefly to the fact that there is no negro labor here. Laboring people here are respectable white men, and they are not compelled by force of circumstances to compete with the colored laborer as they are required to do in some sections.

Immigrants will find our climate much milder and more desirable than that of a large portion of the great northwest, and one entirely free from the great cyclones and blizzards of that section. They will find also cheap lands with a rich soil which produces the finest fruits and vegetables to be found this side of California. Indeed it is doubtful whether our vegetables can be excelled in any part of the world. They will have the advantages too, of good schools, both public and private, and churches of nearly all religious denominations. Abundant employment at remunerative wages for laborers, and excellent home markets for farm and garden products, for those who till the soil. The opportunities for those of limited means to become land owners are not excelled in any part of Maryland, if indeed they are in any other part of the country, not the least inducement to thrifty foreigners is the fact to which reference has been made incidentally, to wit; that they will not be subjected to competition with negro laborers.

The glades, part of our county, is peculiarly adapted to grazing and raising cattle and sheep occupies the attention of a large class of the people. The range for cattle in the unfenced mountains and glades is almost unlimited. There are many men like the western cow-boy, who do nothing for a livelihood except herd cattle in the summer and feed their stock in the winter. The soil produces abundant crops of hay and there is no lack of food for winter use. The cattle and sheep grazed and fed in this section command the highest prices in the eastern markets. Especially is this true of our mountain mutton which is famous in Lexington market, Baltimore and Fulton markets, New York. In fact it has a reputation throughout the length and breadth of the land. Our glade butter is as famous as our mountain mutton. Notwithstanding this fact there is not a creamery nor cheese manufacturing in the county. There should be several of them. There is a fine opening in this line for an enterprising man who understands the business. A great deal of superior glade butter is produced by farmers which finds ready sale at good prices.

Whilst Garrett county has all the facilities and resources necessary as a basis for great agricultural development and prosperity, it is not likely to become at any period a manufacturing centre. The largest class of manufacturing establishments within her borders includes the numerous lumber plants of this section. These are of all sorts, sizes and kinds. From the little saw mill which turns out a few hundred feet of lumber per day to the great establishment which has a capacity of seventy-five thousand feet per day. Vast sums of capital are invested in these, and they furnish employment for an army of men and give support to a host of families. These establishments will continue until the large forests of timber are exhausted.

On the east side of the Big Backbone mountain is the Georges Creek coal basin, a portion of which is in Garrett county. Along the West Virginia Central railroad, and on the Maryland side of the north branch of the Potomac river is another large coal field which is being opened and worked at numerous points. On the "Great Youghiogheny" river is what is known as the "Yough Manor" coal field, which is opened also. In addition to these several fields there are numerous mines which are being worked for private use in the vicinity of Accident and Grantsville. In fact the coal supply of Garrett county is well nigh inexhaustible. There are unlimited supplies of iron ore, fire clay and limestone. In the years to come, when the forests have disappeared and the fertile glades and rich mountain sides yield large crops of farm products, the men who mine and manufacture the minerals, will furnish the farmer with a home market for all he can produce.

Another industry which for many years has been in active operation near Accident is the Miller distillery. It has a capacity of about

one hundred gallons of rye whiskey per day. This establishment is owned and operated by M. Miller who has built up a lucrative business. The product of this distillery has a fine reputation and finds a ready sale.

The maple sugar industry gives employment to a large number of people during a portion of the year and brings in a considerable revenue to many industrious persons. An average annual crop is about two hundred and twenty-five pounds. It is said that if all of the groves were properly cared for and worked to their full capacity, the annual output would be five hundred thousand pounds. The sugar manufactured here is of excellent quality and sells readily for eight cents a pound.

Garrett is much more fortunate than many of her sister counties in the matter of transportation facilities. From Oakland to Philadelphia is about three hundred and fifty miles, to Baltimore two hundred and forty-six miles, to Wheeling one hundred and forty-seven miles, to Cincinnati three hundred and fifty-seven miles. All these points can be reached over the B. & O., without change of cars. This trunk line runs through the county from east to west, a distance of thirty miles. Within that distance there are numerous stations where both freight and passenger trains stop, thus affording the people ample facilities for travel and shipment of produce. The Oakland and State line railroad from Friendsville, in this county, to Confluence, on the Pittsburg division of the B. & O., furnishes an outlet to Pittsburg. The Cumberland and Pittsburgh road runs from Piedmont through the Georges Creek mining region to Cumberland and furnishes transportation for the people in the eastern section of the county. The West Virginia Central road runs along the southern border of the county from the mouth of Savage river to the Fairfax stone, and affords an outlet for Ryan's Glades and all that part of the county lying south of the Baltimore and Ohio road. Our county roads, as a whole, are not as good as we desire them to be, but they will compare favorably with those of other portions of the State. They lead from all parts of the county to the stations on the several railroads, and the numerous towns and villages along their lines furnish markets for a large proportion of the surplus produce raised in the county.

I have several times referred to the markets for our produce as home markets. Very little of our surplus produce has to be shipped to the large cities. The large mining population along Georges Creek with the numerous towns of several thousand population each furnishes a splendid market. The mining towns and lumber mills along the West Virginia Central railroad also consume a large amount of our surplus. The Oakland Coal and Coke works, the Snowy Creek Coal and Coke Company and the Preston Lumber and Coal Company's works on the west take a large quantity of supplies. While Grantsville, Accident, Oakland, Deer Park, Mountain Lake Park and numerous other summer resorts make a demand during the summer season far in excess of the supply. It will be seen at a glance that we have superior advantages in the matter of home markets, and that there is every inducement for the farmer and gardener to invest money in this locality.

Savage River.

Our fine sleighing snow has all disappeared and left us with plenty of mud.

Messrs. Chas. and James Merrill attended the wood chopping at Wesley Broadwater's Saturday last. Mumps are the order of the day, as nearly everybody has them.

J. W. McIntyre attended the show at New Germany Saturday evening last.

Miss Ethie Merrill is visiting friends and relatives at Westernport.

Our mail carrier, T. J. Miller, was at Barton Saturday last on business.

J. A. Merrill visited J. H. Gregg Sunday last.

Hezekiah Knox is working for Warnick Bros.

Lloyd Broadwater took a flying trip to Westernport last week.

Joseph Warnick contemplates visiting his daughter at Latrobe, Pa.

Rev. J. Green will preach at Gregg's school house next Sunday at 10 a. m.

Hiram Broadwater and Henry Duckworth paid P. Stephen a flying visit Sunday last.

Johnson Broadwater is in a critical condition.

T. J. Broadwater has taken the contract of furnishing Albert Wilt with shingles.

Wanick Bros. are doing a thriving business with the shingle mill. B. F. Snyder is busy engaged in hauling logs.

CASTORIA

for Infants and Children.

"Castoria" is well adapted to children that I recommend it as superior to any prescription known to me." H. A. ASCHESS, M. D., 111 So. Oxford St., Brooklyn, N. Y.

Castoria cures Colic, Constipation, Sour Stomach, Diarrhoea, Eructation, Kills Worms, gives sleep, and promotes digestion. Without injurious medication.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTIN, D. D., New York City.

"For several years I have recommended your 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results." EDWIN F. PARKER, M. D., 124th Street and 7th Ave., New York City.

THE CASTORIA COMPANY, 77 MURRAY STREET, NEW YORK CITY.

Poor Printing

Pays

Poor Profits.

We get out a class of printing that is superior to the "general run." Good printing pays, and that is the only kind we furnish our customers and patrons.

The Republican Job Printing Department, Oakland, Maryland.

WINTER

Weather has come at last, and our prices on winter goods are so low that you can buy them at one-half the price that you would pay at any other store in the country.

Best flannels for 23 cents per yard; heavy muslin reduced from 10c. to 6c.; heavy muslin reduced from 9c. to 5c.; heavy hose reduced from 50c. to 30c.; heavy shirts, all wool, reduced from \$1.50 to \$1.; heavy shirts reduced from \$1.25 to 90c.; heavy blankets, all wool, reduced from \$6.50 to \$4.75, from \$5. to \$3.50 and from \$2.50 to \$1.90, overcoats reduced from \$7.50 to \$5.75, and from \$6.50 to \$4.75; comforters reduced from \$2.25 to \$1.50; all wool clothing at a sacrifice; rubber shoes, boots and fells at almost half price; ginghams reduced from 10c. to 7c. and from 8c. to 5c.; four skeins yarn for 25c.; all wool underwear at prices to suit the closest buyer; calicos at 4c. to 7c.; Turkey red table cloth, all linen, from 43c. to 47c. per yard; flour from \$3.25 to \$5. per barrel; 3 cans tomatoes 25c.; 21 lbs. granulated sugar \$1.; 6 cakes best soap 25c.; 21 lbs. rice, \$1.; 13 lbs. pitted cherries, \$1.; 22 lbs. beans, \$1.; 12 lbs. best evaporated peaches, \$1.; 13 lbs. hominy, \$1.; peaches, pears and apricots, 18c. per can; tapioca, 9c. per lb.; gelatine, 15c. per package; Fox's corn starch, 9c. per package; Vanhouten's cocoa, 15c. per package; Baker's chocolate, 19c. per cake.

The above are quotations on a few of our goods, and a call from you will be sufficient to convince you that we mean business.

Respectfully yours,

SINCELL BROS.

The Republican.

OAKLAND, GARRETT CO., MD.

A LOVELESS LIBERTY.

Copyright, 1894, by the Author.

ber 31, 18—, I heard, through depths of darkness, the fascinating note of a clear and musical bell. Whence did the sound proceed? Not from the prison turret, not from the hospital dome, not from the old clock tower, no, methought it must be purely imaginary. Sadly too soon I heard it die away, but it left me deeply meditative, though thankful and cheered. Without really divorcing morning from midnight, it had yet ushered in a new year. So far as it was able, it had rung out the false and rung in the true. It had proclaimed me a woman at last, since twenty-one years previously I had first seen the holy light of heaven. In a few hours I knew that I would be set at liberty to do just as I liked. Justice would say that I had expiated my crime.

At eight o'clock, while the east was rosy with the first blushes of a new and innocent year, my kind warden entered my primitive cell. The chaplain followed, and he, in his quiet way, gave me absolution. After that I sat down to a really excellent breakfast, which the matron brought to me in person.

At nine o'clock I was led forth from Dummerstra prison by the reverend chaplain. His last words to me were: "You have, dear child, borne up throughout your three years' confinement with a true woman's fortitude; but the world that is yet before you may owe you many a grudge, and you may be pressed to cry out: 'Oh, that I had died!' But lose not heart, for God will ever be with you on your journey, though you should see Him not!"

The prison door stood ajar. There stretched the great, great world before me, and no wonder that I was taken aback with surprise at the beauty of it. No wonder I felt like an alien at the gate of heaven. For three long years I had almost forgotten the existence of a world so great and so fair. Surely earth must be a Paradise very little known to those who are allowed to live in luxury there! I thought just then, when I saw the majesty of the mountains, the profound depth of the valleys and the greeny black belts of scented pine woods, that I should like to outlive Methuselah, and gain more friendships than the hairs of my head. But mine is a serious question: How will the world receive me? Not with gladness, I vow, or men, women and children, knowing this to be the hour of my release, would even have come to meet me at the prison gate.

Having no relative in the land of the living, where should my first steps lead me but to Roderick McTavish's, whose son used to love me so well ere I had to submit to the seal of a murderer? I knew the house again; it stood immediately on the outside of the old town, with its whitened, irregular walls, its weathercock over the ancient granary, and its dimpled burn, gowan-sprinkled brae, and patch of dead heather all at the back. I had for three of the longest years of my life been wondering about Duncan; we used to be such great unworldly friends, and he had promised to marry me. I felt that I must hear from his own lips that he could not marry a murderer.

There was a great dog's head knocker on the back door. When I applied it, an old woman, with a mob cap and disheveled hair beneath, answered.

"Can I see Mr. Duncan?" I inquired.

"No, ye cannot," she replied.

"But if he knew I was here I feel sure he would see me directly."

"No, he would not."

"May I have a glass of new milk?"

"The old cow isn't milked."

"May I sit down on that stool for a few minutes?"

"It isn't my own."

"Do you take me for a vagrant, then?" I pleaded.

"I ken ye well. Ye have just left the prison-house. Mind ye Nairnie Cameron."

"In the name of our presbyters, don't taunt me so."

"Ye are willing to forget your sins. Others cannot. I thought ye wad have learned more sense."

"But Mr. Duncan. Is he still in Dummerstra?"

"No. His home is in Heaven now, where the good go. It was heavenward speed to him when the news about ye reached him from the court."

Here, then, on the threshold of my lover's old home, I learned that I had been the cause of his early death. Tear-

ing my hair, and not knowing whither to direct my feet, I lamented that I had entered upon the track of loveless liberty.

The sound of the pipes came skirling up the hillside. The pibroch and the highland reel captivated me, but when "Auld Lang Syne" came I shed tears rapidly. The music died away as twelve o'clock and dinner time neared, so I mounted higher and higher, without the exultant banner, to perform my mid-day devotion before some snowy altar. A friendly robin accompanied me on my walk, piping a kind of childish welcome. But in my native place, as I saw by just passing through it, how unwelcome I was! Boys pointed me out, girls whispered, old men snarled, the local patriarch and pedagogue both moralized. Miss Mounsell would not so much as lift up her eyes; everybody spurned me. I was now making up my mind to go right away as soon as possible. Tiding off my thin, threadbare gloves, I tore up some roots from beneath the snow, and elsewhere I found some frozen hips and haws belonging to last autumn, which, however, were still edible. I ate my vegetables with a relish, and they helped to keep me alive and warm.

Suddenly I heard snarl little foot-steps coming up behind me over the crisp snow. On turning round I saw a pretty maiden—an Eva, or a little Miss Sunshine—who could have seen no more than six winters. With a merry voice she thus accosted me:

"Are you going up Ben Mochiel, lady?"

"No, dear, not to-day. I am too tired already, and I am not a quarter of the way up Ben Mochiel yet."

"You look very tired * * * and not so well, I think. Please may I know your name?"

"It is Robina Cameron," I answered.

"O, how strange! I heard my papa say you were coming out of prison to-day, and he thinks you are the wickedest lady anywhere; but I don't. My name is Gracie Deed-Diconson, and I play 'The Blue Bells of Scotland' on the piano, but I was born in England, and so was papa."

"Perhaps he would be displeased if he were to find you with me."

"Very likely he would. But I wish you would tell me before I go why they sent you to prison."

"I will tell you a true tale, Gracie. Three years since to-day, when only just eighteen years old, I was put into a dark and lonely prison. Three months before that a Dummerstra lady had suddenly and mysteriously died. She was my own stepister, Nairnie Cameron, and she had been seen in my company among the roystering of Coddie laigh. We had never been great friends since she fell in love with my lover Duncan McTavish, who did not really admire her at all. That same night she was found dead in Coddie laigh, and traces of poison were on the grass close beside her head. There was overwhelming evidence of my having poisoned my stepister in a spasm of jealousy, or a fit of temporary insanity. I had scarcely presence of mind to stand up before judge and jury and tell them I was innocent. They called me guilty of crime, and committed me to prison for three years. If I had not been a young girl perhaps they might have had me hanged. I only came out of prison to-day."

"Poor Miss Cameron, I don't think you ought to have been where naughty men are put."

"Why, Gracie?"

"Because I love your face, and because you would not climb up here nearer to heaven if you had found wrong, and—because I found this blue ribbon."

It was pleasant to kiss somebody again, and have a living companion by my side with the sweetest little lips. But the sight of the blue ribbon sent a chill through the marrow of my bones. I knew the exact shade and size of it—it had been worn by my stepister, the wretched Nairnie, at the very time she professed to be engaging Duncan's attentions. I looked at it intently. It was not only faded, but somebody had taken the vital trouble to perforate a string capital letters on it. These were as follows:

D D E E D D D D D D D D

In all former letters, mostly D's and E's, had they been perforated significantly in that ribbon? or were they significant (if read right) of some curse on the late owner of it? or did they give some cryptographic clue to Nairnie Cameron's real murderer?

"Guess that that means!" exclaimed Gracie, half with fear and half with heroic pride.

I tried to please her by guessing, but I only made several ridiculous mistakes. For ten minutes the letters floated in a jumbled little mass before my eyes. At last I felt sure they had no meaning at all. Then I felt that they told a story about somebody being dead, there were so many D's and E's; though not a single A. Then I felt sure that this was a cryptograph that would perhaps take an expert weeks to puzzle out—and yet had not Gracie found the key to it? How I wished that I could have seen into her mind for the space of half a minute!

"Gracie, darling," I cried, in despair, "won't you save me this trouble? I never was very good at deciphering puzzles and problems. Besides, it is so cold standing here, and I am not very strong at present. These letters may give a clue to the murderer. I should like to be popularly freed from the stigma of crime, and then I think I should stand a chance of being taken back into Miss Mounsell's millinery house."

"O, Miss Cameron, I daren't tell you anything about it. I'd like you to know, I really would; but—"

"Then just tell me where you found the ribbon, Gracie."

"In my—my father's Bible," she faltered.

III.

I met Roderick McTavish himself in the afternoon. His thumbs were in his waistcoat armbolles, and he was looking as hale, hearty and paternal as ever.

"Lassie," cried he, "God and I are pleased to see thee looking alive, what it all. Now I have been looking out for thee. Come to my house this minute and be my housekeeper. That woman dealt badly with thee, but now she has gone away, and I won't take her back again!"

"Mr. McTavish, I never knew in my life that Duncan was no more of this world."

"Eh, the news killed my brawny ladie. And poor lassie, I tell 'em all thy finger ne'er touched poison. They put thee in the prison house, and I revisited thee; but now I ken my kindness may creep out, though some will say 'na gang. Come, I tell thee mair about it."

So I accompanied him to his house, on the way there putting the perforated blue ribbon into his bag. He stared at it blankly for a moment, then I saw his lips part, and distinctly heard him say:

"Deed did the deed, Deed did the deed!"

"What do you mean, Mr. McTavish?" I cried in alarm.

"Deed did the deed. 'Tis plain enough, these letters tell. My eye fell on the key in a minute. There are fourteen letters in 'Deed did the deed.' You take the first one, then the last; the third, then the last but two. And so you go on moving the letters into order, until you stop in the middle of 'em. When that's done, you shall see in the order they're picked through this ribbon. It's plain to me that Maister Deed-Diconson poisoned Nairnie Cameron. My lassie is saved."

My eyes swam, my heart went pit-pat, the steam hammers began to strike inside my head, as they last did when I heard my sentence in the criminal dock. Here was a clue to the mystery, and I had been consulted in the murderer's Bible, and then Gracie had

found, stolen it, deciphered its meaning (perhaps from a mere verbal slip on her father's part), passed it to me, and I had passed it to Duncan's father.

As we walked through the town we saw a lady being carried along on a stretcher.

"Here is the man who blurted thy fair name, lassie! Rest sure, he'll find him at last, and he hath no mind to escape the coward! See, here is a note for thee."

Yes, a constable was thrusting a note into my hands. I stood tongue-tied, and, glancing from the constable to Mr. McTavish, with trembling fingers I got the envelope open:

"Dear Miss Cameron: I am shooting myself over Nairnie's grave. My child tells me that piece of blue ribbon is in your hands. I do not wish to recover it. You may be able to deliver the letters with a little ingenuity or the truth may flash before your eye at once. How ever that may be I have decided not to live another year in disgrace. I cannot endure my present unquiet state and the slings of my conscience. There is nothing out a premature grave for me. Yes, it was I who poisoned Nairnie Cameron. I did the deed a few minutes after you had left that night in Coddie laigh. I did it in a draft of bravery. My sole reason for taking this step was that she tormented me once too often by saying that Duncan McTavish was a better matrimonial speculation for her than Henry Deed-Diconson, the widower. While she lay dead I went over her. I carried away a piece of blue ribbon she wore. It became a more permanent and valuable keepsake after I had perforated on it the clue of the crime, which I should not have objected to being coming patent to the world after my death. For present safety, however, I inserted it in my little Bible."

"Now I ask your pardon for all the damning evidence that I gave against you three years ago. You have suffered, but you will soon be popularly acquitted by the most scrupulous of those who think a murderer never sufficiently atoned for and you may see your golden crown in the world that is to come. As proof that you to some extent forgive me, will you, before you are of age, execute my affairs on behalf of the child of my predeceased wife? To her, I am Gracie, through you I send the message of farewell."

"HENRY DEED-DICONSON."

After I had recovered from the brunt of this two-faced surprise Roderick said to me:

"My missis is dead, Robina, and thou shalt come to keep my house for me, and thou shalt be Gracie's mother, and I will be her father."

"Dear Mr. McTavish," I said, "then if that is to be my lot, no longer is my liberty a loveless one."

In 1864 Tyndall performed the experiment of separating light from heat. In the course of the investigations which enabled him to do this he made one of the most daring experiments that ever a scientific man ventured on. Mr. Jeans said: "Knowing a layer of iodine placed before the eye intercepts the light, he determined to place his own eye in the focus of strong invisible rays. He knew that if in doing so the dark rays were absorbed in a high degree by the humors of the eye the albumen of the humors might be agitated, and, on the other hand, if there was no high absorption, the rays might strike upon the retina with a force sufficient to destroy it. When he first brought his eye, undefended, near the dark focus, the heat on the part surrounding the pupil was too intense to be endured. He, therefore, made an aperture in the plate of metal, and, placing his eye behind this aperture, he gradually approached the point of convergence of the invisible rays. First the pupil and next the retina were placed in the focus without any sensible damage. Immediately afterwards a sheet of platinum foil placed in the position which the retina had occupied became red-hot."—National Tribune.

LOVED HIS MUSTACHE.

Crime Committed by a Lackey in Revenge for the Loss of His Adornment.

Of all the curious motives for crime recorded by history or enumerated by Lombroso, without doubt the most eccentric and amazing is that alleged by a lackey in Vienna, who has just acted the part of the unjust steward, committed robbery and threatened murder and suicide, all for the sake of a miserable mustache, of which, during the past five years, nothing had remained but the maddening memory. His mistress—a wealthy widow well stricken in years—when engaging him as a lackey made it a condition sine qua non that his upper lip should be always clean-shaven. Albert Zalkovsky at first demurred, then consented under protest, and after several vain attempts to have the cruel order rescinded, submitted to his fate with seeming resignation. But the sequel shows that the wounds inflicted by the shaving off of his mustache had never healed, and now he has taken what he considers a just revenge, under circumstances which, in any other country, would have branded the man as a lunatic.

In Austria the mustache fulfils so much more important a function than in England, that no male citizen is complete without it, while it covers no end of natural blemishes. An individual may be disfigured and how-legged and generally unimpressive-looking, and Zalkovsky was all three, but once he possesses the hirsute adornment of the upper lip he's a man for a that." Hence the wearing of the mustache is tolerated in professions in which elsewhere it would be deemed an impediment, and the fingers of the imperial open throatened to strike when, on the occasion of the German emperor's last visit to Vienna, they were requested to appear in their roles clean-shaven. In some provinces the priests and monks are not only permitted, but are compelled, to sport a mustache while carefully shaving their beards, as otherwise their docks would lose all faith in the efficacy of their ministrations.

Zalkovsky's situation was probably the nearest approach to a sincere which the luckiest of lackeys can hope to obtain in this imperfect world. His mistress, whose health was delicate, was generally absent for six or eight months out of the twelve, during which time he was at liberty to let his hands rest from work and let his mustache flourish in a few days of the lady, about to return to her house after a long absence, telegraphed to her lackey to have everything in readiness for her coming and to meet her at the station, but on her arrival she discovered no traces of her servant. At home she found everything in a state of disorder, the table laid, supper prepared and only the lackey missing. The maid said he had gone out some hours before with a couple of valises full of things. This seemed suspicious, and when Madame glanced at her own white napkin, she perceived an envelope without any address, which, on being opened, was seen to contain the smallest copper coin of the empire, and the visiting-card of the missing lackey with the oracular inscription, "I seek death, but do you look to your safety." In the moment the lady had rushed through the suite of apartments that had separated the dining-room from the bedroom, and examining her safe, found everything in apparent order. But she sent for the police all the same. Then the safe was opened and the lackey, dressed by three men (the lady had left her keys in her portmanteau at the station) when an enormous hole was discovered in the further side, and an examination of the contents showed that many thousand florins had been abstracted.

But the most interesting find was a letter deposited in the safe by the unfaithful servant. In this lengthy libelation he confesses that he stole the scrip, sold it and invested the proceeds in the various Austrian lottery loans, in which he daily lost them and in letting on races. His motive was to revenge himself on his mistress for having insisted on the removal of his mustache, a measure which, he writes, cut deep into his feelings and wounded his honor beyond endurance. He then goes on to say that he is actuated by sentiments of kindness towards the lady, in spite of her unjustifiable conduct in the matter of the mustache, and that no more convincing proof of his friendliness could be given than the circumstances that, although he had at one time firmly resolved to murder her, pity for her prevailed over justice, and he permitted her to live on. Now, however, he considers it his duty frankly to tell her that if she communicates with the police she is lost, as he will then be compelled to murder her without remorse, and then save himself from the ignominy of arrest by committing suicide.—London Telegraph.

Blacks of Science.

In 1864 Tyndall performed the experiment of separating light from heat. In the course of the investigations which enabled him to do this he made one of the most daring experiments that ever a scientific man ventured on. Mr. Jeans said: "Knowing a layer of iodine placed before the eye intercepts the light, he determined to place his own eye in the focus of strong invisible rays. He knew that if in doing so the dark rays were absorbed in a high degree by the humors of the eye the albumen of the humors might be agitated, and, on the other hand, if there was no high absorption, the rays might strike upon the retina with a force sufficient to destroy it. He knew that if in doing so the dark rays were absorbed in a high degree by the humors of the eye the albumen of the humors might be agitated, and, on the other hand, if there was no high absorption, the rays might strike upon the retina with a force sufficient to destroy it. When he first brought his eye, undefended, near the dark focus, the heat on the part surrounding the pupil was too intense to be endured. He, therefore, made an aperture in the plate of metal, and, placing his eye behind this aperture, he gradually approached the point of convergence of the invisible rays. First the pupil and next the retina were placed in the focus without any sensible damage. Immediately afterwards a sheet of platinum foil placed in the position which the retina had occupied became red-hot."—National Tribune.

Blacks of Science.

In 1864 Tyndall performed the experiment of separating light from heat. In the course of the investigations which enabled him to do this he made one of the most daring experiments that ever a scientific man ventured on. Mr. Jeans said: "Knowing a layer of iodine placed before the eye intercepts the light, he determined to place his own eye in the focus of strong invisible rays. He knew that if in doing so the dark rays were absorbed in a high degree by the humors of the eye the albumen of the humors might be agitated, and, on the other hand, if there was no high absorption, the rays might strike upon the retina with a force sufficient to destroy it. When he first brought his eye, undefended, near the dark focus, the heat on the part surrounding the pupil was too intense to be endured. He, therefore, made an aperture in the plate of metal, and, placing his eye behind this aperture, he gradually approached the point of convergence of the invisible rays. OUR WASHINGTON LETTER.

WASHINGTON, Feb. 12, 1894.

The Cleveland tariff bill is to be reported to the Senate this week. It is not to be torn all to pieces by the Finance committee, as many had expected. It is only to be sufficiently amended before being reported to gain the support of those Democratic Senators who had announced their intention to vote against it unless their demands were complied with. Nothing has yet been officially given out concerning these amendments, but it is regarded as certain that they will include a duty on sugar, both raw and refined, and a duty on coal. These concessions to the Senators from Maryland, Virginia, West Virginia and Louisiana, are not to be called protection. The Democratic party is opposed to protection, you know. So the claim is to be made by the committee that these duties are levied solely for revenue purposes and with no intent to protect these industries. As a matter of fact, hard fact these proposed amendments are not pleasing to the Democrats, except those from the states that will be benefited, and they are only to be made because the bill cannot be passed by the House without an offset the duties on a number of articles principally produced in states that are reliably Republican are to be still further reduced. The income tax is to remain in the bill, unless struck out by a vote of the Senate. The Republican Senators will probably hold a conference as soon as the bill is reported, in order to determine upon the plan of opposition they will follow. The advice they are receiving from their constituents are somewhat contradictory. Some want them to merely put themselves on record as opposing the bill and then to allow it to be passed; others want them to use every legitimate parliamentary method to delay or defeat it.

Colonel E. T. Lee, of Monticello, Va., Secretary of the Shiloh Battle Field Association, is in Washington for the purpose of presenting to the congressional committee the memorial adopted by the association, asking Congress to purchase the battle field of Shiloh and turn it into a National Memorial park. The association at a recent meeting held at Indianapolis, designated Senator Harves, of Tennessee; Sherman, of Ohio, and Vilas, of Wisconsin, a committee to take charge of the memorial in the Senate and the following Representatives to perform a like duty in the House: Col. D. B. Henderson, of Iowa; Gen. Joseph Wheeler, of Alabama, and Gen. John C. Black, of Illinois.

Representative Geary—"Chinese Geary," he is often called—of California, is a Democrat, but not a sneaker, as will be seen by the following language of his: "I have as much respect for the President as anyone else, but I do not see why Congress should first learn the wishes of the President or consult the wishes of the Executive Department before legislating. Congress is here to pass laws without consulting anybody and I, for one, am growing tired of the constant interference of the executive Department in the work of Congress. Let Congress make its own laws, and let him exercise his constitutional prerogative and veto them." That's the most sensible Democratic speech of the session.

The charge was made several days ago that Secretary Gresham has had a long letter from President Dole to Minister Willis in his possession more than a week, and that it was withheld from the House for fear that the terrible language of Willis for the double dealing since arriving in Honolulu, which it contains, would have defeated the resolution which the House was fairly driven to adopt last week, and the charge has not been denied. It certainly looks as though the administration were determined to snare itself to the bottom of the pit of public infamy in dealing with Hawaii. President Dole's letter is said to be something like ten thousand words long and to go into minute particulars concerning the acts of Minister Willis. The administration people are claiming that Senator Morgan has been "poisoned," and that he will join Senators Butler and Gray in majority report of the Hawaiian investigation, which will jump on ex-Minister Stevens and let parliament Blount and the administration down easy.

The silver men are on top in the House, and the passing of Mr. Brand's bill for the coinage of the centavo is regarded as an assured fact, although its opponents are still fighting it hard and will continue to do so to the end, by filibustering or by any other method that promises to serve their purpose. They are talking veto rather strongly, and it is said that some of the Democrats who will vote for the

bill do so merely to square themselves with their silver constituents, expecting the bill to be vetoed if it gets through Congress.

Selby's report.
Messrs. Welch and Dunham, the lime merchants, made good use of the snow as long as it lasted and thereby saved many dollars.

The Salvation Army was back in town last week.
Horse traders have had possession of our town for the past week, and nobody smiles about it but Dad.

Wm. Hollinger and family were visiting his mother-in-law Sunday. J. Z. Browning, of Deer Park, spent a few days last week with his grandson, S. S. Browning, of our town.
P. M. Miller moved his saw mill on Buffalo Run to saw up a large tract of timber for Jonas Frazee. On Saturday his son run the saw into a steel trap that had been left in the log and broke out three teeth.

Oliver Bigler and Miss Clara Meese, of Lock Seventeen, Ohio, were visiting friends in our town last week. They will go to Kings on Monday and remain over night with Miss Meese's brother, A. G. Meese, and start on Tuesday for home. This young couple have made many warm friends during their stay here and their friends part with them very reluctantly.

Rev. Cox has been conducting a series of meetings here for a week but so far has met with little success.
Last Sunday will be a memorable day for a few of our young men. Rev. Ford, who delivered the sermon on Sunday, suspended the rules and gave some one or ones an extraordinary lecture on good behavior. He did it in such a way that the dullest could but understand just what and who he meant (if they were guilty). After the sermon Rev. Cox spoke very plainly as to causes of much sin in the community. He scored the rum sellers and the rum traffic generally.

S. S. Browning, of this place, is visiting friends near Deer Park. He expects to buy a farm in that neighborhood before he returns.
Some of the applicants for the appointment of Justice of the Peace are getting very nervous. The lucky names will soon appear and then the Democratic party will be torn all to pieces.

It came to pass on Saturday afternoon in the Squire's office at Friendsville that one Geo. D. Frantz in a heated argument called one of our townsmen (known as Bones) a liar and immediately thereafter the spectators heard something fall and after the crowd had scattered there was a man to be seen about the size of George with a very much disfigured countenance.

Geo. T. Wilt, of Frankville, Md., is registered at the hotel Diamond. More talk of the R. R. being extended to Oakland in the near future. Work is to commence in March according to the latest report. If this is true many of our idle men can find employment.

Attainment and vicinity.
Snowing and blowing here to-day. Mrs. Chas. Wilson is visiting in the east.

Miss Blanche Cassidy spent Sunday at Mr. Lafe Friend's.
Mr. Clayton is visible on our streets once in a while.
Some of our young men can go to the top of the hill in half an hour, but it seems to take Mr. J. half the night.

Miss Minnie Stemple spent Saturday at Frankville.

Chas. West was seen on our streets one day last week.

D. T. Thayer expects to move on his farm near here soon.

Mrs. Rosa Carroll and Mr. Tom McElhugh attended the ball at Frankville last week.

Little Bertie, daughter of Mrs. Anna Browning, who is visiting near here, was very ill one night last week with cramp.

Lucian Sliger is making some improvements in his new home.

Hard times seems to have struck this city pretty forcibly, we are sorry to note.

Our new merchant, Mr. Barnett, expects to get a large stock of dry goods soon. Our other merchant will have to hustle or Mr. Barnett will get all the trade.

The endless way in which the shleighs dash around the corner of Main and Alder streets make it very dangerous for pedestrians. People should be more careful.

M. Breche was seen on our streets Sunday.

Russel, son of Mr. Lafe Friend met with a very painful but not serious accident last Friday.

Miss May Wable spent Sunday at John Friend's.

News is as scarce as money in this city so I will have to stop for this week.

Bloomington.
The quiet little town of Bloomington is situated at the confluence of the North Branch of the Potomac river and the Savage, and has a population of three hundred, al

wide awake to the interests of the country.

The Jr. O. U. A. M. lodge that was instituted here on Dec. 14, 1893, is in a flourishing state. The average of new members per week has been four, and average attendance forty. Then say, "I will give them three weeks to smash up." The allotted time to each Junior is Bloomington is three score years and ten.

The fair and festival has been postponed until after this administration.

The boys say, "No tariff on coal." The Bunyan's Pilgrim Band was in town last Wednesday night, and lectured to a crowded house.

Our school is taught by W. A. Moffett, of Accident, assisted by Miss Jennie Wilson, of Westernport. They both deserve praise for the interest they have taken in the seventy odd pupils attending. We hear the children say "Mr. Moffett said he wanted every boy and girl in school to wear red, white and blue ribbon on the 22nd."

Blacksburg.
Plenty of snow and still snowing. Miss Annie Galvin, of Mt. Savage, was visiting friends in this vicinity a few days last week.

Bruce Blocher was working for W. S. Durst last week while Mr. D. was in Oakland on business.

Miss Emma Bocher and Rella and Ora Garlits were visiting friends at Pikesville Saturday and Sunday, the 10th and 11th inst.

Mr. Chas. Chaney and Miss Linnie Lorman were visiting Mrs. Wesley Durst Sunday.

James Keedy was visiting friends in Mt. Savage Saturday and Sunday and reported a good time.

Curry Bros. are busy hauling logs for spring plowing.

Heleny Blocher made a business trip to Frostburg Saturday.

Bradford Blocher was visiting friends near Axilston Saturday.

There was a grand ball at W. R. Anderson's Feb. 10th, which was enjoyed by the young folks as it was the first of the season.

RED ROVERS.
Ripans Tablets cure jaundice

ORDER NISI.
Mary Elsie Kirby vs. Sarah J. Evin and others.

No. 425 Equity. In the Circuit Court for Garrett County, Md., Feb. 12, 1894.

Ordered, this 12th day of February, in and to the effect that the said Mary Elsie Kirby, plaintiff, do file a bill of complaint in this cause, within the time specified by the court, failing to do so, the said cause shall be dismissed with costs.

Witness my hand and the seal of the court, this 12th day of February, 1894.

E. Z. TOWER, Clerk.

PROPOSALS FOR BUILDING A BRIDGE.
OFFICE OF THE GARRETT COUNTY COMMISSIONERS, OAKLAND, MD., Feb. 12, 1894.

Sealed proposals for building a bridge across the Garrett County road, known as the "Bridges" road, from the bridge at the mouth of the Savage River to the bridge at the mouth of the Potomac River, will be received by the County Commissioners at their office in Oakland, Md., until the 15th day of March, 1894.

The bridge to be built is to be a truss bridge, 100 feet long, and to be built on the site of the old bridge, which was destroyed by fire in 1881.

Each bidder will furnish a plan and specification of the bridge, and will also furnish a list of the names of the persons who will be employed in the construction of the bridge.

The commissioners reserve the right to reject any or all bids.

ESTATE OF BARBARA E. DURST, deceased.

THIS IS TO GIVE NOTICE, that the subscriber, the undersigned, has obtained from the Orphans' Court of Garrett County, in Maryland, Letters of Administration on the estate of BARBARA E. DURST, deceased.

All persons having claims against the deceased are hereby warned to exhibit the same, with vouchers therefor, legally authenticated to the subscriber, on or before the 25th day of August next, they may otherwise by law be excluded from all benefit of said estate.

Given under my hand this 10th day of February, 1894.

WINFELD D. DURST, Administrator.

ROAD PETITION.
NOTICE IS HEREBY GIVEN, that thirty days after the first publication of this notice application will be made to the County Commissioners of Garrett County, Md., for the improvement of the road from the bridge at the mouth of the Savage River to the bridge at the mouth of the Potomac River, known as the "Bridges" road.

Witness my hand and the seal of the court, this 12th day of February, 1894.

E. Z. TOWER, Clerk.

THE REPUBLICAN.

VOLUME 17.

OAKLAND, MD., THURSDAY, FEBRUARY 22, 1894.

NUMBER 50.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

A line crayon portrait free for thirty days. Loar & Co.

"Babies a success" at photo gallery. See ad. Loar & Co.

Mr. J. H. Shipperd, of Corinth, was here Tuesday afternoon.

Mr. D. E. Offutt, jr., spent Sunday with friends at Terra Alta.

Mr. A. T. Fraley has returned from his visit to Washington.

Mr. Samuel Faulkner, of near Friendsville, was here Tuesday.

Messrs. E. H. and John T. Sinclair were in Cumberland Tuesday.

Bring the babies and children to photo gallery. See ad. Loar & Co.

Those desiring fine photographs should call at once for we will remain here only a few weeks. Loar & Co.

Mr. Quill Bartley, of Fairmont, W. Va., was in Oakland a few days this week.

Our stock of plows are complete. All sizes and prices. J. M. Davis and Son.

If in need of bolts go to J. M. Davis & Son's. They have 10,000 in stock.

Five hundred pairs of scissors and razors to select from at J. M. Davis & Son's.

Mr. G. S. Hamill went to Baltimore Sunday night. He returned Monday night.

Mr. and Mrs. Edward H. Sineell gave a tea to a few of their friends Monday evening.

Rev. Wm. L. Leisher returned from his visit to Pennsylvania and Ohio Monday night.

For thirty days we will give a fine life size crayon portrait with each dozen cabinets. Loar & Co.

Rev. J. F. W. Kitzmeyer, of Davis, was here Tuesday visiting Rev. and Mrs. Wm. L. Leisher.

Mr. C. E. Rixford, manager of the electric plant here, went to Terra Alta Monday on business.

Preaching services in St. Mark's church next Sunday morning at 10.30 by the pastor, Rev. Leisher.

Mr. John Anlt returned from Salisbury, Pa., yesterday, where he spent two or three days on business.

Mr. Stephen Friend, sr., of Sang Run, was here last Saturday and dropped in to see THE REPUBLICAN.

Mrs. R. A. Ravenscroft, of Accident, wife of Garrett county's senator, is visiting friends in Washington, D. C.

The President has sent the name of Mr. Jno. O'Hanly to the Senate for confirmation as postmaster at Lonaconing.

Hon. A. F. George came to Oakland from his home at Swanton Sunday evening to take train No. 4 for Annapolis.

Mr. Dixon, of Friendsville, was in the city the latter part of last week as the guest of his brother, Mr. D. M. Dixon.

Opera singers and public speakers can keep their voices clear and strong with the famous remedy, Dr. Bull's Cough Syrup.

People who live in the country should keep Salvation Oil, the infallible antidote for the poisonous stings of bees and wasps.

On last Friday night the mercury registered twelve degrees below zero in Oakland. This was the coldest it has been here this winter.

Miss Maggie Allen, of Bloomington, is visiting her sister, Mrs. James Stevenson, of this place. —Lonaconing Review.

Construction work for the purpose of lighting Mountain Lake Park by electricity the coming summer has been commenced.

Mr. and Mrs. Henry P. Weber, of Oakland, spent Sunday in town the guest of Mr. and Mrs. Thomas Jackson. —Lonaconing Review.

Messrs. Wm. Linn and Louis Berkhalter, of Grafton, were in the city last Thursday evening. They accompanied Mr. J. H. Shipperd to Corinth and spent Friday there as his guest.

Rev. Wm. L. Leisher will preach in St. Paul's church, Deer Park, on next Sunday afternoon at 2.30 o'clock.

Coal at from 75 cents to \$1.12 per ton, cash or trade at Deal's mine three miles north of Oakland on the Yough.

New Germany letter was received this morning just as we were getting the forms on the press. It will have to go over until our next issue.

Mr. George Miller, of the Commercial hotel, has been very ill for some weeks past. Mr. Miller is eighty years of age and his recovery is doubtful.

There will be preaching in the school house at Crelina on next Sunday evening by the Rev. Wm. L. Leisher, of Oakland. All are invited to attend.

WANTED TO RENT.—In the central portion of Oakland one or two rooms suitable for millinery store. Miss Mary Cunningham, Lonaconing, Md.

Mr. Edward M. Spelden, who attended the Grand Lodge of Maryland, Knights of Pythias in Baltimore, returned to his home in Oakland last Friday morning.

Miss Lizzie Weber, of near Oakland, departed for Cumberland yesterday morning, where she will remain two weeks or more visiting relatives and friends in and near the city.

A communication from a correspondent at Deer Park was received last night, but owing to the crowded condition of our columns it is compelled to go over until our next issue of the paper.

Fish Commissioner Browning started for Baltimore last Sunday night to get the apparatus in order for the spring work of his department. He will return to Oakland the latter part of the week.

Mr. Dessie E. Boyer, of Accident, who has been in charge of the Oakland Coal and Cake Company's store at Corinth for the past eighteen months, has resigned his position and returned to his home.

Mr. L. A. Rudisill, superintendent of the Park, has been engaged the past few days getting up a very handsomely illustrated booklet advertising the Park. The composition and press work will be done in THE REPUBLICAN office.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church.

You can get your garden seeds at Henry E. Felt's grocery store. These seeds will be fresh and a great deal cheaper than sending off for them. A new variety of seed potatoes also on hand.

Mr. J. K. P. Johnson, who conducted a general store in the Rasche building in Oakland for a number of months, removed his goods to Westernport last week and will engage in the same business in that town.

Rev. Henry Carrington Alexander will preach in the Garrett Memorial church, Oakland, on next Sabbath at 11 o'clock a. m. and 7.30 o'clock p. m. The subject of the discourse to be delivered Sunday evening will be "Moses."

The Universal Plow is the only complete plow made, as you can buy it all steel, or chilled, with steel or wood beam, front or rear adjusting, plain grooved, slip or cutter shears, shins, knee cutters, jointers, wheels, etc. Write for catalogue. J. M. Davis & Son, agents, Oakland, Md.

The dam at the Oakland Mill which has withstood the high waters of the Little Youghiogheny river for nearly a quarter of a century, gave way Sunday afternoon before the great pressure of the water behind it. About twenty-five feet of the masonry washed away which will be repaired as soon as possible. In the meantime the mill will be operated by steam power and no inconvenience will be experienced by the patrons.

Evidently the editor of the Fairfax Republican, published at Davis, W. Va., didn't get the kind of a valentine he was looking for. Hear him. "A white-livered, craven-hearted, leather-tongued, dwarf-

soul, chicken-gizzard, pigeon-toed, weasel-faced, buzzard-billed, bleary-eyed, hawk-nosed, claw-fingered son of Belshazzar is a comic valentine Wednesday. He can learn something to his disadvantage by calling at the Republican office."

Spring-time will soon be here, and so will one of the finest lines of buggies, Daintons, spring wagons, surreys and carts for A. D. Naylor that ever came to Oakland. Be sure to give him a call when in need of anything in this line, for he can suit you both as to price and terms. Some vehicles on hand now. 50-3t.

The New York Tribune observes that the persons who believe in luck and signs will doubtless agree that it is unlucky to be struck by lightning on Monday, or take hold of a circular saw in motion on Tuesday, or tumble down stairs with a coal scuttle on Wednesday, or to be hit by a cable car on Thursday, or fall overboard on Friday, or marry on Saturday a girl who swings ten pound dumb bells, or be one of thirteen at dinner on Sunday, when there is food for only ten.

The Hon. A. Hunter Boyd, chief judge of this circuit, was here last Friday and selected the jury for the March term of the Circuit Court. After completing drawing the jury Ellen Laylie, of near Swanton, was brought before him and a jury on a writ of *de homine inquirendo*. Several witnesses were examined and the jury rendered a verdict that she was an insane pauper. Judge Boyd ordered that she be confined in the insane asylum at Cumberland, to which institution she was taken on Saturday morning by Sheriff Wegman, assisted by Mr. Jacob S. Meyers.

Some very strange things come to pass in this big world sometimes. For instance, up at Wayne C. H., West Virginia, Alva Hampstead jumps into the creek and saves little Robert Austin as he was going down the second time. Hampstead to revive the boy gave him a drink of whisky. Two weeks later Hampstead is brought before the circuit court and fined ten dollars for giving honor to a minor. This is a warning to the life saving heroes; more dead than alive from drowning, don't give them whisky, but build a fire and make some coffee. They can wait until you get it made.

The funeral of Mr. Franklin C. White took place last Friday morning at 11 o'clock from St. Mark's Ev. Lutheran church. The services at the church were conducted by Revs. John M. Davis and Geo. W. Kepler, of the M. E. church, Rev. Leisher, of St. Mark's being absent from town. About forty members of Garrett Lodge No. 113, K. of P., of which lodge the deceased was a member, attended the funeral in a body. The active pallbearers were Messrs. Henry J. Mayers, Joseph Martin, Thomas Little, Truman West, E. H. Sineell and Jacob S. Meyers. The services at the cemetery were conducted by the members of the lodge.

Valuable Advice. Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Coladeau Cottage, opposite the bank, Oakland, Md. 41-1t.

Eyes Examined Free. Sam'l S. Little, the graduate optician of Cumberland, will visit Oakland, March 2, at Dr. H. W. McComas' office. Call and consult him about your eyes, as properly adjusted glasses will relieve many a headache. 49-2t.

Photographs. We have opened the photograph gallery, 3d Street, near Lutheran church, and give the people of Oakland and vicinity an opportunity of getting a finer class of work than they have ever had before. Our pictures are guaranteed to be satisfactory. Give us a call. Loar & Co.

A. B. WILT, Operator.

Local Institute. The following is the program for Teachers' Institute to be held in Oakland on Saturday, the 24th day of February, 1894:

The model teacher, W. A. Moffett; history, A. S. Teets; language, Miss Alice DeBerry; ideal school, J. S. Guey.

Come out, teachers, and let us make this our best meeting. The public is cordially invited. 50-2t. COMMITTEE.

School Buildings and the Bond Question.

Editor of The Republican.

It has been currently reported within the past week that I am opposed to the building of a new school house in Oakland and other places in Garrett county where school houses are needed.

I always have been under the impression that the public generally knew my position on questions of public improvement. I believe in good school houses, good schools and a longer term of school.

In my mind there is no doubt but that Oakland should have an academy with a term of not less than nine months school a year—a place where our children can be educated without leaving the county.

I concluded that the rumors above mentioned emanated from some one who has taken a position against improvements that we ask for in Oakland, thinking by these rumors to injure me in the estimation of those who have always stood by me in my efforts to make Oakland a credit to her sister towns.

Look at the condition of our town today, and yet we are told that it is good enough. Some of our people are now petitioning the General Assembly of Maryland to repeal legislation the right to issue bonds to improve our town, which the voters have said by their ballots shall be done. I want to say to our friends on the other side, that they are not only injuring themselves, but are affecting every business man in the town. I claim that every man who brings, butter, eggs, chickens, potatoes, tomatoes, etc., to this town is injured. For proof of what I say look at Mt. Lake Park. They spend the money in fixing up and advertising their place and get lots of summer boarders, while we get but a few.

As much as I would like to see Oakland improved I never have asked for the passage of a bill to issue bonds without first submitting the question to the will of the people.

I have no apology to make or offer in this matter, feeling that I could not be a true citizen and do otherwise.

Respectfully, J. H. SHIPPERD.

The Enterprise Tannery at Huttons in Successful Operation.

The Enterprise Tannery Company's plant at Huttons, this county, is modern in its equipment and convenient in its arrangement. It, and the dwellings for the accommodation of seven families, were built during last season at a cost of about \$25,000.

The tannery buildings are all one story, and the roofs are iron. The leach house is 36x80 and contains six 12,000-gallon cypress leaches. Bark is ground in one of these buildings in an Ott bark shaver, the tracks running inside directly from the bark stocks and connecting with the main line of the B. & O. The bark mill is run by a 40 horse-power Erie City engine. The boiler house is 24x50 feet and is built of stone. It contains two two-hundred 50 foot in diameter and 30 feet long, and room for storing spent tan bark, which is used for fuel and which is brought from the bottom of the leaches by a Jeffrey conveyor.

The yard is 40x207, and contains in one end the beam house, 40x15, twelve roekers 3x11 and 6 feet deep, pump and wash pools and 53 hay-racks a foot square and six feet deep. The rolling room is 26x62 and contains two of the Shapley & Wells rollers and a 25 horse-power Erie City engine. The dry rooms are 40x108. The leather room is 12x36. There is also an office, hide house, lime house, barn, a building in which hair is washed, dried and baled, and a building in which grease is tried.

All bark is bought by weight, for which purpose a 60-ton Osgood scales is in use.

The product of this tannery is "Union Sale," and the average daily consumption of green salted hides is 3,750 pounds. Twenty-two men are employed the year round and eight or ten more on the bark stacks during the bark season. About 3,000 tons of bark are ground per year.

Notice.

I hereby notify all parties not to trust my wife on my account, for I will not be responsible, as she has left my bed and board without any cause.

NEWTON SAVAGE.
Friendsville, Md., Feb. 19, 1894.

What Becomes of a Lie.

Morgantown, Dominion.

First somebody told it.
Then the room wouldn't hold it
So the busy tongues rolled it
Till they got it outside;
When the crowd came across it
To and fro all must toss it,
Till it grew long and wide.

From a very small lie,
It grew deep and high,
Till it reached to the sky,
And frightened the moon;
For she hid her sweet face,
At the dreadful disgrace,
That had happened at noon.

Thus he brought forth others,
Dark stories and rumors,
And fathers and mothers—
A terrible crew;
And while heading they hurried,
The people they hurried,
And troubled and worried;
As lies always do.

And so, evil be it,
This monstrous lie grew,
Till at last it exploded
In smoke and in flame;
While from mud and from mire
The pieces flew higher
And hit the sad threr,
And killed her good name. J. H.

The Band Benefit Entertainment.

Those who were lucky enough to be able to attend the entertainment given for the benefit of the Oakland band, did not leave Offutt's Hall last Friday evening disappointed.

The ladies and gentlemen having parts in the entertainment deserved great credit for the interest manifested by them in making the evening a great success both socially and financially.

The program, which was quite elaborate, was carried out very well throughout. Between the plays and acts music was rendered by the Oakland Orchestra, the leader of which is Prof. S. C. Smith. The orchestra was organized only a few weeks ago, but the music played by it was very fine. The members are Miss Lottie Loar, piano; Prof. S. C. Smith, 1st violin; D. G. Smith, 2d violin; John Legge, cornet; Jos. Martin, trombone; Godfrey Felt, tuba.

Those who took part on the stage were Mesdames Henry J. Mayers, and S. C. Smith; Misses Grace Loar, Nettie Michaels, Maggie Miller, Belle Browning, Anna Anderson, Annie and Daisy Grant; Messrs. Wm. Weber, Chas. Tower, J. H. Sineell, D. W. Dargatz, and Willie Grant.

Garrett County Appointments.

On Tuesday evening Governor Brown sent the following nominations for this county to the Senate: Justices of the Peace—Alexander Fairall, William Sharpless, Levi C. Eike, Frank Welch, Peter Nathan, Enoch Carthy, Marcus M. Fazenbaker, Andrew Mullen, Henry Kahl, Frederick Burkhardt, Peter H. Eckhart, Andrew B. Gonder, Benj. F. Crane, James A. Delawder, Jeremiah Browning, Thomas J. Johnson, W. D. Hoyer, Emil F. Droegge, John T. Robinson, George P. Ralston.

Officers of Registration—Henry D. Hamill, Reese E. Friend, Isaiah Fuller, John Collins, John A. Richter, Nathan C. Browning, John A. Hughes, Henry A. Shaffer, Samuel Johnson, Sebastian Hinebaugh, Noah S. Garlitz, Joseph Buckle.

Notaries Public—George A. Fraley, Jas. M. Litzinger, Louis A. Rudisill, James Guard.
School Commissioners—Sam'l C. Hoyer, Jas. D. Hamill, C. N. Friend.
Supervisors of Election—Jno. T. Mitchell, Walter Warnick, Jonas E. Gnagay.

Married.

MICHAEL — BROADWATER.—On Feb. 13, by the Rev. J. H. Enlow, of Grantsville, at Mr. Wm. W. Broadwater's, Savage, Md., Andrew Wheeler Michael, of Firm Rock, and Miss Laura Persia Broadwater, of Savage.

Marriage Licenses.

James H. Bart and Lillie Clatter.
James W. Johnson and Nora J. Keefover.
Elijah F. Uphold and Missouri I. Castled.
Andrew W. Michael and Laura P. Broadwater.
One with request not to publish.

A Card of Thanks.

To the Editor of The Republican.
We desire, through your columns, to thank the people of Oakland and vicinity for the liberal patronage accorded us at the entertainment for the benefit of the band given on last Friday night; and especially to the ladies and gentlemen taking part in the entertainment.
Respectfully,
S. LAWTON, Pres.
D. G. SMITH, Sec.

Our Eastern Boundary.

To the Editor of The Republican.

I noticed in last week's issue of THE REPUBLICAN an article in relation to the unsettled line between Garrett and Allegany counties. I will give you the true facts in the matter, having been over the ground, I think I ought to know how the matter stands.

As every one who will examine the code will see that the bill or act expressly says that the division line shall begin at the highest point on Great Savage mountain, where that mountain is crossed by Mason & Dixon's line, and with a straight line run to the mouth of Savage river. Now I say that the present line was not run correctly. Instead of starting at the highest point on Great Savage, the line starts in a gap or low place on Little Savage mountain, fully three-quarters of a mile west of the top of Great Savage.

Perhaps some will think that I am taking an interest in a matter that don't concern me, but I think otherwise. I claim Garrett county, Md., as my home, having been born there nearly seventy-five years ago, and it is for the warm feeling and the well wishes of the good people of Garrett county that I write this. Hoping it will meet with their approval, I remain,

MICHAEL DUBST.

P. S. Mr. Samuel Johnson was the surveyor, when he and myself and others made the discovery of the big mistake made in locating the true and correct division line. If there should be any trouble in having the correct line established, Mr. Johnson, I think, can give the necessary information. R. D. Preston, Minn., Feb. 15, 1894.

List of Jurors for March Term.

The following named gentlemen have been drawn by Judge Boyd to serve as jurors at the March term of the Circuit Court for this county: District No. 1.—Robert E. Wilson, Henry Pugh, John S. Ashenfelter, John B. Friend.
No. 2.—Henry Brown, Alfred Kelley, Wm. R. Barnhouse, S. R. Prantz, Wm. H. H. Friend, Geo. W. Meyers.
No. 3.—Wm. Jenkins, Ralph Engle, Archibald Warnick, Levi Randolph, J. H. Sineell, C. Loeschel.

No. 4.—Oliver C. Fazenbaker, Michael Daily, George O. Broadwater, Elijah Kemp, Joshua Tichenell.

No. 5.—John M. Lowdermilk, Henry F. Lininger, Ruben Enlow, Jod Deihl.

No. 6.—Hanson B. Lewis, John F. Friend.

No. 7.—Henry Weber, Wm. A. Dailey, R. S. Jamison, Adrian Glatfelly, Johnson King, Andrew Shartzer, Asa Coddington, John Anlt, John M. Jarboe, Charles S. Davis.

No. 9.—Henry Kenney, Aaron Wilhelm.

No. 10.—David W. Miller, John O. Harvey, Norman B. Bray, Solomon Hoyer.

No. 11.—Amos Broadwater, jr. No. 12.—Joseph Buckle, Simon Resh, C. E. Ellithorp.

Eagle Rock.

As we have not seen any items from this place for some time, we thought we would let you hear from us.

Snow and mud plentiful. Most of our farmers made good use of the snow by hunking cross ties, etc.

George Tasker has been on the sick list.

M. T. Sollars started to Oakland Sunday evening on important business.

Our school is progressing nicely under the management of Miss Nellie Butler, with about twenty-nine pupils enrolled.

Mr. A. McRobie has been busily engaged in making ties.

James W. Jenkins was visiting his sister, Mrs. M. T. Sollars, Sunday.

There was a spelling match held at our school Friday night the 14th. There was a very good turnout and some excellent spelling done.

VIOLET.

Rogers' Specific Liniment.

A radical cure for cholera. Sold by A. G. Sturgis, Oakland, C. F. White, Huttons; The Co-Operative store, J. O. DeBerry, Corinth; E. A. Weimer, McHenry, Smith & Callis, Johnston; J. E. Gnagay, Accident; Jonas Frazee, Yough Store Co., R. Liston, Selbysport; A. Wass & Son, Mineral Springs; L. E. Friend, Friendsville; P. T. Garthright, Mountain Lake Park, and at all other general stores.

The Republican.

OAKLAND, GARRETT CO., MD.

A HARMLESS LADY.

Why Mrs. Whitcomb Followed Her Husband to the Country.

The line of rail fence that divided the two farms stretched, as down the grass-green meadows, ending at right angles with the more pretentious fence along the country road. From the two corners there, the land spread out in even broadening borders, and upon each side of the dividing line embraced a distant farmhouse in its lazy sunny arms. In their soft colors of green and white, the two houses lay like idle creatures sprawling in the sun.

The meadows glistened under the floating light of an early summer morning, and Farmer Basset, at the foot of his fertile undulating field, stopped now and then, with hammer in hand, to direct a long gaze of satisfaction over his thriving estate. He was kneeling in long grass, and under his great straw hat was sheltered alike from the sun's rays and from ordinary vision. But the outlook from under its broad brim brought a flood of pleasure to its owner's heart, for he noted on the one side the clean smooth floor of earth between the very stems of wheat, and, in contrast to it, the weed-entangled growth upon the adjoining land.

"Jinkerton!" suddenly exclaimed the farmer, with a surprised stare over the fence. "That's Whitcomb come back?"

With a sudden vigor he drove the long nail home into the thick wood, and, giving it another sharp decisive blow, dropped his hatchet into the basket and started in the direction of his house.

"That's Whitcomb or it's his double," he ejaculated again. "I wonder what it means! The house is all closed."

With a sudden vigor he drove the long nail home into the thick wood, and, giving it another sharp decisive blow, dropped his hatchet into the basket and started in the direction of his house.

"He must have come late yesterday evening, and he has taken the back room upstairs."

"I'd like to see the old fellow. If I thought he'd be friends, I'd go over. But he left here in such a mighty row, and has never been back since—perhaps it's better to let fallow land lie."

"He's married, isn't he? I wonder if his wife came with him."

Basset pushed the damp hat rim back from his matted hair and looked at her from his gentle blue eyes.

"I'd hate to be offish with him—about old times, too. He looked kind of sick, didn't he? A man seemed to be helping him across the yard."

He went about his work all that day in a disturbed meditation, glancing toward his neighbor's house, which still stood empty and dark.

Returning from the orchard, he set down his basket of apples and stood with his eyes fixed thoughtfully upon one of the windows, whose blind had been partially opened and through which he might draw some knowledge of the silent interior; it was like an eye, covetous and half closed, but full of a subtle intelligence.

He bent down with his hand upon his basket again when Mrs. Basset came toward him hastily. There were traces of a recent astonishment yet lingering on her face.

"Oh," she said, "Mrs. Whitcomb is in the house."

"Mrs. Whitcomb?" repeated the farmer's voice, uncertainly. "Where is Mrs. Whitcomb?"

"Why, in the sitting-room, to be sure, just at present. She wants a room of her own, though, to keep for several days, or maybe a week. You see, her husband has something the matter with his eyes, and the doctor would not treat them unless he left the city and came to some quiet place. He is run down and nervous at the same time, and his old home was the most convenient place to come. He brought nobody with him except a man servant who knows how to nurse and take care of him. They wouldn't let her—his wife even—come with him; but she was so anxious about him that she followed him here, and now, as she can't go over there in face of the doctor's orders, she wants us to keep her. She's a devoted little wife, and of course I consented."

Her husband patted her approvingly on the arm and prepared to go into his guest.

In the meantime, in the Basset sitting-room stood a little woman attired in a jaunty sailor hat and a dress of soft and flowing elegance. Her eyes were directed toward the window and upon the house in the distance.

"It is very foolish of me," she was thinking, "and when Henry is perhaps suffering. But I can't help it; after a few days, he will be able to go about, and he is sure to see that woman again. She may be a designing sort of a woman, for all I know, and may want to amuse herself with him; or she may be desperately in love with him yet, and he, being weak and nervous and in such a state of health anyhow, why, there's no telling what she might do—or he either, for that matter. Oh, what am I saying?—or thinking?—it's all one. How Henry would feel if he knew!"

And she gave her small foot a vicious stamp that set her ruffles fluttering from shoulder to toe, like the rustle of a tree and its innumerable leaves.

"I suppose I must put on the ugly mask of deception and smile and smile and be a villain, for I'm not a bit frightened about him. If he could only be in alarming danger without my being serious! I believe it would be easier then; but he can't, and what shall I do?"

After a few minutes' agitated rustling up and down the room, she resumed: "I don't mind her being pretty; lots of country girls are that and are per-

fect failures, for they are likely to be simple too. But if she's smart enough to have style about her, I think I shall grow distracted. Henry is always perfectly infatuated with style. That involves the worst part of it; to be stylish, one must be very sharp and clever, and to have an air about one takes a clear head and artful scheming. Oh, I'll be scared to death if she's a stylish woman!"

When Mrs. Basset and her husband entered the house, a cordial welcome was given her and a room prepared for her upstairs. But her field of operations laid below, amid the informalities of household custom. In conversation, she skirted along the channel of her thoughts and talked in ambush of the subject that engrossed and tormented her.

"Mr. Whitcomb was born in that very house, wasn't he?" she inquired, by way of challenging remark.

"Oh, yes, he was born and raised in this part of the country," and as Mrs. Basset moved over to the kitchen stove with the iron in her hand, the floor shook under her heavy tread. Mrs. Whitcomb glanced involuntarily down at her own light, trimly clad foot and then said:

"I suppose you knew him, didn't you? Maybe you were together at quiltings or singing school, or wherever it is the young people go for amusement?"

"Oh, yes," replied Mrs. Basset, smiling broadly. "My husband and I knew him well. We always called him Little Whit, because he was somewhat slight and never stout like the other boys."

"I have heard them say he was quite a favorite with the girls out here—he always was graceful and had a taking way with him—and that in fact, when he was quite young, he fell desperately in love with one of them," said Mrs. Whitcomb, in a careless manner.

"About the time?" echoed Mrs. Basset, in pleased surprise. "Oh, yes; how could you guess? When I was just fifteen years old I had four grandmothers living—two great ones, you know—and they all kind of for me. I think all the world of it, everyone regards it as a great curiosity."

"Mrs. Whitcomb was disappointed at this result—albeit she was momentarily startled at the remarkable incident itself—and resolved not to make a second mistake."

"Indeed! Is it certainly wonderful? I'm surprised that you use it about the house. But your having no children makes many things possible. Mr. Basset is such a strong man! I envy him when I think of my husband. Henry will have to stay here several weeks, perhaps, and how I'm to back him up without him is hard to tell. But he will meet some of his old friends again when he is stronger. That girl he especially liked—she is here, is she?"

She asked, complacently gathering in bits about her wrist.

"The girl? Oh, yes, she's here," responded Mrs. Basset.

"I suppose she is a woman now?"

"Yes, she's a woman now, of course."

"I wonder if I couldn't see her sometime. I have a great curiosity about her. Oh, who is that?" she sprang to the window. "What a fine rider she is, and doesn't she look splendid on horseback? That isn't a country girl, is it? She isn't that woman, is she?"

She started painfully and fixed her eyes upon Mrs. Basset's imperturbable face.

"Oh, no, that isn't the woman. But she's from this neighborhood, though. She's one of the Brookville girls; they all ride."

"She's very fashionably dressed; she looks as if she came from the city," mused Mrs. Whitcomb. Then she blushed a little and entered the battle bravely.

"Is this other woman nice looking?"

"Every one seems to think her a good looking woman. Mr. Whitcomb used to think so," and Mrs. Basset's iron slid smoothly over a shining napkin.

The disturbed wife was fast losing a calm view of the situation. She rose and sauntered to a glass hanging against the wall, saying with a hysterical laugh:

"Papa and aunt say that he only married me because I was pretty. But I'm positively getting wrinkled now, and Henry can't endure wrinkles." She looked in with a frown at the puckered forehead reflected in the glass.

To herself, she was saying: "To go back home and leave him here with her, and I not knowing what she is like—I can't do it! Silly unreasonable child that I am!"

"She is married now," suggested Mrs. Basset.

"Oh, yes, I suppose so. All attractive women get married. Women in the country follow the fashions a great deal nowadays, don't they? I mean, if they are clever enough, I suppose they copy the pictures they see, and follow the directions of the magazines."

"This woman takes a magazine; I have often seen it," interposed Mrs. Basset.

"Oh, does she?" exclaimed the troubled little woman. "Now, then, do you know if she wears bell skirts or circular skirts?" She bent over upon the edge of the ironing-board, her chin in her hand, while her clouded gaze followed now the gliding iron and was now raised to the face of the farmer's wife. "Maybe she wears the umbrella skirt; I always detect it. An umbrella never was anything but ugly. I'd hate to think of the ungraceful thing dangling around me. Does she call it that?" she asked, anxiously. "They are cut like this," and with her slender fingers she drew an imaginary figure suggestive of a cone in shape, cutting out its apex carefully. "It works like a charm, is plain and smooth at the waist, but the bottom is perfectly beautiful—is very full and stands away out like this, a genius made that pattern! Does she wear that kind of a skirt?"

Mrs. Basset shook her head.

"Some of her skirts are tolerable, wide. She's considered a very well-dressed woman among her friends."

"Does she have puffs on her skirts, or her shoulders, and big ruffles, so kind that stand out and give a woman such a magnificent air? Oh, I've seen ladies that looked positively sublime in their big silky sleeves, and, when the dresses are light, cover with lovely lace; and you see them gliding round in a room full of people—'they look—' and she part with a long convulsive sigh, 'they look like floating angels!'"

There was a silence of profound absorption for a moment, when she resumed:

"Maybe she stuffs her sleeves with cotton wadding. Does she? That gives a striking effect."

Mrs. Basset's fund of information was not extensive, and her question was in despair when she only maintained, stolidly:

"Yes, she is, no doubt, considered to be a smartly-dressed woman."

"I wonder now, if she ever wore a lady's collar? Has she gloves and shoes to match her dresses or to give a harmonious contrast?"

Mrs. Basset had nothing further to say, and, piling up the handkerchiefs, went from the room, vouchsafing a gleam of comfort.

The day after they had seen the doctor drive away from the Whitcomb home, Farmer Basset said:

"I can't stand this way of doing any longer. If Whitcomb doesn't like it, I can walk back again across lots, but I'm going over."

He had an old neighbor back home again and never go near him."

Mrs. Whitcomb learned of his decision, and, with loosely flowing skirt caught up in one hand and shading her eyes from the sun with the other, she tripped over the path that had long been lost in overgrowing grasses, through which the farmer had made his way only a few minutes before. She crossed a side porch at the back of the house, ascended a flight of narrow uncarpeted stairs, and advanced on tip-toe down the hall toward a room from which she heard sounds as of someone moving. She placed her open palm lightly against the door, which was slightly ajar and stood listening. Farmer Basset's deep tones were saying:

"Don't you know who I am? You haven't forgotten that Dr. Basset lives in this neighborhood, have you?"

Mrs. Whitcomb pushed the door open so little and looked in. Her heart swelled up within her.

"Oh, my poor dear husband, how thin he looks, with that shank over his eyes! If it wasn't for that horrid woman, I'd go back home where I belong."

The accusing tears were streaming down her face as she looked at the two men in the dark room.

Farmer Basset had put his hand upon the sick man's chair, and the latter had covered its brown breadth with both his white ones; his eyes were bandaged from the light.

"You, old Jo Basset?"

"Yes, old Jo Basset," said the farmer, leaning over to kiss a minute's sunshine, and yet you come into this dark hole! You're a splendid fellow, Jo!"

"I'm powerfully glad to see you. You don't look bad, you know—just a little rest is all you need," and Basset proceeded to shake his friend's hand heartily. "You've forgotten our quarrel, then?"

"Our quarrel?" said the other, wonderingly. "What quarrel, when we were always having? I don't seem to remember," and he turned his unseeing face upward inquiringly.

"Oh, you've forgotten it! Now, I tell you I'm mighty glad of that. I might have known it, seeing that you are married again. A man's wife—don't you remember, old boy?"

"Your wife?" responded the other, and then a beaming smile broke forth upon his face. "Clara? Of course, I remember now. She was a fine girl, and it did hurt me, springing elated from me there. Forgotten it!" and his laugh rang merrily in spite of his weakness. "Well, I should say I have. You ought to see Mrs. Whitcomb! I would have her here now, but the doctor insists on rest for me, and says I'm in a perilous way. It's hard medicine—worse than any in his bottles. Do you wonder I didn't remember our old quarrel? It's fun, though; I'm glad you reminded me of it."

Farmer Basset rubbed his hands in glee; something could have done him that, then seeing his friend in such spirits.

Mrs. Whitcomb stood without the door, the very tears stopped upon her face in the consternation of the moment. Mrs. Basset, with her straw hat shaped like a tent, soop-shovelled and its dejected trimming, her round blouse with its buttons down the front, the skirt with its bunch of failures around the waist, the dull thick shoes—this was the vision that rose in her mind. This was the woman over whom she had been grieving. With trembling step and downcast head she made her way down the stairs, out into the open air, and there held council with her own follies and humiliation.

The next day she sat in the farmer's wagon, under the shade of his big black horse, with her own side one by her side in its newest cover, and behind them was her trunk. Mrs. Basset stood in the doorway, seeing them start.

"Yes, Henry will be all right, with you to watch him now and then," she said, cheerfully, from her high seat. "I shall be perfectly satisfied. Let me know, of course, if he should get worse—and the doctor says he won't. You've been very kind to me, let me say again, and good by!"

She was driven off with a heart freed of its burden and as light as the step of the feet-footed horses, silently blessing the harshness of an unfashionable woman—Anna Embree, in *Artisan's Home Magazine*.

MISCELLANEOUS.

—During the thirteenth century in France an archer received fifteen shillings a month, a knight £4 10, a field marshal £15.

—An Italian laborer has soup in the morning, soup, bread and potatoes at dinner, bread, wine and macaroni for supper.

—Dressmakers in France in 1870 averaged nineteen pence a day in wages; flower-makers, embroiderers, lacemakers and laundresses averaged twenty-eight pence.

—The food of working people in Holland is mainly potatoes, vegetables, beans and peas. With the exception of horse flesh, fresh meat is a rarity.

—A Definition.—Teacher—"What is the feminine of man, Thomas?" Thomas—"Woman." Teacher—"And the feminine of gentleman?" Thomas (unhesitatingly)—"Dude!"—Puck.

—Napoleon once called attention to a bright star he saw shining in his room and said: "It never deserted me. I see it on every great occurrence urging me onward. It is my unfailing omen of success."

—If a wife in India is abandoned by her husband, she waits eight years if he has gone on a pilgrimage, six if he has been to study and three if he has traveled for pleasure, and then is legally divorced and may remarry at her pleasure.

—"Doctor, do you think that the cigarette habit really affects the brain?" Doctor—"That is a question that will probably never be answered."

—Madam—"Well, Mary, what do you think of the pictures at the academy?" Mary—"O, mum, there was a picture there called 'Two Dogs after Lamb-seer,' but I looked at it for nearly half an hour and I couldn't see a Land-seer."

—Spare Moments.

—In the shifting movement of this restless country some people yet have been content to abide by the ancestral roof tree. Dr. George Adam died at Canaan, Conn., at the age of 81 years, in the same house in which he was born, and in which he had lived all his life.

—Two men uprooting peach trees on the farm of Mrs. Richard Diehl, near Chestertown, Md., on the eastern shore, unearthed the other day an iron pot containing a hundred and fifty dollars in old coin and an open-faced silver watch, doubtless the forgotten treasure of some one who buried it when many persons were hoarding coin during the period of inflated currency.

—Those South American medals and decorations that await some officers of the United States navy were doubtless actually manufactured in New York or possibly in Paris. The South American republics go abroad for nearly all such things, bank notes and even coins included, and New York does a large share of the work than any other city of the United States.

—Although the emerald-green never passed the Alleghenies, something nearly its equivalent used to prevail in the Scotch Highlands. The Scotch of the Scotch Highlands used to be generally accepted as indicating the hour for closing shops and for hastening homeward. The lives of many families were regulated by the bell, and the younger members in particular were held to account when they reached home long after its striking of nine.

—Women lecturers on labor topics are a novelty on the Pacific coast, and much interest is aroused in Oakland over the fact that in a course of lectures under labor union auspices three women lectured on the labor problem as women see it. Women of the Pacific coast are only now beginning to join the labor unions, and the accession of "three lady organizers" to the ranks of a Federal Labor union of Oakland a few days ago, was made the occasion of an enthusiastic demonstration.

—California prospers apace. At the close of last year the state had a population of 1,500,000, and since 1880 the assessed value of property has just doubled. She has the largest per capita wealth of any state in the Union, and her savings banks now have on deposit \$138,000,000. She ranks first among the states in the production of gold, wine, honey, oranges, almonds and walnuts, and is running close to first on many other products. Last year her mines yielded gold to the value of \$13,000,000, and other precious metals to the value of \$5,000,000. San Francisco is now the leading whaling port of the world.—N. Y. Sun.

—One of the most ingenious expedients for overcoming the difficulties of sinking shafts for mining or other purposes in wet "measures" is the "freezing process." Supposing that the bottom of the shaft is so continuously flooded that the miners are unable to use their picks or in any way proceed with the excavation, pipes are run down from the surface to the flooded locality, and through these pipes is forced a powerful freezing mixture. The consequence is that the seeping water becomes solidified, and the workman can quarry his way through the ice, which now becomes a protection from the body of water beyond, and the sinking of the shaft can be continued.

Rare Egyptian Antiquities.

In accordance with a promise announced some time ago, some exceedingly valuable selections of antiquities, recently discovered, have been presented to the British government by the government of Egypt. By a contingent just received the magnificent mummy collection in the British museum has been greatly enriched by the addition of seven coffins, four of which include mummies of the fourth dynasty period, or 3000 B. C. The gift comprises also a number of Unkapi figures, as the "answers" to the bidding of the deceased are called; and they are of great archaeological importance. These figures were laid in the tomb to execute the never-world field labors as decreed by Osiris, the god of the underworld and judge of the dead.—Scottish American.

SCIENCE AND INDUSTRY.

—As far back as 1854 Hamburg embroidery was imported from Switzerland into the United States. The trade has grown steadily until now Switzerland exports \$12,000,000 worth of these machine embroideries annually. The work was first started in Switzerland in 1837.

It has been found by Saville-Kent that the pearl oyster reaches maturity in a shorter time than formerly supposed. He thinks that under favorable conditions a period not exceeding three years suffices for the shell to attain to the marketable size of eight or nine inches in diameter, and that heavy shells of five pound or six-pound weight per pair may be the product of five years' growth.

—A theory has been put forth by M. Raten in the French Academy of Sciences that the crust of the earth beneath the continent does not touch the land globe, but is separated from it by a space filled with gaseous matter under pressure. The continents would therefore constitute a sort of blister, much flattened, inflated and sustained by gases, while the bottom of the oceans is supposed to be directly on the fiery nucleus.

By this hypothesis the author believes that many phenomena of the terrestrial crust may be explained which are not clearly accounted for under the present theory.

—Popular Science Monthly.

—The wing area of flying animals, says a French naturalist, "varies from about forty-nine square feet a pound of weight in the gnat and five square feet in the swallow, to half a square foot a pound of weight in the Australian crane, which weighs twenty-one pounds and yet flies well. If we were to adopt the last or smallest proportion, a man weighing twelve stone would require a pair of wings each of them fourteen feet long by three broad, or double the area of an ordinary room door, to carry him, without taking into account the weight of the wings themselves."

According to the Bureau Veritas, or French Lloyds, Great Britain owns more than one-third of the actual shipping of the world—14,371 out of 42,357 vessels. Six out of twelve of the largest steam and sailing companies in the world are British, and of the fourteen vessels of over 8,000 tons employed in the world's commerce British ship-owners claim nine. The estimated value of the merchants' fleet of Great Britain is \$1,100,000,000. The United States comes second in the list with 8,704 vessels owned by us. Norway comes next with 3,708 ships, and is followed by Germany and Italy with 2,165 and 2,122 respectively.

—Direct trade in two years, 1890 to 1892, increased the south's imports \$87,000,000 against \$82,000,000 in all of the south's imports 25 per cent against 5 per cent in the rest of the United States. One prime object of southern direct trade has been to induce western grain and flour and meat to go abroad through southern ports.

In 1892 as a fruit of this direct trade the west shipped \$104,000,000 of its exports through the south to foreign countries, of which \$85,000,000 were cereals, \$13,000,000 meat and \$6,000,000 other goods. And nearly all of this western stuff went through Baltimore, Newport News, New Orleans and Galveston.—Atlanta Constitution.

—In relation to the visits of night moths to flowers, resulting in their cross-fertilization, a recent author shows that the lepidote clothing is so easily detached that they invariably leave "moth hair" on the pistil, provided it is in the receptive condition required for perfect fertilization. The stigma at this period is utterly devoid of membrane and forms the next a little cup containing sticky liquid into which the pollen grain falls, the moisture aiding in the development of the pollen tube, and probably furnishing the nutritive material requisite for its growth. The sticky fluid entangles and holds the "moth hair," and thus the observer can tell whether or not the flower is favored by the visits of these nocturnal creatures.

—In a Fortnightly Review article, relating to the thickness of glaciers, it is stated that the most recent researches show that the thickness of the ice has been usually underestimated. A terminal moraine on the Jura at Chasseron is four thousand feet above the sea, or 2,770 feet above Geneva. In order that the upper surface of the ice should have sunk sufficiently to reach the level of the sea, it was probably five thousand or six thousand feet thick below Martigny, and four thousand or five thousand feet above the middle of the lake. The essential condition for the formation of a glacier at all is that more ice should be produced annually than is melted away.

Sledge Dogs in Northwestern Canada.

Six or eight dogs are used on each sledge. They are fed only once in twenty-four hours and that is in the morning before the start is made and after the dogs are in harness. At that time about four pounds of frozen fish are given to them. Everything must be in readiness for the start and the men must look to it that they are at hand to jump on the sledges, for at the very instant the last morsel of fish disappears the dogs are off at a break-neck speed. Strange as it may seem, the drivers do not dare to feed the dogs unless they are in harness. Otherwise they would scatter and nothing more would be seen of them. They are driven with one long rein attached to the leader. A whip with a very short handle and a very long lash is used to drive them, though in most cases they need no urging, for they seem to feel that the faster they go the quicker they will come to the post, where food and warmth and a lazy life await them. They travel often as far as ninety miles a day.—Buffalo Courier.

Money Saved, But—

Algy (counting the cost)—Do you—er—always take a chapman along when you go to the theater?

Miss De Pink—My, no! never, unless I go with a man. Two seats will be plenty.—N. Y. Weekly.

Symptoms of Cancer

Appeared on my lip. Disagreeable eruptions came on my neck. After taking four bottles of Hood's Sarsaparilla, all the traces of disease have disappeared and the medicine has given me renewed vigor and strength. I am now almost 73 years of age and I work like a tiger. And I know that Hood's Sarsaparilla has had much to do with my vigor and strength. I recommended it to my wife, who had suffered so much with rheumatic troubles, as also with

Hood's Sarsaparilla Cures

female weakness. In two years she has used about three bottles of Hood's Sarsaparilla, and today, and for the last six months, she seems like a new being." Rev. O. H. Power, 2524 Hanover street, Chicago, Ill.

Hood's Pills are the best after-dinner Pills, assist digestion, cure headache, etc.

SWAMP-ROOT CURED ME.

INTENSE PAIN IN THE KIDNEYS AND BACK.

Urinary Disorder Instantly Relieved.

Moravia, N. Y., Sept. 7, 1893.

Dr. Kilmer & Co., Binghamton, N. Y.

Gentlemen: Last winter I was taken with severe pains through me in the region of my kidneys; the pains were so severe I could hardly endure my face and eyes were as red as blood; the drops all over me; I was as cold as ice and I was unable to get up. I purchased a bottle of Dr. Kilmer's Swamp-Root, also one bottle of his U. & O. Anodyne. They

Gave me immediate relief.

I treated the Anodyne with a flat-iron. In four days time the pains had all disappeared. I think Swamp-Root one of the greatest medicines ever offered to suffering humanity. Any one wishing to write me may do so and I will gladly answer.

Yours truly, Frank H. Reynolds.

At Binghamton, 50 cent and \$1.00 sizes, "Swamp-Root" is usually free of charge.

Dr. Kilmer & Co., Binghamton, N. Y.

"COLCHESTER" SPADING BOOT

For Farmers, Minors, R. R. Hands and Others.

The outer tap sole extends the whole length of the sole down to the heel, protecting the shoe throughout. ASK YOUR DEALER FOR THEM.

W. L. DOUGLAS'S SHOES

Equal custom work, costing from \$4 to \$5, best value for the money in the world. Name and price stamped on the leather. Every pair warranted. Take no substitutes. Write for full description and complete list of agents and prices for Ladies and Gentlemen. Write or send for it. W. L. DOUGLAS, BOSTON, MASS.

der by mail. Postage free. You can get the best bargains of dealers who push our shoes.

THURSDAY, FEB. 22, 1894.

The election in Pennsylvania Tuesday for a Congressman-at-large resulted in the defeat of the Democratic candidate by nearly 165,000. This is the first time in the history of the State that the Republicans carried it by such a tremendous majority, but is only a foretaste of the battle royal to be fought in 1896, when the whole country will be in the Republican line.

PRESIDENT CLEVELAND, after dressing his wounds received in his recent fight with Senator Hill, surprised the country Tuesday by nominating Senator White, of Louisiana, to be associate justice of the supreme court. This spikes Hill's gun, but it will not be news of exceeding joy in the ranks of New York Democracy.

The Senate certainly got a move on itself Tuesday by confirming Senator White to be associate justice a few hours after his nomination was sent in. Old Senatorial Courtesy must have gone out and shaken hands with himself several times and then invited old Personal Dignity to take something. Such occurrences are too unusual to pass over lightly.

The Senatorial Yoke.

The defeat of the administration on the Peckham appointment is not particularly impressive, since it was really done by Republican votes. Twenty-seven Republican Senators gave their support to Hill and two did not vote. Only eight Republican Senators voted for confirmation. With all this Republican support Hill was able to defeat the nomination by a majority of nine votes, so that while he has achieved a personal victory, he sustains a party defeat.

There is a natural relation between snakes and whiskey and it appears that Prof. Wilson has been a victim to the correlation in compounding his famous bill. Ostensibly the bill raises the tax on whisky from 50 cents to \$1 per gallon, but actually by the cute insertion of a snaky provision a reduction is made to the holders of the present stock amounting to 18 1/2 cents per gallon. There are about one hundred millions of gallons of whisky in bond at the present time, and the liberal present of nearly \$20,000,000 to the owners is a fine illustration of Bourbon wisdom governing the whole bill.

Building and Loan Associations.

Building and loan associations have become very popular in late years and have been the means of teaching people of moderate means lessons in economy and enabling them to become owners of their homes instead of paying rent. Directed and managed with business prudence, they are great factors in promoting the growth and adding to the wealth of a town or city. No sooner were their usefulness and popularity demonstrated than their idea was seized upon by speculators throughout the country, and so called "national" associations sprang up thicker than mushrooms after an autumn rain.

The conservative and safe methods of the local associations were improved upon to such an extent that, according to prospectuses of the "nationals," the money of the investor would double and treble itself in an incredibly short time, while the borrower could procure loans at rates that were much more

liberal and the payments a great deal easier to meet than those of his home organization. And they produced figures to prove it too. But practical experience has proved to the investor that figures will lie on some occasions.

These national concerns are managed by high salaried officers who are housed in elegant quarters. They advertise in costly periodicals and deluge the country with circulars and pamphlets printed in the most expensive manner. A local agent in almost every town receives a liberal compensation for soliciting membership, and yet many unthinking people allow themselves to be convinced that they are able to profitably make larger returns for their investment than the home association, the entire expense of which is less per annum than the salary of the janitor who cares for the offices of the national concern.

Hundreds of these corporations have gone to the wall in the past few years, entailing the loss of thousands of dollars to those who could ill afford to stand it. Yet there are still many more in existence, some of them financially sound, it is true, which are annually taking thousands of dollars out of the community where it belongs and wasting it elsewhere. These companies have been well named "rich men's companies." They are promoted and fostered by capitalists, who use the monthly stipend of the workingman and man of moderate means to augment their own bank account.

Saying nothing of the local pride and the advantage to be gained by keeping one's sayings in his own community, business sense should teach any one that these expensive conducted companies, with their costly payroll, cannot honestly offer the inducements for a safe investment that the local association, with its economical methods of management, can.

A Good Word for the Newspaper.

At a recent business convention Governor Francis, of Missouri, who is in a position to know whereof he speaks, paid tribute to the local newspaper as follows:

"Each year the local paper gives from \$500 to \$5,000 in free lines to the community in which it is located. No other agency can or will do this. The editor, in proportion to his means, does more for his town than any other ten men, and in all fairness with men he ought to be supported—not because you like him or admire his writings, but because the local paper is the best investment a community can make. It may not be brilliantly edited or crowded with thought, but financially it is of more benefit to the community than the teacher or preacher. Understand me, I do not mean mentally or morally, but financially you will find most of the local papers on the right side. To lay the editors of the home papers do the most for the least money of any people on the face of the earth."

Justice White.

WASHINGTON, D. C., Feb. 19.—Edward Douglass White, who was today nominated to fill the vacancy in the Supreme bench caused by the death of Justice Blatchford, is one of the best known and most popular men in the State of Louisiana ever sent to Congress. He has been a member of the United States Senate for three years, and had no expectation of being anything else but a Senator for the remainder of his six year term until he was asked to accept the important judicial position for which he has been nominated.

Senator White is a native of the parish of Lafourche, having been born there in November, 1815. His earlier education was received at Mount St. Mary's, near Emmitsburg, Md., and the Jesuit College in New Orleans. The finishing touches were put on at Georgetown College. He served in the Confederate army and at the close of the war took up the study of law. Three years later he was licensed to practice by the supreme court of Louisiana. Interested in political affairs, he achieved the distinction of a seat in the State Senate in 1874; was appointed associate justice of the supreme court of Louisiana in 1878, and when Senator Enstis was retired was elected to the United States Senate.

PROMPTLY CONFIRMED.

There was no opposition to the appointment of Judge White, and after a speech of explanation from Senator Hill, in which he eulogized the appointee, the Senate confirmed the nomination without referring it to the usual committee.

GARRETT COUNTY.

An Interesting Review of its History and Resources.

By J. Jay in Cumberland News.

OAKLAND, MD., Feb. 14, 1894.

A great deal has been written and much more has been said about land titles in Garrett county. For many years prior to the formation of Garrett county the greater portion of the business transacted by the Land Office of Maryland was business from Allegany county. During that period much of the time of the Circuit Court for Allegany county was taken up with that class of business known by the general term of land cases. For several years after the establishment of our county and the organization of her courts, a large percentage of the legal business was of the class above referred to. At the present time, however, ejectment suits are comparatively few. Frequently a whole term of court passes without the trial of a single ejectment suit. By far the greater number of ejectment suits which are instituted nowadays are brought either by some non-resident undertaking to enforce a State claim or by some land shark who seeks to obtain something for nothing.

The great amount of land litigation which for so many years occupied the land office and the courts, resulted from a combination of circumstances which no longer exists. Notwithstanding the fact that the charter of Maryland dates back to 1632 there was very little land surveyed and patented in this section until about the year 1774. A large majority of the patented tracts, which are older than the military lots, (of which I shall speak presently) bear date in 1774.

The "Manor of Lord Baltimore in the Great Glades," containing 17,750 acres, was surveyed in 1768. This was one of the early surveys.

"Yough Manor," containing nine thousand acres, "Republic," containing eight thousand three hundred and seventy-three acres, "Small Meadows," containing five thousand and twenty-five acres, "Thomas and Ann," two thousand and eleven acres, "The Royal Charlotte," two thousand acres, "Kindness," nineteen hundred acres, "The Land Flowing with Milk and Honey," two thousand seven hundred and forty-five acres, "Pence and Plenty," fifteen hundred acres, "Himes Discovery," one thousand acres, "Addition to Eden's Paradise Regained," twenty-five thousand acres, "Ashby's Discovery," one thousand acres, "Bear Camp," twenty-seven hundred and ninety-seven acres, "The Blooming Rose," eleven hundred acres, "Deer Park," two thousand acres, and "The Diadem," sixteen hundred and ninety-six acres, and many other tracts were surveyed in 1771. At that remote period land in this section was not very valuable and the surveys in many instances were not made with accuracy. Many of the old-time surveyors seem to have been careless in describing the beginnings of surveys. I have copied two of these from the patents which will serve to illustrate the point in hand. Here they are:

The tract called "Anythin" is described as "beginning at a bounded maple standing near a spring on the south side of a hill which divides the waters of 'Bear Creek' and 'Bear Camp' about a mile southwest of Adam Parker's at the Bear camp on Braddock's road."

The tract called "Buck's Bones" is described as "beginning at a forked white oak standing about one hundred and ten paces on the south-east side of the mouth of the Little Youghiogheny near a meadow on the south-east side of a ridge about sixty perches on the east side where McCulloh's pack road crosses said meadow, it being the first and only road cut through the 'Yough Glades,' which road leads from the South Branch of the Potomac river to the mouth of Cheat river, and likewise being the end of the first line of His Lordship's manor of 17,750 acres in the said glades, and running thence, &c." These were taken at random, and are fair samples of the descriptions by which the old tracts are to be found. It is not a matter of surprise that some confusion arose when an attempt was made in later years to trace these old lines.

Under a resolution of the General Assembly of Maryland passed in 1787, Francis Deakins laid out four thousand one hundred and sixty-five lots of fifty acres each. These lots were awarded to the officers and soldiers of the Maryland line for their services in the revolutionary war. Nearly all these military lots are included within the limits of Garrett county.

When Deakins undertook to lay out and survey these lots he met with some difficulties by reason of the obscurity of the beginnings and lines of some of the old tracts above referred to. In this way of facts arose which for many years caused much tedious litigation. Mr. Deak-

ins found three hundred and twenty-three families occupying six hundred and twenty-six lots. These lots had been occupied and improved by the settlers, and they were given the privilege of purchasing them and making payment therefor in three annual payments in the years 1789, 1790 and 1791. It was estimated that there were twenty four hundred and twenty-five soldiers entitled to lots, and one hundred were set apart for recruiting officers. A part of the remaining lots were distributed to the officers of the Maryland line and their families. To each officer four lots were given. Under these provisions all the lots were disposed of except those which had been taken up under warrants and locations in sight of American citizens, and actually paid for. At the time the awards were made the land was comparatively valueless, and so remained for a long time thereafter. In later years, however, as the territory was settled and the Baltimore and Ohio railroad was built through this section, the lands gradually improved, became valuable, and attracted the attention of settlers. In the mean time, many of the old soldiers had passed away and in many cases their families seemed to know nothing whatever of their lands or titles.

At this juncture a great many lots were taken up under and included in escheat warrants, and surveys made embracing large numbers of military lots in a single survey. Upon these surveys patents were granted by the State. I will refer to some of the largest escheat patents as follows: "Arden Corrected" containing twenty-three military lots or eleven hundred and fifty acres, patented to Nourse and Templeman, December 1, 1841. "Emancipation," seven thousand one hundred and thirty-seven and a half acres, patented to Oliver and Cunningham, August 4, 1830, contains one hundred and thirty-one lots and vacancy "Hunter," thirty-three hundred and sixty-four acres, patented to Templeman and Stewart, July 19, 1842. "Harrison," has twenty-seven hundred and ninety-four acres. "Internal Improvements," has five thousand eight hundred and twenty-two acres and was patented to Gen. Walker, R. and John B. Armstrong, April 24, 1834. "Latent Worth," has ten thousand seven hundred and sixty-one acres. "Medalpedal," two thousand one hundred and twenty-seven acres. "Potomac Manor," ten thousand seven hundred and ninety-four acres. "The Green Meadows of Deep Creek" have fourteen hundred and eight acres and "White Plains" four thousand one hundred and seventy-five acres. All these patents and hundreds of smaller ones were made up of military lots. In many cases where these escheat patents were granted there were descendants of the old soldiers still living and legally entitled to these. Some of these descendants subsequently undertook to recover these lands, and in some cases they succeeded, but in many instances they found occupants fortified with escheat patents coupled with twenty years actual possession and failed in their attempt to regain that which they had neglected so long. Here we find the descendants of old soldiers and those holding escheat patents with paper titles claiming the same lands.

Owing to the fact that those who located warrants upon military lots did so because the land was considered valuable, they took possession at once. In most cases when the old soldier or his descendants undertook to assert title he or they found somebody in possession, armed with a patent who could successfully resist him. Some twenty years ago one E. W. Cecil came to this section armed with a wagon load of abstracts of title and powers of attorney and undertook to do a great business in assisting State claims to military lots. He represented that his powers of attorney had been executed by bona fide representatives of old soldiers. He operated in this county for several years. He succeeded in deceiving a number of well meaning people into paying him money. Some of them paid him considerable sums, others smaller amounts. There are some people in the county who perhaps still believe Cecil owned a great deal of land, whilst the fact is he never owned a foot in the county. Take his work as a whole it was not a success, nevertheless he annoyed many of our people. At several periods in the history of the county somebody has undertaken to annoy the people with pretended abstracts and sham claims of title, but the business has not been a paying one in the past and is not likely to prove profitable in the future. I mention this fact because it is important for those who contemplate purchasing land in this county to know that they have nothing to fear from land sharks who pretend to have a great deal of knowledge about land titles. Suffice it to say at this point, all our land titles are on record in

the land office and in the offices of the circuit courts, and any man who is green enough to go anywhere else to look for an abstract of title ought to buy money from a green goods dealer and then kick himself for being a fool.

Our land titles are pretty well settled. There is comparatively little land litigation at the present time, and not likely to be much of it in the future. Money may be made in legitimate speculation in Garrett county lands. Indeed, there is a fine chance for investment here. There are no vacant, undefined nor unassessed lands, and there is no possibility of making money by any venture in this direction.

The tax rate has been somewhat against the progress and development of Garrett county. The rate for State and county purposes is higher than it is in any county in the State except, perhaps, one. This should not be the case. In fact it would not be so if the property in the county was uniformly assessed at a fair and proper valuation. When the last assessment was made in 1876 unimproved land was in most cases assessed at a very low figure, and improved lands were assessed at much less than their value. Since that period the population has nearly doubled, thousands upon thousands of acres have been cleared and now have fine buildings upon them. A great many of these farms which were originally assessed at from three to five dollars per acre, are now worth twenty-five or thirty dollars per acre, but the assessment has not been increased. There are hundreds of cases where farms which were assessed at five or six dollars per acre, with very poor buildings, have been since that time improved by good dwellings and large barns. Notably in this case in Selbyport district.

Hundreds of taxpayers whose property has been thus improved are only paying taxes upon the old assessment which was made before the land was improved. It is plain, therefore, if these statements be correct, that the assessment of property in this county for the purposes of taxation is not uniform by any means. It is pretty generally considered that if the real estate in Garrett county were assessed at a fair valuation the basis for taxation would be nearly double what it is. If the basis were double what it is the tax rate would be only one-half what it is at present. The amount to be raised would be no less, but the rate per one hundred dollars would be decreased. This being the case there is no reason why the present tax rate should alarm persons contemplating investing here. Nevertheless it is a fact well known to most persons that one of the first things inquired about by persons proposing to make investments, is the tax rate. It is a matter therefore of the utmost importance to Garrett county that her lands should be reassessed or that the present assessment list should be revised. There are a great many men of prominence, however, who think that the present depressed condition of business and the very low prices of all kinds of personal property make an assessment undesirable at this time. They seem to think the taxable basis would not be increased as much as it ought to be, and that it would be better to wait until business was readjusted itself. Be this as it may, it is safe to say with our lands assessed at the same figures which have been adopted in other parts of the State, our tax rate would compare favorably with the lowest.

METHODS OF COLLECTION.

In the early days of Garrett, the county was divided in three collection districts, and there were three collectors, who were appointed by the county commissioners. Under that system the county commissioners fixed the compensation of the collectors, and they were required to give bonds to the State for the State taxes and to the county for county tax. While there were three tax districts and three collectors there was no division of the county indebtedness. Any one of these collectors was just as much responsible for any particular item upon the levy list as was any other collector. The system was a bad one, and caused a great deal of confusion and delay in the collection of taxes and the payment of the county's liabilities. The credit of the county materially suffered under this system, and the county commissioners adopted a different one, whereby a single collector was appointed, who collected all the taxes and paid all the debts. This was a decided improvement upon the first plan, but still there was a continuous complaint about the delay in paying claims against the county. Frequently money had to be borrowed to pay court expenses. The school commissioners had trouble with collectors, and occasionally had to borrow money and pay interest while waiting for their money to be collected by those officials.

The county worked under these systems until 1888, when the legislature passed a law providing for a county treasurer, and a new method of collection. Experience has demonstrated the wisdom of the new law. The system has worked admirably.

Since the appointment of a treasurer the county's liabilities have always been paid at maturity and many of them before maturity. No suit has been entered against the county for a claim which had been levied so far as I know. No suits have been made upon the treasurer's bond and the credit of the county is first-class. Her standing at the comptroller's office in Annapolis, as shown by the comptroller's report is first-class. Many of the counties are adopting the treasury system and their experience will doubtless be similar to that of Garrett county. The people know where and when to pay taxes and the creditors of the county know where to go for their money.

(TO BE CONTINUED.)

Ten Days Trip to Washington.

Everybody expects to visit Washington some time; in fact it is a duty that every one owes to himself. What Rome was to every soldier of the Empire, what Athens was to the Greek, Washington is and should be to every citizen of the United States—his glory, his pride, his inheritance, his estate—it belongs to him. All its magnificence, all its glory, all its fame, its public buildings, its paintings, its statuary, its monuments, its gardens, its libraries, its museums, its streets and its parks, and he ought once in a lifetime to take a look at the property. When do you expect to take a look at it?

The best train service of the B. & O. R. R. is at your service always, but not reduced rates—they come seldom. The third select excursion to the National Capitol via the B. & O. is announced for March 8th, when reduced rate tickets will be sold from points on its lines between Wheeling, Pittsburg, Parkersburg, Lexington and Hagerstown.

We give below a list of stations in this vicinity showing time of trains and rates of fare.

LEAVE	TIME	TIME	RATE
Griffin	6:45 a.m.	4:05 a.m.	7 1/2
Washington	7:25	4:15	7 1/2
Terre Alto	8:20	2:12	6 1/2
Oakland	8:42	2:37	7 1/2
Piedmont	9:00	6:15	8 1/2
Kaysville	9:15	6:30	8 1/2
Cumtoburn	10:15	7:32	9 1/2

Correspondingly low rates from other stations.

Tickets will be good ten days, and will be valid for passage from Washington to Baltimore at any time within the life of the ticket.

For Pullman car accommodations and guide to points of interest in Washington, address nearest B. & O. Agent.

The Penalty of Bad Roads.

Western soil is especially adapted to raising farm products. For this reason good roads must be the work of art rather than of nature. And the greater the crops the more necessity there is for easy transportation from the farm to the elevators.

It has been estimated that good roads would increase the value of two-thirds of the good farms in the Mississippi and Missouri valleys \$10 an acre. In addition to the difference in the cost of hauling should be considered the great amount of vegetables, garden and dairy products which are shipped by rail from long distances.

Under our present system of dirt roads it is not profitable to make a garden very far from the city market. Farmers living 8 or 10 miles from the city find it difficult to supply customers regularly. As a result they raise only enough to supply their own wants and trust to the general market for the disposal of butter and eggs when they come to town.

But conditions are such that a great many reach market at the same time, and after a few days of scarcity in fresh goods carry an abundance which breaks the market. With gravel or macadam roads farmers would find gardens profitable, and they could make daily or tri-weekly trips with a regularity which would benefit themselves and their customers alike.

In large cities the trade has been forced to keep a good supply of fresh articles constantly on hand, and having learned that the home gardeners are not reliably regular they have arranged for receipts from other states, at an extraordinary expense. Thus the farmer not only loses a near market, but consumers pay for transportation, packing and losses, besides getting staler food.

When local conditions are favorable, the city dealer dares not transfer his trade to the market gardens near home, but must continue to trade abroad at greater cost because his correspondents will not submit to irregularity. It is plain that both town and country suffer for lack of reliable roads.—Kansas City Times.

IRLANDO BOGG'S CHECK.

BY J. J. FULLEN.

R. L. A. N. D. O. BOGG'S wanted to go around the world and he had nothing on earth to go with but time and check. It has been said that time is money, but for some reason Mr. Boggs found it impossible to convert his time into any collateral.

for bread and meat and steamboat fare and railroad riding and other necessities incident to living or traveling. In taking stock of his resources one day, it suddenly occurred to Boggs that his check might be more available and he put himself into a deep thinking trance. Results followed and Orlando Boggs went abroad; in fact he went all around the world; and yet he left home without the ghost of a penny.

The ocean steamship Orpheus was advertised to sail on Saturday night at twelve o'clock. Capt. Findley, one of the jolliest and most sociable of old sea dogs, was the master, and just on time the planks were pulled in and all was made snug on board for the ocean voy-

PLANNING THE TRIP.

age, and no one suspected there was an extra passenger hanging to the railhead post. The Orpheus was a first-class passenger liner and she plowed through the water at a lively rate, having made about two hundred miles at breakfast time on Sunday morning. Capt. Findley was about the deck taking a survey of the weather and looking after things in general, before going below to eat, when a commotion at the stern of the vessel attracted his attention. Going aft he found that a man without shoes, hat or coat had just clambered over the rail of the ship and stood there dripping wet. The first mate was there and had asked the stranger who he was and how he came on board, and to these questions the dripping man's reply was merely an inquiry as to where he could find the captain.

"I am the captain, sir," said that jolly old fellow, all in amaze at the spectacle before him; "now who on earth, or rather on water, are you?" "Glad to see you, captain," replied the visitor; "sorry I haven't heard of you, but you have doubtless heard of Orlando Boggs? I am he."

"Well, Mr. Boggs," said the captain, in still greater wonderment at the easy affability of the man, "I am not sure whether I am glad to see you or not. I must confess to you that I never heard of you in my life; out with it, man, and tell me who you are and how you happened to be on board my ship?"

"Captain, I am Orlando Boggs, the swimmer; how I happen to be here is simple enough; last evening I came down to the beach, as is my usual custom, to take a swim; my system must be out of gear in some way, for when I was out thirty or forty miles I went to sleep and evidently kept right on swimming. It was just daylight when I awoke, and looking about me I espied your ship; knowing my average speed and judging by the rising sun what time it was, I inwardly roared myself for going to sleep and getting so far from land without any preparations or supplies. I began to feel the gnawings of hunger, and realizing it would take me

"OUT WITH IT, MAN."

several hours to return to the city. I determined to overhurl you and ask your hospitality for a meal, and here I am; that's all there is to it, captain."

"Why, confound it, man, you don't mean to tell me that you—why, man, are you crazy?"

"No, captain, I am not crazy, but I am very hungry."

"You swim all the way out here and then overhurl my ship going twenty miles an hour?" stammered the captain; "you did this?"

"Why, certainly; you don't know my record, captain, or you wouldn't be so incredulous; that is nothing for me, sir."

"You come right down to my stateroom, Mr. Boggs; you can have anything you want on this ship."

Mr. Boggs, for sure enough it was

that same individual, with plenty of time and check, was soon fitted out with dry garments and was enjoying a hearty breakfast with the captain. During the meal he related to the captain numberless performances in which he had been engaged and altogether proved decidedly entertaining; his wonderful swimming experiences entertained the captain hugely.

"And now, Capt. Findley, allow me to thank you for your kindness and your hospitality," said Mr. Boggs, as he finished his coffee; "if you will have the steward take me up a couple of sandwiches and let me have my wet clothes I will start back; I want to reach home by supper time, at least."

"Now, see here, Mr. Boggs, I like you, and as you have intimated once or twice you have nothing particular on hand just now, I want to invite you to stay aboard with me for the round trip; I shall take it as a favor if you will; come now, say yes."

Mr. Boggs declared he would be delighted, but called the captain's attention to the fact that he had come away from home without money or luggage.

"How can I, captain," said he, "with only a pair of pants, a pair of suspenders and a negligee?"

"Don't you worry about these things," replied the captain; "you can have all the clothes and money you need while you are with me; you are my guest as long as you will stay."

And so it was arranged. Check had succeeded in taking Mr. Boggs across the ocean in first-class style without a cent. It was a jolly trip, both for Mr. Boggs and the captain, and the former made himself very entertaining to all the passengers; there was nothing too good for Boggs on the Orpheus. On arrival at Liverpool the captain and his guest went ashore for a little change. One of the first things that struck their notice was the advertisements of a great swimming contest to take place that same afternoon. A great champion had challenged the world to swim for a stake of one thousand dollars, the test being both speed and distance.

"Why, here, Boggs," exclaimed the captain, "this is just in your line; you ought to enter this and win that money; will you, if the entries are not closed?"

The question for a moment staggered Boggs, but he quickly braced up and replied that he would be only too glad to do so. The captain went to make inquiries and presently returned saying he had made all the arrangements and had put up the money. Boggs told him he would be obliged to draw on him for a little money to get some necessities for the match, and his friend gave him the cash without the least hesitation. Boggs then disappeared, but just about fifteen minutes before the time set for the start he showed up. He was a sight. He was dressed in tights and on his shoulders and arms were numberless

THE CAPTAIN INSISTED ON HIS TAKING THE \$2,000.

bundles and packages, among them being a small oil stove and some utensils for cooking. The captain greeted him warmly.

"All right, Boggs, my boy? Got everything you want?" he asked.

"Yes, I guess so," replied that cheeky individual; "only I don't know anything about my opponent, and I am in doubt whether or not I ought to take along another ham and a few dozen eggs."

"What's that," said the champion, coming up; "ham and eggs; you don't mean to say you are going swimming with all that truck on you; what is it all, anyway?"

"What is it," replied Boggs, as if surprised at the question; "it is? Why, supplies for the trip, of course."

"Supplies!" yelled the champion. "Why, how long do you expect to be gone?"

"That depends entirely on you, sir," replied Boggs, with dignity; "all I have to do to win the money is to swim longer and faster than you do; I only intend to keep just ahead of you, and if you should keep me out in the ocean for a month or two I don't want to starve, do I? Where are your supplies, sir? It strikes me it is time for us to start."

"Say, see here, mister, is that the way you always swim; do you mean to say you go out and stay two and three months at a time?"

"Certainly," said Boggs; "two or three months are nothing; I swam one match with a native Malay which lasted twenty-one months; come on, let us start."

"Say, mister, I don't think I want to swim with you; you are out of my class. I give it up and you can have the money; I am willing to give it up just to have look at a man rigged out for a three months' swimming match; you beat me, you do."

Orlando Boggs now had plenty of money for his trip abroad, for the captain insisted on his taking the two thousand dollars. They went up to London together, and after seeing the English capital Mr. Boggs went over to the continent and spent several months in keen enjoyment enlivening the globe, seeing all the sights, and he did it all on his check.—Chicago Herald.

—Almost all kinds of labor are paid twice as well in Paris as in the departments of France; bakers in Paris make sixty-seven pence a day, in the departments thirty-five pence, carpenters eighty-three pence and thirty-eight pence respectively.

LUNG HI'S STRANGE STORY.

Told to Consul Hedlow as a Warning to Scotland Yard.

This is the story told Dr. Edw. Hedlow, consul to Amoy, by his secretary in piquant English, its rendition into purer tone and classic phrase has taken from it naught of truth nor added naught of falsehood. By the sons of the ancestors of Lung Hi, the sampanman, it is a true tale, and let no man deny it. Lung Hi, a young man and his contrails grown with pain. The sampanman told it as he sat on the veranda near the doctor's feet one day after tiffin. He smoke a bit of the doctor's good Virginia bright tobacco in a pipe with a bowl no bigger than a pea. The doctor had thrown a stone at an intruder on the porch and repelled him with harsh epithets; Lung Hi had rowed the doctor a good ten miles in the official sampan that day and was philosophic.

"One cannot be too careful what one does or says to an animal," observed Lung Hi. "It possesses the intelligence of the soul it contains and may be the soul of one's grandfather or some other near relative who should be treated with respect."

"Don't you worry about these things," replied the captain; "you can have all the clothes and money you need while you are with me; you are my guest as long as you will stay."

And so it was arranged. Check had succeeded in taking Mr. Boggs across the ocean in first-class style without a cent. It was a jolly trip, both for Mr. Boggs and the captain, and the former made himself very entertaining to all the passengers; there was nothing too good for Boggs on the Orpheus. On arrival at Liverpool the captain and his guest went ashore for a little change. FIRESIDE FRAGMENTS.

—Orange Filling.—Whites of two eggs, beaten to a stiff froth, juice and grated peel of one large orange, and one cup of sugar spread between the layers.—Ohio Farmer.

—A Humble Shin.—A shin of beef washed seven to ten pounds and costing from eighteen to twenty-four cents will furnish two excellent dinners for a family of ordinary size.—Woman's Home Journal.

—Corn Muffins.—Beat two eggs well, add one pint buttermilk, a teaspoonful salt, one-half teaspoonful melted lard, with sufficient meal to make a stiff batter. Add salt and bake in muffin pans.—Orange Judd Farmer.

—Ice Cream Candy.—One and a half coffee cups of sugar, three-fourths of a teaspoonful of water, batter with a teaspoonful of lemon extract and a pinch of cream tartar. Boil all together (except extract) until it becomes hard when dropped in cold water, add the flavoring and pour into buttered tins to cool. When slightly thick, pull out white and cut with shears.—Farm and Home.

—Lamb Chops in Paper With Fine Herbs.—Cut a piece of foolscap paper in the shape of a heart and sufficiently large to fold a lamb chop in, rub a little oil over the paper, then season the chop with a teaspoonful of chopped onion, one of chopped parsley, a little pepper, salt and grated nutmeg. Wrap the chop in the paper, which plait down at the edges; lay it upon a gridiron over a slow fire, turning it frequently. It will take about twenty minutes to broil properly. When done serve in the paper very hot.—Boston Budget.

—Japan Quince Jelly.—Pick from the bush when the fruit is ripe enough to come off easily. Do not pare them. Quarter, and remove all seeds, but not the cores. Put into a preserving-kettle, and a little more than cover with water. Boil until perfectly soft, then strain through serin or cheese-cloth. On no account squeeze, but let slowly drain, and the jelly will be transparent. Take equal parts of juice and sugar, and boil together from fifteen to twenty minutes. Strain into tumbler and cover.—Harper's Bazar.

—Lemon Layer Cake.—Two eggs, save the white of one for frosting, beat the eggs very light and add one teaspoonful light brown sugar. Cream the eggs and sugar together, add one tablespoonful of butter, one-half teaspoonful sweet milk, one teaspoonful extract of lemon, one and one-half teaspoonfuls of flour and two teaspoonfuls baking powder. Bake in three layers from six to eight minutes. This cake is good for any filling.—Filling: One large lemon and two small ones, grated, and one teaspoonful granulated sugar. Mix well together and spread between the layers. Frosting: 1 lb. granulated sugar if fine.

—Orange Judd Farmer.

—Washing Fluid.—One can of concentrated lye, two ounces carbonate of potash, two ounces of ammonia. Mix the lye, a little at a time, in one gallon of hot water. If all is put in at one time it will boil over. Mix the ammonia and potash together in one gallon of cold water. When the lye is cold put all together. About two-thirds of a teaspoon of fluid is sufficient for a large boiler of water. Put in the soiled clothes and let them boil about twenty minutes. Stir frequently. The material should be kept in tightly covered stone or glass jars.—Ohio Farmer.

If all is put in at one time it will boil over. Mix the ammonia and potash together in one gallon of cold water. When the lye is cold put all together. About two-thirds of a teaspoon of fluid is sufficient for a large boiler of water. Put in the soiled clothes and let them boil about twenty minutes. Stir frequently. The material should be kept in tightly covered stone or glass jars.—Ohio Farmer.

—Orange Judd Farmer.

—Washing Fluid.—One can of concentrated lye, two ounces carbonate of potash, two ounces of ammonia. Mix the lye, a little at a time, in one gallon of hot water. If all is put in at one time it will boil over. Mix the ammonia and potash together in one gallon of cold water. When the lye is cold put all together. About two-thirds of a teaspoon of fluid is sufficient for a large boiler of water. Put in the soiled clothes and let them boil about twenty minutes. Stir frequently. The material should be kept in tightly covered stone or glass jars.—Ohio Farmer.

VOLUME 17.

OAKLAND, MD., THURSDAY, MARCH 1, 1894

NUMBER 51.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Originality is naught but judicious imitation.

Mr. John Shartzer was in Rowlesburg Monday.

A fine crayon portrait free for thirty days. Loar & Co.

"Babies a success" at photo gallery. See ad. Loar & Co.

Hon. A. F. George spent Friday in Oakland with his constituents.

Bring the babies and children to photograph. See ad. Loar & Co.

The Knights of Pythias now have over 5,000 members in West Virginia.

Mrs. Peter Conner, who has been very ill for several weeks, is convalescing.

Mrs. G. A. Bolden, of Terra Alta, was here on Thursday last visiting relatives.

Mr. Jos. Rembold, of Horse Shoe Run, was here yesterday on a business trip.

Messrs. John and L. F. Friend, of near Deer Park, were in the city yesterday.

Mr. George W. Moose went to Belington, W. Va., Tuesday morning on business.

Mr. John E. Guagey, the veteran merchant of Accident, was here on business Tuesday.

The foundation of Offutt & Lak-in's new business house is well under way.—Oracle.

Cashier S. T. Jones, of the Garrett Co. Bank, was in town Monday evening.—Oracle.

The annual Easter hop will be given at the Glades on Monday night, March 26th.

Mr. Thaddeus Hinebaugh, of Elkins, was here two or three days this week on business.

Mr. J. S. Gagey, of Dobbin, W. Va., was here Saturday attending the teachers' institute.

Mr. Wm. Jarvis, of Philippi, W. Va., is here on a visit to his daughter, Mrs. G. W. Moose.

Mr. Jonas C. Beachy, of Bittinger, was visiting Mr. and Mrs. M. M. Ashby near town.

For thirty days we will give a fine life-size crayon portrait with each dozen cabinets. Loar & Co.

Rev. S. L. Keller and wife of Aurora, were in Oakland Tuesday and registered at the Central.

We call attention to the card of Mr. Jonas C. Beachy which appears in another column of this issue.

Mr. Isaac Leighton, of near the city, spent Sunday in town with his daughter, Mrs. J. M. Falkenstein.

Those desiring fine photographs should call at once for we will remain here only a few weeks. Loar & Co.

Mr. Benj. Bittinger, of near Bittinger, has removed from that vicinity to the Johnson farm near Oakland.

Messrs. Thomas J. Peddicord and Edward H. Sincell were at Terra Alta Monday on professional business.

New so-called remedies spring up every day like mushrooms; but the people still cling to Dr. Ball's Cough Syrup.

Mayor S. P. Specht, of Deer Park, was in the city on business last Friday and gave THE REPUBLICAN a call.

During last year Mr. John E. Gnagey shipped from his store at Accident 9,720 dozen of eggs to city markets.

For cure of rheumatism, neuralgia, cuts, sprains, burns, stings, chilblains, scalds, and lumbago, use Salvation Oil.

The jewelry store of Mr. Ferguson, of Bayard, Grant county, W. Va., was robbed of several watches a few nights ago.

Mrs. E. P. Russell will accommodate a number of boarders during the March term of court. Rates, 50 cents per day.

Messrs. D. E. Offutt, T. J. Peddicord and John Shartzer, all of Oakland, were in town Tuesday on business.—Terra Alta Oracle.

George Menear, aged sixteen, has been committed to the Preston county jail on the charge of robbing Charles Sisler's store at Terra Alta.

Capt. J. H. Jarboe, of Piedmont, was in Oakland and Mountain Lake Park Sunday. He with his family will soon remove from Piedmont to Iowa.

WANTED TO RENT.—In the central portion of Oakland one or two rooms suitable for millinery store. Miss Mary Cunningham, Lonaconing, Md.

The depth of the snow which fell in Oakland Sunday afternoon and Monday morning was variously estimated at from twelve to eighteen inches.

Mrs. H. Clay Shaw and Mrs. King Delawder, of Oakland, spent Tuesday in Keyser visiting Mrs. Wm. Inskeep.—Piedmont Independent.

Mr. Wm. Culp, of near Dobbin, who is teaching the school at Creolin, was in the city Saturday last attending the sessions of the teachers' institute.

Rev. and Mrs. Wm. C. Davis and little daughter, of Brownsville, Pa., arrived in town Monday evening and are visiting Rev. and Mrs. J. M. Davis on Second street.

Mr. John Lee Harne, of the Citizens' National Bank, Clarksburg, W. Va., spent Saturday and Sunday with his parents in Oakland. He returned to Clarksburg Sunday evening.

The Morgantown Independent says that that town is full of people who do nothing but go from day to day and gather up lies in order to keep up a continual uproar among the citizens.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church.

Miss Mattie Porter, who is teaching at Elkins, W. Va., and who was called home on account of the recent serious illness of her sister, returned to Elkins Saturday morning to resume her duties.

You can get your garden seeds at Henry E. Felty's grocery store. These seeds will be fresh and a great deal cheaper than sending off for them. A new variety of seed potatoes also on hand.

The people of Terra Alta are considering the advisability of purchasing the boiler, engine and dynamos which have been in use at the Oakland electric plant and starting an electric light plant in that town.

The March term of the Circuit Court for Garrett county will convene on Monday, March 19th. There are a great many cases on the docket for trial and the court will be in session longer than usual on this account.

Rev. Henry Carrington Alexander will preach in the Garrett Methodist church, Oakland, on next Sabbath at 11 o'clock a. m. and 7:30 o'clock p. m. The subject of the discourse to be delivered Sunday evening will be "Job."

The condition of Miss Maggie Porter, which has been very critical for some weeks past, is greatly improved, and under the skillful treatment she is receiving at the hands of Dr. Henry W. McComas her ultimate recovery is expected.

Mr. and Mrs. George D. White and children went to Frostburg on last Saturday morning. Mr. White returned to Oakland Monday, leaving his wife and children at Frostburg, where they will remain with friends and relatives some weeks.

Dr. W. N. Berkely, of Frostburg, Md., will be at Accident March 12; Hayes, March 13, and Cranesville, March 14, for the treatment of diseases of the eye, ear, nose and throat. Special attention to the examination of eyes for glasses.

The Universal Plow is the only complete plow made, as you can buy it all steel, or chilled, with steel or wood beam, front or rear adjusting, plain grooved, slip or cutter shears, chisels, knee cutters, jointers, wheels, etc. Write for catalogue, J. M. Davis & Son, agents, Oakland, Md.

Ripans Tabules cure jaundice.

The funeral of Grandmother Lawton, mother of the late Samuel Lawton, sr., occurred on Friday last from the Old Ladies' Home in Philadelphia, of which institution Mrs. Lawton had been an inmate a number of years. The deceased lady was nearly ninety years of age.

Spring-time will soon be here, and so will one of the finest lines of buggies, Daytons, spring wagons, surreys and carts for A. D. Naylor that ever came to Oakland. Be sure to give him a call when in need of anything in this line, for he can suit you both as to price and terms. Some vehicles on hand now.

The new dynamos for the electric light plant have arrived and are being placed in the building as fast as possible. These two machines combined have a capacity of 720 16-candle power lights, or double the capacity of the old machines. They are placed on a foundation of brick and cement, thus giving them a more solid basis which will have a tendency of making the lights steady.

The members of the Oakland band are practicing nearly every night and will so continue until after their concert and minstrel show in Offutt's Hall on the night of Wednesday, March 21st, at which time the March term of Circuit Court for this county will be in session. The band has made wonderful progress and it will be only a short time until it is one of the best in Western Maryland.

The remains of Mr. Martin Grimes, an old and highly respected citizen of Garrett county, who lived at Everett's tunnel, and for a number of years a watchman on the B. & O. railroad at that place, were brought to Westernport Tuesday and interred in the Catholic cemetery. Father Weider conducted the funeral services. Mr. Grimes died last Sunday evening at the age of about 65 years.—Piedmont Independent.

A meeting of the board of directors of the Enterprise Tanning Company was held at their office in Hutton on Tuesday. The full board consisting of Mr. H. L. Clark, president; Wilson B. Bacon, Esq., secretary; Wilson B. Bacon, Esq., Ralph W. Brooks, Esq., and Edward H. Sincell, Esq., were present. The first car load of leather was shipped on Monday of this week from the tannery to eastern markets. The outlook for this company is exceedingly bright.

An exchange enumerates the following nine classes of persons who can certainly depress business in any community: "They are those who go out of town to make purchases; who oppose improvements; who prefer a quiet town to one of push and business; who imagine they own the town and are bound to run it; who think business can be done without advertising; who have no public spirit themselves and dread those who have; who are chronic kickers against every movement they do not originate; who oppose public enterprises which do not directly benefit them; and who seek to run down and injure their fellow townsmen."

Died.—Grace McRobie, the five year old daughter of Mr. and Mrs. Hampton McRobie, died on Tuesday and was buried to-day in the Odd Fellows' cemetery, Oakland.

Speicher.—John Christopher, son of Mr. and Mrs. George Speicher, residing near New Germany, died Feb. 23d, aged six years, five months and twenty-three days. The funeral services were conducted by the Rev. D. C. Leader. Interment was made in the Trinity Reformed church yard.—New Germany Correspondent.

Valuable Advice.—Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardeau Cottage, opposite the bank, Oakland, Md.

Dentistry.—Dr. L. L. Ritter, Proprietor of the Frostburg Dental Parlors, will be at Accident, March 12; Johnstown, March 13; Cranesville, March 14. Teeth extracted without pain.

LADIES.—Needing a tonic, or children who want building up, should take BLOWMAN'S BITTERS. It is pleasant, cures Malaria, Indigestion, Biliousness, Liver Complaints and Neuralgia.

Resolutions of Respect.

At a regular meeting of Garrett Lodge, K. of P., held in Oakland last night, the following resolutions of respect were adopted:

Resolved, It has pleased an all-wise Providence to remove from among us our beloved brother, F. C. Whiter, therefore be it

Resolved, That in the death of our deceased brother, our lodge loses an honorable member, true to every obligation and worthy of our undying devotion and friendship.

Resolved, That in the hour of sorrow and distress we extend to his bereaved family our sincere sympathy and consolation.

Resolved, That the charter of our lodge be draped in mourning for a period of thirty days and a copy of these resolutions be properly engraved and sent to the family of our deceased brother; also a copy be furnished our county papers for publication.

L. E. TOWNSEND,
EDWARD M. SPEDDEN,
BENJ. H. SINCELL,
Committee.

Bargains? Yes!

Children's suits, from \$2 up; boys and youths' suits, from \$5 up; men's suits, from \$5 up; men's pants, from \$1 up; overcoats, only a few left, lower than the lowest. Want to close them out. 50 and 60 cent caps, 35 and 40 cents; \$2.50 hats for \$1.75.

S. L. TOWNSEND & SON.

Married.

LAREW—HARSH.—On Feb. 7, 1894, by the Rev. George W. Kepler, at the M. E. Parsonage, Oakland, Mr. Charles O. Larew and Miss Ida Bell Harsh, both of Grafton, W. Va.

BOND—COOKMAN.—On Feb. 26, 1894, by the Rev. George W. Kepler, at the Commercial Hotel, Oakland, Mr. Lawrence B. Bond and Miss Olive Cookman, both of Harrison county, W. Va.

Rogers' Specific Liniment.

A radical cure for cholera. Sold by A. G. Sturgess, Oakland, C. F. White, Huttons, The Co-Operative store, J. O. DeBerry, Corinth; E. A. Weaver, McHenry, Smith & Callis, Johnstown; J. E. Gnagey, Accident; Jonas Frazee, Young Store Co., R. Liston, Selbyport; A. Wass & Son, Mineral Springs; L. E. Friend, Friendsville; P. T. Gartwright, Mountain Lake Park and at all other general stores.

March Forecast, 1894.

The month will register its entrance cold and frosty in eastern parts; in the west the temperature will be growing warmer and the storm threatening conditions developing, which will culminate in a storm wave about the 3d or 4th in central and eastern parts, which most likely will be severe and of a general character leaving in many places some snow and a cold wave in its rear. About the 5th a change to warmer will start in the west, moving eastward followed closely by a wave of disturbance which will be in transit from the 7th to the 9th in central and eastern parts. Snow, sleet and storms of wind are likely to prevail, especially the latter on the lakes and the Atlantic coast. A cold wave is likely to set in after the passage of the storm holding to about the 12th or 13th. The rainfall from this period is likely to be more general and in greater quantities than has fallen in the past months of the winter. The storms of wind following the 10th or 15th of the month will be very severe in the storm areas, hurricanes and cyclones will develop in many portions of southern and western territory, and also gales exceeding the ordinary will be felt both on the northern lakes and the Atlantic or touching the above dates. Much electric display in the sense of lightning and claps of thunder will be an accompaniment of the periods of storm in question. From about the 13th to 16th storms will be on their passage, which perhaps may leave in their tracks across the continent some snow and swollen streams. From the 19th to the 23d will usher in another period of storms of wind and rain. And from the 25th to the 27th a period of disturbance is reached. All of which are likely to prove in their passage severer at points where conditions favor storm development. The month will close with a storm on the wing. The first half of the month of April is likely to be very changeable alternating from warm and spring-like to cool and very chilly and attended by wet. The after part favorable.

Feb. 18th, 1894. P. R. SMITH.

FINANCIAL REVIEW.

Henry Clews's Weekly Letter on the Business Outlook.

NEW YORK, Feb. 24.—In Wall street, speculative business continues to centre principally in the class of stocks known as "the industrials." The continued uncertainty as to what may be the final status, in the new tariff, of certain articles which these trusts control naturally gives to this group of stocks an active speculative interest. This is especially so in respect to sugar, the duty on which still remains undecided. It seems to be reasonably sure that the Senate will so strongly favor some duty on its article that the house may consent to its removal from the free list; and the best informed opinion inclines to the expectation that the duty on raw will finally range around to one cent per pound. The thing on which Congress is likely to differ is the duty on the refined article. The eastern members of both houses seem to preponderate in favor of a small protective duty on this grade, sufficient to prevent importations; and the south also is likely to favor that course for obvious reasons of interest. But the west, which grows increasingly rampant against any form of protection, may be expected to oppose any form or degree of favor to the sugar trust. The difficulty of the subcommittee of the Senate finance committee in reaching a report is expected to cover some possibility of a serious disagreement. Senators are said to find a much more positive public hostility to incorporating the income tax in the Wilson bill than they expected to encounter; and, in some quarters it is deemed possible that the upper house may venture on the experiment of retransferring the bill to the house minus that odious and unpopular clause. The longer the measure remains in the Senate, the greater the danger of miscarriage from this cause is likely to become; for there can be no question that the public hostility to the tax, through the whole section from Chicago to Baltimore and Baltimore to Portland, Me., is most bitter and intense, and would alone suffice to consign to oblivion the party responsible for the outrage of adopting such a tax. It remains to be seen what these clouds on the horizon may betoken; but Wall street has its eye upon them as involving possibilities important to speculation.

In the railroad list there is little new to attract the attention of either investment or speculation. The scarcity of freight is calculated to encourage "cutting of rates," and something of that kind is now and then attempted, but on so small a scale that it does not appreciably affect general prices. As a rule, quotations are steady and the "bears" find little inducements to attempt raids.

Information comes from Paris to the effect that the bourse has in contemplation arrangements for putting on its regular call a liberal representation of American securities. Certain issues of our government are now called on the bourse; but the proposal to at once extend the list to a selection of the bonds and stocks of some of our best railroads, and at a later period to broaden the list so as to make it an important feature of the Paris market. The distrust created by our silver leanings is shown in a disposition to exclude from the bourse all those of our securities the interest or dividends of which are not payable expressly in gold; but this point does not seem to have been finally determined. This movement appears to have arisen, on the one hand, from a marked scarcity of transferable investments in France and consequently low rates of interest, and, on the other hand, from the impressions made upon notable French capitalists on their visit to the World's Fair. So far as may be inferred from the standing of the promoters of this movement and from the reception it has met with on the bourse, it seems likely that the plan will be put into execution at an early day. If so, it is bearing upon both investment and speculative interests at New York cannot but be highly important. For it is not alone a matter of creating an early market for a Paris supply of securities, but it will widen the European market for our investments, and help to establish a much broader arbitrage interchange in them as between the several foreign financial centres.

The rates for foreign exchange continue to rule, and under ordinary relations between the home

and foreign money markets, gold would now be flowing to Europe. Under existing conditions, however, neither England nor the continent wants more gold; but would prefer to allow American balances to run until the rate of interest improves. There is little probability therefore of any noteworthy shipments of specie being made; and were it otherwise, the effect here, with our abundant supply of idle money, would be rather wholesome than otherwise. HENRY CLEWS.

Notice.

I hereby notify all parties not to trust my wife on my account, for I will not be responsible, as she has left my bed and board without any cause.

NEWTON SAVAGE.
Friendsville, Md., Feb. 19, 1894.
50-31.

Selbyport.

Winter has just begun. Snow 15 inches deep.

Mr. A. C. Browning was in our town last week visiting his son S. S. Browning.

Mr. and Mrs. Jas. Duff, of Export, Pa., and Mr. Fink and Miss Lizzie Lanfer, of Manor Dale, Pa., were visiting at E. J. Stuck's last week.

The Salvation Army held an open air meeting in front of the saloon on last Wednesday evening and created quite an excitement among some of our citizens.

"Squire Griffith was in town last week. The 'Squire' don't come to town often but when he does come he generally stays a few days to have what he calls a good time and we think he had it this time if a long stay means anything in that direction.

The spook story in the Democrat under the head of Selbyport is receiving considerable attention since the election in Pennsylvania. The writer little thought that the old clock which he turned into a real spook had any political significance but it has turned out differently. It is, according to good authority, marking the time of the existence of the Democratic party which is not to be many years at the furthest. That same old spook gave the time when the death knell was sounded to the Demos in Pennsylvania and will do the same next fall, and in '96 it will come down with a vengeance on the heads of the Democratic party and sweep it off the face of the earth.

A number of Juniors from this place attended the bible and flag presentation at Accident on Washington's birthday. They are loud in their praise of the manner in which the whole affair was conducted and say they never heard better speaking in the interest of the order than at Accident.

Wm. Hinebaugh, superintendent of public schools, visited our school on Tuesday the 27th and stated that it was in every way a good school.

Pennsylvania's majority for G. A. Grow for Congressman-at-large was 182,500 up to this a. m. The vote has not all been in yet. The Democratic vote is so small that it takes a long time to find it and the Republican vote so large it takes a long time to count it.

Jno. Weisenborn, the jeweler, was in town Tuesday.

Wm. Houe has purchased a match team. He now has one of the best and finest looking teams in the district.

It is Justices Welsh and Fike now and still we have a Notary Public.

The protracted meeting closed last week. There were a number of conversions and some eight or nine connected themselves with the church.

The Juniors are making arrangements to build a hall next spring. This is a move in the right direction boys. Push it for all it is worth. It will not only benefit you but our town. Some may kick, but they must be promptly sit on a few minutes and that will take the kick all out of them.

Jonas Frazee says he is getting on a car load of salt and means to sell it cheaper than salt has been sold anywhere in the county before. This will please his patrons.

A. G. Meese and S. I. Bowling, of Krug, were visiting friends in town last Sunday.

When Baby was sick, we gave her Castoria.
When she was a Child, she cried for Castoria.
When she became a Man, she clung to Castoria.
When she had Children, she gave them Castoria.

THE REPUBLICAN.

VOLUME 17.

OAKLAND, MD., THURSDAY, MARCH 1, 1894

NUMBER 51.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Originality is naught but judicious imitation.

Mr. John Shartzler was in Rowlesburg Monday.

A fine crayon portrait free for thirty days. Loar & Co.

"Babies a success" at photo gallery. See ad. Loar & Co.

Hon. A. F. George spent Friday in Oakland with his constituents.

Bring the babies and children to photograph. See ad. Loar & Co.

The Knights of Pythias now have over 5,000 members in West Virginia.

The remains of Mr. Martin Grimes, an old and highly respected citizen of Garrett county, who lived at Everett's tunnel, and for a number of years a watchman on the B. & O. railroad at that place, were brought to Westernport Tuesday and interred in the Catholic cemetery. Father Weider conducted the funeral services. Mr. Grimes died last Sunday evening at the age of about 65 years.—Piedmont Independent.

A meeting of the board of directors of the Enterprise Tanning Company was held at their office in Hutton on Tuesday. The full board consisting of Mr. H. L. Clark, president; Mr. U. G. Palmer, secretary; Wilson B. Bacon, Esq., Ralph W. Brooks, Esq., and Edward H. Sincell, Esq., were present. The first car load of leather was shipped on Monday of this week from the tannery to eastern markets. The outlook for this company is exceedingly bright.

An exchange enumerates the following nine classes of persons who can certainly depress business in any community: "They are those who go out of town to make purchases; who oppose improvements; who prefer a quiet town to one of push and business; who imagine they own the town and are bound to run it; who think business can be done without advertising; who have no public spirit themselves and dread those who have; who are chronic kickers against every movement they do not originate; who oppose public enterprises which do not directly benefit them; and who seek to run down and injure their fellow townsmen."

Died.—McRobie.—Grace McRobie, the five year old daughter of Mr. and Mrs. Hampton McRobie, died on Tuesday and was buried to-day in the Odd Fellows' cemetery, Oakland.

Speicher.—John Christopher, son of Mr. and Mrs. George Speicher, residing near New Germany, died Feb. 28d, aged six years, five months and twenty-three days. The funeral services were conducted by the Rev. D. U. Leader. Interment was made in the Trinity Reformed church yard.—New Germany Correspondent.

Valuable Advice.—Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colarado Cottage, opposite the bank, Oakland, Md. 41-tf.

Dentistry.—Dr. L. L. Ritter, Proprietor of the Frostburg Dental Parlors, will be at Accident, March 12; Johnstown, March 13; Craneyville, March 14. Teeth extracted without pain. 51 2t

Resolutions of Respect.

At a regular meeting of Garrett Lodge, K. of P. held in Oakland last night, the following resolutions of respect were adopted:

Resolved, It has pleased an all-wise Providence to remove from among us our beloved brother, P. C. White; therefore be it

Resolved, That in the death of our deceased brother, our lodge has an honorable member, true to every obligation and worthy of our unflinching devotion and friendship.

Resolved, That in the hour of sorrow and distress we extend to his bereaved family our sincere sympathy and consolation.

Resolved, That the charter of our lodge be draped in mourning for a period of thirty days and a copy of the resolutions be properly enclosed and sent to the family of our deceased brother; also a copy be furnished our county papers for publication.

L. E. TOWNSEND,
EDWARD M. SPEDDEN,
BENJ. H. SINCCELL,
Committee.

Bargains? Yes!

Children's suits, from \$2 up; boys and youths' suits, from \$5 up; men's suits, from \$5 up; men's pants, from \$1 up; overcoats, only a few left, lower than the lowest. Want to close them out. 50 and 60 cent caps, 35 and 40 cents; \$2.50 hats for \$1.75. 51 3t S. L. TOWNSEND & SON.

Married.

LAREW—HARSH.—On Feb. 7, 1894, by the Rev. George W. Kepler, at the M. E. Parsonage, Oakland, Mr. Charles O. Larew and Miss Ida Bell Harsh, both of Garrett county, W. Va.

BOND—COOKMAN.—On Feb. 26, 1894, by the Rev. George W. Kepler, at the Commercial Hotel, Oakland, Mr. Lawrence B. Bond and Miss Olive Cookman, both of Harrison county, W. Va.

Rogers' Specific Liniment.

A radical cure for cholera. Sold by A. G. Stargiss, Oakland, C. F. White, Huttons; The Co-Operative Store, J. O. DeBerry, Cornith; E. A. Weiner, McHenry, Smith & Callis, Johnstown; J. E. Gnagay, Accident; Jonas Frazee, Young Store Co., R. Liston, Selvsport; A. Lass & Son, Mineral Springs; L. E. Friend, Friendsville; P. T. Garthright, Mountain Lake Park and at all other general stores.

March Forecast, 1894.

The month will register its entrance cold and frosty in eastern parts; in the west the temperature will be growing warmer and the storm threatening conditions developing, which will culminate in a storm wave about the 3d or 4th in central and eastern parts, which most likely will be severe and of a general character leaving in many places some snow and a cold wave in its rear. About the 5th a change to warmer will start in the west, moving eastward followed closely by a wave of disturbance which will be in transit from the 7th to the 9th in central and eastern parts. Snow, sleet and storms of wind are likely to prevail, especially the latter on the lakes and the Atlantic coast. A cold wave is likely to set in after the passage of the storm holding to about the 12th or 13th. The rainfall from this period is likely to be more general and in greater quantities than has fallen in the past months of the winter. The storms of wind following the 10th or 15th of the month will be very severe in the storm areas, hurricanes and cyclones will develop in many portions of southern and western territory, and also gales exceeding the ordinary will be felt both on the northern lakes and the Atlantic on or touching the above dates. Much electric display in the sense of lightning and claps of thunder will be an accompaniment of the periods of storm in question. From about the 13th to 16th storms will be on their passage, which perhaps may leave in their tracks across the continent some snow and swollen streams. From the 19th to the 23d will usher in another period of storms of wind and rain. And from the 25th to the 27th a period of disturbance is reached. All of which are likely to prove in their passage severer at points where conditions favor storm development. The month will close with a storm on the wing. The first half of the month of April is likely to be very changeable alternating from warm and spring-like to cool and very chilly and attended by wet. The after part favorable.

Feb. 18th, 1894. P. R. SMITH.

FINANCIAL REVIEW.

Henry Clews's Weekly Letter on the Business Outlook.

NEW YORK, Feb. 24.—In Wall street, speculative business continues to centre principally in the class of stocks known as "the industrials."

The continued uncertainty as to what may be the final status, in the new tariff, of certain articles which these trusts control naturally gives to this group of stocks an active speculative interest. This is especially so in respect to sugar, the duty on which still remains undecided. It seems to be reasonably sure that the Senate will so strongly favor some duty on the article that the house may consent to its removal from the free list; and the best informed opinion inclines to the expectation that the duty on raw will finally range around to one cent per pound. The thing on which Congress is likely to differ is the duty on the refined article.

The eastern members of both houses seem to preponderate in favor of a small protective duty on this grade, sufficient to prevent importations; and the south also is likely to favor that course for obvious reasons of interest. But the west, which grows increasingly rampant against any form of protection, may be expected to oppose any form or degree of favor to the sugar trust. The difficulty of the subcommittee of the Senate finance committee in reaching a report is expected to cover some possibility of a serious disagreement. Senators are said to find a much more positive public hostility to incorporating the income tax in the Wilson bill than they expected to encounter; and, in some quarters it is deemed possible that the upper house may venture on the experiment of returning the bill to the house minus that odious and unpopular clause. The longer the measure remains in the Senate, the greater the danger of uncerriage from this cause is likely to become; for there can be no question that the public hostility to the tax, through the whole section from Chicago to Baltimore and Baltimore to Portland, Me., is most bitter and intense, and would alone suffice to consign to oblivion the party responsible for the outrage of adopting such a tax. It remains to be seen what those clouds on the horizon may betoken; but Wall street has its eye upon them as involving possibilities important to speculation.

In the railroad list there is little new to attract the attention of either investment or speculation. The scarcity of freight is calculated and something of that kind is now and then attempted, but on so small a scale that it does not appreciably affect general prices. As a rule, quotations are steady and the "bears" find little inducements to attempt raids.

Information comes from Paris to the effect that the bourse has in contemplation arrangements for putting on its regular call a liberal representation of American securities. Certain issues of our government are now called on the bourse; but the proposal to at once extend the list to a selection of the bonds and stocks of some of our best railroads, and at a later period to include the list so as to make it an important feature of the Paris market.

The distrust created by our silver leanings is shown in a disposition to exclude from the bourse all those of our securities the interest or dividends of which are not payable expressly in gold; but this point does not seem to have been finally determined. This movement appears to have arisen, on the one hand, from a marked scarcity of transferable investments in France and consequently low rates of interest, and, on the other hand, from the impressions made upon notable French capitalists on their visit to the World's Fair. So far as may be inferred from the standing of the promoters of this movement and from the reception it has met with on the bourse, it seems likely that the plan will be put into execution at an early day. If so, it is bearing upon both investment and speculative interests at New York cannot but be highly important. For it is not alone a matter of creating an early market for a Paris supply of securities, but it will widen the European market for our investments, and help to establish a much broader arbitrage interchange in them as between the several foreign financial centres.

The rates for foreign exchange continue to rule, and under ordinary relations between the home

and foreign money markets, gold would now be flowing to Europe. Under existing conditions, however, neither England nor the continent wants more gold; but would prefer to allow American balances to run until the rate of interest improves. There is little probability therefore of any noteworthy shipments of specie being made; and were it otherwise, the effect here, with our abundant supply of idle money, would be rather wholesome than otherwise. HENRY CLEWS.

Notice.

I hereby notify all parties not to trust my wife on my account, for I will not be responsible, as she has left my bed and board without any cause.

NEWTON SAVAGE.
Friendsville, Md., Feb. 19, 1894.
50-3t.

Selvsport.

Winter has just begun. Snow 15 inches deep.

Mr. A. C. Browning was in our town last week visiting his son S. S. Browning.

Mr. and Mrs. Jas. Duff, of Export, Pa., and Mr. Fink and Miss Lizzie Lauffer, of Manor Dale, Pa., were visiting at E. J. Stuck's last week.

The Salvation Army held an open air meeting in front of the saloon on last Wednesday evening and created quite an excitement among some of our citizens.

"Squire Griffith was in town last week. The "Squire" don't come to town often but when he does come he generally stays a few days to have what he calls a good time, and long stay means anything in that direction.

The spook story in the Democrat under the head of Selvsport is receiving considerable attention since the election in Pennsylvania. The writer little thought that the old clock which he turned into a real spook had any political significance but it has turned out differently. It is, according to good authority, marking the time of the existence of the Democratic party which is not to be many years at the furthest. That same old spook gave the time when the death knell was sounded to the Demos in Pennsylvania and will do the same next fall, and in '96 it will come down with a vengeance on the heads of the Democratic party and sweep it off the face of the earth.

A number of Juniors from this place attended the bible and flag presentation at Accident on Washington's birthday. They are loud in their praise of the manner in which the whole affair was conducted and say they never heard better speaking in the interest of the order than at Accident.

Wm. Hinebaugh, superintendent of public schools, visited our school on Tuesday the 27th and stated that it was in every way a good school.

Pennsylvania's majority for G. A. Grow for Congressman-at-large was 182,500 up to this a. m. The vote has not all been counted yet. The Democratic vote is so small that it takes a long time to find it and the Republican vote so large it takes a long time to count it.

Jno. Weisenborn, the jeweler, was in town Tuesday.

Wm. Houe has purchased a match team. He now has one of the best and finest looking teams in the district.

It is Justices Welsh and Fike now and still we have a Notary Public.

The protracted meeting closed last week. There were a number of conversions and some eight or nine connected themselves with the church.

The Juniors are making arrangements to build a hall next spring. This is a move in the right direction boys. Push it for all it is worth. It will not only benefit you but our town. Some may kick, but they must be promptly sit on a few minutes and that will take the kick all out of them.

Jonas Frazee says he is getting on a car load of salt and means to sell it cheaper than salt has been sold anywhere in the county before. This will please his patrons.

A. G. Meese and S. L. Bowling, of Krug, were visiting friends in town last Sunday.

When Baby was sick, we gave her Castoria.

When she became a Child, she cried for Castoria.

When she became a Man, she clung to Castoria.

When she had Children, she gave them Castoria.

The Republican.

OAKLAND, GARRETT CO., MD.

THE "MORNING STAR."

BY EDEN PHILLIPOTT.

"Is this, along with his father's face?"

"Aye, and his mother's warm heart," answered John Bates. "You're his uncle, don't be too hard on the boy."

Thomas Garth, the first speaker, made no immediate answer. He shifted his pipe, looked out over a gray sea streaked with foam, torn with wind, and then sat down again under the weather side of a wall upon Perranopol quay.

"It's like this, Bates; Mike Tregaskis had his evil way before he left near eighteen years ago. And this boy's the risen ghost of his father."

"Do Dick know about his father?"

"In a manner of speakin' yes. Dick knows 'is father left Mary; an' 'e ses 'e goin' to roam the world some fine day and bring Michael Tregaskis back to 'is mother."

The speakers were two grizzled Cornishmen, and the boy who they discussed, now interrupted conversation, for he came briskly along the quay. Dick was a smooth, brown-faced lad—froward enough, as his uncle declared—but well put together, strong, energetic like his father, and a splendid sailor. He had wanted to go into the royal navy, but his mother could not nerve herself to let him go. So he stopped at Perranopol, in mischief most of his time, the cock of the walk amongst the youngsters of the neighborhood. He was a wild hawk of a boy and picked his life from morn till night, on the sea, on the cliffs amid the gull's nests, or where any spice of danger lurked. He loved his mother with all his heart and caused her a world of mingled terror and joy. Nobody ever knew what Dick would do next. Some times, though less often as he grew older, he vowed to go out into the world and find his father and bring him home to Perranopol, but with years the determination waned. The world was a big place, Dick discovered, and all that was ever known of Michael Tregaskis in Perranopol, after he went away, amounted to a rumor that he had gone as a sailor to foreign parts.

Dick came down the quay to where old Garth and John Bates were smoking their pipes. He stopped and spoke abruptly to them:

"I been up on the head. 'Tis wicked work brewing to the eastward—a black gale blowing up. The air's stingin' with it already."

"Like enough, boy."

"How's the 'Devil's Teeth,' Dick?" asked Bates.

"The 'Devil's Teeth' was a ridge of sunken rocks that showed a jagged, serrate edge above water at low tide. It lay to the east of the little harbor of Perranopol, about half a mile from shore."

"Old Nick's showin' 'em," answered the lad. "He's champing the water to froth with 'em. Look there's a ugly nubby out there to-night! I'd like to see him come down on that lee shore."

"Out on you, boy!" swore his uncle. "You an' your duds with fisher folks to wish that. Are you daff? Mayhap God Almighty'll drive you on a lee shore fore 'e's done with you. Your 'art's harder an' blacker'n Cornish rocks!"

"I don't wish no 'art to none, uncle," answered Dick, looking out into the oncoming night, "but 'tis this way. Long Dyke's lad, by with some ill that's took 'im in the loins, an' I'm next—next for the life-boat. I've got the cap'n's word for it. He sed me pull in the regatta to Falmouth last summer, and 'e giv' 'is word. That's why I'd not cry if so be there come a wreck on the 'Devil's Teeth."

"'Tis true," said Bates; "Long Dyke's in dock with innabagey an' the boy's next."

"Do you mother know, Dick?"

"No. Time to tell 'er when I've gone an' come back again."

"A dirty night, an' 'e giv' to be a blamed sight dirtier. I'm for home," said John Bates.

"Doan't name the life-boat to mother."

"Nay, not me. God send no call to name it to none."

The storm that night was tremendous. Few of the oldest men in Perranopol could remember a worse. When the tide turned and came high, the night glimmered with ghostly gray light of white water, breaking in sheets or of the quay; the wind shrieked and filled Perranopol with flying brine and lashing rain. But down trembled into the chaos at last, and just after the earliest dim touch of it, Dick, sleeping restlessly enough, heard a sound that brought him out of bed and into his clothes like a flash of lightning. Lander than the hurle of the rain, louder than the roar and shriek of the gale, came the third and solemn boom of a heavy gun. After a minute's pause the sound shook his easement again in a lull of the wind; and Dick knew it was a signal from the coastguard station—the signal for the life-boat.

In less than ten minutes he was alone. Such all lamps as had not been blown out still roared and twinkled in the little street. The tide was out again, and Dick fairly gasped as he got

down on to the quay and met the wind. Over the beach he went, his head low, his tarpanling cracking and bulging. The sea was terrible now—a gray, bubbling, boiling hell of raging water, racing up over the sands, sheet upon sheet, with a circular swirl as each wave fell back, churning and rattling and hissing, into the lap of the undertow; while beyond the white water, a livid, lead-colored sea was running mountains high, bursting in a roar against the breakwater, sending up columns of flying white foam into the dull gray of dawn. The wind had veered a trifle, and was now blowing a gale right on shore. Dick strained his eyes, but he was upon a level with the sea, and could note nothing. Presently sky, and then where the "Devil's Teeth" grinned back in a line of breakers, the boy saw a mast hanging above the water—a solitary mast with black dots upon the shrouds of it. Many were at the lifeboat before Dick. She was already out of her house, perched on lofty wheels, waiting for the approaching team of horses to get her to the sea. Then Dick learned that he had seen no vision through the storm drift. There was a two-masted ship in the "Devil's Teeth"—a schooner, hard and fast upon the rocks. Her mizzen-mast had gone, but her lower fore-mast was standing and a crew of eight or nine men could be seen in the rigging. Dick was sweeping her deck and at any moment the ship might break up. It was a race between the hungry storm and the men ashore. The lifeboat soon loomed in the surf and Dick and the captain and others of the crew were hurrying down to her, when, to the boy's bitter sorrow, Long Dyke appeared, clad in his cork jacket, limping down with the crowd over the sand to take his usual place. Half Perranopol was on now. Many wild-eyed, hard-featured women, with their hair in the wind, their clothes flying, were struggling down to the water. Most of them had men in the lifeboat, but it was no new thing, only a phase of life. Every man who came safely ashore would be a guinea richer. They dragged their shawls about them and stood like birds on the fringe of the sea, fearless, bedazzled, unmoved. Dick's mother was there, not silent, not tearful. She hung on his arm and prayed him for the love of God to stay. He was too young; he was all she had in the world; she had dreamed an evil dream, even that night, that his days were done. That Tom Garth upheld Dick in his ambition and, what was more important, Capt. Silver, of the lifeboat, supported the boy and refused to take lame Long Dyke aboard. Then the grumbling elder yielded up his belt to the youngster and a woman screamed and fought with the men who held her back.

the wind; Dick sweat at his oar and did the work of a strong man; Michael Tregaskis, master of the "Morning Star," hung lashed to the stump of the fore-mast, a life arm was broken, but he made his way to the shrouds, and made him fast aloft in the best place. Hope was struggling in the frozen hearts below him, for they saw the boat. There was a great chance yet if the "Morning Star" could hold together. But the man with the broken arm did not watch approaching salvation. His eyes roamed to the black moving spots on the cliffs, to Perranopol, lying snug not a mile away. His Maker was just; he had brought Tregaskis to a hard lee shore, but a just one. Six lives still rested in the balcony. Two men had already fallen, and a third hung dead, like one crucified, with shrouds for cross, where he had lashed himself in the rigging. Capt. Silver knew his perilous business, and in half an hour, or less, the lifeboat dropped under the stern of the wreck. The tide was low now, and a man might cross the shattered deck aloft saw, and soon a sailor, white and wild with the error of death, ran his chance, got across and jumped for it, and was dragged into safety.

Four of the others did likewise, but there was some delay in the rigging before the last sailors came down. Dick, who was on the deck, saw the lifeboat, and was dragged aboard. They explained that the two men still above one was dead, the other refused to let them rescue him.

"He's our skipper and his arm's broke, but we got him up and lashed him taut; but he won't come down, so we left 'im, 'cause it's every man for himself now," bawled the rescued man of the "Morning Star" into Silver's ear. Then he huddled down with his fellows and drank brandy that had been brought for them.

"The man must be mad," said Capt. Silver, looking up and noticing that the shipwrecked skipper aloft was signaling him away with his sound arm. The ship was breaking up fast the danger increasing every moment.

"Let 'im go," said the mate, better for brandy. "You can't board her. Mike Tregaskis won't change his mind for you."

Then one who had overheard the name left the oar he was tugging with another man—tugging to keep the lifeboat in its place—and got over to Silver.

"I heard—I know," said Dick—"an, you know; it's my father—an' mother at 'ome, waitin' for me an' 'im! Lemme try, Cap'n."

"Lord! there's a fitness in it for sure. If any could get aboard 'er you could, Dick. 'Tis Providence brought you out, I guess. See them shrouds from the mizzen floating like a rope lad."

"I heard—I know," said Dick—"an, you know; it's my father—an' mother at 'ome, waitin' for me an' 'im! Lemme try, Cap'n."

"Lord! there's a fitness in it for sure. If any could get aboard 'er you could, Dick. 'Tis Providence brought you out, I guess. See them shrouds from the mizzen floating like a rope lad."

The tide was low now, and a man might cross the shattered deck aloft saw, and soon a sailor, white and wild with the error of death, ran his chance, got across and jumped for it, and was dragged into safety.

Four of the others did likewise, but there was some delay in the rigging before the last sailors came down. Dick, who was on the deck, saw the lifeboat, and was dragged aboard. They explained that the two men still above one was dead, the other refused to let them rescue him.

"He's our skipper and his arm's broke, but we got him up and lashed him taut; but he won't come down, so we left 'im, 'cause it's every man for himself now," bawled the rescued man of the "Morning Star" into Silver's ear. Then he huddled down with his fellows and drank brandy that had been brought for them.

"The man must be mad," said Capt. Silver, looking up and noticing that the shipwrecked skipper aloft was signaling him away with his sound arm. The ship was breaking up fast the danger increasing every moment.

"Let 'im go," said the mate, better for brandy. "You can't board her. Mike Tregaskis won't change his mind for you."

Then one who had overheard the name left the oar he was tugging with another man—tugging to keep the lifeboat in its place—and got over to Silver.

"I heard—I know," said Dick—"an, you know; it's my father—an' mother at 'ome, waitin' for me an' 'im! Lemme try, Cap'n."

"Lord! there's a fitness in it for sure. If any could get aboard 'er you could, Dick. 'Tis Providence brought you out, I guess. See them shrouds from the mizzen floating like a rope lad."

"I heard—I know," said Dick—"an, you know; it's my father—an' mother at 'ome, waitin' for me an' 'im! Lemme try, Cap'n."

"Lord! there's a fitness in it for sure. If any could get aboard 'er you could, Dick. 'Tis Providence brought you out, I guess. See them shrouds from the mizzen floating like a rope lad."

"I heard—I know," said Dick—"an, you know; it's my father—an' mother at 'ome, waitin' for me an' 'im! Lemme try, Cap'n."

"Lord! there's a fitness in it for sure. If any could get aboard 'er you could, Dick. 'Tis Providence brought you out, I guess. See them shrouds from the mizzen floating like a rope lad."

"I heard—I know," said Dick—"an, you know; it's my father—an' mother at 'ome, waitin' for me an' 'im! Lemme try, Cap'n."

"Lord! there's a fitness in it for sure. If any could get aboard 'er you could, Dick. 'Tis Providence brought you out, I guess. See them shrouds from the mizzen floating like a rope lad."

"I heard—I know," said Dick—"an, you know; it's my father—an' mother at 'ome, waitin' for me an' 'im! Lemme try, Cap'n."

"Lord! there's a fitness in it for sure. If any could get aboard 'er you could, Dick. 'Tis Providence brought you out, I guess. See them shrouds from the mizzen floating like a rope lad."

"I heard—I know," said Dick—"an, you know; it's my father—an' mother at 'ome, waitin' for me an' 'im! Lemme try, Cap'n."

"Lord! there's a fitness in it for sure. If any could get aboard 'er you could, Dick. 'Tis Providence brought you out, I guess. See them shrouds from the mizzen floating like a rope lad."

"I heard—I know," said Dick—"an, you know; it's my father—an' mother at 'ome, waitin' for me an' 'im! Lemme try, Cap'n."

"Lord! there's a fitness in it for sure. If any could get aboard 'er you could, Dick. 'Tis Providence brought you out, I guess. See them shrouds from the mizzen floating like a rope lad."

"I heard—I know," said Dick—"an, you know; it's my father—an' mother at 'ome, waitin' for me an' 'im! Lemme try, Cap'n."

"Lord! there's a fitness in it for sure. If any could get aboard 'er you could, Dick. 'Tis Providence brought you out, I guess. See them shrouds from the mizzen floating like a rope lad."

"I heard—I know," said Dick—"an, you know; it's my father—an' mother at 'ome, waitin' for me an' 'im! Lemme try, Cap'n."

"Lord! there's a fitness in it for sure. If any could get aboard 'er you could, Dick. 'Tis Providence brought you out, I guess. See them shrouds from the mizzen floating like a rope lad."

"I heard—I know," said Dick—"an, you know; it's my father—an' mother at 'ome, waitin' for me an' 'im! Lemme try, Cap'n."

"I heard—I know," said Dick—"an, you know; it's my father—an' mother at 'ome, waitin' for me an' 'im! Lemme try, Cap'n."

SCIENCE AND INDUSTRY.

The bee works harder than most people would believe. There are about fifty thousand bees in every head of clover, and only a tiny morsel of honey in each. In order to get enough sugar for a load the bee must visit about 5,000 different flowers, and each bee must make, on an average, twenty trips a day.

Notwithstanding the fostering care of the French government, sheep breeding has declined in Algeria, and official reports show that for several years past there has been a progressive decrease in the number of sheep. The present number is estimated at 8,800,000, the estimates being based on official figures.

During the last seven years the area devoted to indigo in India has been about 300,000 acres, but in 1903 it sunk nearly one-third. A favorable season and a rise in the price of indigo at Calcutta, led to a great extension of the industry in 1903, and the area of cultivation was estimated at 350,000 acres. The output was about 80 per cent. above the average rail exports for the last twelve years.

If the reported results of recent researches in diptheria by the bacteriological bureau of the New York health department are confirmed, they are extremely important. The power to transmit the infection of diptheria, it is found, lingers sometimes for as much as twelve days and occasionally three or four weeks in patients who have made an apparently perfect recovery from this most deadly disease.

Dr. William C. Braithwaite shows that in negroes the nasal canals are wider, shorter and less deep than in other races, and thereby less protection is afforded the lungs. The author believes that the African nose, being adapted to a tropical climate, is not suited for the colder climates, and that in this lies the greater susceptibility of the negro to consumption and other diseases depending upon irritating qualities in the atmosphere.

Experiments in magnetizing and concentrating the low grade soft red ores of some southern districts are in process, and said to be so far promising of good results. The consulting chemist of the Tennessee Coal, Iron and Railroad Company, operating upon 3,000 pounds at a time of the crude ore which contained 40 per cent. of iron and 20 of silica, has been able to secure 55 per cent. of iron and reduce silica to 10 per cent.—Age of Steel.

Exhaustive nose bleeding is frequently one of the most difficult things to check. Several aggravated cases have lately occurred at the hospital of the University of Pennsylvania. As a last resort, Dr. B. Hayes Agnew tried ham fat with great success. Two large cylinders of bacon were forced well into the nostrils and the hemorrhage ceased at once. This is a very simple remedy and one which should be remembered for cases of emergency in the country.

The deepest boring of which we have any knowledge up to the present time, says Revue Scientifique, is at Paryschowitz, in the district of Rhenish, in Western Silesia. The depth attained is 6,568 feet, and the diameter of the hole is only 2 3/4 inches. The work has been temporarily stopped, in order to lower special thermometers, which have been made with great accuracy, into the hole for the purpose of obtaining the temperature at different depths. The boring will then be resumed and it is hoped that the depth of 10,000 feet will be reached.

In a German medical journal Dr. F. Imberger treats of the peanut as an article of food rich in albumen, of which it contains 47 per cent., together with 19 per cent. of fat and non-nutritious extraneous matters. He recommends the use of roasted peanuts in the form of soup or mush. On account of their cheapness peanuts are recommended as a popular article of food, especially in poorhouses and the like; moreover, they are recommended as an article of food for the convalescent, diabetics and for the subjects of kidney disease, in the last mentioned of whom foods rich in animal albumen are to be avoided.—N. Y. Tribune.

Feeling His Way.

"Excuse me, ma'am," said the tramp. "Have you got any wood you want split?"

"No."

"His face brightened. 'Any wood you need carried?'"

"None whatever."

A smile stole over his features as he went on.

"Is there any work of any kind ye could call on me fur?"

"No."

With intense relief, he said: "Thank yer, missus, for them assurances, even if yer charity don't go no farther. Yours is the first house that's let me git round to the question terday. Have yer got any cold victuals?"—Washington Star.

An Obvious Danger.

"Don't give that dish to that man!" hurriedly whispered the proprietor of a restaurant.

"Why not?" asked the waiter, who was serving a table d'hôte dinner to a guest.

"It's an eel. Don't you see he's already on the point of having the Jim-jams?"—Chicago Tribune.

Evolution of a Card.

TEMPERANCE NOTES.

A SOCIAL MENACE.

The Growing Evil of Drink by Women of Culture.

There is an evil under the sun which has, within the last decade, made itself too manifest among the ranks of fashionable women to be longer ignored—an evil which may be politely called the overuse of alcoholic stimulants. If men were the offenders another far more specific name would be used, but this vice in connection with women is so abnormal, so subversive of all the ideas and traditions associated with the sex, that there is a very strong tendency to hush up all mention of it. With the exception of one or two society papers of the bravest sort, and one or two purely ladies' newspapers, the press—usually so fearless in denouncing social ills—has been nearly reticent on the matter. And it is an evidence of the deep feeling on this subject that even the comic papers have respected the pitiable lapse, and have refrained from making jokes on a question of such serious import.

But pretending not to see an evil is not the way to get rid of it. Doctors may call it by euphonistic scientific names, doctors may not feel it to be their interest to move the question; W. C. T. U. societies may consider the divinity of the avenues outside their efforts; but women of wealth and influence can not longer afford to neglect a vice which is a blot upon their order and which, if suffered to take its course, is quite capable of undermining the whole glittering structure of their social world.

The excessive use of wine and spirits by women of culture is a vice of this era. Many brilliant and famous men have been notorious drunkards, but I fail to remember one famous woman, with this stigma darkening her name, in all the past centuries. Our drawing room drinking is a phase of our special social life, and has sprung from the almost superhuman demands of society upon women—the social friskiness—the afternoon wit—the great fun—the "go"—which is expected at continual functions of so-called pleasure, and the necessity that the members of them should be up to their neck.

And unfortunately the entering in of this vice is so natural that it is hardly observed. A glass of wine or a tablespoonful of brandy is privately taken some day to meet the social strain, and is found to be apparently restorative. The stimulant makes the taker feel that the dance or the dinner, which seemed to be impossible, is possible; and thus she is tempted to a renewal of the labor which she had just dropped from exhaustion. But she was already helped to wear herself further out; and so, even physically, the last state of that woman was worse than the first. The little slips of spirit soon lead the taker of them beyond her own control; the intervals between them decrease, the quantities increase, and before she is aware she has drifted into courses without excuse and full of danger; for just as soon as a woman feels incompetent without her usual drink, the barriers of safety have been already passed.

It must be allowed that the conditions under which the terms of fashionable hard labor are carried on in their seasons are full of temptations to the use of stimulants. The heated vitiated atmospheres of ball-rooms, the late hours, the overloaded stomachs from feasts of many courses, the numerous engagements following one another in ceaseless routine—all these things clamor for artificial aid. But the champagne usually taken under such circumstances only jogs the nerves, and so invites the use of some stronger liquor to quiet them. Stimulants can not create strength, and a dose of wine that makes a tired woman feel "jolly," that gives her "tone" and "go," is bought by such paralysis of the nerves as disorders her perceptions, and such weakening of the brain as dulls her moral senses. For women ought to clearly understand that the excitement produced by wine results from an ineffectual paralysis of the nervous system.

The physical results, however, are not the worst. Dr. Anstie, in his work on stimulants, plainly says that "the essence of intoxication consists in the destruction of that power in the brain which retains or recalls moral and prudential impressions." And as it is also well known that there is in the brain substance a positive attraction for alcohol, a woman may well feel afraid to encourage a vice which is not only to fight from the outside, but which is powerfully aided by mutiny from within.

Neither can stimulation by alcohol be hidden. The youngest man knows whether his partner's high spirits are the natural joyousness of her nature or the result of champagne. If the latter the flushed face, the loosened tongue, the reckless manner reveal at once the unhealthy brain action; the woman has unveiled to him the lowest part of her nature, and if for the hour he sympathizes and responds, real affection or real respect have no part in his words or actions. Any physician, any ordinary man, knows that the physical and moral effects of alcohol on a woman are to denaturalize her.

But with any considerations of physical and moral health prevent women from drinking of that cup which in the end "stings like an adder"? It is certainly always easy to check a virtuous impulse by a reflection that to carry it out will injure our health; but how many check vice by a similar consideration? There is, however, one circumstance that is favorable in this case—very few women drink because they like to drink. They often loath the spirit they swallow. It is not their palate they desire to please; it is that they may saturate their nervous system, and thus be equal to their social engagements, and in their "biggest feather" during them. But at what a frightful cost they do this, let them ask their physician; and if he is truthful with them they will tremble at the count. Let the young ask the middle-aged, and they will admit that if twenty or thirty years ago paralysis slew its thousands, it now slays its tens of thousands. They all admit that in society there is no distinct moral relaxation; that in the presence of unmarried women are more unabashed, and that the tendency of that society which calls itself "good" is to the particular license resulting from overstimulation from alcoholic drinks.

Other fashionable faults may be condoned, may admit of palliation, may be thrown off by an exercise of will, or dropped because they have become unfashionable, but the increase of drawing-room drinking attacks society in its most vital part. Women are the salt of the world, but if the salt loses its savor, what then? Will not the decomposition of the world follow? Men may drink with far greater impunity than women, both personally and socially. Personally they have more will power to resist the domination of alcohol and socially their influence and examples as slaves to it is far less disintegrating. It is a great truth that vice in a woman is more of a crime than the same vice in a man.

For in social manners and customs, women are the autocrats of conduct and custom. If, then, women should ever make certain vices tolerable there would be no barrier left against them, and the influx of many secondary passions would be not a social crime, but a social evil. A drinking woman is a social criminal of the worst type, and the idea is so shocking that it requires an effort of the will to contemplate her.—Amelia E. Barr, in N. Y. Herald.

DRINK AMONG THE ANCIENTS.

Penalties Imposed Upon Drunkards of All Classes.

The offense of drunkenness was a source of great perplexity to the ancients, who tried every possible way of dealing with it. If none succeeded, probably it was because they did not begin early enough, by intercepting some of the ways and means by which the insidious vice is incited and propagated. Severe treatment was often tried to little effect. The Loerians, under Zaleucus, made it a capital offense if a man drank wine, if it was not mixed with water; even an invalid was not exempt from punishment, unless by order of a physician. Pittacus, of Mytilene, made a law that he who, when drunk, committed any offense should suffer double the punishment which he would if sober; and Plato, Aristotle and Plutarch applauded this as the height of wisdom. The Roman censors could expel a senator for being drunk and take away his horse. Mahomet ordered drunkards to be bastinadoed with eighty blows. Other nations thought of limiting the quantity to be drunk at one time, or at one sitting. The Egyptians put some limit, though what it was is not stated. The Spartans also had some limit. Arabians fixed the quantity at twelve glasses a man; but the size of the glass was, unfortunately, not clearly defined by the law. The Anglo-Saxons went no further than to order silver nails to be fixed on the side of drinking cups, so that each might know his proper measure. And it is said that this was done by King Edgar after noticing the drunken habits of the Danes. Lycurgus of Sparta, went to the root of the matter by ordering the vines to be cut down. And his conduct was imitated in 704 by Tarbulus of Bulgaria. The Spartans tried to turn the vice to account by systematically making their slaves drunk once a year, to show their children how foolish and contemptible men looked in that state. Drunkenness was deemed much more vicious in some classes of persons than in others. The ancient Indians held it lawful to kill a king when he was drunk. The Athenians made it a capital offense for a magistrate to be drunk, and Charlemagne imitated this by a law that judges on the bench and pleaders should be sober. The Carthaginians prohibited magistrates, governors, soldiers and servants from drinking. The Scots, in the second century, made it a capital offense for magistrates to be drunk, and Constantine II. of Scotland, 861, extended a punishment to young people. Again, some laws have absolutely prohibited wine from being drunk by women; the Massilians so decreed. The Romans had the same, and extended the prohibition to young men under thirty or forty-five, and the husband and wife's relation could be severed for wife for offending, and the husband himself might scourge her to death.—Journal of Inebriety.

NOTES BY THE WAY.

A prison chaplain very tersely said: "Crime is simply condensed alcohol." Sir Andrew Clark, the general physician in the largest hospital in London, says that seven out of every ten persons treated there owe their ill-health to drink. Ninety-five dollars per day by two hundred and fifty thousand, the number of saloons, that result by three hundred and sixty-five days and the final result represents the drink bill for the United States. The new commander-in-chief in India, Sir George White, has warmly indorsed the Army Temperance association and spoken strong words to it in favor of total abstinence, reminding it that nearly all crime in the service may traced to drink. FREDERICK MARSHALL LORD NATHAN says: "On reviewing the records of soldiers' offenses all practically have their origin in drunkenness. Of one thousand and eight hundred men under my command in India the total abstainers had no crimes. The temperate men had practically none. The whole body of crime was among the non-abstainers." A MILLION of dollars is what the liquor traffic costs this country every year. It takes by far the largest part of it out of the pockets of the laboring class and gives them nothing of value in return. The greatest foe of the poor man is the drink. It is the greatest monopoly in the land.

MISCELLANEOUS.

—Seattle, Wash., was so called after a powerful Indian chief of the neighborhood.

—Marriages with the deceased wife's sister or husband's brother numbered in France, in 1883, 355 per 100,000 marriages.

—One of the most disagreeable duties of the Hawaiian police is the examination and arrest of persons suspected of having leprosy.

—Some persons are so busy talking about what they intend accomplishing that they never find time to begin.—Young Men's Era.

—Some men are known by their words and works; others by the color of their neckties and the cut of their clothes.—Young Men's Era.

—Bobbie—"I got a awful toothache." Jimmie—"Been eatin' candy?" Bobbie—"No." "What made it then?" "Look in' at the coal that's to be carried in."

—Inter Ocean.

—Goldsmith's improvidence caused him great annoyance. He was more than once compelled to dodge his creditors and on at least one occasion was locked up for debt.

—Virgil's sore point was the fact that he could not converse pleasantly. He often envied the fops of the Roman court who could talk with ease on the ordinary subjects of the day.

—Gluck's life was made a burden by musical squabbles. He was a peaceable man, but it was his misfortune to be constantly mixed up in the broils of his admirers and their opponents.

—Little Rock took its name from the ordinary subjects of the day.

—From Arizona for three years past has come the earliest car load of American raisins shipped east.

The season there is ahead of that of southern California and the atmosphere is peculiarly suited to the curing of raisins.

—Gen. Booth, in opening the Salvation Army congress in New York November 14, said that during the past year more than 15,000 persons had attended the meetings in the halls of the army and 10,000 children had been cared for while their mothers were at work.

—Henry Harrington, aged 65, of St. Paul, Minn., has arrived at Hazelton, Pa., having walked the entire 1,500 miles in quest of work.

—Cato learned Greek at 50; Plutarch Latin at 72; Dr. Johnson, a few months before his death, began to study Dutch; Chaucer's "Canterbury Tales" were finished when he was 61; Montaigne wrote his memoirs at 115; Cellini, his autobiography at 58; Dryden began his translation of the "Hill" at 68; Franklin began the study of natural philosophy at 50.

—Tombstone, Ariz., owes its name to an attempted suicide. When Schieffelin, the discoverer of the mines in that locality, was starting on his first successful prospecting tour he told a friend he was "going to discover a mine this time sure." The friend replied: "You'll discover a tombstone."

In recollection of the rejoinder, Schieffelin named the mines he found the Tombstone mine.

—New Zealand has twenty-five establishments in which mutton is frozen for the British market. The output is some two million fat sheep a year. The sheep used for this purpose are chiefly crosses of Merino and Down.

—Long-waisted breeds, Sibiryan, Drevens and Lincoln are in much favor for rich, level pastures, while in hilly and broken situations Border Leicester have proved quite successful for crossing on Merino ewes.

—Birmingham, Ala., is called the "Magnetic City of the South," on account of its phenomenal growth. Within a few years it is Red Mountain, with millions upon millions of tons of hematite ore and inexhaustible supplies of limestone and coal. Krupp once said: "I would go to Birmingham, Ala. to see the dynamo."

The dynamo once completed that it would become the greatest metal-working city in America.

—Quack grass, which is regarded only as a troublesome weed in Europe and America, is highly esteemed in Australia. The Australian Agriculturalist says of it: "It is a most valuable fodder, thrives on any soil, not easily affected by frost, and is the first to shoot out green in the spring. Cattle are very fond of it, the milk produced by it is of good quality, and the butter and cheese manufactured from such milk is generally a first-class article."

—Improving a Bulgarian Town.

No European town has been more conspicuously improved in recent years than Sofia, the capital of Bulgaria. A series of splendid boulevards has been cut through the mass of old narrow streets and Turkish houses, one encircling the city, while others run across it in various directions; and a still more spacious avenue, 197 feet wide, and set with six rows of trees, leads from the center of the town to the railway station, while another, called the Boulevard Stambuloff, runs from the same point to the new park. This park is very large and is said to be well planted. A great public garden has also been formed in the middle of the town, with smaller gardens at various points, and a nursery, covering a hundred acres, has been established in the suburbs, where plants will be grown for the public grounds and will also be sold to private purchasers.—Garden and Forest.

ADVENTURE WITH SAVAGES.

George "The-Man-That-Draws-the-Handcart" and the Indians.

Never satisfied with ordinary activity, common adventures, George was accustomed to employ green trappers to work by the month under his direction, pushing beyond the usual limit of trapping into the Yellowstone country, he would establish a camp out of the way of Indian haunts, and distribute his men up and down the streams to trap. During the winter of 1889 he planted his camp on Devil's Lake, a large body of water in what is now northeastern Dakota.

A Sioux chief of the Yankton tribe, whose Indian name signifies "old man," heard that the adventurous handcart driver was trapping at that point, and fitted out an expedition for the purpose of "pulling him partly perhaps under the greatest of vindictive Yankton chiefs to a riparian ownership in all the multitude and other that paddled in the streams of that country, but influenced still more strongly by an Indian's love of a fight.

On a bright winter morning, and George had followed an elk six miles through the snow. He had just shot it, and was stripping off its coat, when he saw an Indian scalp-lock rising above the top of a little knoll. He threw himself into a thicket, put his hand on his belt pouch, and found by touch, without looking, that there were fifteen bullets in it, while thirteen Indians soon came into view.

"Is The-Man-that-draws-the-Handcart here?" asked one of the Indians, for they knew Northrup's aim too well to approach without caution, but if any man comes one step nearer," cried George, in the Dakota tongue, "I'll know whether this is a war party or not, I will shoot him."

One of the Indians fired off both barrels of his gun into the air, which was a pledge of peace, and the necessity of emptying his gun and trusting to the uncertainties of Indian good faith, or of accepting battle with the odds of thirteen to one. Slipping the cap from one barrel George ran out and fired one barrel of his gun, blowing the hammer down on the endless tube of the other, as though the barrel were empty. He was now virtually a prisoner, but he dexterously replaced the other cap and kept a good hold on his gun. He afterward managed to load the empty barrel without attracting attention.

He understood perfectly the Indian plan. They knew that any attempt to take the life of a man with so sure an eye and quick a hand as George's would probably cost some Indian his life. They meant to detain him on some pretext while a detachment should plunder his camp, guarded only by inexperienced men.

The boldest way was the only one. After standing in the Indian camp while he confronted the chief, and said quietly: "I'm going home," immediately turning about and taking the trail that led to his camp. The savages were nonplussed by the suddenness of the movement, and they fell into line behind Northrup. At every step of that six miles George expected a rifle ball from behind.

Guns, provisions, furs, were scattered all about the trapper's camp in confusion; if the Indians on their arrival should find things so, the camp would be utterly stripped. George tried again what virtue there might be in impudence. Turning to the old chief, when he came in sight of the camp, he said: "Old man, my men are green; they do not know that you are coming in friendship; if you go in now, they might fire on you. Wait here until I go and tell them that you are friends."

In fact, George feared nothing so little as that his men would shoot. But the Indians were deceived, and with a "Ho!" of approval, the Sioux consented to remain until their welcome should be assured. When they reached the camp, George had everything in order, the things all under guard, and the Indians saw themselves outwitted.

There were thirteen savages to seven white men, but Indians like to keep their own skins whole, and to attack so vigilant a man as Northrup was dangerous. George overheard them disputing which should have his rifle. "Where is your gun?" he demanded of one of his men.

"The Indians are sitting on it and I cannot get it."

George walked up to the row of Indians who had taken the gun in this tentative and diplomatic manner, and, eyeing them sternly, he seized the stock of the gun, whereupon the cowed savages rose up, and he returned the gun to the man and ordered him to hold on to it.

The crisis came at last. There was a flour barrel thirty-seven pounds in the camp, carefully hoarded against extremity. To George's consternation he found that Old-Man had seized it, while his frightened men did not dare offer resistance. Northrup walked directly up to where the chief sat with the sack of flour by his side, and laying hold of it, started off.

"Stop!" cried the Indian, getting to his feet. "Mun-that-draws-the-Handcart, bring back my flour!"

George turned about, and with a gesture of that cool dramatic kind which so impresses a savage, he opened the sack of his own and said:

"Old-Man, if you want to kill me, shoot, but you shall not take away my flour and leave me to starve."

"Then," said the chief, fiercely, "Mun-that-draws-the-Handcart, you shall go south."

The Dakota tribes believe that the soul, driven out of the body, journeys off to the south, and "to go south" is, among the Sioux, the favorite euphemism for death. George looked unflinchingly at the chief, and said:

"Very well, Old-Man, I will go south, then. But if I go south, you have got to go also, and just as many more as I can take with me. But you first."

At this the chief quailed. He saw that he was hostage for the good behavior of his whole party, and, indeed, Northrup had given orders that if a movement towards an attack were made by any Indian, the chief should

be killed first. The Indians last succeeded in stealing an old flintlock musket and a bag of pemmican, with which they made off. As soon as they were gone, George pushed off to a grove far out on the open prairie, which grove he had reason to think the Indians were not acquainted with.—Edward Eggleston, in Harper's Magazine.

THE BAHIS OF PERSIA.

A Sect With Many Good Points, but Greatly Persecuted.

"I was in Persia on the 10th of last May," said a gentleman recently.

"Why do you mention that particular day?" asked the reporter.

"Because," he returned, "it is a day of sorrow to thousands of the inhabitants of the land of Cyrus. There is a new sect in that country, and they believe they will supplant all others. They are known as the Bahis. These peculiar people claim that on the 16th of May, in some year unknown, God became a man in the person of Beliaou Allah, who left the human body and ascended to heaven, after praying his people to prepare themselves for a better and a perfect life in the days of martyrdom. They would build up the temporal man and ennoble this life. It was the son of this prophet who thus related his father's death. The followers of Beliaou are called Bahis. They admit that Jesus and Mohammed and Moses were great prophets. They maintain that God has inaugurated a new era and that it began with the advent of Beliaou and Ali Mohammed. The origin of the belief is Persianic. A new Imam is to arise. With his rising will come peace to all men. There will be more happiness in the world, more charity, more honesty among men."

"Seventy-five years ago marked the advent of Ali Mohammed. He went abroad in Persia proclaiming himself a prophet. The new sect has been persecuted with violence. They have suffered in degree equally as terrible as that undergone in the days of martyrdom. They have deserved it as little, too. The Bible or creed of this new sect is called the Bajan. In no way does it conflict with the established rule of any government. It lacks among its adherents one thing which has been deemed essential to the success of religious teaching. They are not orthodox. The Bajan teaches that there is no hell, except in unbelief, and that to believe is heaven—paradise. It claims the mission of the Old and New Testament, and the Koran to have been fulfilled, and therefore useless in the present day. It holds that the human intellect has developed and is able to receive a better creed, a stronger religion and a better one. This new religion is patterned after the Mohammedan religion more than any other. However, the status is not the same. The Bajan is a sect of the last month of the year a fast is ordered, and only children, travelers and women in travail are exempt from the observance. There is one thing about this new sect which deserves consideration and support. The higher status is based on women. No evil is required when the female desires to appear in public celebrations. The Bahis insist on charity and demands brotherly love. Begging is prohibited, and efforts are made by those in high station and affluence to assist their inferiors to rise by labor and independence above the role of mendicants. They believe in a millennium and hope for its inauguration. They hope to obtain it strictly by religious means. The Bajan is strongly opposed to ignorance and superstition, and therefore consider them unpardonable and do not allow it. They reject slavery and the outward distinction of dress. They believe that God alone knows their state after death.—New Orleans Picayune.

NOT GOOD SWIMMERS.

Apes and Monkeys Are as Helpless in the Water as Man Is.

I have had no opportunity of testing the swimming powers of the anthropoids, and have not been able so far to get any direct evidence on the point; but there is strong presumption that the more bulky ones, such as the orang and gorilla, which adopt a semi-erect attitude in walking, are as helpless in the water as man is. Some of the Cynocephali are expert swimmers, and Mr. C. Bartlett informs me that a cynocephalus in the zoo at London would take the seal pond and pick up objects from the bottom. These baboons, however, dwell far away from the forests, and have lived a non-arboreal life long enough to have acquired a typically quadrupedal mode of progression.

A cynocephalus, when climbing, advances both hands together, and follows them up with both feet, so that the animal practically gallops upward. A man's gait when mounting a ladder is much more that of a true arboreal animal than a baboon's. Some of the slim South American monkeys, such as the Gelada, swim to islands in the river, and Mr. Bartlett has seen them in the act of crossing. Mr. Alfred Russell Wallace, however, informs me that they seldom or never cross the larger streams, as is proved by the fact that these often form the boundaries between the territories of allied species. Most of the new world apes are great adept at running on all fours, and their long limbs and light bodies would aid them in floating, from the extent of surface being great in proportion to the bulk. I have also been informed of numerous cases in which monkeys of the Macaque order have proved themselves able to swim, but apparently few instances are recorded of their entering the water voluntarily. It is noteworthy that, as far as my information has observed, all these apes, with the exception of the baboons, lifted the arms alternately above water and kept their bodies in a semi-vertical position when they swam, and, in fact, acted as if they were endeavoring to climb upward.—Nineteenth Century.

—Philadelphia has 2,000 miles of regularly laid out streets and 300 miles of street car lines. It produces every year \$500,000,000 of goods.

YANKEE INGENUITY.

It Goes A-Borrowing From Its Neighbors, the Dutch.

Even in Connecticut was the skill of the knickerbockers admired. A new invention or improvement was said to "beat the Dutch." The Dutch tiles on the hearth, the crockery on the dresser, the blue tiles lining the front of the fireplaces in the best houses, show how the Dutch had a part in the evolution of the New England house. Hundreds of open fireplaces in New England were decorated with these tiles after the Dutch fashion, and contained not only "proverbs in porcelain," but abundant Biblical illustration. From the evidences of relics, nearly as much of the imported tile furniture in the northern colonies came from Holland as from England. Not a few of the old teapots and other table service, which followed upon the introduction of those oriental hot drinks which drove out the beer and tankards did indeed come over from Holland, though not on the Mayflower, as so often anachronistically alleged. When, too, the open fireplace gradually gave way to supposed improvement, it was to a Dutch thing with a Dutch name—the stove. Not only in Plymouth, but elsewhere, numerous houses had what can be occasionally seen throughout New England to-day (nor by this do we mean the later substitute of tin)—a Dutch oven. It was under this spacious dome of brick and clay that those famous articles of Yankee diet, the pumpkin-pie, brown bread, baked beans, and fishballs, had their evolution. No smoker of tobacco in the snow-white meerschaum rejoiced more in his coloring of the sea-foam clay than did the rosy housewives of Massachusetts buy in the rich hues of bean, bread, and fish. The browning of fish of early days met in the kitchen rather than in the parlor or vendome. The doughnut may have been too cosmopolitan an article to claim invention at the hands of any one people; yet what Yankee "fried cake" or doughnut ever equalled an oleoket? Was not cruller, whose derivation confounds the dictionary-makers, who call it "a kind of" doughnut, first brought to perfection by Capt. Kroll (pronounced and sometimes spelled crull), the whilom commander and Dutch church elder at Fort Orange? To this day the "cookey" (kookel), noodles, hodgepodge, smother, rullies, cold-slaw, and other dishes that survive in New England farm-houses, are, despite their changed pronunciation and spelling, proofs that the Yankees enriched their monotonous menu of early colonial days by borrowing the more varied fare of their Dutch neighbors in the west and south.

As for the popular American winter breakfast luxury, the backwater cake, it was introduced from Central Asia by the Hollanders, acclimated, cultivated, named "beechmst" (beekwilt), and in the form associated with heat, sweets, aroma, and good-cheer is a Dutch invention.—William Elliot Griffiths, in Harper's Magazine.

THE MISSOURI RIVER GOING.

Reports of Engineers Showing That This Great Stream is Shrinkng at the Mouth.

The recent survey of the Missouri river under the direction of the United States geographical engineering department resulted in a discovery that the stream is undergoing a peculiar transformation. During the past few years measurements were made of the volume of water passing between the banks at various points from Great Falls, Mont., to Sioux City. It was found that the volume at Great Falls measured 4,796 cubic feet per second, while at Fort Benton, twenty-five miles farther down the river, the volume was but 4,321 cubic feet, a decrease of 475 cubic feet. Owing to the large number of tributaries emptying into the river between Fort Benton and Sioux City a gradual increase was noted, until at the latter point, where the final measurements were taken, a flow of 14,775 cubic feet per second was reached. In the opinion of some of the engineers engaged in the survey the decrease in the volume between Great Falls and Fort Benton explains the presence of that great subterranean body of water known as the South Dakota artesian basin. The discrepancy can only be accounted for by the presence of an outlet in the bed of the river somewhere between the points mentioned. Directly below the upper cataraet on the south bank of the river, about half way between the towns, is a large pool, in which, if frequent visitors to the place can be believed, are to be found eyeless fish of the species said to inhabit subterranean water courses. In all probability the outlet, if one exists, is located at this point, the alleged presence of these fish tending to corroborate the theory. From here, if this surmise is correct, it would appear that an underground channel running in a southeasterly direction carries the water into a basin underlying a large area of South Dakota, thus forming a huge subterranean lake, which has recently been tapped by the numerous artesian wells. Another queer discovery is noted in connection with the survey just completed. In 1878 observations were taken in a similar manner, and unless errors in calculation have been made, since that year there has been a decrease of fully 20 per cent. in the volume of water in the river. If no error has been made and the ratio of decrease continues, before fifty years have passed the once majestic Missouri will have dwindled into an insignificant rivulet.—Sioux City Journal.

The Blankville Mandolin Quartette.

In a small town in New York state a lady recently engaged for her recreation the services of the "Blankville Mandolin Quartette." Upon the stated day three drunks appeared on the scene with banjos.

"Why," cried the hostess, "I engaged the Mandolin Quartette." "Yes, Yassum," said the leader. "We's dey."—Harper's Magazine.

and continuous operations.
This is plain and explicit.
completely refutes the silly char

A. B. WILT, Operator

This dispute about the boundary between Maryland and West Virginia lying between Garrett county, Maryland and Preston county, Va., is a much more serious matter.

The State of Maryland, by William Pinkney Whyte, its Attorney General, brings this, its bill against the State of West Virginia, and

It is further represented to your Honors that the territory ceded by the charter aforesaid in western limits of the State of Maryland has been in part covered by grants from the States of Virginia and West Virginia; that West Virginia has assumed jurisdiction over some of the citizens of Maryland holding lands under grant in this State; that many conflicts have arisen between the citizens of two States over claims arising

of grants of the same lands by the respective States. The State of Maryland alleges that the State of West Virginia is wrongfully, unlawfully and unconstitutionally in possession of an exercising sovereign jurisdiction and control over a large portion of territory which under the constitution and laws of Maryland, the constitution and laws of West Virginia, and under the constitution and laws of the United States, of right belongs to and is a part of the territory of Maryland and over which Maryland should rightfully exercise sovereign jurisdiction and control. The State of Maryland alleges that the true line of her western boundary is a meridian line running south to the first or most distinct formation of the Potomac and that such line is several miles south and west of the line which the State of West Virginia claims and to which the said State is attempting to exercise territorial jurisdiction, and that the State of West Virginia is in possession of an unlawfully exercising sovereign jurisdiction, authority and control over a strip of land several miles wide and within the territorial jurisdiction of the State of Maryland.

It is further represented unto your Honors that the line referred to in the charter as the western boundary of Maryland should be truly established so that the true limit of the rightful jurisdiction of either State should be distinctly determined. Wherefore being without remedy on the law side of this court the State of Maryland prays that the State of West Virginia be made party defendant to this bill and that a subpoena be issued and served upon the proper officers of the said State, and that it be required to answer the allegations hereof. And that your Honors, by proper orders and decrees, establish the true boundary line between the State of Maryland and the State of West Virginia at a meridian line running south from the 40th parallel of north latitude to the first or most distinct fountain of the Potomac in conformity with the ancient chartered rights of this State and the laws creating the State of West Virginia and admitting it into the Union; that the rights, jurisdiction and sovereignty of the State of Maryland to all the land and territory with all its appurtenances now held and controlled by the State of West Virginia lying within the line of the western boundary of the State of Maryland by proper decree of this honorable court, be restored and confirmed to the State of Maryland; that the State of Maryland be quieted in the full and free enjoyment of its jurisdiction and sovereignty over the same, and that the title, jurisdiction and sovereignty of the State of Maryland over the said territory be confirmed and established by the decree of the court; that your Honors grant the State of Maryland such other further and general relief in the premises as the facts alleged require at the hands of the court and may seem consistent with equity and good conscience.

The State of Maryland by Wm. Pinkney Whyte, its Attorney General

Whilst the Legislature of the State of Maryland, chapter 563, only authorized the attorney general to take steps to obtain a decision of the Supreme Court of the United States to settle the controversy between the States of Maryland and West Virginia over and concerning the boundary line between said States lying between Garrett county, in the State of Maryland, and Preston county, in the State of West Virginia, yet that officer as appears by the foregoing bill says nothing about that line, but sets up a different line or claim to the South branch of the Potomac and asks the court to settle that. The State of West Virginia, as will be seen by its answer, says our attorney general had no authority to file such a bill as he has filed, and seeks to take advantage of this want of authority. The act seems to be very specific and refers only to that part of the boundary line between Garrett and Preston counties. Accompanying the bill of complaint is a copy of the charter of Maryland and the act of 1890, under which the proceedings were begun.

Southern Regard for National Interests.

To the Editor of The Republican.

My apology for again trespassing on your valuable space is that we have now had practically one year of the benefits of a Democratic administration and the result is that business is so completely demoralized that there is little else left for me to do.

My business is less than half what it was, and what sales I make is at a reduction equal to about 124 per cent. off of former prices.

I presume that when the Rebels and Democrats have succeeded in their determined effort to destroy the industries of the Nation they will be almost as well satisfied as if they had destroyed the Union itself.

It seems utterly absurd to see the very same men, who a few years ago were moving heaven and earth to overthrow the Government, now sitting in authority complacently enacting laws for the very purpose of destroying the business of the country and in that way seemingly hoping to accomplish the ruin they left unfinished in 1865.

I will give an example or two:

In December, 1862, when General Bragg, at the head of the Rebel army, was lying at Murfreesboro just before the battle of Stone River there was a gay time at headquarters. It was the occasion of the marriage of the famous raider and guerilla chief John Morgan. I quote from reliable history:

"Jeff Davis (who was on a visit to Bragg) was at the wedding. Most of the principal army officers were present. The ceremony was performed by General Polk who put on the cockade for the occasion; and the merry party found a means of increasing their enjoyment by dancing on a floor carpeted with American flags."

Jeff Davis was there with the principal officers of Bragg's army. They gratified their intense hatred of this Government by dancing on the emblem of our nationality.

The chances are that some of those very men are in Congress today urging the passage of this spoliation bill which is to complete the wreck of our industries. I don't believe they are true to the country now any more than they were when they danced on the flag.

Again: The Rebel authorities had some 30,000 Union prisoners whom the chances of war had placed in their hands. They were penned up in a stockade at Andersonville and kept there naked, starving, without shelter, with no water except a dirty creek that contained the filth of a Rebel camp above the prison. They were compelled to burrow in the ground like rats in order to secure some protection from the elements. Some 14,000 of these brave defenders were carried out and buried, having been deliberately starved to death by the Rebel authorities.

Four members of the company to which I belonged were captured and sent to Andersonville in 1864, but only one out of the four ever returned—the other three were starved to death.

Now, I say, I don't feel happy when I see the red-handed traitors who perpetrated this horrible outrage on civilization sitting in the halls of Congress legislating to make hewers of wood and drawers of water for the English manufacturers out of the citizens of this republic.

On the 31st day of March, 1865, advancing from Dinwiddie Court House to Five Forks, our soldiers marched, skirmishing all the way, over ground which had been fought over the day before when our cavalry had been driven back, I saw a number of our soldiers who had been slain in the previous day's battle, and in every instance their bodies had been stripped of their clothing and left stark naked in the woods to rot or to be devoured by hogs or other animals. This I saw, and the day following I saw a number of Confederate slain lying along a road and in the woods, and out of respect for the dead, and as affording some protection from the elements their blankets had been spread over them to screen their ghastly faces.

What a contrast! On the one side humanity; on the other, rank fiendishness and barbarism.

It was these things which inspired the breasts of the traitors that danced on the flag, that starved the prisoners and robbed, insulted and desecrated the dead.

To me it seems utterly incongruous for these people now to signalize their first advent to power by making war on the industries of the nation which will result in the transfer of the prosperity so recently our own to our great commercial rival, England.

In the letters I have written to THE REPUBLICAN I have said nothing but what I believed or knew to be strictly true; and I have so written because I, with very many of my countrymen, am suffering in consequence of the change from loyal to disloyal hands. I have a

right to speak as every other citizen has to express his sentiments on a question so vitally affecting the interests of all.

From A Farmer Who is in Love With Garrett County.

To the Editor of The Republican.
If you will allow me space in your valuable paper I will answer a few questions and give a little information that may be of interest to some one. I do not wish to make myself conspicuous but simply give facts.

I have been living in Garrett county nearly twenty years. I was very much pleased with its appearance when I first saw it and the longer I stay the better I like it. The beautiful springs and streams and the pure mountain air are certainly delightful.

Some years ago some people would say that the summer was too short and the climate too cold and the soil too poor. In regard to the summer being short I think that is all in our favor for our crops are produced in so short a time they are better and sweeter than those produced other places. Regarding the climate being cold I don't think we could have it better without having other advantages which we have taken from us. All sections have their disadvantages but there is one important fact for us—we never have a complete failure of crops. This they have in many other places. In the summer time we have at all times a cool and pleasant air moving which makes it very pleasant to work in the harvest field and our nights are always cool. When we retire we can sleep and rest and not be tormented with mosquitoes.

It is true some places the land is not so rich as other places but this we can attend to if we will. I have some poor land and I have some that is not poor. Take it altogether I do not think a man need starve on it. We can raise from 35 to 45 bushels of oats to the acre—just as we find the land, and I have seen 50 bushels per acre raised and from 15 to 25 bushels of buckwheat per acre and some of our farmers can raise more than 50 bushels of shelled corn per acre. Potatoes do extra well here and are of a better quality than those produced other places. There are farmers in this county that produce 60 bushels of wheat per acre. In the grass line we have Timothy, red and white clover, blue grass and red top—all do very well.

Our land produces beans, peas, lucas, pumpkins, carrots, squash, cabbage, cauliflower, celery, and a great many other things which is not necessary to mention. Our fruits are apples, pears, quinces, grapes, plums, gooseberries, raspberries, blackberries, currants and strawberries and the important part is the markets. This cannot be excelled anywhere in prices and demand.

We have plenty of good farmers here and plenty of room for more. We have farmers with their bank accounts growing larger and their farms growing richer and it has all come out of Garrett county soil. Is this not proof enough of the good of our country?

While in adjoining states they sometimes loose their crops from dry weather this is never the case with us. Last summer was the driest I ever saw and after harvest we thought we would have no fall pasture. Its true our crops were a little short by the dry weather but I am glad to say we never had a much better fall for pasture. Some of the farmers in West Virginia drove their cattle into Garrett county to keep them alive.

If we could just realize how many blessings we have that we might be deprived of we would thank God that we are in Garrett county.

Yours truly,
A FARMER.

Communicated.
To the Editor of The Republican.

Seeing in your columns a reference to the meeting at Selbysport, in its beginning, now that it has closed, we wish to give the result. While we did not reach as far in results as we hoped, or desired, yet the meeting was a success. There were eight conversions and necessities to the M. E. church, and a general good meeting in the church.

We confess judgment for having spoken against the saloon, but we have no apology to make. The speech met with a hearty approval of the people of the community.

LOYAL CITIZEN.
Pricedville, Feb. 26, 1894.

Let The Truth Prevail.
To the Editor of The Republican.

When "T. Jay" reshales his windy and wormy "chestnuts" for the Cumberland News asserting that "there are no undefined nor unassessed lands in Garrett county," he either proves his ignorance of the facts or he deliberately and intentionally attempts to deceive the public by making dogmatic assertions which he and all intelligent citizens of Garrett county know to be absolutely untrue!

Respectfully yours,
H. P. TASKER.

Hoyes.
February could not leave us until we were assured that it is a winter month.

We are taking a deep and continued sigh when we remember that the schools of Garrett must close near the middle of winter. It does appear to me that some plan could be worked to give us six months school each year and not cripple us financially. Six months school would be so much better in many ways.

1st. By encouraging our teachers to better prepare for teaching and sticking to it as a profession.

2d. The teachers can accomplish twice as much during a little longer term, as all know that have tried it, that it takes some time for teacher and pupil to get acquainted and the school classed to do effective work.

3d. We are robbing our children of a treasure that is worth more to them than gold; gold may be taken away, education cannot. It may be denuded or abused but cannot be taken away from them.

4th. It costs but very little more for a long term, except the pay of teachers, as we have our corps of officers to pay and school buildings to keep just the same.

5th. The short term drives from us the most intelligent and their places are filled by the careless and indifferent.

Those in authority, to whom we look for help, do your best financing to get our schools to compare favorably with our sister counties in every way, especially in length of term. I was in Gap Run school a part of the forenoon of Monday and if I know anything about a school I never witnessed a more pleasing sight than seen there. A beautiful school house, an industrious and pleasant teacher and scholars equally as industrious, and trying to please the teacher and the recitations were very good. Thanks to the School Commissioners for having our house repaired.

Truman Castiel has about thirty acres of ground cleared on the "Castiel farm," or so near cleared that the fire will do the balance when dry weather comes.

Some of our farmers have commenced erecting their lime pits. This is right, burn them early in the season to give the lime time to slack and be applied to the ground before the dry season commences.

Rev. Cox is holding a successful meeting at Sang Run.

More than half of the Sunday schools in Districts 6, 5 and 2 are continuing during the year. Every school should do this.

Rev. Hart held a few days' meeting at Elder Hill school house.

Mountain Lake Park.

Major Alderson is here for a few days.

Mr. May, of Everett, Pa., came to the Park Thursday last. He will be here for awhile visiting his son Henry.

Mrs. L. A. Radisill and children left on No. 3 Wednesday for Cincinnati. Masters Wesley and Arthur will remain in Cincinnati two weeks. Mrs. R. will meet Mr. R. on Friday and accompany him to Florida.

Mountain Lake Park is getting some good advertising just now. Saturday night Supt. Radisill will show 150 views of the Park at Nashville, Tenn.

The snow was a snow. February has been a regular old time winter month.

Material is on the ground for three new houses.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTIN, D. D., New York City.

THE CENTRAIR COMPANY, 77 MURRAY STREET, NEW YORK CITY.

Castoria cures Croup, Whooping Cough, Sore Throat, Diarrhea, Stomach Disorders, Biliousness, Indigestion, Worms, etc., and keeps the system in perfect health. Without injurious action.

"For several years I have recommended your 'Castoria' and shall always continue to do so as it has invariably produced beneficial results." EDWIN F. PARKER, M. D., 123rd Street and 7th Ave., New York City.

Poor Printing Pays Poor Profits.

We get out a class of printing that is superior to the "general run." Good printing pays, and that is the only kind we furnish our customers and patrons.

The Republican Job Printing Department, Oakland, Maryland.

MERCHANT TAILORING.

B. Savage, the Tailor, has returned to Oakland and reopened his Tailoring Establishment, and will be pleased to serve the people of the town and vicinity at exceedingly low prices.

He will make Suits of all wool goods, fit guaranteed, for \$15 and up.

He has also a large and complete stock of ready-made clothing which he will alter to fit and make no charge for the alteration. Give him an early call and judge for yourselves. He will also in a short time have a full line of shoes and hats for sale. Yours respectfully, B. SAVAGE, 204 E. 1st and 2d Streets.

WINTER

Weather has come at last, and our prices on winter goods are so low that you can buy them at one-half the price that you would pay at any other store in the country.

Best flannels for 23 cents per yard; heavy muslin reduced from 10c. to 6c.; heavy muslin reduced from 9c. to 5c.; heavy hose reduced from 50c. to 30c.; heavy shirts, all wool, reduced from \$1.50 to \$1.; heavy shirts reduced from \$1.25 to 90c.; heavy blankets, all wool, reduced from \$6.50 to \$4.75, from \$5. to \$3.50 and from \$2.50 to \$1.90. overcoats reduced from \$7.50 to \$5.75, and from \$6.50 to \$4.75; comforts reduced from \$2.25 to \$1.50; all wool clothing at a sacrifice; rubber shoes, boots and fells at almost half price; gingham reduced from 10c. to 7c. and from 8c. to 5c.; four skeins yarn for 25c.; all wool underwear at prices to suit the closest buyer; calicos at 4c. to 7c.; Turkey red table cloth, all linen, from 43c. to 47c. per yard; flour from \$3.25 to \$5. per barrel; 3 cans tomatoes 25c.; 21 lbs. granulated sugar \$1.; 6 cakes best soap 25c.; 21 lbs. rice, \$1.; 13 lbs. pitted cherries, \$1.; 22 lbs. beans, \$1.; 12 lbs. best evaporated peaches, 15c. per can; tapioca, 9c. per lb.; gelatine, 15c. per package; Fox's corn starch, 9c. per package; Vanhousen's cocoa, 15c. per package; Baker's chocolate, 19c. per cake.

The above are quotations on a few of our goods, and a call from you will be sufficient to convince you that we mean business.

Respectfully yours,
SINCELL BROS.

An Incident in the Love Affairs of Miss Bragg.

Miss Bragg dressed with great ease and calmly self possessed, she was awaiting for Newmann. She read the last two letters again, but the repetition of them left her puzzled still. From her cabinet she fished out a package of letters she had received from him. She

1. **Can a hungry man make a square meal?**

Brings comfort and improvement and

Altamont and Vicinity.
Lots of snow. See who can drive the best rig this time.
Mr. Harned, assisted by H. B. Friend, has been surveying for Mr. J. Z. Browning and others the past week.
Mr. Jeffers went to Blooming-ton Sunday to see his best girl.
Mr. Tom McHugh spent Sunday at Frankville.
Miss Minnie Stemple, accompanied by Master Harley Friend, spent several days at Frankville last week.
Mrs. John Friend, who has been very ill, we are pleased to note is convalescent.
Mr. James Lee is visiting at Mr. Chas. West's this week.
Mr. Chas. West was visiting at Thuyerville this week.
Rex is night watchman for Mr. Herman Beckman this winter.
Mr. Laff Friend was on our streets Sunday.
The person or persons who have been helping themselves from Mr. John Friend's "smoke house" had better be very careful as he says he is prepared to give them a warm reception if they should return.
Mrs. Cassidy is on the sick list.
We noticed Mr. Chas. West on our streets Tuesday.
Can't one remove the snow from the pavements?
We are glad to see so many of our young men attending church at Deer Park.
Quite a number of our young folks were out sleighing Tuesday evening and unfortunately one sled load failed to see the stumps at the side of the road, consequently a big "up set" which resulted in nothing more serious than some badly frightened young ladies.
Bert and Will West are both very ill with grip, we are sorry to note.

WINTER.
New Germany.
On Feb. 10th the Variety Company, of Frostburg, appeared in the New Germany school house and gave an entertainment which was a treat to the young folks and all were highly pleased. On account of the weather the audience was not as large as had been anticipated.
Our school is progressing nicely with Miss Laura Wiley as teacher. I am only too sorry that the term is so short, and for one I am in favor of having a bill passed by the General Assembly authorizing the issuance of bonds for school purposes, the bill to be so framed to allow the voters to say by ballot whether the bonds be issued or not.
Well, readers of THE REPUBLICAN what do you think of the Democratic party by this time? Were we not to have better times as soon as Cleveland took the chair? But a few more days and it will be one year since he took the oath of office. Are the times better now? Is labor as plenty as it was then? Is money as plenty now? Is lumber in as good demand? All these questions are answered by an emphatic NO. I know of one gentleman here who used to ship from 200,000 to 300,000 feet of lumber per year. Since the month of June, 1894, he has not sold 25,000 feet and his yard is stacked full of lumber. They say idle men everywhere. They say they cannot get work. I am one of the number who must suffer with the rest. Is it the lack of confidence in the administration or do these things come by chance to make these hard times?

Mr. Monassa Shank, of Bittin-ger, has been through this community buying apples to ship to the Pittsburgh markets.
Mr. and Mrs. Chas. Bancroft were on a visit to Mr. Ross Gomp-ton's residence some days ago.
Mr. Henry Swanger has purchased Mr. Samuel Willard's saw mill and is removing it to his farm where he has some very fine oak and hemlock timber to cut.
Miss Sadie Darrat has returned home from Accident.
Our Sunday schools are prospering this winter.
Mr. B. P. Savage has returned home from Fall City, Pa., where he had been on a visit to friends.
Mr. Jacob L. Fresh is working for Mr. Jonas Rotherberger at the Stone House Farm.
Mumps are making their appearance in this vicinity.
Robert Crow was working with a chisel the other day when it slipped and nearly severed his great toe from his foot.
About eighteen inches of snow fell Sunday night and Monday.
Rev. Fallow, pastor of the M. E. church, preached here on Sunday at 10:30 a.m. He announced the program for the Easter services.
Mr. Lou Stanton, of Frostburg, passed through here Sunday on his way to his home at Bittin-ger.
Rumor has it that there will be several weddings here soon.
Some of our young folks are not so well pleased over the valentines they received this year.

For Malaria, Liver Trouble, or Indigestion, use BROWN'S IRON BITTERS

SOCIAL ASPECT OF GOOD ROADS.
Advantages Improved Highways Would Bring to the Farmer's Family.
The social effect of good roads upon country life cannot be overestimated. The improvement of our highways would do away with much of the difficulty of visiting in our rural districts. Bad roads often render social intercourse almost impossible. The evening is dark, there are no side paths nor lamp-posts along the way, the roads are almost impassable with mud or drifting snow, and as the family look out toward the light in the window of their neighbor's house the gush of social life that a moment before was moving in full tide is now checked by these many difficulties. Life in the country, otherwise full of happiness, now sinks into a tame existence, all for the want of a pleasant highway connecting the homes of adjoining neighbors.
There can be no doubt that poor roads have much to do with the small attendance at our public schools. The country boy and girl obtain the greater part of their education in early life. After the age of fifteen the children are busily engaged in the care of the farm or dairy. During the late fall and winter when work upon the farm is at a standstill, there is an opportunity given for school attendance. But this is at a time when our public highways are at their worst, and the two or three miles between the farm and the schoolhouse are traveled with the greatest difficulty. Were our highways in a proper condition the number of days of school attendance by these children would be more than doubled, and the preliminary education of the farmers' sons and daughters would be made to equal that of their city cousins, and a good common school education might be obtained where now even an ordinary intelligence is lacking.

Church attendance would also be greatly increased if our roads were uniformly good. During half the year the pleasure of church attendance is denied because of almost impassable highways. The Sabbath in the country becomes, therefore a day of languor devoid of religious thought, with no care for religious teaching, instead of a day devoted to moral development and Christian attainments.
Our vital statistics show that a larger percentage of farmers, and especially of farmers' wives, become insane than any other class, and the ratio of this insanity is increased in proportion as the parties are isolated from society. This ought not to be. The occupation of a farmer is not a disgraceful one, it is full of interest. Nature has a thousand charms for him that no other occupation would provide. But this condition results from his self imposed isolation, caused in many instances by neglect and impassable highways. In the old dungeons of a more barbarous age prisoners after a few years nearly all became demented. A complete separation from human sympathy and social intercourse was the cause of this insanity. This condition of things was only a little worse, however, than that oft produced upon the farmer by impassable highways.
Once upon the avenues of intercourse with schools, churches and society by improved roads and increased facilities for contact with our fellow men, and country life, otherwise beautiful and attractive, would become indeed what it should be—an approach to our original Eden.—N. B. Spaulding in Good Roads.

Deer Park.
Miss Anna Townsend is visiting at Mrs. S. C. Hoye's.
Hon. and Mrs. A. F. George were on our streets the other day. Mr. George has many friends here who are always glad to see him.
Miss S. M. Marly, Miss Vaile Thrasher and Miss Fannie Chidester are all on the sick list.
Mr. Ed. Mawille and his brother Bob, are also on the sick list.
Mr. D. P. Graham was here a day or two last week.
Mr. Ed. Miller, our hostling blacksmith, is building an addition to his shop.
Mrs. S. C. Hoye and Mrs. W. C. Jones are ill.
Mr. Abe Friedland has gone to German to visit his daughter.
Mr. Charles Savage has bought a lot on Peace and Plenty avenue and is preparing to erect a building for a meat store.
Rev. C. E. Feather is holding a protracted meeting here.
Mr. S. Clary, of Keyser, W. Va., was visiting his sister, Mrs. Frank Thrasher, the other day.
Mrs. Joseph McRobie has returned from an extended visit to Thuyerville.
Mr. Robert Jankey has moved from this place to Kerens on the W. Va. C. railroad.
Sheriff Wegman had business here last week.
Mr. J. C. Rodeheaver is the happy father of a fine big boy.
Mr. Patrick Garrett and sons are

preparing to build a fine house on their farm near this place.
STANGER.
Davis' Mills.
Isaac King had a wood chopping on Wednesday of last week.
J. H. Chisholm was at Bayard a few days ago.
A. S. Sell has moved his saw mill on Hoopole near P. H. Rotherberger's.
J. J. Garrett has been engaged in working on G. W. Delawder's saw mill for some time past.
Ellsworth Mail is making and hauling cross-ties this winter.
Emanuel King, of Deer Park, was at Isaac King's Saturday and Sunday last to see his brother who has been sick for several months.
Miss Mary Garrett, who has been staying at J. S. Dodge's, has returned home.
Some of our young people attended the spelling match at Dodge's and report having had a good time.
We are informed that our teacher Miss Georgie Albright, is going to have an exhibition on the last day of school.
Miss Lillie Garrett was visiting at Chauncey Kimmel's Sunday last. John Markey has been helping A. S. Sell set up his saw mill.

Two Days Trip to Washington.
Everybody expects to visit Washington some time; in fact it is a duty that every one owes to himself. What Rome was to every soldier of the Empire, what Athens was to the Greek, Washington is and should be to every citizen of the United States—his glory, his pride, his inheritance, his estate—it belongs to him. Albeit magnificent, all its glory, all its fame, its public buildings, its paintings, its statuary, its monuments, its gardens, its libraries, its museums, its streets and its parks, and he ought once in a lifetime to take a look at the property. When do you expect to take a look at it?
The best train service of the B. & O. R. is at our service always, but not reduced rates—they come seldom. The third select excursion to the National Capitol via the B. & O. is announced for March 8th, when reduced rate tickets will be sold from points on its lines between Wheeling, Pittsburgh, Parkersburg, Lexington and Hagers-town.
We give below a list of stations in this vicinity showing time of trains and rates of fare.

LEAVE	TIME	TIME	TIME	RATE
Wheeling	6:00 A.M.	6:00 A.M.	6:00 A.M.	7.00
Parkersburg	7:00	7:00	7:00	7.00
Pittsburgh	8:00	8:00	8:00	7.00
Wheeling	8:00	8:00	8:00	7.00
Parkersburg	9:00	9:00	9:00	7.00
Pittsburgh	10:00	10:00	10:00	7.00

THE REPUBLICAN.

OAKLAND, MD., THURSDAY, MARCH 8, 1894

NUMBER 52.

VOLUME 17.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Altamont letter received too late for publication.

The Terra Alta woolen mills will start next month.

A fine crayon portrait free for thirty days. Loar & Co.

"Babies a success" at photo gallery. See ad. Loar & Co.

Mr. Richard Tasker, of Swanton, was here Monday on business.

Rev. Wm. E. George, of Deer Park, was here on business Monday.

Bring the babies and children to photo gallery. See ad. Loar & Co.

THE REPUBLICAN job printing department used over a ton of paper last week.

Miss Nora McGrail, of Terra Alta, was in Oakland a few hours Monday.

FOR SALE OR RENT.—An eight-room house in Oakland. Apply at this office.

Messrs. Reed and Howard Smouse were in Terra Alta Sunday the guests of relatives.

WANTED.—Bright and intelligent boy to learn the printing trade. Apply at this office.

Mr. Thomas Callis, of Johnstown, was here on business last Thursday afternoon.

Mr. Joe Miller, of Cumberland, was here Friday in the interest of the firm he represents.

Dr. E. H. Bartlett was confined to his room several days this week with an attack of the grip.

Mr. E. P. Anderson, B. & O. station agent, spent Sunday in Newburg with his parents.

Don't fail to see the new arc lights burning on the incandescent circuit at D. E. Offatt's store.

For thirty days we will give a fine life-size crayon portrait with each dozen cabinets. Loar & Co.

Mr. and Mrs. G. A. Bolden, of Terra Alta, were here Sunday afternoon as the guests of relatives.

Mr. J. M. Conneway, of Wilson, was here Tuesday on business and smiled in on THE REPUBLICAN.

Deputy Collector Asa Wilson, of Cumberland, was in the city Tuesday on Internal Revenue business.

Messrs. Frank Freeland and John Cassidy, of Terra Alta, were Oakland visitors Sunday afternoon.

Mrs. Wm. L. Leisher expects to leave Oakland Monday morning next for her home in Pennsylvania.

Mr. J. S. Harvey, of near Germania, was here Tuesday and favored this office with a paying call.

Those desiring fine photographs should call at once for they will remain here only a few weeks. Loar & Co.

Mrs. J. C. Peddicord gave a tea to a number of friends at her residence on Liberty street Friday evening.

Miss Martha Hinebaugh spent Saturday and Sunday in Terra Alta as the guest of Mr. and Mrs. G. A. Bolden.

Miss Lizzie Weber returned from a visit to friends and relatives at Cumberland and vicinity Saturday evening.

Mr. and Mrs. Godfrey Felty went to Martinsburg last Friday to spend a week or two with relatives and friends.

There is nothing superior to Salvation Oil for the relief and cure of wounds of all kinds. Its effect is marvelous. 25cts.

Beware of imitations. Take no "just as good." See that you get the genuine Dr. Bull's Cough Syrup, the peerless specific.

Mrs. E. P. Russell will accommodate a number of boarders during the March term of court. Rates, 50 cents per day. 51-53.

The regular preaching service by the pastor in St. Paul's Evangelical Lutheran church, Deer Park, Sunday afternoon at 2.30 o'clock.

Mr. D. M. Mason was laid up several days last week with an attack of rheumatism. He resumed his duties at the railway station Monday.

Good roads mean quick and economical transportation, mean easy and safe travel, a saving of teams and vehicles. By all means let us have good roads.

A Chicago thief stole a two-story house, which was found a mile away from its foundation. At last accounts Lake Michigan had not been made off with.

Rev. Wm. L. Leisher will preach in St. Mark's Ev. Lutheran church Sunday next at 10.30 a. m. and 7.30 p. m. The latter will be his last sermon as pastor.

Dr. J. Lee McComas and son Lee returned from their eastern trip on Saturday night. The health of Lee has improved very much, we are glad to state.

Mrs. E. P. Russell, corner 1st and Water streets, is prepared to take boarders by the month. Persons attending court will be accommodated with board at 50 cents per day. 52-54

Mr. S. Broadwater, of Lime Springs, Iowa, who spent several weeks in this county visiting relatives and friends, returned to his home in Iowa the latter part of last week.

A movement is being made by residents in and around Johnstown, this county, to establish a lodge of Knights of Pythias. That vicinity has good material in it for a lodge of Knights.

Dr. Mahlon C. Hinebaugh has removed his office from the Mayers building to the old postoffice building on Alder street where he will be pleased to meet all those desiring his services.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-12

A cattle train was wrecked on the Pittsburgh division of the B. & O. railroad on Wednesday evening, at Cook's Mills, Pa. A large number of cattle were killed. None of the trainmen were injured.

Mr. S. T. Jones went to Terra Alta Sunday morning and spent the day with his family who were on a visit to relatives there. Mrs. Jones and children returned to Oakland Tuesday morning.

You can get your garden seeds at Henry E. Felty's grocery store. These seeds will be fresh and a great deal cheaper than sending off for them. A new variety of seed potatoes also on hand. 45-17

It was reported in Oakland yesterday that the store of L. H. Friend, at Swanton had been robbed on Tuesday night of goods amounting to \$250. Whether the report is true we cannot state.

Mr. W. A. Liller, the well known contractor, of Keyser, has secured a contract to build two fine cottages at Mt. Lake Park, for Capt. Sheetz, of Grafton, and a lady at Bloomington.—Piedmont Independent.

Even the "Hard Times" may have a silver lining. If they bring about the cash system and people stick to it there will never be any future panics worth mention. Cash, spot cash, will work a revolution in trade.

Mr. John Ault has secured the contract from Mr. D. M. Dixon to erect a two-story business and dwelling house combined on the lot Mr. Dixon recently purchased from Mr. John Shartzer near THE REPUBLICAN building.

The attention of our readers is called to the announcement of Prof. S. C. Smith, which appears in another column of this issue. The professor has decided to remain in Oakland and to form classes for the purpose of teaching music.

The firm composed of Messrs. G. W. Delawder and Geo. O. Miller, in Oakland, which partnership expired by limitation on March 1st, has been renewed and the business of the firm will be carried on at the Shartzer building.

In a letter from our friend, Dr. W. H. Ravenscraft, formerly of Oakland, but now residing at Elbon, Pa., he says: "Enclosed I send you check to pay for THE REPUBLICAN. It is to us like an old friend coming to see us once a week, and always welcome." Such an evidence of satisfaction expressed by our patron is highly appreciated by us.

Are lights on incandescent circuit, six, eight, ten, twelve or sixteen hundred candle power, can be furnished by the Oakland Electric Light Company. For terms, etc., apply to the general manager, Mr. C. E. Rixford. 52-11

Mr. C. Anelard Montague, of Hovos, was in the city Monday and made this office a very pleasant and agreeable visit. Mr. Montague recently removed to this county from Michigan and will make Hovos his future home.

Rev. Henry Carrington Alexander will preach in the Garrett Memorial church, Oakland, on Sabbath at 11 o'clock a. m. and 7.30 p. m. The subject of the discourse to be delivered Sunday evening will be "Caleb."

The thirty-sixth anniversary of the wedding of Rev. and Mrs. John M. Davis was celebrated at their residence in Oakland Monday. Quite a number of the relatives and friends of the couple were present and partook of the bountiful dinner prepared for the occasion.

The boarding house and hotel keepers in Oakland expect to have a very busy season the coming summer. Mr. George L. Bosley informed us Tuesday that he has already rented one of his cottages in that several of the rooms in his hotel have been rented for the season.

Dr. W. N. Berkely, of Frostburg, Md., will be at Accident March 12; Hovos, March 13, and Cranesville, March 14, for the treatment of diseases of the eye, ear, nose and throat. Special attention to the examination of eyes for glasses. 51-21

The Universal Plow is the only complete plow made, as you can buy it all steel, or chilled, with steel or wood beam, front or rear adjusting, plain grooved, slip or center sheers, shins, knee cutters, jointers, wheels, etc. Write for catalogue. J. M. Davis & Son, agents, Oakland, Md. 50.

At the request of the patrons Dr. Henry W. McComas has decided to have regular office hours, if possible, in the future. The hours that he will endeavor to be at his office in the Mayers' building are as follows: 8 to 10 a. m., 2 to 3 p. m., 8 to 9 p. m., from June to October and from October to June, 7 to 8.30 p. m.

Our popular railroad conductor, Capt. Bazzard, was at Oakland last week. Tom Aggleston, of Thomas, manipulated the punch in his absence.—Mr. T. C. Hinebaugh, the general proprietor of the Hotel Randolph, returned Wednesday evening from a business visit to Oakland and Cumberland.—Elkins Inter-Mountain.

Spring-time will soon be here, and so will one of the finest lines of buggies, Dayton's, spring wagons, surreys and carts for A. D. Naylor that ever came to Oakland. Be sure to give him a call when in need of anything in this line, for he can suit you both as to price and terms. Some vehicles on hand now. 50-21

Mr. Chas. J. Newman, who has been an employee of THE REPUBLICAN for a year or more, has been compelled to sever his relations with us on account of failing health. Hereafter he will devote his entire time to his store on Railroad street where he will be pleased to serve all who may patronize him. His office in this office has been filled temporarily by Mr. W. Dorsey, of Kingwood.

Wm. Bray, son of Norman B. Bray, of Blaine, died last Wednesday morning. The young man had been afflicted with consumption for some time, and had only reached the age of 27 years when death claimed him for his own. He was well liked in the community, and his parents have the sympathy of the entire community. "His battle is over, his crown is won."—Piedmont Independent.

Mr. Ed. M. Spedden, of Oakland, Md., was here on business Tuesday evening.—Mr. Charles Tower, of Oakland, spent a few hours in town Tuesday evening.

—Mrs. John Connell, of Union, spent Sunday last with her daughter, Mrs. Parley DeBerry, at this place.—Mr. Harry Nell, a very handsome and brilliant young telegrapher, now located at Wheeling, spent Tuesday in Terra Alta.

Ripans Tablets cure jaundice. Tablets relieve nausea.

A Cincinnati man got mad and said his tailor's bill with five thousand copper cents. The question was as to whether the tailor was obliged to take payment in money of that denomination. This brought out the information that all be new to some: "Cents, three cents and nickels are legal tender to the amount of 25 cents. Over dollars are legal tender to an unlimited amount. Trade dollars not legal tender. Silver half dollars, quarters and 20 cent pieces legal tender to the amount of 50 cents. Silver half dimes and silver cent pieces are legal tender to the amount of \$5 only.

The bridge, now being built by the Baltimore and Ohio railroad at Harper's Ferry, will be completed and put in use about the middle of this week. To complete this span all traffic on the present track will be stopped for about one hour, when the new span is put in position. All trains will immediately resume using the new tunnel and tracks from a point just west of Sandy Hook station to the east end of the old tunnel, west of 1st and Park streets. This will complete the improvements at Harper's Ferry, except the building of the new depot and connection with the Valley railroad.

Dentistry. Proprietor of the Frostburg Dental Parlor, will be at Accident, March 12; Johnstown, March 13; Cranesville, March 14. Teeth extracted without pain. 51-21

Valuable Advice. Avoid lawsuits and loss by consulting H. P. Tasker and examining his blueprints of the "conflicting titles" before paying for Military Map. Charges reasonable. Office at Garden Cottages, opposite the Bank, Oakland, Md. 41-11.

Bargains? Yes! Children's suits, from \$2 up; boys' suits, from \$5 up; men's suits, from \$5 up; men's suits, from \$1 up; overalls, only \$1.75 to close them out. 50 and 60 cent caps, 35 and 40 cents; \$2.50 hats for \$1.75. 51-31 S. L. TOWNSEND & SON.

Notice. I hereby notify all parties not to trust my wife on my account, for I will not be responsible, as she has left my bed and board without any cause.

NEWTON SAVAGE: Friendsville, Md., Feb. 19, 1894. 50-31.

Rogers' Specific Liniment. A radical cure for cholera. Sold by A. G. Sturgis, Oakland, C. F. White, Huttons; The Co-operative store, J. O. DeBerry, Corinth; E. A. Weimer, McHenry, Smith & Callis, Johnstown; J. E. Guagey, Accident; Jonas Frazee, Yough Store Co., R. Liston, Selbyport; A. Wass & Son, Mineral Springs; L. E. Friend, Friendsville; P. T. Garthright, Mountain Lake Park and at all other general stores.

Condition of Mr. Robert Garrett. The Baltimore American of Monday, speaking of the condition of Mr. Robert Garrett, says: "It has been reported and was current about town yesterday that Mr. Robert Garrett, ex-president of the Baltimore and Ohio railroad, had suffered a stroke of paralysis, but was emphatically denied yesterday at Uplands, Mr. Garrett's country home on the Frederick road. Mr. Garrett's condition remains about the same. He is not considered critically ill, yet he requires a constant attendant. On five days, such as yesterday, he is placed in his comfortable armchair and wheeled about the grounds surrounding the mansion. The warm sunshine and the soft breezes which draft through the tall and stately pine trees and the towering oaks on the spacious and well-kept lawn, seem to have a reviving effect upon Mr. Garrett, for he is always the better for these outings. Of late a number of conflicting rumors regarding his condition have been in circulation, and anxious friends have gone to Uplands in numbers to make inquiries."

Photographs. We have opened the photograph gallery, 2d Street, near Lutheran church, and give the people of Oakland and vicinity an opportunity of getting a finer class of work than they have ever had before. Our pictures are guaranteed to be satisfactory. Give us a call. Loar & Co. A. B. WILT, Operator.

The Chance of a Lifetime.

In a private letter to the editor of THE REPUBLICAN from Mr. Chas. F. Frazee, of Pittsburg, he encloses a clipping from the Pittsburg Times, as follows:

"Buffalo Run may be the site for the proposed summer resort of the Masonic Association. It is in Garrett county, Md., and is within easy reach of Oakland, Deer Park and other favorite resorts. There is a fine lake there and the place is said to have many other natural advantages. There are 434 acres, and the price is put at \$12,000."

Mr. Frazee further adds: "If the people of Garrett county could assure the Masonic Association of the completion of the Conference and Oakland railroad, Garrett county would have one of the finest and richest summer resorts on Youghiogheny river in the nation. Where the Association decides to locate either on the P. R. R. or B. & O. R. R. they will build a fine hotel and erect from three hundred to four hundred cottages. The writer has been working hard to have the Association locate on Yough River at Buffalo Run, which place could be made a fine resort and would afford the farmers of District No. 2 an excellent market for their produce. What can Garrett county and the B. & O. R. R. do to get this Association locate in this county?"

Married.

DEWITT—MONTAGUE.—On yesterday at the home of the bride near Johnstown, Mr. C. Anelard Montague to Miss Estella DeWitt, daughter of Mr. and Mrs. Archibald DeWitt.

DECOSE—MALE.—On February 27, 1894, by Rev. William E. George in the town of Deer Park, Edward DeCose, of Garrett county, and Miss Emily Male, of West Virginia.

WRIGHT—FRIESE.—On Sunday, March 4, 1894, by Rev. William E. George at his residence in the town of Deer Park, in the presence of a number of witnesses, Mr. Samson S. Wright and Miss Henrietta Friese, both of Garrett county.

TEATS—FIRE.—On Feb. 28, 1894, by the Rev. George W. Kepler, at the M. E. parsonage, Oakland, Mr. Benjamin F. Teats and Miss Florence E. Fire, both of Annapolis, W. Va.

WHORTON—ARNOLD.—On Thursday evening, Feb. 22, very quietly at the bride's home, Mr. John William Whorton and Miss Edna Dora Emma Yantz Arnold, both of Oakland, were united in holy wedlock by Rev. Wm. L. Leisher.

Trial of the Freelands.

Messrs. David A. Freeland and Dawsey E. Forman, and Misses Lisa Albright and Ellie Spurgeon left Terra Alta Sunday morning for Chicago, Ill., to attend the trial of Mr. and Mrs. Judson Freeland, counterfeiters, late of that place, which came up in the United States court in that city Tuesday. Mr. and Mrs. Freeland have been in the Cook county jail, Chicago, since November. The crime with which they are charged is that of raising United States \$10 notes to \$50's. Intense interest is manifested at Terra Alta in the trial. The accused are both from prominent families at Terra Alta. Mr. Freeland being a son of David A. Freeland, one of the most prominent and honored of Preston's citizens, and Mrs. Freeland is the daughter of Daniel Albright, a prosperous farmer.

A Good Opportunity to Study Music.

The undersigned takes this method of informing the public that he has decided to remain in Oakland some time and will teach the following branches according to the most approved methods. Pupils will be pushed as rapidly as is consistent with thorough work.

PIANO.—Either American or foreign fingering. Special attention given to finger training, articulation and phrasing. The common and pernicious habit of playing legato music with the arm and wrist motion will be avoided and corrected.

ORGAN.—Not the everlasting thump, thump, pull all the stops and "let'er go" style so often heard, but a noiseless touch, regular pedal action, proper use of stops and sing voice of reeds. The organ is not and never was intended to be an instrument of percussion.

VIOLIN.—The most perfect of all musical instruments, once persecuted and considered the devil's own property (like the poor devils

our forefathers burned) is now used in churches and is especially a lady's instrument as it requires great delicacy of touch and agility of fingering to bring out its beauty of tone. Too little attention is usually given to bowing. The pupil should early be taught the different kinds of strokes, the whole, the half and the short strokes, which part of the bow to use in playing forte and piano, and later the harmonics, staccato and tremolo. Without good control of the bow it is impossible to play well. The music will be expressionless and heavy and the motions of the player as laborious and ungraceful as a man sawing wood. Cornet and all band instruments. Ballad playing, double, triple and staccato tonguing.

VOCAL MUSIC AND VOICE CULTURE.—The human voice properly cultivated is the sweetest and best of all musical instruments, if it can be called an instrument. This is attested by the fact that the standard of excellence claimed by all instrument makers is their near approach in tone to the human voice. Musical instruments represent three distinct qualities of tone: the pipe, the reed and the string. The human voice partakes of all these, hence its superiority. We use the system of voice culture adopted by the best European teachers. Solo, duet, quartette and chorals singing all require special and distinctive training for their several purposes. Musical theory must go hand in hand with practice in order that the pupil may practice intelligently. Harmony and composition are delightful studies, and the ambitious pupil can now have an opportunity to practice writing harmony, after which they may go still farther and study instrumentation, arranging music for bands and orchestras, studying the proper form of accompaniments to suit the melody, part given to each instrument, etc. etc. Having studied with graduates of the conservatories of music at Leipzig, Dresden and Munich, we have no hesitancy in asserting that we teach correctly, and an experience of nearly 20 years enables us to put under the greatest possible advancement in a given time.

In soliciting the patronage of Oakland's citizens we beg to say that teaching is not an experiment, but a success as has been attested by the notice of hundreds of our pupils scattered over half the states in the Union.

Respectfully,
S. C. SMITH.

52-41

SUMMER IS HERE

So is F. G. Hyde, Read this Ladies and Gentlemen.

This concerns everybody between the dates of March 15th and April 1st. I will sell at private sale anything I have in stock at what you wish to give for it, providing you offer me something near the wholesale price. I mean just what I say. Remember, I have not any stale goods. Don't keep any. Must have room for summer stock which will far surpass all efforts in the past. I have quite a number of small trinkets that I am going to dispose of, either sell or give them away and confine my business strictly to the jewelry and musical trade. I find that you don't have to sell everything in order to do business, but it is just the reverse, and every one-horse merchant will find it out if he lives long enough. I mean these little concerns that keep everything and nothing at last, and stay in business six months to a year. I would do without sugar in my tea a thousand years before I would buy a cent's worth of that firm. If everybody was like me he would not be in business 30 days until the sheriff would be running the concern. Please bear in mind my low prices for Cash.

Very respectfully,

F. G. HYDE.

Jeweler and Music Dealer, Oakland.

P. S.—Time will prove all things. Just have patience. 52-21

When Baby was sick, we gave her Castoria.

When she was a Child, she cried for Castoria.

When she became a Girl, she clung to Castoria.

When she had Children, she gave them Castoria.

Ready for Easter.

New spring hats, flowers, ribbons and a large assortment of laces.

THURSDAY, MARCH 8, 1894.

CONVICTS in the Maryland penitentiary have contributed from their overtime earnings a purse of \$435 for the relief of the needy in Baltimore. The contributions ranged from ten cents to five dollars. Some of the men desired to give more than the warden would permit them to give. The movement was the thought of the convicts. There is something very touching in this act.

Local Reciprocity.

The application of the principles of reciprocity should be made in every town or city that is ambitious of attaining prosperity. The mechanic or laborer who lives in a town, and who is dependent on the people of that town or community for employment, who spends his money in another city has no right to complain if his neighbor refuses to employ him, but instead imports a workman from some other locality to build his house, lay his wall or paint his barn as the case may be.

The merchant or shop-keeper who ignores his townsmen in a different line of business when he wishes to make a purchase goes from home to trade is not entitled to the least consideration from the people of his town. It is the duty of every person residing in a community to as far as possible reciprocate the many benefits which the community has conferred upon him, and the individual who fails in this regard is not endowed with that public spirit which characterizes a good citizen.

A Great Fake.

In our news column to-day will be found an article from the Baltimore American of Tuesday which will certainly afford much amusement to the people of Garrett county. Our citizens living in Districts Nos. 9 and 11 may look out for a large influx of silver prospectors shortly, seeking the El Dorado which the correspondent of the American has conjured up for the deception of its readers.

We trust that the people of Baltimore, readers of our distinguished contemporary, will not be beguiled into considering seriously that such a region as that depicted in this weird mountain tale exists in Garrett county. That silver ore is to be found in the locality mentioned there can be no doubt but that any human being could live there for years without coming into contact with our people and amass the wealth mentioned is too silly for consideration by persons of ordinary intellect.

We may be wild and woolly in our mountain fastnesses but such fakes as this don't go.

Why He Went Ducking.

The awful revelation is made that the President took to the swamps to get away from the importunities of the politicians of his party. He was especially annoyed by their efforts to get him to side with one faction, then another, on the tariff bill. This is somewhat fishy. It is a very small faction of the Democrats in Congress which opposes the Wilson bill. Only seventeen Democratic votes were polled against that measure in the House.

The President and the big majority of the Democrats in Congress have stood together for the bill. If he went away to escape the importunities of the small minority he is lacking in courage. It can hardly be true that Senator Hill and his shadow have importuned the President on this or any other question. They don't go at him in that way. They lie in wait and whack him with a club as he passes.

It may be that the President was tired of his party and wanted a little respite and repose, but his party has shown signs of growing weary of him, so what's the odds?—Intelligencer.

Assessment.
The Hayes assessment bill passed the Senate of Maryland on Friday of last week by a vote of nineteen to six, and we are pleased that the vote of our Senator was recorded in the negative.

This statement may come as a surprise to a large number of the readers of THE REPUBLICAN, but we are confident that were they acquainted with the bill in its present emasculated form, they would entirely agree with us. Another reason why we are glad that Garrett's representative voted as he did is because the Democratic party in the State of Maryland is entirely responsible for all legislation, whether it be good, bad or indifferent, and that party having in three successive campaigns pledged itself to a fair and equitable revaluation of property, and having as often failed to carry out its promise, could not expect to be extricated from the snarl into which it has gotten itself by Republican aid.

We do not believe that there is now or ever has been an honest intention on the part of the Democratic managers to pass the kind of bill which would relieve or evenly distribute the burden of taxation among the people. Some excuse has always been found for their failures to pass such a bill, and we have no doubt that when the session of 1894 closes that the people of Maryland will be just as far from the oft-promised relief as ever; indeed it has been suggested that the people vote upon the question of a re-assessment, and this in the face of the oft-repeated promises of the Democratic party to pass the bill. What the fate of the Hayes bill will be in the House of Delegates we are unable to say, but certain it is the Governor will not sign the bill in the shape in which it passed the Senate.

The Tariff Bill in the Senate.

The imbroglio upon the tariff bill in the Senate is complicated to such an extent that the probable result is not at all clear. The situation is made more uncertain by what is known as the "Democratic decemvirate," for it is ascertained as a fact that ten Democratic Senators have signed an agreement to oppose the Wilson bill so long as any one of the ten is dissatisfied with the provisions of the bill, or until changed to the satisfaction of all ten. It is said that "decemvirate" is the explanation for Senator Voorhees' angry words in the Democratic caucus some days ago, when he assented certain Democratic Senators with having formed a combination to defeat the Wilson bill. Certain it is that such a condition of affairs in the Senate would mean defeat to the bill unless coal, iron, sugar, wool, and collars and cuffs are restored to a protective tariff basis.

The feeling among the Democratic Senators against Gorman and Hill is especially bitter, and if it were possible for them to pass the bill without yielding anything to these two Senators they would do so. There are so many involved, however, in the demand for concession that they cannot be entirely ignored. The Democratic majority in the Senate is only three. There are forty-four Democrats, thirty-eight Republicans and three Populists. Two Democratic votes against the bill would defeat it, and unless material concessions are maintained at least three Democratic Senators would vote against it. These three Senators are Caffery, the successor of White, of Louisiana, and Smith, of New Jersey.

"W" Writes From New York.

Ascor House, New York, March 6, 1894.

I have been reading in the trade journals that the business situation is improving and thinking that might be a chance to get a few orders to enable me to keep my mill employed and mills running I came on here via Washington, Annapolis, Baltimore and Philadelphia. I have been out now four days including Sunday and have sold but one small load of hemlock boards on which there will not be a sufficient profit to pay two days' expenses.

I was out in January and sold nothing, but having a nice lot of s. rice lumber, which one year ago would have gone off quick at from one to two dollars advance on present prices, I thought that just now, in the beginning of the season, I could surely sell at some sort of a price, but people tell me that I could not name a price that would tempt them to buy.

They ask me if I am related to the chairman of the committee on Ways and Means. One day I asked me when I gave him my card if I was the author of the Wilson bill, and not satisfied with that, he introduced me to a gentleman who came in as the author of the Wilson bill. The fellow looked at me and said, "well, if he is the author of the Wilson bill I don't want to shake hands with him."

People tell me everywhere that they are not selling anything—that they have stacks of lumber on hand, and that they don't want to put any more money into lumber until there is a chance to get something out of it.

I went to a large trunk factory at Newark, where I sold two cars of lumber last spring and the proprietor said he could not buy anything as business is too flat. He said, "I don't know what you are but this Wilson bill is ruining the business of the country."

I said, "I would not suppose it could effect your business as you have no foreign competition." "That is all very true," said he. "Trunks are too bulky to ship from any other country, but when people are not earning anything they have no money to buy trunks with."

I have seldom heard much of the tariff talked by business men until recently, and I am surprised at the unanimity of the sentiment against the Wilson bill. There is hardly a man in business, especially the merchant business, that is not talking against the Wilson bill. There is really no perceptible improvement in business, and I see very few signs of improvement in all the lines of business. Just as a change of administration, just as quick as we get a party in power which will be true to the country and its vast interests there will be no confidence in the party at the helm to-day.

That party demonstrated its hostility to the Government and the interests of the American people when it tried to destroy the Union, and for thirty years it was kept under the ban, and now, after thirty-two years of retirement it strikes its advent to power by striking down the industries of the country.

The people want a change now very much more than they did in '92, and just as quick as they get the opportunity Mr. Cleveland and his party with its policy of infamy and destruction will go into "innocuous desuetude" to remain forever thirty years longer or until another generation of cranks and doctrinaires grow up and mock at reason and common sense as they did in the election of the horde of miserable incompetents who disgrace and degrade the very name of which every true American is so justly proud—that of being an American citizen.

It is impossible to think of Benjamin Harrison, James G. Blaine or any other of the great Republican statesmen in comparison with the miserable, disgraceful, contemptible conduct of Cleveland in relation to his Hawaiian policy. The very thought of it makes me tired.

Marriage Licenses.

Clerk Tower of the Circuit Court, has granted licenses to wed to the following named parties since our last published report:

Edward DeCost and Emily Male. John Wm. Whorton and Edna O. E. Y. Arnold.

GARRETT COUNTY.

An Interesting Review of Its History and Resources.

T. Jay in Cumberland News.

OAKLAND, Md., March 1, 1894.

MARYLAND CHARTER.

James I. died in 1624, and was succeeded by Charles I, who was a friend of Lord George Baltimore. King James I. had granted Lord Baltimore certain territory at Newfoundland, and he had founded a colony there, but becoming dissatisfied with the colony on account of the rigor of the climate he visited James City in Virginia in 1629, and being unable to take the oath of supremacy and oaths of allegiance that were tendered by the authorities of Virginia he petitioned the King to make him a grant of certain unsettled parts of Virginia. Before the charter was granted Lord George Baltimore died, and was succeeded by Cecil Calvert, Baron of Baltimore in Ireland, etc., and in 1632 Charles I. issued the charter of Maryland to said Calvert, a copy of which, in Latin, is filed with the bill of complaint of the State of Maryland in this case.

It is some doubt as to the exact reading of the original charter, and there is also some question as to what is the correct translation of it. The State of West Virginia submits the following as the best authentic copy of the original charter of Maryland, and also what is believed to be a true translation of it in parallel columns. This is an exact copy of the document obtained by Col. De Jarnette, who was sent by the State of Virginia to England in 1871 to procure documentary evidence relating to the disputed boundary lines between that State and the State of Maryland. Col. De Jarnette in his report to the State of Virginia, made November 8, 1871, says of this paper:

Chapter 20th, Patent to Cecil (Lord Baltimore) containing a grant of province of Maryland communicated to Mr. Beak from Lord Baltimore, dated June 20th, 1632. This purports to be the original found in the rolls office enrolled in parchment and expressed in the Latin language. This copy was taken by the keeper of the rolls and bears his official seal. To verify this (a most important paper) I employed Thomas Edlyne Tomlins (attorney at law and record solicitor of London's Inn Fields, London.) to copy and translate so much of this Latin charter found in the rolls office as describes the bounds of the territory thereby granted.

Translation—Extract Patent Roll, Charles I. Part 3, No. 6, (20, June 1632.) Of a grant to him and his heirs to Cecil, Baron of Baltimore, the King, etc. To all to whom, etc. Greeting.—Know ye therefore that we regarding with royal favor the pious and noble purpose and intention of the aforesaid Barons of Baltimore of our special grace, certain knowledge and more notion, have given, granted and confirmed, and by this our present charter for us, our heirs and successors to give, grant and confirm to the aforesaid Cecil, now Baron of Baltimore, and his heirs and assigns all that part of the peninsula or Chesapeake lying in the parts of America between the ocean on the east and the bay of Chesapeake on the west, divided from the remnant of the same by a right line drawn from the promontory or head of land called Watkins Point beside the bay aforesaid, situate near the river Wagon on the west as far as the great ocean on the eastern coast, and between that boundary on the sea as far as to that part of the estuary of the Delaware on the north which lieth under the fortieth degree of north latitude from the equator where New England is bounded; and all that tract of land within the boundaries underwritten, that is to say, going from the said estuary called Delaware bay in a right line in the degree aforesaid to the true meridian of the first source of the river of Potomack, then tending downwards towards the south to the farther bank of the said river and following it to where it faces the western and southern coast as far as to a certain place called Cinquack, situate near the mouth of the same river, where it discharges itself into the forenamed bay of Chesapeake, and from thence by the shortest line as far as the aforesaid promontory, or place called Watkins Point. So as all the tract of land divided by the line aforesaid, between the great ocean and Watkins Point as far as to the promontory called Cape Charles, and singular their appendages to us, our heirs and successors, are entirely remaining forever excepted. And also all the islands and isles within the limits aforesaid. We also grant and do confirm to the same baron of Baltimore, his heirs and assigns, all the singular islands and isles on the Eastern Shore of the aforesaid country towards the east risen, or to rise in the same sea situate within ten sea leagues from the same shore, with all and singular

ports, roads of shipping, estuaries, flowings of water and arms of the sea to the country or islands aforesaid belonging. A true translation. Thomas Elegne Tomlins, attorney at law and record solicitor, No. 20 Lincoln's Inn Fields, London, June 5, 1871.

It will be observed that the northern limits of Maryland, as described in the charter was the 40° north latitude where New England is bounded or terminates and that it extends from the Delaware bay with the 40° to the meridian of the first fountain of the Potomac. It is proper to state here that the Plymouth Company or northern Virginia colony had made no settlement up to 1629 and in that year a new and enlarged charter had been granted to the Duke of Lenox and others, who were denominated the Plymouth Company conveying to them in absolute property all the lands between the 40° north latitude. This company in 1727 conveyed to Henry Roswell and others that territory which is now Massachusetts, and in 1633 the Plymouth Company surrendered its charter to the Crown. In 1732 therefore the southern boundary of the Plymouth Company's territory or of New England as it was called was the 40° north latitude and it was to this line that Lord Baltimore's charter extended northward. The territory described in the Maryland charter also extended to the ocean and the Delaware bay on the east. WESTERN BOUNDARY OF MARYLAND.

The western boundary was to be ascertained by following the 40th degree to the true meridian of the first source of the river Potomac thence tending downward toward the south to the further bank of the said river and following it to where it faces the western and southern coast as far as to a certain place called Cinquack, situated near the mouth of the same river where it discharges itself into the forenamed bay of Chesapeake.

It will be observed that the whole of the territory described in the charter to Lord Baltimore was included within the territory of the Virginia charter of 1609. The Virginia colony strenuously opposed the granting of this charter to Baltimore and tried to have it revoked after it was issued, claiming that the territory belonged to Virginia and that it was an unwarranted and unlawful dismemberment of her domain. The King referred the matter to his Privy Council and the controversy was heard by the council and on the 3rd day of July, 1633, they decided to leave Lord Baltimore to his patent and the other parties to the course of the land according to their desire.

NORTHERN NECK OF VIRGINIA.

On the 28th of July, 1639, a petition by the governor and company of London, for the plantation of the Somer Isles—now Bermuda Isles, addressed the lord of commission of foreign plantations shows that said company was incorporated about the year 1621, and the inhabitants were not able to subsist there and sought another place. That an agreement had been made between the company of Virginia and the petitioners when the latter purchased the Somer Isles from the former; that the petitioners should receive a large proportion of land in Virginia, and they prayed for a grant of land situate and being between the two rivers of Rappahannock and Potomack. This petition shows that the Northern Neck, as it is now called, was not then inhabited by English subjects, and that no grant thereof had yet passed to any. This, with the enclosed papers, was submitted to the lord's commissioners on the 1st day of August, 1639. Then August 3rd, 1663, came a letter from Charles II. to the Governor and Council of Virginia, reciting that he had granted to Henry, Lord Gernine, now Earl of St. Albans, Ralph, Lord Hopton and others, in the first year of his reign, by letters patent under the great seal of England, all that tract, territory or portion of land in America, bounded by and within the heads of Tappanahock alias Rappahannock and Querrough or Potomack rivers, the sources of these rivers and Chesapeake bay, together with the rivers themselves, and all the islands within the banks of the said rivers as in and by said letters patent doth and may more at large appear, which by reason of the late unhappy and unsettled times, they could not plant or enjoy according to our royal intention. And it recites that the said Earl of St. Albans, Lord Berkely, Sir William More and an servant, John Pety, assignee of said Lord Hopton, had lately since the restoration of said Charles II. to his rights and government, granted and demised to Sir Humphrey Hooket and others the said tract and territory for a certain number of years, and also reciting that he had by his letters under his sign manual signified to the governor and the council of Virginia that they should give these

patentees aid and assistance, and that he had reasons to believe his said letters had miscarried and had not come to their hand, for that they had lately obstructed the proceedings upon his said letters patent, and had not permitted the patentees, etc., to act in pursuance or according to the tenor thereof. And then directs that the governor and council shall forbear to give any further interruption, but that they aid and assist the patentees, etc., and concludes as follows: Neither are we intending, nor our said patentees desiring to withdraw the said colony from under your government or appeal.

Offutt's Hall, Wednesday, March 21st. GRAND BENEFIT GIVEN FOR THE OAKLAND CORNET BAND.

A grand OLD-FASHIONED NEGRO MINSTREL SHOW, will be given on the above date. PLENTY OF MUSIC. FUN. BOATING PARTIES. SINGING.

No show has ever appeared on the Oakland stage having as complete a program. Entire band and complete orchestra will be present and furnish music.

The members of the band have been making preparations for this entertainment for a number of weeks and to hear the music will be worth the admission price.

If You are Going to Court Don't Miss This Show

GENERAL ADMISSION, 25 Cents.

LOOKOUT FOR FULL PROGRAM IN NEXT ISSUE!

COMMISSIONERS' MEETING

OFFICE OF THE GARRETT COUNTY COMMISSIONERS

OAKLAND, MD., March 19th, 1894.

The County Commissioners for Garrett County will meet at their office in Oakland on

Monday, March 19, 1894.

For the purpose of transacting any business that may come before them.

By order of the Board.

J. S. MEYER, Clerk.

FOR DYSPEPSIA,

Indigestion and Bloating, take BROWN'S IRON BITTERS.

All dealers keep it. 81 per bottle. Genuine trade-mark and colored red label on wrapper.

YEARS A HERMIT.

His Abode in the Fastnesses of Great Savage Mountain.

A special to the Baltimore American on Monday from its correspondent at Frostburg, relates the following interesting and decidedly romantic story, located in the fastnesses of the Great Savage Mountains:

James Watts, who lives on Great Savage Mountain, four miles from Frostburg, to-day returned from a hunting trip through the wilds of Garrett county, and tells an interesting story of the discovery of a hermit and the location of a vein of silver ore. There has long existed in this section a firm belief that in Garrett county there is a deposit of rich silver ore. A mountaineer named Layman, who died a few years ago, claimed that he had once discovered the place where the deposit is located, but on leaving it he was never able to relocate the place.

The story is corroborated by the experience of Mr. Watts. Watts left home on Friday morning last to hunt for game. About noon he came upon the tracks of a wildcat in the snow, and following it for several miles, he found himself in a locality never before visited by him. In a deep gorge, surrounded by a dense thicket, he discovered a rude cabin. It being near nightfall, Watts sought admission and found within the cabin an old man lying upon a couch, who said he had been ill for several days. The hunter prepared supper and spent the night in the cabin.

Next morning the old man was worse, and Watts decided to remain with him all day. In the afternoon the hermit called Watts to his bedside and said he wished to tell him the story of his life, as he knew that he could live but a few hours. He said his name was Henry Lembach, and was born in Munich in 1814. He was educated at the University of Heidelberg, and while there fell in love with a pretty girl named Katherine Reiff, who jilted him to become the wife of a banker in order to please her father. He then determined never to marry, and in 1841 came to America, and in 1849 went to California to join in the search for gold.

After spending ten years there, he came East and settled in those mountains, having learned that somewhere in this vicinity was a deposit of precious metal. He had a general description of the locality in which the metal was to be found. Not wishing his object to become known, he built his cabin in a secure place, and only when absolutely necessary made trips to neighboring towns to purchase food. He brought with him from the West a snug fortune, and for nearly three years kept up the search for hidden treasure.

At length, almost by accident he discovered a vein of silver ore assaying nearly \$100 a ton. He constructed a smelting furnace in his cabin and reduced ores till he had silver bullion to the value of \$35,000. He directed Watts to take from under his bed, after his death, a box containing papers of value.

The old man's voice then became weaker, and was too much exhausted to talk further. Late Saturday evening he died, Watts dug a grave near the cabin, and the next day he buried Lembach in a coffin which had evidently been made by the latter. Sunday night Watts spent in the cabin, and found the place where the silver bricks were hidden. He found the box to contain \$540 in gold, and a small amount of silver change, a map showing the route from the cabin to the deposit of ore, and several letters addressed to persons in Germany.

Watts started for home at daylight this morning, bringing with him the papers and the gold. He followed his tracks made in the snow on Friday until he reached a portion of the mountain with which he was familiar. He is confident he can find the place again after the snow melts. Lembach has been seen in Frostburg at various times during the past twenty-five or thirty years, but no one ever knew where he lived or what his occupation was. He was evidently well educated and a man of culture. Watts contemplates a visit to the cabin this week, and will also try to locate the place where the silver ore was found.

For Good Roads.

The committee on roads and highways, of which Mr. Archibald H. Taylor is chairman, in returning to the House of Delegates a favorable report on the "bill to create a department of roads and highways," says:

"From every agricultural community in every state in the United States, where bad roads exist, and they exist in the large majority of these communities, has come a cry of distress on account of the suffering, inconvenience and hardship which the people undergo by reason of bad roads. For the long period covered by the winter and early spring, the movement of farm

produce is practically prohibited. At all seasons of the year the burden and expense of such transportation is far greater than need be. In all the states exists a demand for a remedy of the evil so widely felt, and in nearly all the people have come to recognize that the remedy requires the employment of the resources and power of the state, not the spasmodic exercise of the limited resources of a district or county. The people of our own state at large have appealed to the Legislature for relief. The bill in hand was prepared and presented to this House by the Maryland Road League, composed of representative farmers in all counties of the state. Its provisions are in no way compulsory upon any county or community. It in effect provides scientific and practical advice and assistance, which are gratuitously at the service of any county that may desire to make use of them. For want of information and intelligent plans it is estimated that out of \$400,000 a year spent for road-making and mending in our state, at least \$100,000 are totally wasted. The share of expense cast upon each county by the plan of the bill is insignificant, and is expected in no way to increase the state levy. Its advantages are offered freely to those counties that desire it, and will be availed of by those whose need is greatest. Every item of expense has been considered by the committee, and amendments have reduced to the most economical figure all expenditures under the bill. It should be added that the bill has been approved by the chief of bureau of roads and highways of the United States, as the best of its kind yet introduced into any State."

Savage River.

We are sorry to say that our fine sledding snow has entirely disappeared but good use was made of it.

Mr. Stephen Wilt has given up his notion of going to the Smoky South and evidently intends to roll the sod another year.

Misses Lizzie Wilt and Flora Foster, two of Westernport's most bright and enthusiastic young ladies, gave us a pleasant call. They returned on last Wednesday. Miss Ida Bowers, of Fairview, accompanied them.

Mr. William Blocher, of Backwoods, gave us a pleasant call on last Thursday.

Mr. Geo. O. Broadwater has erected a new kitchen. S. F. Broadwater did the carpenter work.

Rev. J. H. Gregg preached a most interesting and able sermon at Fairview on Sunday, Feb. 18, to a large audience.

Mr. Frank Broadwater, one of our young men, paid a visit to Fairview on Sunday the 8th. He reports a pleasant time.

Our school is progressing nicely under the efficient care of W. M. Englehart.

Levi Bittinger, Esq., and Mr. Nels. T. Witt made an exchange (or in plain words had a "swap") of animals, Mr. Bittinger getting a mile for a gray horse.

The mumps are raging in our vicinity. They are considered very contagious.

Mr. Nelson Broadwater has threshed his large yield of oats. The yield was fifty dozen per acre. Each dozen cleaned one bushel.

Mr. David McIntyre has finished his contract for a large number of crosses, Mr. Wash. House, Mr. George Wilt and Mr. Nathaniel Rounds assisting him.

Deer Park.

Mr. Solomon Hodge is building the Garrett cottage.

Mr. George Marville, sr., of German, is at home on account of the sickness in his family.

Prof. E. Lee, of Flintstone, was here last week.

Mrs. Henry Shank, of Swanton, is visiting her daughter, Mrs. J. S. Laughlin.

Mrs. James Baldwin and her two daughters, of North Glade, are among their many friends here.

We are glad to say all our sick are improving.

Mr. M. Shaffer lost a valuable cow last week.

Rev. N. Hart preached a very interesting sermon here last Sunday.

Miss Ettie Clary, of Antioch, is visiting her sister Mrs. Frank Thrasher.

Great praise is due Rev. J. W. Bedford and Rev. C. E. Feather for one of the most successful revivals that ever took place here. About twenty-five have been to the altar, most of whom have received Christ, and others still coming. We hope that those who have embraced religion will use all their power to keep it and not depend too much on religion keeping them.

Mr. Solomon Hodge and quite a number of the good people of this place attended preaching at the Chadderton school house last Sunday.

Rev. Wm. E. George is on the sick list.

Mr. J. A. Endow, of Mountain Lake Park, was here on business this week.

GOVERNOR BROWN'S VIEW.

What He Says on the Assessment and the Party Caucus.

The following interview with Governor Brown appears in the Indianapolis correspondence of the Baltimore Sun of Saturday:

Governor Brown spoke very freely this morning on his position on the assessment question and the manner in which he has tried to fulfill the pledges of the party. Ever since his inauguration his utterances on this matter have been of the most open and candid character. He said: "Recognizing the demand for revaluation and assessment when I went into office, and knowing of the veto of the bill by Governor Jackson in the spring of 1890, I determined to leave the provisions of an assessment bill entirely in the hands of the General Assembly, free and untrammelled. The course of this measure through the Legislature of 1892 is well known. When the bill reached the Governor it was after the adjournment of the session, and went before him altogether with over 100 other bills. All of these bills were required to approve, if at all, within six days. The examination of all these bills devolved upon the executive the most careful and considerate thought. In withholding his signature from the assessment bill he gave a statement of his reasons for doing so.

"After this it was determined to procure a general expression of the people of the State, regardless of party or faction, on this important question. The result of this was the well-known convention in the winter of 1893. This convention was brought to a sudden termination owing to the illness of the Governor due to his participation in President Cleveland's inauguration. The convention being informed of the Governor's serious illness and the doubt as to his recovery, it adjourned without having reached any specific conclusions."

The Governor says he had earnestly hoped to obtain from this convention some well digested plan and principles upon which revaluation should be based. He also states that his action in failing to approve the assessment bill was criticised generally, yet he did not hesitate to call into consultation this body composed of men of all opinions on the subject. They had a full opportunity to censure or commend. At the opening of the convention he made a formal statement of his objections to the provisions of the bill and the plan he took at the time, he added, "I still maintain."

The Governor then went on to refer to the views embodied in his message. He showed that he recommended only the enactment of conservative legislation, the separation of the question, one bill providing the machinery for revaluation and another bill for revenue. His idea was that if by any possibility the revenue bill should fail revaluation would go on. Finding that there were some objections on the part of the Senate more particularly to his plan of action, he determined, if possible, to harmonize the differences and of his own volition sought an interview with the principal opponents in the Senate. The result of this was the well-known Renner Hotel conference, where a compromise measure was agreed upon, removing to a very great extent the bill of 1892. The Governor says it was thought that this compromise measure would pass without serious opposition, but the ink was scarcely dry on the bill before there were murmurings of discontent, brought about largely by the sentiment that was brewing against any assessment whatever. This was augmented by the growing doubt in the minds of the people as to our increase in the assessable basis under any act. Some members, recognizing this danger, determined to go for new proposals which might under rigid provisions be added to the basis and thereby prevent an increased levy. Hence the proposition to tax mortgages was offered and adopted as an amendment to the bill. After much discussion and delay an additional amendment was introduced providing for the scaling of corporation bonds, notwithstanding the distinct understanding at the Renner Hotel conference that it be eliminated, the Governor holding that it was unconstitutional. Following this was the proposition to exempt mortgages owned by building associations. The bill as it stands taxes individual mortgages at one rate, corporation bonds secured by mortgage at another, and exempts mortgages entirely held by building associations. This, in the opinion of the Governor, is in direct conflict with the decisions requiring that all classes of property be uniformly taxed. The Governor added:

"I believe that this class of legislation will bring upon the State the greatest disaster that has been known in its history, and to a great extent destroy many sections of the agricultural community. If rigidly enforced it will possibly result in the absolute abandonment of farms by their owners in order to avoid the payment of mortgage obligations. With these views I felt it incumbent to say to the General Assembly and to the people at large, without regard to party, that it was extremely doubtful whether I could make myself a party to the measure in its present shape. But being a thorough and consistent party man I determined to convene the party, which had in State conventions committed itself to the passage of an assessment bill, for the purpose of a general conference and exchange of views, in the hope that some satisfactory result might be reached and remove the serious objections I have to the measure in its present shape. Hence the call for a party conference, which will be held on Wednesday night, the 7th instant. Finding that even this proposition was antagonized by some of the Senators, who positively declined to go into caucus and be bound by any conclusions that might be reached, and being thoroughly convinced that my action was proper under the circumstances the call was proceeded with, and is now signed by two-thirds of the Democratic members of the General Assembly. The caucus now only awaits the call of the chairman. Not wishing to be in conflict with the Senators, I gave it as my judgment that it would be best for the Senate to proceed to pass the bill and leave the House of Delegates to decide its own course. Hence there was scarcely any opposition in the Senate to the passage of the bill to-day. I now feel that I have done all more than the people of the State and my party had a right to expect, and the matter is left with the General Assembly, reserving to myself the right to determine as to my action on the merits of the question when it reaches me."

agricultural community. If rigidly enforced it will possibly result in the absolute abandonment of farms by their owners in order to avoid the payment of mortgage obligations. With these views I felt it incumbent to say to the General Assembly and to the people at large, without regard to party, that it was extremely doubtful whether I could make myself a party to the measure in its present shape. But being a thorough and consistent party man I determined to convene the party, which had in State conventions committed itself to the passage of an assessment bill, for the purpose of a general conference and exchange of views, in the hope that some satisfactory result might be reached and remove the serious objections I have to the measure in its present shape. I now feel that I have done all more than the people of the State and my party had a right to expect, and the matter is left with the General Assembly, reserving to myself the right to determine as to my action on the merits of the question when it reaches me."

North Glade.

Pleasant weather.

Mrs. James Baldwin and daughter are on a visit to Deer Park.

Miss Mollie Beckman took a trip to Piedmont last week.

Mr. Wm. Bray was visiting Theo. Beckman.

Mr. J. L. McRobie filled the appointment of Rev. C. E. Feather at Glade Valley last Sunday.

Times are hard but nevertheless Theo. Beckman is doing a good business saving lumber.

Rich Moon's smile is spread all over his face—a 13-pound boy.

Mr. Tim Laffey accompanied by his three sisters and Miss Sue Beckman were visiting friends here last Sunday afternoon.

Look out girls, Mr. J. W. Painter has a new horse and he says "the long wars" he is going to have a baggy.

Success to THE REPUBLICAN and all its readers. KNOW ALL.

Glade Valley.

Plenty of mud.

Weather very warm and the snow is all gone.

Farmers are busy opening their sugar camps.

Mr. and Mrs. A. S. Mosser were the guests of J. S. Hauser last Sunday.

Mr. Frank Shaffer was the guest of H. A. Shaffer last Saturday.

The Gauer school will close March 14.

Prof. David Guegy has organized a singing class at the Red House.

Mr. E. H. Foreseythe, of Michigan, who has been with us several weeks visiting relatives, is to go home this week.

New Germany.

Rev. D. H. Leader preached at Trinity Reform church on Sunday at 10.30 a. m., subject, Home Missions. In two weeks his subject will be Foreign Missions.

The past week was a happy time for the young folks. Sleighting parties were all the go.

A sleighing party from Grantsville spent a pleasant evening at C. J. Otto's. The party was composed of Messrs. Ed. and Harry Guegy, Misses Lillie Kartz, Anna Guegy, Cinda Figgie, Nora Muhlberg and Maggie Swager.

Quite a number of our young people have been attending church at Bittinger.

C. J. Otto and family spent Thursday evening at Mr. John Bancord's.

D. N. Crow & Bros. are putting in a large amount of shingle wood to C. J. Otto's mill.

Lloyd Wiland finished up logging on Saturday.

J. L. Fresh attended church on Sunday. He reports having a good time at the Old Stone House.

Peter Broadwater passed through here in a sleigh the other day.

Mr. Louis Breneman and Miss Mandy Elthorp, Mr. John Breneman and his sister Jennie spent one evening with friends here.

The snow has about disappeared.

Mr. Henry Swager and his son Albert are down with the mumps.

John Mathews is wearing a smile on his face. It is a girl.

CASTORIA

for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. ANCHER, M. D., 117 So. Oxford St., Brooklyn, N. Y.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTIN, D. D., New York City.

Castoria cures Colic, Constipation, Sour Stomach, Diarrhoea, Indigestion, Kills Worms, gives sleep, and promotes digestion. Without injurious medication.

"For several years I have recommended your 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results." EDWIN F. PARKER, M. D., 120th Street and 7th Ave., New York City.

THE CENTAUR COMPANY, 27 MURRAY STREET, NEW YORK CITY.

Poor Printing Pays.

Poor Profits.

We get out a class of printing that is superior to the "general run." Good printing pays, and that is the only kind we furnish our customers and patrons.

The Republican Job Printing Department, Oakland, Maryland.

MERCHANT TAILORING.

B. Savage, the Tailor, has returned to Oakland and reopened his Tailoring Establishment, and will be pleased to serve the people of the town and vicinity at exceedingly low prices.

He will make Suits of all wool goods, fit guaranteed, for \$15 and up.

He has also large and complete stock of ready-made clothing which he will alter to suit and make no charge for the alteration. Give him an early call and judge for yourselves. He will also have short times have a full line of shoes and hats for sale. Yours respectfully, B. SAVAGE, 24-26 E. Second St., Oakland, Md.

WINTER

Weather has come at last, and our prices on winter goods are so low that you can buy them at one-half the price that you would pay at any other store in the country.

Best flannels for 23 cents per yard; heavy muslin reduced from 10c. to 6c.; heavy muslin reduced from 9c. to 5c.; heavy hose reduced from 50c. to 30c.; heavy shirts, all wool, reduced from \$1.50 to \$1.; heavy shirts reduced from \$1.25 to 90c.; heavy blankets, all wool, reduced from \$6.50 to \$4.75, from \$5. to \$3.50 and from \$2.50 to \$1.90, overcoats reduced from \$7.50 to \$5.75, and from \$6.50 to \$4.75; comforts reduced from \$2.25 to \$1.50; all wool clothing at a sacrifice; rubber shoes, boots and felts at almost half price; gingham reduced from 10c. to 7c. and from 8c. to 5c.; four skeins yarn for 25c.; all wool underwear at prices to suit the closest buyer; calicos at 4c. to 7c.; Turkey red table cloth, all linen, from 43c. to 47c. per yard; flour from \$3.25 to \$5. per barrel; 3 cans tomatoes 25c.; 21 lbs. granulated sugar \$1.; 6 cakes best soap 25c.; 21 lbs. rice, \$1.; 13 lbs. pitted cherries, \$1.; 22 lbs. beans, \$1.; 12 lbs. best evaporated peaches, \$1.; 33 lbs. hominy, \$1.; peaches, pears and apricots, 18c. per can; tapioca, 9c. per lb.; gelatine, 15c. per package; Fox's corn starch, 9c. per package; Vanhouten's cocoa, 15c. per package; Baker's chocolate, 19c. per cake.

The above are quotations on a few of our goods, and a call from you will be sufficient to convince you that we mean business.

Respectfully yours,

SINCELL BROS.

YEARS A HERMIT.

His Abode in the Fastnesses of Great Savage Mountain.

A special to the Baltimore American on Monday from its correspondent at Frostburg, relates the following interesting and decidedly romantic story, located in the fastnesses of the Great Savage Mountains:

James Watts, who lives on Great Savage Mountain, four miles from Frostburg, to-day returned from a hunting trip through the wilds of Garrett county, and tells an interesting story of the discovery of a hermit and the location of a vein of silver ore. There has long existed in this section a firm belief that in Garrett county there is a deposit of rich silver ore. A mountaineer named Layman, who died a few years ago, claimed that he had once discovered the place where the deposit is located, but on leaving it he was never able to relocate the place.

The story is corroborated by the experience of Mr. Watts. Watts left home on Friday morning last to hunt for game. About noon he came upon the tracks of a wildcat in the snow, and following it for several miles, he found himself in a locality never before visited by him. In a deep gorge, surrounded by a dense thicket, he discovered a rude cabin. It being near nightfall, Watts sought admission and found within the cabin an old man lying upon a couch, who said he had been ill for several days. The hunter prepared supper and spent the night in the cabin.

Next morning the old man was worse, and Watts decided to remain with him all day. In the afternoon the hermit called Watts to his bedside and said he wished to tell him the story of his life, as he knew that he could live but a few hours. He said his name was Henry Lembach, and was born in Munich in 1814. He was educated at the University of Heidelberg, and while there fell in love with a pretty girl named Katherine Ruff, who jilted him to become the wife of a banker in order to please her father. He then determined never to marry, and in 1841 came to America, and in 1849 went to California to join in the search for gold.

After spending ten years there, he came East and settled in these mountains, having learned that somewhere in this vicinity was a deposit of precious metal. He had a general description of the locality in which the metal was to be found. Not wishing his object to become known, he built his cabin in a secure place, and only when absolutely necessary made trips to neighboring towns to purchase food. He brought with him from the West a snug fortune, and for nearly three years kept up the search for hidden treasure.

At length, almost by accident he discovered a vein of silver ore assaying nearly \$100 a ton. He constructed a smelting furnace in his cabin and reduced ores till he had silver bullion to the value of \$35,000. He directed Watts to take from under his bed, after his death, a box containing papers of value.

The old man's voice then became weaker, and was too much exhausted to talk further. Late Saturday evening he died, Watts dug a grave near the cabin, and the next day he buried Lembach in a coffin which had evidently been made by the latter. GOVERNOR BROWN'S VIEW.

What He Says on the Assessment and the Party Caucus.

The following interview with Governor Brown appears in the Indianapolis correspondence of the Baltimore Sun of Saturday:

Governor Brown spoke very freely this morning on his position on the assessment question and the manner in which he has tried to fulfill the pledges of the party. Ever since his inauguration his utterances on this matter have been of the most open and candid character. He said: "Recognizing the demand for revaluation and assessment when I went into office, and knowing of the veto of the bill by Governor Jackson in the spring of 1890, I determined to leave the provisions of an assessment bill entirely in the hands of the General Assembly, free and untrammelled. The course of this measure through the Legislature of 1892 is well known. When the bill reached the Governor it was after the adjournment of the session, and went before him altogether with several other acts. All of these bills were required to approve, if at all, within six days. The examination of all these acts devolved on the executive the most careful and considerate thought. In withholding his signature from the assessment bill he gave a statement of his reasons for doing so.

"After this it was determined to procure a general expression of the people of the State, regardless of party or faction, on this important question. The result of this was the well-known convention in the winter of 1893. This convention was brought to a sudden termination owing to the illness of the Governor due to his participation in President Cleveland's inauguration. The convention being informed of the Governor's serious illness and the doubt as to his recovery, it adjourned without having reached any specific conclusions."

The Governor says he had earnestly hoped to obtain from this convention some well digested plan and principles upon which revaluation should be based. He also states that his action in failing to approve the assessment bill was criticised generally, yet he did not hesitate to call into consultation this body composed of men of all opinions on the subject. They had a full opportunity to censure or commend. At the opening of the convention he made a formal statement of his objections to the provisions of the bill and the position he took at the time, he added, "I still maintain."

The Governor then went on to refer to the views embodied in his message. He showed that he recommended only the enactment of conservative legislation, the separation of the question, one bill providing the machinery for revaluation and another bill for revenue. His idea was that if by any possibility the revenue bill should fail revaluation would go on. Finding that there were some objections on the part of the Senate more particularly to his plan of action, he determined, if possible, to harmonize the differences and of his own volition sought an interview with the principal opponents in the Senate. The result of this was the well-known Rennett Hotel conference, where a compromise measure was agreed upon, removing to a very great extent the bill of 1892. The Governor says it was thought that this compromise measure would pass without serious opposition, but the ink was scarcely dry on the bill before there were murmurings of discontent, brought about largely by the sentiment that was brewing against any assessment whatever. This was augmented by the growing doubt in the minds of the people as to our increase in the assessable basis under any act. Some members, recognizing this danger, determined to go for new provisions which might under rigid provisions be added to the basis and thereby prevent an increased levy. Hence the proposition to tax mortgages was offered and adopted as an amendment to the bill. After much discussion and delay an additional amendment was introduced providing for the sealing of corporation bonds, notwithstanding the distinct understanding at the Rennett Hotel conference that it be eliminated, the Governor holding that it was unconstitutional. Following this was the proposition to exempt mortgages owned by building associations. The bill as it stands taxes individual mortgages at one rate, corporation bonds secured by mortgage at another, and exempts mortgages entirely held by building associations. This, in the opinion of the Governor, is in direct conflict with the decisions requiring that all classes of property be uniformly taxed. The Governor added:

"I believe that this class of legislation on the question of mortgages will bring upon the State the greatest disaster that has been known in its history, and to a great extent destroy many sections of the agricultural community. If rigidly enforced it will possibly result in the absolute abandonment of farms by their owners in order to avoid the payment of mortgage obligations. With these views I felt it incumbent to say to the General Assembly and to the people at large, without regard to party, that it was extremely doubtful whether I could make myself a party to the measure in its present shape. But being a thorough and consistent party man I determined to convene the party, which had in State conventions committed itself to the passage of an assessment bill, for the purpose of a general conference and exchange of views, in the hope that some satisfactory result might be reached and remove the serious objections I have to the measure in its present shape. Hence the call for a party conference, which will be held on Wednesday night, the 7th instant. Finding that even this proposition was antagonized by some of the Senators, who positively declined to go into caucus and be bound by any conclusions that might be reached, and being thoroughly convinced that any action was proper under the circumstances the call was proceeded with, and is now signed by two-thirds of the Democratic members of the General Assembly. The caucus now only awaits the call of the chairman. Not wishing to be in conflict with the Senators, I gave it as my judgment that it would be best for the Senate to proceed to pass the bill and leave the House of Delegates to decide its own course. Hence there was scarcely any opposition in the Senate to the passage of the bill to-day. I now feel that I have done all and more than the people of the State and my party had a right to expect, and the matter is left with the General Assembly, reserving to myself the right to determine as to my action on the merits of the question when it reaches me."

North Glade.

Pleasant weather. Mrs. James Baldwin and daughter are on a visit to Deer Park. Miss Mollie Beckman took a trip to Piedmont last week.

Mr. Wm. Bray was visiting Theo. Beckman.

Mr. J. L. McRobie filled the appointment of Rev. C. E. Feather at Glade Valley last Sunday.

Times are hard but nevertheless Theo. Beckman is doing a good business sawing lumber.

Mr. Moon's smile is spread all over his face—a 13-pound boy.

Mr. Tim Ladley accompanied by his three sisters and Miss Sue Beckman were visiting friends here last Sunday afternoon. Look out girls, Mr. J. W. Painter has a new horse and he says "by the long wars" he is going to have a buggy. Success to THE REPUBLICAN and all its readers. KNOW ALL.

Glade Valley.

Plenty of mud. Weather very warm and the snow is all gone.

Farmers are busy opening their sugar camps.

Mr. and Mrs. A. S. Mosser were the guests of J. S. Hauser last Sunday.

Mr. Frank Shaffer was the guest of H. A. Shaffer last Saturday.

The Gauer school will close March 14.

Prof. David Guey has organized a singing class at the Red House.

Mr. Eb. Foreseythe, of Michigan, who has been with us several weeks visiting relatives, is to go home this week. O. K.

New Germany.

Rev. D. H. Leader preached at Trinity Reform church on Sunday at 10.30 a. m., subject, Home Missions. In two weeks his subject will be Foreign Missions.

The past week was a happy time for the young folks. Sleight parties were all the go.

A sleight party from Grantsville spent a pleasant evening at C. J. Otto's. The party was composed of Messrs. Ed. and Harry Gnagey, Misses Lillie Kritz, Anna Gnagey, Cinda Figgie, Nora Muhlberg and Maggie Swanger.

Quite a number of our young people have been attending church at Bittinger.

C. J. Otto and family spent Thursday evening at Mr. John Bancord's.

D. N. Crow & Bros. are putting in a large amount of shingle wood to C. J. Otto's mill.

Lloyd Wiland finished up logging on Saturday.

J. L. Fresh attended church on Sunday. He reports having a good time at the Old Stone House.

Peter Broadwater passed through here in a sleigh the other day.

Mr. Louis Breuneman and Miss Mandy Elithorp, Mr. John Breuneman and his sister Jennie spent one evening with friends here.

The snow has about disappeared. Mr. Henry Swanger and his son Albert are down with the numps. John Mathews is wearing a smile on his face. It is a girl.

CASTORIA

for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." D. A. Archer, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTIN, D. D., New York City.

Castoria cures Croup, Whooping Cough, Sore Throat, Hoarseness, Flatulence, Indigestion, Biliousness, Stomachic, and promotes the assimilation of food without injurious medication.

"For several years I have recommended your 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results." EDWIN F. DAVENPORT, M. D., 125th Street and 7th Ave., New York City.

THE CASTORIA COMPANY, 27 MURRAY STREET, NEW YORK CITY.

Poor Printing

Pays

Poor Profits.

We get out a class of printing that is superior to the "general run." Good printing pays, and that is the only kind we furnish our customers and patrons.

The Republican Job Printing Department, Oakland, Maryland.

MERCHANT TAILORING.

B. Savage, the Tailor, has returned to Oakland and reopened his Tailoring Establishment, and will be pleased to serve the people of the town and vicinity at exceedingly low prices.

He will make Suits of all wool goods, fit guaranteed, for \$15 and up.

He has a large and complete stock of ready made clothing which he will alter to fit and make no charge for the alteration. Give him an early call and judge for yourselves. He will also in a short time have a full line of shoes and hats for sale. Yours respectfully, B. SAVAGE, 209, 2nd and 3rd streets.

WINTER

Weather has come at last, and our prices on winter goods are so low that you can buy them at one-half the price that you would pay at any other store in the country.

Best flannels for 23 cents per yard; heavy muslin reduced from 10c. to 6c.; heavy muslin reduced from 9c. to 5c.; heavy hose reduced from 50c to 30c.; heavy shirts, all wool, reduced from \$1.50 to \$1.; heavy shirts reduced from \$1.25 to 90c.; heavy blankets, all wool, reduced from \$6.50 to \$4.75, from \$5. to \$3.50 and from \$2.50 to \$1.90, overcoats reduced from \$7.50 to \$5.75, and from \$6.50 to \$4.75; comforters reduced from \$2.25 to \$1.50; all wool clothing at a sacrifice; rubber shoes, boots and felts at almost half price; gingham reduced from 10c. to 7c. and from 8c. to 5c.; four skeins yarn for 25c.; all wool underwear at prices to suit the closest buyer; calicoes at 4c to 7c.; Turkey red table cloth, all linen, from 43c. to 47c. per yard; flour from \$3.25 to \$5. per barrel; 3 cans tomatoes 25c.; 21 lbs. granulated sugar \$1.; 6 cakes best soap 25c.; 21 lbs. rice, \$1.; 13 lbs. pitted cherries, \$1.; 22 lbs. beans, \$1.; 12 lbs. best evaporated peaches, \$1.; 33 lbs. hominy, \$1.; peaches, pears and apricots, 15c. per can; tapioca, 9c. per lb.; gelatine, 15c. per package; Fox's corn starch, 9c. per package; Vanhonten's cocoa, 15c. per package; Baker's chocolate, 19c. per cake.

The above are quotations on a few of our goods, and a call from you will be sufficient to convince you that we mean business.

Respectfully yours,

SINCELL BROS.

BENEATH THE CHIMNEYS TALL.

Where spiders stretch their silvery webs to compass but their prey.
Where mice hold wonton revelry all night till rosy day.
Where trees and clouds are ever near; where people seldom call.
There dwells a very funny world, beneath the chimneys tall.

There tigers, bears and elephants abide for aye in peace;
The lion flings his tawny length beside the lamb's white fleece;
And woolly dogs there are that never bark or bite at all.
And blue-eyed China pussy cats, beneath the chimneys tall.

A chestnut colt with winding horn still at the saddle bow,
Who's won the hush in many a chase, no more the field may know.
Two leas are off, his tail is gone, his nose clipped by a fall—
He's pastured in the meadow lots, beneath the chimneys tall.

And horrid war has left its mark in this secluded place;
A score of soldiers' headless lie—a captain in gold lace.
The dandy black-mouthed cannon piece that sent the fatal fall—
Is falling sadly to decay, beneath the chimneys tall.

Fair wakened dames with faded cheeks and gowns of silver sheen
Dwell sadly now upon the days of glory that have been;
And gentlemen who once were first at tournament and ball
Have all retired to private life, beneath the chimneys tall.

Old drums that never more will drum and horns that will not blow,
Flags that forever more are faded, steamships that will not go,
With trains of cars and blocks enough to build a Chinese wall.
Are gathered all within the space beneath the chimneys tall.

Where spiders stretch their silvery webs to compass but their prey.
Where mice hold wonton revelry all night till rosy day.
Where trees and clouds are ever near; where people seldom call.
There dwells a very funny world, beneath the chimneys tall.

—Elliott K. Stickley, in Banner of Gold.

DICK DOOLITTLE'S LESSON
ELEANOR CHASE.

"I cleaned across the pasture," called Molly, as he took up the gun he had stood against the fence, and whistling to his dog, sauntered across the field. "Dick!" she called again; but he did not turn or look back; and Molly, catching up the baby girl that was clinging to her, ran lightly down the steps and around the corner of the house to the wood-pile.

There were several big logs that Dick had hauled from the woods just after New Year's, when he was "turning over a new leaf." Against the saw-horse lily leaned the ax and the saw, like old cronies that were trying to wink at the gudemans's sins of omission. But not a stick of wood ready for the stove was anywhere visible.

"Well," said Molly, "I'm sorry, but it must be done." The song of a robin fluttered up upon her ears—such a triumphant burst of melody that the baby clapped her hands and laughed. "Oh," said Molly, "little Robin sings as if he was glad to get back home again, doesn't he, Jessie?"

Such a wonderful morning it was! Everything seemed to be rejoicing in the new awakening of nature. Far off, in the shadows of the woods, and in some sequestered fence corners, Molly could see the snow-drifts that still lingered, as if loth to leave such a glad, beautiful earth.

But there was work waiting to be done, and only one pair of hands to do it. They were strong, resolute hands, and Molly hurried back into the house, setting her foot to the tassel before her with the deft fingers and wise forethought that always seemed to work such miracles in her homely world.

Little Jessie followed her about, watching with grave, sweet eyes while her mother skimmed the cream from the loup row of shining pans in the milk-room and prepared the morning's churning. Then, while she churned and the little one quietly amused herself, Molly planned the day's campaign; or, rather, reinforced her courage for the attack already planned, with reasons that seemed to her both strong and just. The churning done, Jessie was at her side begging to be rocked to sleep.

"Sing, 'Hush, mamma,'" she said, laying her bright head against her mother's hand, that she had taken to both her own.

Molly drew her rocking chair near the south window, and, with Jessie cuddled close in loving arms, crooned softly to her sweet old hymn that has soothed so many childish hearts:

"Hush, my dear, lie still and slumber;
Holy angels guard thy bed."

It was not a part of Molly's wisdom to deny herself or her child the exquisite pleasure this afforded. Whatever might be said in support of the theory and practice of disciplining the little ones to forego this "cuddling," Molly's true and tender mother heart was its own law giver, and with reverent joy she tasted daily of this cup of blessing; the purest and sweetest that life could ever bring. She knew that she had never come so near to heaven's bliss as this. She knew the name celestial joy that Mary felt when she cradled in her arms

the infant Christ. And, in all the years to come, when never again that sunny head could rest upon her breast, there must always remain this blessed remembrance. Though, like Paul, she might be "in perils often," yet, though even "the sword might pierce her own soul," no deepest sorrow, no sharpest trial, could ever rob her of this sacred memory.

When Jessie had fallen into the sweet, undreaming slumber of childhood, Molly laid her gently upon her bed, and, opening the door into the hall, ran quickly up the back stairs into the attic. From the crossbeams overhead hung great braided bunches of sweet corn, kept for seed. The air was redolent of pennyroyal, mint and sweet fern. Molly crossed the large, unadorned room and stopped before a pile of ax-helves. They were of seasoned hickory and showed careful workmanship. Dick had hewn them out during some of the stormy winter days, intending to sell them at his leisure.

He had shown not a little pride in the success of his work, and had exhibited them many times to admiring friends. "About as good a job, I guess, as those hammers of Maydole that they cry up so," he said sometimes, feeling that by this unusual effort and accomplishment he had cancelled many shortcomings.

"Poor Dick!" said Molly to herself, stooping to pick up one of the ax-helves. "Poor Dick! It's such a pity his mother hadn't taught him that no man liveth or dieth unto himself; that this lesson wouldn't have been needed. Maybe, though, this strain of selfishness is something he takes from some old ancestor, and such traits are slow in coming to the surface sometimes. But, there! I've no time to climb genealogical trees. This is a moment like cutting one down. As Parson Tremmow would say: 'It's fore-dained.' That's it, I guess, and not so difficult to understand, either. Dick has certainly been a 'free agent'; there was nothing to keep him from cutting the wood. I've been patient, too, till he really makes capital of my patience, and expects me to 'manage somehow.' I've cut the wood myself, and even gone out into the woods gathering sticks, like the poor wretch in the Bible. I've tried giving him cold dinners, and he only sulks and goes off hunting. Yes, it must be done."

Molly picked up the other ax-helves, and ran downstairs and out to the wood-pile. No Dick in sight and time to begin getting dinner. Far off in his woods she could hear the sound of his gun. One ax-helve after another was laid across the sawhorse and deftly saved into lengths suitable for the stove, for experience had been an exacting teacher.

When Dick and Abner, the hired man, came into dinner they found it all ready, smoking hot, upon the table.

"Well," said Dick, "I'm tired; such a race as I had after that rabbit, and lost him, after all!" He ate quickly, and said, as he pushed back his chair: "You can harness, Abner; I've got other things to see to."

A moment after Molly heard him climbing the back stairs and creaking across the attic floor. He came down in a hurry, clinging open the door: "Where's them ax-helves? Strange! I can't find any."

ONE AX-HELVE AFTER ANOTHER WAS LAID ACROSS THE SAWHORSE. "Where were they?" Molly went to the stove, and, lifting the cover, said calmly: "Here are their ashes."

Dick looked at her for a moment in a dazed, uncomprehending way; then, as the truth flashed upon him, his face grew white with wrath. He turned and strode out of the house, slamming the door behind him till the tiny windows rattled. If he had been a club man, or of a stratum lower than his own, he would have vented his anger in oaths. But Dick Doolittle, nurtured by Christian parents, reverencing at least the letter of the law, only slammed the door.

Just at daybreak, the next morning, Molly was awakened by the ringing blows of an ax. When Dick came in to breakfast, Abner came with him. Dick was saying: "Well, we'll use that crosscut-saw and make quick work with the old logs. They say crosscut is good for the soul, and I might as well confess that I've been letting Molly lift the heaviest end."

He stooped and caught up Jessie, lifting her high above him, and then dropping her gently into her chair at the table. Molly turned and looked at Dick, and as long as he lived he remembered that look, with a thrill and heart-warmth that words alone could never give.—Woman's Journal.

—Willie—"Anty, what do they call the man who hunts up the taxes?"

—Ann Sarah—"Taxidermist, of course, because he skins every body."—Cleveland Plain Dealer.

—How do you like the dressmaker I sent you to? "I'm afraid she's not first-class." "Why?" "Well, she allowed me to make a suggestion without losing her temper."—Inter Ocean.

—A Protracted Conversation.—Jones—"What did your wife say when you got home last night?" Smith—"What she said?" My dear fellow, it would take me three hours to tell you half of what she said.—Texas Sittings.

—Quick, quick, come on; there must be an awful fight or some other trouble over east." "That the police officers are all running west." "Yes, that's how I could locate it so quickly."—Inter Ocean.

—How They Kept Her.—Mrs. Kingsley—"You certainly have a splendid cook, but I thought you said she was going to leave you." Mrs. Kingsley—"But I decorated her room with policemen's uniforms."—Brooklyn Life.

—A Mean Trick.—"It was mighty mean of him." "What was?" "We were talking of good dinners, and I took him to a certain restaurant just to show him what a good dinner is like. When we finished, the cook expected me to foot the bill!"—Truth.

—A Slight Difference.—De Bore—"Yes, Miss Amy, I'm going to join the Sons of the Revolution." Miss Prospect—"You mean the Sons of the Evolution, do you not, Mr. De Bore?"—Brooklyn Life.

—Phishing for Faith.—Sunday-school Teacher—"Tommy, I was shocked to hear you swearing so dreadfully at that strange boy as I came in." Tommy—"I couldn't help it, m'm. He was making fun of our kind of religion."—Chicago Tribune.

—Did the cooking man take place?" "Yes." "Which side won?" "Ours." "Why, I heard that the other side won and that all of your birds were killed but one." "That's true." "Then how did you win?" "We claimed a fowl."—Norristown Herald.

—Rules are now printed at Phillips' "Gleaner" in circular form. When Dr. Gleason L. Soule ruled in his strength, it was his custom to make this announcement at the beginning of the school year: "Gentlemen, there are no rules at Exeter until they are broken."—Boston Journal.

—The father of the twin babies had been left temporarily in charge of them. At the end of half an hour he weakened. "Angeline," he called out to his wife, in a voice of agonizing protest, "you'll have to come and take one of these boys. No man can serve two masters!"—Chicago Tribune.

—Will Kill Anything.—First German Scientist—"I am inclined to doubt the finding of an American scientist has killed cholera bacilli with tobacco smoke. I have tried it and failed." Second German Scientist—"Ah! But you did not try it with an American cigar!"—Puck.

THE ARISTOCRATIC ORCHID.

A LITTLE FLYER SCARCELY COMPLETES THIS FLOWER'S LIFE.

Fifty years ago these plants were hardly known except to students of botany, and now the species is a cultivation number something like two thousand, with a quarter of a million dollars' worth of collectors are exploring every accessible jungle and forest of the tropics for novelties, and under the hands of expert hybridizers new forms are appearing with a rapidity which baffles every attempt to keep a record of them. Admiration has become the fashion, and their cultivation has become a passion. Some of them are still rare and costly as diamonds; others, which were once quite as precious, are now displayed in every florist's window. The literature of cultivated orchids would fill a large library, and there are journals and magazines devoted to them exclusively, most of them illustrated with pictures drawn and colored with consummate skill. Millions of dollars are invested in them, and the money value of a single private collection in this country is at least a quarter of a million dollars, while the plants in one commercial establishment are worth still more. Of course the prices which individual specimens command bear no relation to their beauty when judged by the ordinary canons of taste, and a plant which brings a thousand dollars at auction may differ so slightly from varieties that are sold by the dozen for the production of market flowers that only the trained eye of the connoisseur can detect the peculiarities of habit and form, or appreciate the purity of color, or the richness of markings, which makes it unique or rare. As with other objects prized by collectors, the value of such a plant is enhanced by the comforting assurance that no one else, or at least only a few of the elect, can share with its owner the joy of possession.—Scribner.

The Poor in Japan.

It is said that the contentment of the poor in Japan is the result of the spirit of politeness which pervades all ranks of the Japanese people. Rich and poor are all courteous, and it is impossible to distinguish employer from laborer by their behavior. This politeness results from genuine kindness, and it settles all problems between man and man.—Chicago Herald.

An Investigation.

Parker—I wonder you keep your office in a building like this. Any one can see it isn't safe. Has the attention of the building department eyes been called to it?

Barber—O, yes! I think they looked into the matter once, and found out how the landlord cries.—Puck.

SCIENCE AND INDUSTRY.

—New York is the first manufacturing city in the country. It has 11,000 factories, which make every year \$500,000,000 worth of goods, including \$80,000,000 of clothing, \$25,000,000 of books and papers, and \$18,000,000 of cigars. Central park covers 862 acres and cost \$15,000,000.

—Chicago has over thirty elevators, which handle 140,000,000 bushels of grain every year. The Union stock yards cover 350 acres and cost \$3,000,000. They have eight miles of streets and receive 8,000,000 head of stock every year. The meat exports exceed \$100,000,000.

—On the Andes, in latitude two degrees, the limit of perpetual snow is 14,700 feet. In Mexico, latitude nineteen degrees, the limit is 13,800 feet; on the peak of Tenerife, 11,454 feet; on Mt. Etna, 9,000 feet; on Caucasus, 9,000 feet; on the Pyrenees, 8,400 feet; in Lapland, 3,100 feet; in Iceland, 2,900 feet.

—M. Gaup, writing to a Paris publication from Russia, says that the cultivation of cotton in the Zarnafshan district of that country has developed wonderfully since American varieties of the plant have been introduced. At first the natives were so prejudiced against the new plants that the experiment failed.

—The Massachusetts State Board of Health has issued a report on the impurities of the water in the inner core of the portion last frozen; that the impurities are least if distilled water is used; that the number of bacteria in artificial ice is insignificant under the prevailing methods of manufacture, and that the amount of zinc found in ice is insufficient to cause injury from its use.

—Micro organisms are present in the air, the water and the earth. They are not only on the earth, but in the upper layers of the atmosphere, and are carried by the atmosphere as dust, and deposited upon the surface of all objects. They exist in vast numbers upon and in the human body. They are present with the body in life, and do not leave it in death. The air is resolved into the kidneys. Hence there can be no doubt but they are an important factor in nature.

—A mining expert sent to investigate some Arizona properties for Denver capitalists reports the finding of a most remarkable bridge formed by a tree of agatized wood, spanning a canyon forty-five feet in width. The tree had at some remote time fallen and become embedded in the sill of some great inland sea or mighty water overflow. The sill in time became sandstone, and the wood gradually passed through the stages of mineralization, until it is now a wonderful tree of solid agate. In after years, water washed and ate away the sandstone until a canyon forty-five feet in width has been formed, the flint-like substance of the agatized wood having resisted the erosion of the water flow.

SURE PROOF.

How a Husband Was Convinced of His Condition the Previous Night.

The Rev. Thomas Murphy, a temperance orator, related the following story at a prohibition meeting in Worcester, Mass., recently.

A man once came home at two or three o'clock in the morning, and his wife, who was waiting for him and ready to jump on him, finally induced him to say that he would sign the pledge. The man meant to keep his word, but he went into a saloon to see a man and when he went home at night he stopped at the gate and took out his night key, thinking he was at the door. His wife saw him and took him in the house and tried to get him to go to bed, but he had with him a flower in an oratorical "jag," and she had a hard time over it. But finally he went to bed and to sleep. When he woke up in the morning he did not recollect anything about the "jag" of the night before, he put on a bath and went to work. His wife met him as he came down, and said to him reproachfully:

"You promised not to drink any more."

"And I am happy to inform you that I have kept my promise," said the man with a blushing effrontery.

"George," said his wife, "you were very drunk for you tried to open the door with your latchkey."

"O, I think you are mistaken; this is hyperbole."

"And as you came into the parlor you stumbled and nearly fell over a flower in the carpet on the floor."

"This is not true."

"And a fly was on the wall, the last fly of the fall, and you said, pointing to it: 'I guess I will hang my coat and hat on that nail over there.'"

"Not at all, for here is a \$20 gold piece you gave me yourself to buy a new bonnet with."

"I do remember part of that."

"And you insisted on seeing your mother-in-law. You wouldn't go to bed before you saw the old lady, and when she came down-stairs you put your arms around her and said: 'Mother-in-law, you shall never leave this house.'"

"Did I do that?"

"Yes, all of it."

"Then I must have been very drunk."—Chicago Tribune.

A PROMINENT MAN'S EXPERIENCE.

GRAVEL AND CHRONIC KIDNEY COMPLAINT.

Swamp-Root Adds Another Remarkable Case to Its List of Great Cures—Restored to Perfect Health After Suffering Twenty Years—Pronounced by Doctors and Friends Beyond All Hope.

The almost immediate benefit resulting from the use of Dr. Kilmer's Swamp-Root in cases of kidney, liver and bladder disorders makes it the most successful Remedy for all such diseases. Its efficacy in the case stated below is only one of the many thousands which has made it famous and proves its great merit.

Mr. John F. Jones, of Fredericktown, Ohio, a well known citizen of that place, who by his strict honesty and integrity has attached to him a host of friends, and these friends vouch for the truth of what he says in his letter to Dr. Kilmer & Co., Binghamton, N. Y., dated January 10th, and which reads as follows:

"For twenty years or more I have been troubled with my kidneys, but as they were not better and their action worse I thought very little about it. However, the disease gradually progressed until it became chronic and finally flooded me. About a year ago I doctored with two of the physicians here, one of them pronounced my trouble gravel, and the other stated it was hemorrhage of the kidneys. At this time I was in bed for a month, I passed pus and bloody matter with intense pain across the back and kidneys. My urine was scanty at times and again profuse, but always attended by more or less stinging and pain in voiding. I was

People do not realize the remarkable prevalence of kidney disease. Thousands die yearly from some form of it! While it is not dangerous at first, the disease progresses quickly and is soon in the advanced or chronic stage, which is not only serious, but in a large percentage of cases, unless proper medicine is used, fatal. Kidney trouble seldom progresses without also affecting the liver and producing some sort of an irritation of the bladder.

Mr. John F. Jones, of Fredericktown, Ohio, a well known citizen of that place, who by his strict honesty and integrity has attached to him a host of friends, and these friends vouch for the truth of what he says in his letter to Dr. Kilmer & Co., Binghamton, N. Y., dated January 10th, and which reads as follows:

"For twenty years or more I have been troubled with my kidneys, but as they were not better and their action worse I thought very little about it. However, the disease gradually progressed until it became chronic and finally flooded me. About a year ago I doctored with two of the physicians here, one of them pronounced my trouble gravel, and the other stated it was hemorrhage of the kidneys. At this time I was in bed for a month, I passed pus and bloody matter with intense pain across the back and kidneys. My urine was scanty at times and again profuse, but always attended by more or less stinging and pain in voiding. I was

JACK RABBITS CAN FIGHT.

And When They Do Get at It There is a Lot of Fur in the Air.

A battle to a finish between two rabbits was lately witnessed at the residence of a sportsman, all of whom state that they had never witnessed a more novel or interesting contest between man or beast.

Canavan received from Trapper Browning, of Merced, two consignments of "jacks" a few weeks ago, for sport reasons, because very unfriendly; owing possibly to the fact of having been caught in different localities, they represented different tribes of the genus Lepus. However, the hares, properly called, became very belligerent, and battles royal were almost daily occurrences in the park. At last the patrons of the leash were afforded a splendid opportunity of seeing a contest to a finish between two of the new arrivals, and a descriptive account of "the war" was given to a reporter:

"We were chatting over the prospects of next day's coursing and commenting on the weather," said the speaker, "when a 'jack' was seen crossing the field in the direction of the escape with another 'jack' in hot pursuit. At first I thought some stray dog had got into the field at the south end and was driving the hares toward the breeding paddock. Suddenly hare No. 1 turned in its track and dashed at its pursuer. They telescoped, so to speak, and then the fight was on. You should have been there to see the fur fly. There was no fake about this match; it was for blood and fur."

"The rabbits rolled in the mud after the first charge, and as they regained their pins they rose quickly on their hind feet and slashed at each other with their front paws in a manner that would have made champions of the prize ring feel as if they were as slow as a snail in their movements. I positively never saw such fierce fighting. At each stroke the fur would be seen to fly in bunches, and the blows, if they can be termed such, were fast and furious. After a minute's contest the pursued hare made an effort to run, but it was so badly crippled that it lost its equilibrium and fell in the slush, where it received still further punishment from its opponent."

"We thought that the jig was up with No. 1, and moved slowly toward the spot where the conflict had taken place."

"The sportsman further states that when forwarding hares to this city from where they are shipped the trapper must provide coops arranged in such a way that the rabbits are separated from each other by compartments, otherwise they would fight until death would end their trouble."—San Francisco Call.

For Supper.

Potato salad is a nice dish for a light Sunday supper. It may be made in a hurry, by boiling the potatoes in salted water, letting them stand till almost cool, cutting them into dice, adding a generous portion of butter, half an onion shredded fine, three tablespoonsful of vinegar, all mixed and well together and served cold. But when it is desirable for the salad to look nice as well as to taste good, mix the potatoes and onions, put them in a salad dish and pour over them a French dressing made with two tablespoonsful of salad oil or butter, the yolk of one egg and three tablespoonsful of vinegar, mixing carefully the egg and butter and adding vinegar carefully. The dish is then garnished with slices of hard-boiled egg and sprigs of parsley.—Toledo Blade.

An Average Parent.

Fond Father—My boy doesn't seem to be learning anything.

Long-Suffering Teacher—No, I am afraid he is not improving very rapidly.

Fond Father—Huh! Just as I thought. I'll send him to a better school.—Good News.

It is just as well to beware of the professional pedestrian. He nearly always has some scheme on foot.

MR. JOHN F. JONES, OF FREDERICKTOWN, OHIO.

THE REPUBLICAN.

VOLUME 18

OAKLAND, MD., THURSDAY, MARCH 15, 1894

NUMBER 1.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

A fine crayon portrait free for thirty days. Loar & Co.

Miss Mamie Weber spent Sunday in Cumberland with friends.

"Babies a success" at photo gallery. See ad. Loar & Co.

Mrs. G. A. Bolden, of Terra Alta, was here on last Saturday.

Mr. Emanuel Custer, of Johnstown, was in the city Monday.

Seeds by ounce, pound, pint and peck at H. E. Felt's Grocery.

Bring the babies and children to photo gallery. See ad. Loar & Co.

Mr. C. A. Osborne, of Philadelphia, was here Thursday on business.

For SALE OR RENT.—An eight-room house in Oakland. Apply at this office.

Mr. Fred Felt was in Baltimore two or three days last week on business.

Jerry Stanton, of the Democrat, was in Cumberland on business Friday.

Mr. D. J. Breneman, of New Germany, was here on business Monday.

Mr. Ed Offutt is in New York City this week purchasing a spring stock of goods.

Mr. P. J. Sullivan, of Cumberland, was here Saturday calling on the merchants.

Prof. S. C. Smith has rented the Lutheran parsonage and will move into it in a short time.

For thirty days we will give a fine life-size crayon portrait with each dozen cabinets. Loar & Co.

Miss Emma Hinebaugh, of Accident, spent Sunday and Monday in the city as the guest of relatives.

Mr. George Stoyer, of near Gorman, was here Saturday and smiled in on THE REPUBLICAN.

Mr. and Mrs. W. W. W. returned to their home in Leesville, Pa., last Wednesday morning.

Constable Baker Johnson, of Grantsville, was here Tuesday on business before the Orphans' Court.

Mr. Daniel Hinebaugh, of Accident, was here Sunday as the guest of his brother, Mr. Wm. Hinebaugh.

Those desiring fine photographs should call at once for we will remain here only a few weeks. Loar & Co.

Miss Hattie Bartlett, who spent a week with relatives in Cumberland, returned to Oakland Saturday night.

Mrs. Eli Williams and her sister, Miss Hensel, went to Frostburg Monday morning on a visit to relatives.

The greater number of the public schools in the county closed for the scholastic year on Friday of last week.

Mr. J. S. Spedden, of McKeesport, Pa., was here a few days last week on a visit to relatives and friends.

Do not be hoodwinked. Use no "just as good." Salvation oil is what you want when in need of a good liniment.

Mr. and Mrs. Patrick Garrett, of Deer Park, spent Sunday in Oakland as the guests of Hon. and Mrs. R. T. Browning.

Dr. Bull's Cough Syrup has always been kept up to the standard. It is the same it was forty years ago, the best sold.

Mr. W. M. Englehart, of Guesman, W. Va., who has been teaching school at Savage this winter, was in the city Friday on business.

Mr. John Helbig, jr., has been appointed postmaster at Gorman, this county. The office at Gorman, we understand will also be open.

Mr. E. J. Fringer, of Davis, a former resident of Oakland, was here two or three days last week shaking hands with his many friends.

Mr. G. W. Delawder has rented his house to a Mr. Stoddard, of White Haven, Pa., who is interested in the Preston Lumber & Coal Co. at Crelmin.

Miss Letitia Parks, of Kingwood, departed from Oakland on last Thursday night for Indianapolis, Ind., in which city she will reside in the future.

Mrs. Abraham King, of near Gorman, who spent a month in Florida, returned to her home Saturday morning. Her husband is still in the South.

Mr. A. W. Moffett, who taught the Bloomington school this winter, was in Oakland Monday on his way to Johnstown to spend the summer there with friends.

Mrs. Mary Baker arrived in Oakland on Tuesday from Cincinnati, O., and will in the future reside with her uncle, Mr. Christian Slabach, near Sunnyside.

Elkins has fixed her license at \$500 a year, which with the State license of \$350 places it at a pretty high figure, but five people took out license last week at these figures.

The Oakland REPUBLICAN smiles at the Frothing story of a great silver discovery as a fake, the author as a fakir and the Baltimore American a fakce.—Frostburg Journal.

Mr. and Mrs. T. C. Hinebaugh, of Elkins, who attended the funeral of Mrs. G. W. W. Arick, Mrs. Hinebaugh's sister, in Oakland, returned to Elkins Monday morning.

Mrs. E. P. Russell, corner 1st and Water streets, is prepared to take boarders by the month. Persons attending court will be accommodated with board at 50 cents per day. 52-31*

The new armature for the electric plant arrived Friday and was placed in the machine. Saturday night the streets were again illuminated, after being in darkness for over a month.

The residence being erected by Capt. J. M. Jarboe and his force of mechanics in the East end for Gen. I. N. Patton, is under roof and will be finished for occupancy within a short time.

Messrs. Henry Weber & Sons, the Oakland florists, have made which all accommodations for passengers will stop to take on or off passengers at their farm.

The Old Fellows of Morgantown, W. Va., will erect a building the coming year that will cost \$20,000. It will contain lodge and business rooms. The way to make a town is to build it.

The young ladies of Corinth will give a "pink Tea" on Friday evening, March 16, 1894, in the church, for the purpose of purchasing a chandelier. Everybody cordially invited to attend.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's. 8-1yr

Messrs. Henry, Fred and Louis Kamp, of near Accident, were in the city Tuesday to see their father, Hon. Henry Kamp, who is lying dangerously ill at the home of his son-in-law, Mr. Andrew Shartzler.

Mr. Clyde Liller purchased, on Monday, the barber shop on Railroad street lately owned by Mr. R. K. Liller, and will carry on the tonorial art at the same stand. All the people are invited to give him a call.

The salt air has badly corroded the Statue of Liberty in New York harbor, and it is thought she will have to be painted to preserve her good looks. Miss Liberty won't be the first old girl that will have to take to paint.

The Preston Lumber and Coal Company's mill at Crelmin, this county, having a capacity of 50,000 feet daily, will start within a short time. Quite a large number of orders are on hand. By this mill resuming work employment will be given a large number of laborers.

B. F. Crane, of Mt. Lake Park, has secured the agency for Ellwanger & Barry's nursery stock. The above firm has been successful in business for over a half century, which is all the recommendation needed. 1-3t

For Malaria, Liver Trouble, or Indigestion, use BROWN'S IRON BITTERS

Ripans Tabules relieve headache.

On last Friday afternoon, at the close of his school Mr. A. C. Smith, principal of the Oakland public schools, was the recipient of a number of mementos presented to him by his scholars. Mr. Smith is now teaching a select school at the school building, having a number of scholars enrolled.

The Universal Plow is the only complete plow made, as you can buy it all steel, or chilled, with steel or wood beam, front or rear adjusting, plain grooved, slip or outer shears, shins, knee cutters, jointers, wheels, etc. Write for catalogue. J. M. Davis & Son, agents, Oakland, Md. 50.

We publish this week the program for the Minstrel show, to be given in O'Quinn Hall, Wednesday, March 21. It is gotten up entirely by home talent, and promises to be one of the best things of the season. Do not fail to attend this when you come to court. A few reserved seats left; on sale at Mayers' drug store.

The B. & O. is putting out a number of new freight cars, which are very much better for many lines of freight than the old ones. The new cars are about two feet and a half longer than the old ones, and appear to be built in a more substantial manner. They are in every respect model cars for the freight traffic.

Spring-time will soon be here, and so will one of the finest lines of buggies, Dayton's, spring wagons, surreys and carts for A. D. Naylor that ever came to Oakland. Be sure to give him a call when in need of anything in this line, for he can suit you both as to price and terms. Some vehicles on hand now. 50-31.

At the request of the patrons of Dr. Henry W. McComas he has decided to have regular office hours, if possible, in the future. The hours that he will endeavor to be at his office in the Mayers' building are as follows: 8 to 10 a. m., 2 to 3 p. m., 8 to 9 p. m., from June to October and from October to June, 7 to 8.30 p. m.

The new Baltimore and Ohio route, from Sandy Hook and through the village of Harper's Ferry, about two miles altogether, and its old bridge will be abandoned. The improvements, made at a cost of \$200,000, include two miles of double track, a tunnel 875 feet in length, under Maryland Heights, and a new iron bridge of nine spans and over a thousand feet in length over the Potomac river. The bridge is of considerable elevation, being nine feet higher than the old one, and built to stand any freshet likely to occur, and also to allow free passage for canal boats underneath.

Farmers look to your interest and get reliable fertilizers and such as will suit your crops. We will give you our experience of over a quarter of a century. Just received two car loads of Pure Animal Bone and Phosphate, guaranteed not a particle spurious matter in our Animal Bone fertilizer. Best for seeding down in meadow and buckwheat, etc. Also a special fertilizer for potatoes. We are agents for good reliable companies. Will sell at lowest cash price or will take your notes for six months. Cabbage, tomato and celery plants in season. Also all kinds of flowering plants and cut flowers on hand and furnished at short notice. H. Weber & Sons, Box 57, Oakland, Md. 1-2m

Photographs. We have opened the photograph gallery, 3d Street, near Lutheran church, and give the people of Oakland and vicinity an opportunity of getting a finer class of work than they have ever had before. Our pictures are guaranteed to be satisfactory. Give us a call. Loar & Co. A. B. WILT, Operator.

Married. **COWMAN-KESTER.**—On March 6th 1894, by the Rev. George W. Kepler, at the Commercial Hotel, Oakland, Mr. Wm. S. Cowman and Miss Rebecca Ann Kester, both of Doddridge county, W. Va.

GREY-WILSON.—On March 3d, 1894, by the Rev. George W. Kepler, at the M. E. Parsonage, Oakland, Mr. Lucian R. Grey and Miss Ella M. Wilson, both of Palatine, W. Va.

Died. **KAMR.**—At the home of his daughter, Mrs. Andrew Shartzler, near Oakland, on yesterday morning, after an illness of several weeks, Judge Henry Kamp, aged about sixty-eight years. The deceased was elected associate judge of the Orphans' Court for this county in 1892. The funeral will occur this afternoon at Accident, the home of the deceased.

GLOTFELTY.—On Sunday, at her home near McHenry, Mrs. Jonas Gloftely, of heart disease. The deceased was aged about fifty years. The funeral occurred on Tuesday, interment at the Specht burying ground in the Backwoods.

Florida Letter. When I left Garrett county for a while I thought I would write a letter or two for THE REPUBLICAN, one describing the country through which I passed, viz: The states of Maryland, West Virginia, Ohio, Kentucky, Alabama and Florida—a long but enjoyable ride. Garrett county was covered with twenty inches or more of snow, but here peach and apple trees were in bloom and roses hanging to the bushes. A great change. Instead of two letters one must answer. The journey here will be described some other day.

De Funiak, I presume, is an attractive place when it don't rain. The third day is closing up and it rains yet. The town (800 inhabitants) is built on a sand bank, in fact the Florida I have seen is all sand, consequently the roads are not good. But little grass, but yellow and white sand everywhere. A beautiful lake is in the center of the town. All around is vast pine forest. The town is a winter town. True about 800 people spent the year here, but the busy time is confined to the latter part of February and March. The Chautauqua attracts people from all parts of the land. Michigan has possibly the largest number.

The hotels are full. People have gone away unable to get accommodations. The climate is certainly all that could be asked for. The country around is not as yet under cultivation and not largely raised hereabouts. I have seen one wagon with horses to it. Oxen are universally used. The ox carts predominate. I saw yesterday a six ox team.

Dr. Davidson is superintendent of the Chautauqua. Among the attractions is the Schumann quartette, of which Mr. Johns, of near Oakland, is the leading tenor. The quartette made its first appearance on Sat. Mr. Johns made a great hit. Mr. Johns brought down the house with tremendous applause. This quartette will be at Mountain Lake Park next August.

Supt. Rudisill is doing some good work in advertising the Park. He is circulating printed matter and talking up the Park. A number of visitors at the Park are here. A beautiful Album filled with pictures of Mountain Lake Park lies on the hotel parlor table, and is greatly enjoyed by the guests. Those who have been fortunate enough to visit the Park say it is far ahead of Florida. Yet this must be a good place to spend the winter. The thermometer registered yesterday 86.

I was disappointed in not seeing an orange orchard. They are a hundred miles or more from here. I bought oranges at Cincinnati for half the price they ask here. The citizens are putting out trees and hope soon to have plenty. Of course there are a few trees here and there in yards. GARRETT, De Funiak Springs, Fla., Feb. 8.

Encampment of State Militia. Strong pressure is being exerted to have the military encampment of the Maryland National Guard this summer at Ocean City. If the appropriation is not reduced the militia will go into camp. Governor Brown and Adjutant General Douglas are both in favor of the encampment by the seaside. The matter has been submitted to the managers of the Shipuxent Beach company. If they can give assurance a militia commission and resort to survey the ground and report on the practicability of an encampment there. Three regiments will go into camp, and if Ocean City is decided upon it will make that resort a lively place during the season.

SUMMER IS HERE

So is F. O. Hyde, Read this Ladies and Gentlemen.

This concerns everybody between the dates of March 19th and April 1st. I will sell at private sale anything I have in stock at what you wish to give for it, providing you offer me something near the wholesale price. I mean just what I say. Remember, I have not any stale goods. Don't keep any. Must have room for summer stock which will far surpass all efforts in the past. I have quite a number of small trinkets that I am going to dispose of, either sell or give them away and confine my business strictly to the jewelry and musical trade. I find that you don't have to sell everything in order to do business, but it is just the reverse. I mean these little concerns that keep everything and nothing at last, and stay in business six months to a year. I would do without sugar in my tea a thousand years before I would buy a cent's worth of that firm. If everybody was like me he would not be in business 30 days until the sheriff would be running the concern. Please bear in mind my low prices for Court.

Very respectfully,
F. O. HYDE,
Jeweler and Music Dealer, Oakland.

P. S.—Time will prove all things. Just have patience. 52-21

Ready for Easter. Few spring hats, flowers, ribbons and a large assortment of faces.

M. L. SCOTT,
Baltimore Store. 52-21

Capt. J. M. Jarboe was in Cumberland yesterday.

Mr. Chas. F. White is in Baltimore this week on a business trip.

Miss Sallie Jarboe went to Hutton last night to spend a few days with her sister, Mrs. C. F. White.

Mr. and Mrs. J. M. Jarboe went to Baltimore on last Wednesday to visit relatives for a week or ten days.

Messrs. E. H. and Ben. H. Sims will preach in the Stone church every night next week except Wednesday and Saturday. The appointment for this evening is unavoidably recalled.

Mr. Jas. C. Peddicord has moved in the Keller property on Main street, which he purchased a few weeks ago. Mr. Geo. W. Moore will move into the house vacated by Mr. Peddicord.

Communion service will be held in the Garrett Memorial church on next Sunday at 11 a. m., and the usual preparatory service Friday at 7.30 p. m. Sunday evening the biblical character taken up will be Joshua.

The Bulldozing Lawyer. Just by what process the custom of beating and brow beating witnesses came to be established among lawyers is not known. Presumably it comes from the hope that by working upon the indignation of the witness he can be made to lose his head, contradict himself and so lose the value of his testimony. The lawyer who first conceived this plan of cross examination was a great man and a grand originator. He doubtless won many cases by its use. He deserves much credit for his sharpness. But the thousands of cheap imitators he has bred up in our Courts are enough to blot his memory forever. Every crack-brained Redding of the law that has his first chance at cross-examination takes patern from the "powerful lawyers" he has seen in the same brutish game and squeals his abuse at his betters in the witness chair. His chief desire seems to be to make as thorough-paced an idiot of himself as possible. Judges chuckle at him, old lawyers smile at him, witnesses call him impudent when they leave the stand and everyone who hears and sees him very properly despises him. Yet he grows up in the business and prospers with his fees. But bulldozing does not always win. There are finer methods of discomposing a witness than that, though the bulldozing lawyer will probably continue to bulldoze until the Courts discourage the custom generally and thus fill a longfelt want.

A Good Opportunity to Study Music. The undersigned takes this method of informing the public that he has decided to remain in Oakland some time and will teach the following branches according to the most approved methods. *Two pupils will be pushed as rapidly as is consistent with thorough work.*

PIANO.—Either American or foreign fingering. Special attention given to finger training, accentuation and phrasing. The common and pernicious habit of playing legato music with the arm and wrist motion will be avoided and corrected.

ORGAN.—Not the everlasting thump, thump, pull all the stops and "let'er-go" style so often heard, but a noiseless touch, regular pedal action, proper use of stops and sing voice of reeds. The organ is not and never was intended to be an instrument of percussion.

VIOLIN.—The most perfect of all musical instruments, once persecuted and considered the devil's own property (like the poor witches our forefathers burned) is now used in churches and is especially a ladies' instrument as it requires great dexterity of touch and agility of fingering to bring out its beauty of tone. Too little attention is usually given to bowing. The pupil should early be taught the different kinds of strokes, the whole, the half and the short strokes, which part of the bow to use in playing forte and piano, and later the harmonics, staccato and tremolo. Without good control of the bow it is impossible to play well. The music will be expressionless and heavy and the motions of the player as laborious and ungraceful as a man sawing wood. Cornet and all band instruments. Ballad playing, double, triple and staccato tonguing.

VOCAL MUSIC AND VOICE CULTURE.—The human voice properly cultivated is the sweetest and best of all musical instruments, if it can be called an instrument. This is attested by the fact that the standard of excellence claimed by all instrument makers is their near approach in tone to the human voice. Musical instruments represent three distinct qualities of

adopted by the best European teachers. Solo, duet, quartette and chorus singing all require special and distinctive training for their several purposes. Musical theory must go hand in hand with practice in order that the pupil may practice intelligently. Harmony and composition are delightful studies, and the ambitious pupil can now have an opportunity to practice writing harmony, after which they may go still farther and study instrumentation, arranging music for bands and orchestras, studying the proper form of accompaniment to suit the melody, part given to each instrument, etc., etc. Having studied with graduates of the conservatories of music at Leipzig, Dresden and Munich, we have no hesitancy in asserting that we teach correctly, and an experience of nearly 20 years enables us to guarantee the greatest possible advancement in a given time.

In soliciting the patronage of Oakland's citizens we beg to say that teaching is not an experiment, but a success as has been attested by the notice of the press and the attainment of hundreds of our pupils scattered over half the states in the Union.

Respectfully,
S. C. SMITH.

52-41

Notice. I have now received a full line of new, fresh garden seeds, onion sets, etc.; also timothy and clover seed. Don't fail to call at headquarters and save money. H. E. Felt's Grocery. 1-4t

Bargains? Yes! Children's suits, from \$2 up; boys and youths' suits, from \$5 up; men's suits, from \$5 up; men's pants, from \$1 up; overcoats, only a few left, lower than the lowest. Want to close them out. 50 and 60 cent caps, 35 and 40 cents; \$2.50 hats for \$1.75.

51-31 S. L. TOWNSHEND & SON.

Valuable Advice. Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colarman Cott ge, opposite the bank, Oakland, Md. 41-tf.

Ripans Tabules relieve nausea.

FOR YOUNG PEOPLE.

I'LL DO WHAT I CAN.

I may not set the world on fire,
Nor start a grand rebellion;
Nor be a triple millionaire,
Or own a diamond mine.
I never may be president,
Or any famous man;
But there is work for all to do,
And I'll do what I can.

If Washington had said: "Dear me!
There's nothing I can do,
The country's bound to go to smash,
And precious quietly, too!"
Most likely we should still have been
Oppressed by British rule;
But Washington did what he could,
And I'll do what I can.

Ben Franklin did not loaf around,
From morn till set of sun,
And grumble that some other man
Had wealth when he had none.
While yet the stars were in the sky
His daily task began:
He did whatever he could do,
And I'll do what I can.

We may not all be Ciceros,
And claim admiring throngs,
Nor write immortal treatises,
Or sing immortal songs.
But each can fill some little groove,
In nature's wonderful plan,
And help the world to turn around,
So I'll do what I can.

—Helen W. Clark, in Golden Days.

INSECT PAPER-HANGERS.

A Bee That Makes Bright Hangings for Its Fine Chamber.

A small bee, with a long Latin name, "Anthophora argentata," is a very fastidious little animal with regard to her dwelling place. This insect bores a vertical hole into the ground and lines its sides with pieces of flower petals, especially those of the poppy, which make very bright hangings for such a tiny chamber. Before harvesting time sets in in the summer this little insect's comfortable nest can be found in any of the paths that lead through the fields. A grass blade pushed down into the hole brings to light a narrow red passage way several inches long and more, with drops of honey of a somewhat sour taste.

An observant person wandering through the corn and wheat fields will come across many poppies from which this insect has taken its honey. These pieces are all oval, half an inch long and a little less than half an inch wide. These little pieces the bee carries to its little home, crawls in first and drags them in after, then smoothing them out and pasting them to the sides. It takes through enough such pieces to reach around the wall, and they are put on double. Three or four are piled up at the bottom to make a snug little bed. The bee selects the petals of the poppy because they are thinner and finer than those of other wild flowers, and can be more easily handled by this small insect paper-hanger. The honey furnishes the necessary food for the young bees. Sometimes ants discover the tiny storage-house and carry off its sweets. The next day, however, the entrance one could find it again, unless it had been marked the spot. In the evening the bee comes out to the top of its hole, thus stripping the upper valves of its tapestry hanging. If the hole has been closed up on June 22 the maggot changes into a chrysalis on July 1. It is not yet known when the bee develops, nor how it works itself out of this place, but it is supposed that it does so by gnawing through the top leaves and pushing the earth upward until it reaches the surface. —St. Louis Post-Dispatch.

THE SNAIL'S MOUTH.

It Contains a Treasure Hidden on the Principle of a Hand-saw.

"It's a fortunate thing for man and the rest of the animal kingdom," said the naturalist, "that no large wild animal has a mouth constructed with the devouring apparatus built on the principle of the insignificant-looking snail's mouth, for that animal could out-devour anything that lives. The snail itself is such an entirely unpleasant, not to say loathsome, creature to handle, that few amateur naturalists care to bother with it. It is here, however, that the snail they are studying one of the most interesting objects that come under their observation.

"Anyone who has noticed a snail feeding on a leaf must have wondered how such a soft, flabby, slimy animal can make such a sharp and clean incision in the leaf, leaving an edge as smooth and straight as if it had been cut with a knife. That is due to the peculiar and formidable mouth he has. The snail eats with his tongue and the roof of his mouth. The tongue is a ribbon which the snail keeps in a coil in his mouth. This tongue is in reality a head-saw, with the teeth on the surface instead of on the edge. The teeth are so small that as many as 20,000 of them have been found on one snail's tongue. He can uncoil as much of this as he chooses, and the uncoiled part he brings into service. The two sides of his mouth is as hard as bone. He grasps the leaf between his tongue and that hard substance and, rasping away with his tongue, saws through the toughest leaf with ease, always leaving the edge very smooth and straight."

No Dissenting Voice.

"I'm a sort of April fool," said the man with the wart on his nose.
"From the first day of April?" casually inquired the man with the gray spot in his mustache.
"No, married."

"I don't know whether that made you an April fool or not," said the man in the mackintosh, lighting a cigar.
"That whoever picked you up for a valuable package that day got badly April fooled."

And there was a most unanimous and approving silence all around the board. —Chicago Tribune.

Would Have the Fun Afterward.

"His Mother—Tommy, if you fight with little Willie Waters to-day I shall put you to bed for two hours."
"Tommy—Put me to bed, now, ma—"

Chicago Record.

WHY OLD WOOLLY DIED.

Killed by Having to Listen to Daily Dime Museum Lectures.

He was just an ordinary, everyday colt, and an ordinary, everyday young horse. His master had neither time nor inclination to give much attention to the horse's toilet. Nevertheless, a strange thing happened. His hair, day after day and month after month, grew more and more curly until finally "Old Woolly" became one of the features of the town.

"I'll give you two hundred dollars for your horse," said a stranger one day.

"You can have him," was the reply, as that was about twice his real value. The stranger was from a dime museum, and Old Woolly's hard work was over. The rest suited him well enough, but amid the din of street noises and the tooting of a band, Old Woolly listened daily to talk like this:

"Here, gentlemen, is a most marvelous freak of nature. Our agents discovered him in the mines of Siberia. Working underground. Old Woolly, famous among the miners of that re-

OLD WOOLLY.

gion, was deprived of the light of day for years. By some curious process, which has puzzled the most distinguished veterinary surgeons of both continents, his hair began to curl. The hair became woolly in its texture entirely by natural process. Gentlemen, he is the only one of his kind."

Then Old Woolly had to endure this day after day. He lost his spirits and began to grow ill. The hot, stinging air of the museum aggravated a sickness, until one day, as the showman was delivering his speech to the gazing crowd, Old Woolly quietly lay down and breathed his last.—Youth's Companion.

HELPS FOR DRAWING.

How to Make a Compass, Flat Ruler and Square at Home.

If you have to make a geometrical drawing, and you have neither compass, flat ruler, nor square, you will be somewhat embarrassed, will you not? Well, here is a method of supplying, by common objects always at hand, the three instruments that are wanting.

The first is a compass. To make one, take a piece of paper and fold it in half. Then fold it in half again, and then in half again. Now unfold it. You will see a series of lines. The lines that are perpendicular to the top and bottom edges are the lines you want. They will serve as the legs of your compass.

The second is a flat ruler. To make one, take a piece of paper and fold it in half. Then fold it in half again, and then in half again. Now unfold it. You will see a series of lines. The lines that are parallel to the top and bottom edges are the lines you want. They will serve as the legs of your ruler.

The third is a square. To make one, take a piece of paper and fold it in half. Then fold it in half again, and then in half again. Now unfold it. You will see a series of lines. The lines that are perpendicular to the top and bottom edges are the lines you want. They will serve as the legs of your square.

Now you have your instruments. Use them as you see fit. They will help you to make a good drawing.

—The Square is also an instrument indispensable to the draughtsman.

We can also make this of a sheet of strong paper, by folding it first in two, and then in four, taking care to make exactly the same with the first fold. The second fold will be perpendicular to the first, because it forms with the first fold two adjacent equal angles, consequently two right angles, and the angle which has its summit at the meeting point of the two folds will be the right angle of our square.

Now I will show you how to improve a pair of compasses. Take a penknife with two blades, the larger the better. The point of one of the blades will be the sticking-point of the compasses. We stick it at the center of the circle (or of the arc of the circle) which we are about to trace. Now fasten firmly the end of the other blade in a piece of pencil, whose length will vary according to the size of the circle. This will be the tracing point. Now we may cause the opening of the blades to vary according to the radius of the circumference which we wish to trace; and we should hold the instrument lightly by the end of the handle nearest the tracing point, as shown in our illustration.—La Nature.

Remarkable Little Magnet.

A magnet which the great Sir Isaac Newton wore as a set in his finger ring is said to have been capable of raising 740 grains, or about 250 times its own weight of three grains, and to have been much admired in consequence of its phenomenal power. One which formerly belonged to Sir John Leslie, and which is now in the Royal Society's collection at Edinburgh, has still greater powers. It weighs but little more than Newton's curiosity, even 3 1/2 grains; yet it is capable of supporting 1,500 grains, and is, therefore, the strongest magnet of its size in the world.

SCIENCE AND INDUSTRY.

—Trade returns of Russia for the first nine months of last year, compared with those of the corresponding period of 1902, show an increase to the value of 95,694,000 rubles in exports and 42,938,000 in imports.

—In the colony of Natal tea continues to be largely grown in the coast districts, chiefly in Victoria county and the lower Landuluku division. The area under cultivation may be put down at about 2,300 acres.

—Official tests of different qualities of steel at the Massachusetts arsenal show, contrary to the popular opinion, that steel is stronger at zero Fahrenheit than at ordinary temperatures. The minimum of strength is at about 210°, but above that it rises again till it reaches its maximum at 550°.

—The first printers' union of which there is any authentic record was formed in London in 1810, its object being as the charter states, "to correct irregularities and to bring the modes of charge from custom and precedent into one point of view in order to their being better understood by all concerned."

—The average duration of human life is about thirty-three years. One-quarter of the people on the earth die before age sixteen, and one-half before age twenty, and only about one person of each one hundred born lives to age sixty-five. The deaths are calculated at sixty-seven per minute, 97,700 per day and 33,639,553 per year; and births at seventy per minute, 109,800 per day and 39,702,000 per year.

—Statistics regarding the tides in the Bay of Fundy are so startling as to seem almost incredible. At Grand Manan the fall is from twelve to fifteen feet, at Lunenburg and Euprost twenty feet, at St. John from twenty-four to thirty feet, at Moncton on the head of the Petitcodiac, seventy feet, while the distance between high and low-water mark on the Cobequid river is twelve miles, the river actually being twelve miles longer at high than at low water.

—In the ordinary respiration of man sixteen or seventeen cubic inches of atmospheric air pass into the lungs every minute, or a cubic foot every 3 1/2 minutes; 274 cubic feet in twenty-four hours. The lungs hold 280 cubic feet. At each respiration 1.375 of oxygen is converted into carbonic acid gas. The nitrogen inspired and expired is exactly equal. During the act of inspiration the lungs have been found to be the coldest parts of the body.

—In children of consumptive parents a number of deep respirations, accompanied by a horizontal extension of the outstretched arms at each inspiration, distends every part of the lungs and expands especially the apices where this insidious disease first appears. In cases of contracted lung from pleurisy such exercise will break up old adhesions and restore lost breathing power. This pulmonary gymnastic exercise in moderation should be practiced by all who have the disease.

—The total heat of combustion of one pound of hydrogen is 69,000 units, and of one pound of carbon 14,500 units, and requires 1213.4 units of heat to convert water at a temperature of zero to steam of one hundred pounds pressure, but as steam is generally generated from water averaging about sixty degrees, the total heat required to convert one pound of water into steam is only 1153.4 units, and one pound of bituminous coal of average quality contains heat enough to convert twelve and one-half pounds of water at this temperature into steam of one hundred pounds absolute pressure.

—It is not always the direct shock of the lightning stroke that does the greatest damage. The discharge acts powerfully by induction on all conductors in its vicinity, producing thousands of momentary but intense currents, which when they leap across minute intervals give rise to sparks which may start fires or explode gunpowder. One of these induction currents, in leaping from one metallic thread to another in a table cover, set the table on fire, and in another instance the transmitter of a telephone was destroyed in this manner by the fusion of part of the wire in the coil.

HIS PA'S BUSINESS.

Willie Made the Confession Rather Reluctantly.

The principal of a Philadelphia Sunday-school has foundness for statistics, and the other day he directed the teachers to ascertain the occupation of the parents of all the scholars in their respective classes. The inquiry progressed smoothly until it reached the infant class, where one small red-headed and freckled boy obstinately refused to give any information.

"Isn't your father living, Willie?" inquired the teacher.

"Yes, ma."

"Doesn't he work?"

"No'm."

"But he supports you and mamma, doesn't he?"

The small scholar assented emphatically.

"Then isn't he in business?"

"Kind of."

Visions of a gambler in a checked suit and diamond studs, or a saloon keeper dealing out lery fluids, crossed the teacher's mind.

"William," she begged apprehensively, "what does your father do?"

There was a moment's pause, while the sobs in the small boy began to rise to the freckled surface. "My pa," he said weepingly, "ain't in no regular business. He's the bearded lady in de museum, and ma said of I give it away she'd while me.—Detroit Free Press.

Classical and Appropriate.

Mrs. Tremont—"I'm going to put 'Welcome the Coming, Speed the Parting Guest,' over the door of our new house. I wish you would suggest a good inscription for the great fire-place."

Mrs. Westery—"How would 'Is it hot enough for you?' do?"—Puck.

INSECT GODS.

Strange Fables About the Sacred Beetle of Egypt.

Primitive observers never suspected anything so commonplace as the presence of eggs in the middle of the ball the beetle had made; that sort of explanation belongs only to the age of science. The Egyptians saw the beetle carry the pellet, and they saw a new beetle emerge from it in due time, and they leaped straight to the not unnatural conclusion that here was a case of spontaneous generation. The pious scribes, they imagined, buried the balls of dirt as they themselves buried their dead, and new scarabs sprang from it under the vivifying rays of the supreme sun god, as the glorified body would spring in the end from the dried and withered dust of the human mummy.

It was as an emblem of the resurrection, then, that the scarab, attached each immense roque in the Nile Valley. Nothing could be more natural than that a mummy-making race should see in its proceedings an undoubted argument for the immortality of the soul and a proof of the continued existence of the spirit after death. Everything conspired to produce this impression. The earnest way in which the good beetles devoted their lives to the pious task of rolling their balls of manure to the chosen burying place was a lesson, as it were, to careless humanity to look to the end—a perpetual exhortation to memento mori.

All sorts of strange fables rose up accordingly about the sacred insect. It seems that for twenty-eight days the balls remained under ground, through a whole lunar revolution. During that mystic time the beetles grew within by spontaneous generation. On the twenty-ninth day, which the insect knew as the moment of the conjunction of the sun with the moon, the ball opened of itself and forth sallied in full divinity, a new-born scarab. Later on, when the chief of the sun god, became the chief element in the worship of Egypt, eclipsing and absorbing itself the earlier ancestral worship of Osiris yet another point of sanctity was discovered in the scarab.

The balls he rolled behind him so assiduously, being round and revolved, were considered as emblematic of the sun's disk, and the beetle himself was almost regarded as an avatar of the solar deity. To such a pitch of dignity may household industry in its sterling earnestness of purpose lead in the end even a despised carrier beetle.—Cornhill Magazine.

Agitator—Do you ever stop to reflect, sir, on the condition of this country?

Citizen—I have thought much upon the subject, thought long and deeply.

"Ah, I am glad there is one besides myself who has given this great subject attention. What, in your opinion, does this country most need at the present time?"

"A fool killer."—N. Y. Weekly.

Well Supplied.

"Don't you want to buy some combs?" asked the commercial traveler.

"Combs?" echoed the landlord of the tavern at Pokerville Junction. "What makes you think I need any combs? Didn't you see that one hangin' in the wash-room? It's been there since before the war and it's a purty good comb yet."—Chicago Tribune.

High-heeled shoes first appeared in the reign of Louis XIV. The heels were often five inches in height, and walking was thus made very difficult and painful, but the sacrifice was cheerfully made.

—As a motto on the fireplace, Mr. Plancher, "On, yes, East or West, Home's Best," or something like that?" "No; put on 'Poke This Fire and I'll Explain.' Sure as the smoke goes out, you're saying with it, you know."—N. Y. Recorder.

Extract from the "Evening Herald."—It is not often that the HERALD indulges in a puff of any business enterprise, but in this instance we are induced to say a few words in reference to the great growth of the Dr. Kilmer Medicine Company at Binghamton, N. Y. From a small beginning a dozen years ago Dr. Kilmer & Company have grown to immense proportions. Having only just completed a large five-story addition to their immense factory, the rapid growth of their business demands still more room. The justly celebrated kidney remedy, known throughout the land as SWAMP-ROOT, has already reached the largest sales of any kidney remedy. And what is more it has acquired its popularity and enormous sales, not by great advertising, but mainly through the reputation of the cures which it has wrought. Testimonials are being received by thousands from every

GARRETT COUNTY.
An Interesting Review of its History
and Resources.

T. Jay in Cumberland News.
OAKLAND, Md., March 5, 1894.
MARYLAND CHARTER.

* * * And in the Public
Record Office of England, Chancery
Patent Roll 21 Car. II dated May
3rd, 1667, came the patent or grant
from Charles II confirming letters
patent under the great seal of Eng-
land, bearing date at St. Cermine
the 18th day of September in the
first year of our reign under Ralph
Lord Hopton, Henry, Earl of St.
Albans, etc., etc., their heirs and
assigns for ever, all that entire
tract territory or parcel of land
situate, lying and being in America,
and bounded by and within the
heads of the rivers Tappahannock,
alias Rappahannock and Quirough
or Patowmack river. The course
of the said rivers, as they are com-
monly called and known by the in-
habitants and description of those
parts and Chesapeake bay, together
with the rivers themselves, and all
the islands within the banks of
those rivers, and all woods, etc.

This patent recites the terms of
the grant to Lord Hopton made in
the first year of the reign of Charles
II, which was 1651, and then
recites that: whereas the said Ralph
Lord Hopton, John, Lord Culpepper,
Sir Dudley Wyatt, and Thomas
Culpepper being all since dead, and
the said Ralph, Lord Hopton hav-
ing in his life time, by good and
sufficient conveyance and assurance
in law, conveyed and assured all his
estate and interest in said premises
unto John Trethney, Esq., and his
heirs all the said premises, tract,
territory, and portion of land, etc.,
and whereas the said Henry, Earl
of St. Albans, etc., by their deeds,
etc., bearing date the ninth and
twentieth day of June now last
past, etc., have granted and sur-
rendered to us the said tract, etc.,
with the aforesaid letters patent to
be cancelled, to the intent that we
would be graciously pleased to
grant them new letters patent there-
of, etc.

Now know ye, that we for etc.,
have granted and confirmed, etc.,
unto the said Earl of St. Albans,
John Lord Berkeley, Sir William
Morton, John Trethney, their heirs,
etc., all that certain tract, territory
or parcel of land situate, lying and
being in America and bounded by
and with the heads of the river
Tappahannock, alias Rappahan-
nock, Quirough, alias Patowmack,
river, courses of said river together
with all the rivers themselves, and
all the islands within the banks of
those rivers, etc. And after full
and complete proprietary rights and
powers are granted, and a covenant
to supply all further defects it pro-
ceeds: "Provided always, that these
present or anything therein shall
not extend or be construed to ex-
tend to infringing, made void or
otherwise prejudice any contract or
grant, etc., whatever heretofore
made or granted by the Governor
or Council of Virginia, of the pre-
misses, etc., made before the 29th day
of September in the 13th year of
our reign. And these grantees
were prohibited from acting or
intermeddling in the military affairs
or forces in the territory or with the
government or command of any of
the castles, forts, etc., thereof,
without the order, authority and
command of the Governor, and
Council of Virginia, for the time
being, but the same shall remain
continue and be in the Governor
and Council of Virginia, etc. And
the Governor and Council and
Assembly of Virginia for the time
being, shall have full power and
authority to lay any taxes and im-
positions in and upon the said
territory hereby granted. And
these grantees and the inhabitants
in the territory were "in all things
made subject and obedient to such
laws and constitutions as are or
shall be made by the said Governor,
Council and Assembly for or con-
cerning the said Colony or the Gov-
ernor thereof."

This confirmatory grant was
dated May 8, in the twenty-first
year of the reign of Charles II. He
never counted the years of the com-
monwealth or of Cromwell. Charles
I was executed in 1649, and was
succeeded according to the claims
of the royal family, by Charles II,
in the same year, and it was in that
year, while he was in exile, that
Charles II made the first grant
above named to the Earl of St.
Albans, Lord Hopton and others.
And according to the same count
this confirmatory grant was in
1668.

CONFIRMATORY GRANT OF NORTH-
ERN NECK TO LORD CULPEPPER.
A third patent was issued by
James II in the fourth year of his
reign, which after reciting a sale
and conveyance of the granted
premises by the former patentees to
Thomas, Lord Culpepper, "who
thereby became sole owner and pro-
prietor thereof," proceeds to con-
firm the same to Lord Culpepper,
in fee simple and to release him
from the condition of having the
lands inhabited and planted in the
space of twenty-one years, as had

been provided in the former patent.
LORD FAIRFAX SUCCEEDS LORD
CULPEPPER.

Upon the death of Lord Culpep-
per, Thomas, Lord Fairfax became
his heir at law and as such became
the sole proprietor of the said ter-
ritory with the appurtenances and
the above recited letters patent.

THE FAIRFAX TITLE.
Thomas, Lord Fairfax died in
1781, and by his last will and testa-
ment duly made and published, de-
vised the whole of his lands etc.,
called or known by the Northern
Neck of Virginia, in fee to Deany
Martin, upon condition of his tak-
ing the name and arms of Fairfax,
which condition was fully complied
with.

This last recites the several letters
patent as above set out, and that
Thomas, Lord, Fairfax is now be-
come sole proprietor of the said
territory with the appurtenances,
and the above recited letters patent,
and that divers and great quantities
of land have been granted to adven-
turers and planters within said ter-
ritory in fee simple by the agents
and attorneys of the said Lord
Fairfax and his predecessors, former
proprietors of the said ter-
ritory, and letters patent by virtue of
divers letters of attorneys from time
to time by them respectively given
to their said attorneys and agents,
but now of late after long possession
and great valuable improvements
made upon said lands by said grant-
tees, questions are likely to arise
between them and the present pro-
prietor touching the validity of such
grants, and then confirms all such
grants made by any of the agents
and attorneys of the proprietors of
said territory, or any of them, and
declares that they shall be good,
available and binding in law.

FAIRFAX'S DEVISEES SETTLE IN
VIRGINIA.

By an act of the General Assem-
bly of Virginia, passed December
10, 1776 the Devises of Lord Fair-
fax relinquished to the common-
wealth of Virginia all claim to
lands supposed to be within the
northern neck of Virginia which
were waste and unappropriated at
the time of the death of Lord Fair-
fax, and Virginia confirmed the
title of those claiming under Mr.
Fairfax to lands specifically appro-
priated and reserved by the late
Thomas Lord Fairfax or his ances-
tors for his or their use.

It will be seen from the foregoing
recital that the title to the territory
included in the characters granted
by Charles II and James II to the
Earl St Albans, Lord Hopton and
others, continued in those patentees
and their grantees and those claim-
ing under them down to the revolu-
tion, and that after the revolution
in 1796 all of the territory that then
remained waste and unappropriated
and which had not been specifically
appropriated by the former proprie-
tors became vested in the common-
wealth of Virginia. These lands so
relinquished to Virginia became
subject to entry, survey and grant
through the land office of Virginia
in the same manner that all her
other waste and unappropriated
lands were, and they were after-
wards all granted by Virginia in
this way.

The territory embraced in this
Northern Neck tract had belonged
to and been under the jurisdiction
and dominion of the Colony of Vir-
ginia from the time her first charter
was granted in 1606. The patents
for that territory granted by Charles
II and James II to Lord Hopton
and others expressly left it under
the governmental jurisdiction and
control of the Colony of Virginia
and the State of West Virginia,
so far as it lies within the limits of
the latter, from the revolution to the
present time.

This court and the Supreme
Court of Appeals of Virginia have
decided that Lord Fairfax and those
claiming under him, had not only
the absolute fee simple title to the
soil of the territory, but also the
seisin and possession of the same.
This absolute title and seisin and
possession have continued undis-
turbed to the present day, and the
governmental jurisdiction and con-
trol over said territory has been
exercised exclusively, first by the
colony and then the commonwealth
of Virginia, and since June 20,
1863, by the State of West Virginia,
so far as this territory lies within
her limits.

BOUNDARIES OF NORTHERN NECK.
Now, what are the boundaries of
this Northern Neck of Virginia?
What is its location? The bound-
aries and location of this territory
have been definitely established,
marked and determined, by the only
authority having the power and
jurisdiction to establish, mark and
determine them, for nearly a cen-
tury and a half, and during all that
time they have been recognized and
respected, and have not been inter-
fered with, as will fully appear from
the following historical statement
of facts:

SURVEY OF THE NORTHERN NECK
—1736.

On November 27th, 1733, the
King in council made an order

which recites that Thomas Lord
Fairfax had presented his petition
setting out that his patents from
Charles II and James II and, de-
scribing his title and territory there-
by granted (as above set out) and
that several disputes have arisen
between his majesty's governor and
council of Virginia, and the peti-
tioner and his agents touching the
boundaries thereof, and that said
governor and council have from
time to time actually taken upon
them to issue grants of divers par-
cels of land, parts of petitioner's
said tract, etc., and that he is ad-
vised that they were clearly
within the bounds of his said tract,
and that said Fairfax prays that in
order to settle the boundaries of the
petitioner's said tract or district
his Majesty would be graciously
pleased to order a commission to
issue for running out, marking and
ascertaining the bounds of peti-
tioner's said tract or district of land
agreeable to the description thereof
as expressed and contained in the
said several grants from the crown,
and to name such number of com-
missioners for Virginia as his Ma-
jesty should think proper, to be
joined with an equal number on
petitioner's behalf, to run, settle
and ascertain said boundaries, etc.,
and that the governor and council
of Virginia ought to be directed
and prohibited from making grants,
etc., until said boundaries were set-
tled. And the lieutenant governor
orders that the lieutenant governor
of Virginia shall nominate three or
more commissioners (not exceeding
five) who in conjunction with a like
number to be named by Lord Fair-
fax, are to survey and settle the
marks and boundaries of the said
district of land agreeable to the
terms of the patents under which
the said Lord Fairfax claims, with-
in the space of two years after the
arrival of this order, and in the
meantime the lieutenant governor
is ordered not to presume to make
any grants within the above men-
tioned tract.

Lord Fairfax brought over this
order himself, but did not present
it to the Governor until more than
two years from its date.

COMMISSIONERS APPOINTED.

William Gooch, the Governor of
Virginia, on the 7th day of Sep-
tember, 1736, the tenth year of the
reign of George II, commissioned
William Byrd, John Robinson and
John Gammes, as commissioners to
act for the colony of Virginia in
this matter.

INSTRUCTIONS TO COMMISSIONERS.

In the instructions to these com-
missioners, dated September 8th,
1736, is the following:
"For as much as it may be nec-
essary for the more clear determi-
nation of the bounds in the contro-
versy to have exact maps of the
rivers Rappahannock and Potomac
and the branches thereof to the
first heads or springs so called or
known, you are to cause the survey-
ors so by you employed to prepare
correct maps hereof in order to be
laid before his Majesty. And they
were also instructed to take deposi-
tions and affidavits of such persons
as shall see proper to examine
touching said rivers Rappahannock
and Potomac and how far they were
known by these names at the time
of the last grant made by King
James II to Lord Culpepper and
how far the bounds of the territory
aforesaid were reported to extend,
or have since been bounded by the
proprietors thereof or their agents,
etc."

Lord Fairfax appointed Charles
Carter, William Beverly and Wil-
liam Fairfax as his commissioners,
and instructed them "to make full,
true and exact report of all matters
of fact and all their proceedings
especially in order to be laid before
his Majesty for his final determina-
tion, etc., also to make and settle
the boundaries aforesaid after such
determination of his Majesty with
such commissioners as shall be nomi-
nated by his Majesty."

The King's commissioners met
two of Fairfax's commissioners met
at Fredericksburg September 25th,
1738. A question arose as to the
power of the commissioners. Fair-
fax's claim that they were only
empowered to survey the contro-
verted bounds so that a statement
of facts might afterwards be laid
before the King for his royal deter-
mination. And this was finally
decided to be the King's commis-
sioners.

INSTRUCTIONS TO SURVEYORS.

The King's commissioners ap-
pointed Mr. Mayo and Mr. Brooks
as surveyors, who, in conjunction
with Mr. Winslow and Mr. Savage,
appointed on the part of Lord Fair-
fax, were instructed among other
things, "to run the courses and
measure the distance of the branch
of the Potomac called Colungor-
ton, from its confluence with
Sharando to the head spring there-
of," with orders to return an exact
map of said river showing all the
streams that run into the same on
either side. They were also direct-
ed to take the latitude and observe
particularly where the said river
intersected the 40th degree.

SURVEY OF THE POTOMAC RIVER.

This survey was begun in the fall
of 1736, and was not completed
until the summer of 1737. The
Potomac above its confluence with
the Shenandoah, then called the
Sharando, was known as the Co-
lungoruton, and it bore this name
to the head of the North Branch.
The South Branch being known as
the Wappacom.

NORTH BRANCH ADOPTED AS MAIN
POTOMAC RIVER.

When the surveyors arrived at
the mouth of the South Branch of
the Potomac they halted and took
observations and made careful
measurement of the width, depth
and volume of water of the two
streams, the general course of these
streams and of the topography of
the country, and after carefully
considering the matter they decided
that the North Branch was the main
river, and accordingly they pro-
ceeded up it, and traced and sur-
veyed the course to its head springs
in the Alleghany mountains.
The Rappahannock had been sur-
veyed by another party, and the
line between the head springs of
these two rivers was run and ascer-
tained.

This survey was begun in the fall
of 1736, and was not completed
until the summer of 1737. The
Potomac above its confluence with
the Shenandoah, then called the
Sharando, was known as the Co-
lungoruton, and it bore this name
to the head of the North Branch.
The South Branch being known as
the Wappacom.

NORTH BRANCH ADOPTED AS MAIN
POTOMAC RIVER.

When the surveyors arrived at
the mouth of the South Branch of
the Potomac they halted and took
observations and made careful
measurement of the width, depth
and volume of water of the two
streams, the general course of these
streams and of the topography of
the country, and after carefully
considering the matter they decided
that the North Branch was the main
river, and accordingly they pro-
ceeded up it, and traced and sur-
veyed the course to its head springs
in the Alleghany mountains.
The Rappahannock had been sur-
veyed by another party, and the
line between the head springs of
these two rivers was run and ascer-
tained.

Savage River.

Mr. Stephen Wilt and Mr.
Nathaniel Pounds will start for
Florida April 1st, where they con-
template building a large hotel for
the accommodation of winter visi-
tors.

A terrible wind storm struck the
barn belonging to George O. Broad-
water recently and smashed it into
smith-rines.

S. F. Broadwater bought a valu-
able horse a few days ago from
Harvey Broadwater.

Isaac Wilt, who was staying with
S. F. Broadwater during the winter,
returned to his home at Western-
port last week.

Mr. Johnson Broadwater, who
has been at Westernport under
medical treatment, returned home
last Friday much improved in
health.

Mr. John A. Wilt passed through
Dobbin and Georgetown last week
en route to Backwoods.

Harvey Broadwater still trades
horses and you bet that he can get
there Ell!

Philip McAndrews has contracted
with B. F. Snyder to saw his tim-
ber into lumber and shingles.

Barney Wenner is doing a big
business in cross-ties at Dobbin.

Warwick Bro's steam saw mill is
running at full blast.

Miss Ida Bowers is visiting at
Westernport.

Accident.

Weather is very fine.

Roads are getting dry and in a
good condition.

Farmers are busy preparing their
ground for crops.

Dr. W. N. Berk ley, of Frost-
burg, spent Monday in Accident.

Mr. L. Ritter, of Frostburg,
was here on Monday last.

Mr. William Englehart celebrated
his fiftieth birthday last Sunday.

Public school closed last Friday.

Miss Virgie Hinebaugh is teaching
a select school.

The roof of Mr. Daniel Hine-
baugh's house took fire last Mon-
day morning about three o'clock
and was consumed before the people
were able to extinguish the flames.

T. citizens of this place belong-
ing to the German Lutheran church
have begun the work of erecting a
new parsonage.

Miss Agnes Freedland, Miss Clara
Turney and Miss Katie Ault were
the guests of Mr. William Engle-
hart on Sunday last.

Mrs. Mary Spindler moved to
this village Monday. She is in the
military business.

Some of the people of Accident
have commenced to make garden.

Mr. Harry Schlossmugle started
for Illinois on Tuesday last.

Mr. Harvey Specker had a severe
attack of diphtheria, but we are
glad to state that he is conva-
lescing.

Quite a number of teachers from
this place who had been away dur-
ing the winter have returned.

NICK.

Notice.

Prof. Albin wishes to inform the
public of Oakland that he has de-
cided to locate in Oakland and that
he will continue to teach violin,
mandolin, piano and organ thor-
oughly, as his scholars here will tes-
tify. He does not say that he has
studied under graduates of Leipzig,
Dresden and Munich, but graduated
himself from the Royal Academy
of Music, London, England, in
1886 and has been teaching music
successfully here and abroad for the
last eight years. A specialty is
made of violin bowing, of which a
teacher must be a master before he
can teach same. His terms are \$10
per quarter for violin, mandolin,
piano and organ and guarantees to
teach more in three months than
any other teacher does in six
months. Theory of music, harmo-
ny, counterpoint and thorough bass
also taught. I play every instru-
ment that I teach.

Yours Respectfully,
A. ALBIN.

CASTORIA
for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." J. L. A. Archibald, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTIN, D. D., New York City.

THE CENTRAIR COMPANY, 77 MURRAY STREET, NEW YORK CITY.

Castoria cures Croup, Constipation, Sour Stomach, Harshness, Indigestion, Kills Worms, gives sleep, and promotes digestion, Without injurious medication.

"For several years I have recommended your 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results." EDWIN F. PARKER, M. D., 123rd Street and 7th Ave., New York City.

Poor Printing Pays—
Poor Profits.

We get out a class of printing that is superior to the "general run." Good printing pays, and that is the only kind we furnish our customers and patrons.

The Republican Job Printing Department, Oakland, Maryland.

MERCHANT TAILORING.

B. SAVAGE, the Tailor, has returned to Oakland and is ready to furnish and will be pleased to serve the people of the town and vicinity at exceedingly low prices.

He will make Suits of all wool goods, fit guaranteed, for \$15 and up.

He has also a large and complete stock of ready made clothing which he will alter, and make no charge for the alteration. Give him an early call and judge for yourselves. He will also in a short time have a full line of shoes and hats for sale. Yours respectfully, B. SAVAGE, Oak, Oak and 1st Street.

WINTER

Weather has come at last, and our prices on winter goods are so low that you can buy them at one-half the price that you would pay at any other store in the country.

Best flannels for 23 cents per yard; heavy muslin reduced from 10c. to 6c.; heavy muslin reduced from 9c. to 5c.; heavy hose reduced from 50c to 30c.; heavy shirts, all wool, reduced from \$1.50 to \$1.; heavy shirts reduced from \$1.25 to 90c.; heavy blankets, all wool, reduced from \$6.50 to \$4.75, from \$5. to \$3.50 and from \$2.50 to \$1.90, overcoats reduced from \$7.50 to \$5.75, and from \$6.50 to \$4.75; comforts reduced from \$2.25 to \$1.50; all wool clothing at a sacrifice; rubber shoes, boots and felts at almost half price; gingham reduced from 10c. to 7c., and from 8c. to 5c.; four skeins yarn for 25c.; all wool underwear at prices to suit the closest buyer; calicos at 4c to 7c.; Turkey red table cloth, all linen, from 43c. to 47c. per yard; flour from \$3.25 to \$5. per barrel; 5 cans tomatoes 25c.; 21 lbs. granulated sugar \$1.; 6 cakes best soap 25c.; 21 lbs. rice, \$1.; 13 lbs. pitted cherries, \$1.; 22 lbs. beans, \$1.; 12 lbs. best evaporated peaches, \$1.; 33 lbs. hominy, \$1.; peaches, pears and apricots, 18c. per can; tapioca, 9c. per lb.; gelatin, 15c. per package; Fox's corn starch, 9c. per package; Vanhouten's cocoa, 15c. per package; Baker's chocolate, 19c. per cake.

The above are quotations on a few of our goods, and a call from you will be sufficient to convince you that we mean business.

Respectfully yours,
SINCELL BROS.

The Republican.

BENJ. H. SINCELL, Publisher.

OAKLAND, GARRETT CO., MD.

IN NEW ORLEANS.

"Twas in the Crescent city not long ago befell
The tear-compelling incident I now propose to
tell:
So come, my sweet collector friends, and listen
While I sing
Unto your delectation this brief, pathetic
thing—
No lyric pitched in vaunting key, but just a
remin.
Of blowing twenty dollars in by nine o'clock
a.m.

Let critic folk the poet's use of vulgar slang
appraise,
But when I'm speaking by the card, I call a
spade a spade,
And I who have been touched of that same
mania myself,
Am well aware that when it comes to paring
with his self,
The critic collector is so blindly lost in sin
That he doesn't spend his money—he simply
drowns it in:

In Royal street (near Conti) there's a lovely
curio-shop,
And there, one laimey, fateful morn, it was
a gem
To stop was hesitation—in a moment I was
lost—
That kind of hesitation does not hesitate at
cost!

I spied a pewter tankard there, and my 't was
a gem
And the clock in old St. Louis told the hour of
eight a.m.

Three quail Bohemian bottles, too, of yellow
and green,
Cut in archaic fashion that I never before had
seen;
A lovely, hideous platter wreathed about with
pink and rose,
With its curious depression into which the
gravy flows;
Two dainty silver salts—oh, there was no re-
sisting them—
And I'd blown in twenty dollars by nine o'clock
a.m.

With twenty dollars, one who is a prudent
man, indeed,
Can buy the wealth of useful things his wife
and children need:
Shoes, stockings, knickerbockers, gloves, his
nursing bottles, cups,
A gown—the gown for which his spouse too
long has pined, perhaps,
These and ten thousand other speciers harrow
and condemn
The man who's blown in twenty by nine o'clock
a.m.

Oh, mean advantage conscience takes (and one
that I abhor!)
In asking one this question: "What did you
buy for it?"
Why doesn't conscience ply its hissed trail
before the act?
Before one's conscience becomes a bald, ac-
complished fact,
Before one's fallen victim to the tempter's
stratagem
And blows in twenty dollars by nine o'clock
a.m.?

Alas! now that the deed is done, how peni-
tent I am!
I was a robbing lion—behold a bleeding lamb!
I've packed and shipped those precious things
to that more precious wife,
Who shares with our sweet babes the strange
vicissitudes of life,
While he, who, in his folly, gave up his store of
wealth,
Is far away, and means to keep his distance—
for his health!"
—Eugene Field, in Chicago Record.

A BUNCH OF VIOLETS.

BY V. E. TYNGE MITCHELL.

(COPYRIGHT, 1904.)

AST golden fields of yellow
buttercups and
open-eyed daisies,
over hills
on which the
lights and shad-
ows of a sum-
mer morning
were playing
hide and seek, through valleys
where
drowsy cattle were grazing by the side
of idle brooks, rushed the express train
known as the "Wild Irishman," run-
ning between London and Holyhead.
Seated in one of the center carriages
which had no other occupant than her-
self was a young girl, whose face
the exquisite coloring of a portrait by
Titian. Large brown eyes shaded by
curling lashes were in strange yet
pleasing contrast to the golden hair
which fell in willow-like curls about
her forehead.
As they neared Chester, the only sta-
tion at which the train stopped in its
long journey, the young lady leaned
forward and watched with slight in-
terest the eager crowd of men and
women who awaited the arrival of the
cars.
"I wonder what Fate has in store for
me in the way of," she murmured, and
her thought came almost immediately,
as a gentleman wearing the costume of
a traveler, and with a much bronzed
face, entered the compartment.
Selfishly regretting the disturbance
of her solitude, the young woman
opened a book, which she had drawn
from her traveling bag, and appeared to
be entirely absorbed in its perusal.
The newcomer at once proceeded to
make himself comfortable, stowing
away parcels and umbrellas, and finally
taking possession of a seat at the op-
posite end of the car, facing his fellow
traveler, but barely glancing at her.
Only the sound of the busy wheels or
the whirr of a passing train disturbed
the quiet of the journey. The stranger
had followed the example of his vis-
age was soon lost in its contents.
By and by a mischievous south wind
blowing with impetuous familiarity
through the open window disarranged
the fluffy curls peeping from under the
girl's hat. She rose impatiently to shut
out the offender, but fate ordained
that the window should stick, where-
upon she glanced with feminine feel-
ingness at the man, who had dropped
his paper and was looking full at her.
For the first time their eyes met, and
a bow of coldly formal recognition
passed between them.
"Miss St. John," he murmured, "I
hardly expected to meet you here. Al-
low me—" and closing the window he
quietly returned to his former position,
while she, having expressed her thanks
by an inclination of the head, resumed
her novel.
The constraint of their position was
unconformable to the couple, who had
evidently met and parted on some occa-

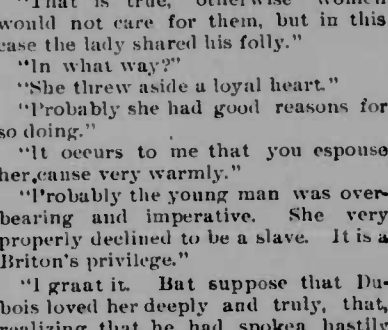

sion which had either left them un-
friendly, or almost as strangers.
From under his heavy eyebrows the
young man covertly watched his com-
panion. She was holding her book up-
side down. A smile broke upon his lips
as he observed this, and rattling his pa-
per noisily to attract her attention he
leaned forward impulsively, determined
to break the silence by addressing her.
"May I inquire how your sister, Mrs.
Arlington, is?" She raised her head,
but not looking at him replied with
freezing discouragement of tone:
"Thank you, Mrs. Arlington is quite
well."
"Ah; and your mother (with quiet
persistence), I hope she is better, Miss
St. John. Am I correct in addressing
you by the old name? You may have
changed it."
"You are quite correct," she re-
torted, feelingly.
Through the window nearest to Mr.
Dennison a saucy bee, giddy with
clown, bounced with noisy jocularity,
then, regretting his imprisonment,
strove to escape from it by flying with
spiteful buzzing against the face of the
young lady, who gave vent to a little
scream, which she instantly suppressed.
"I see you retain your antipathy to
bees," remarked the young man, placidly
folding his arms and smiling; "some
things are unchangeable."
"Among them," replied Miss St. John,
"is my dislike of noisy insects. I have
rudder-colored cattle that lifted their

ENSCOURAGED HIMSELF IN THE 'AT FAC-
ING HER.

heads from the tall reed grasses to gaze
in open-eyed wonder at the passing
train.
"Don't you think," suggested Mr.
Dennison, when the silence again be-
came oppressive, "that as we are likely
to be shut up together in this compart-
ment for two full hours, it might be
more philosophical—not to say agree-
able—than to fuss and fret about
the weather, catching bees, or other
harmless topics."
"Oh! confine yourself to catching
bees, by all means," she cried, nervously,
as the insect in question pestered
them of its presence by bouncing
against the ear of the young lady.
"I have no objection to an occasional
interchange of remarks about the
weather," she added more genially, as
she watched Mr. Dennison chase the
offender through the window.
"Very well," remarked the young
man, resuming his seat and seraping
his throat a little nervously, "it is a
charming day."
"Very, but rather cool for the sea-
son."
"Ah, yes; perhaps we may have rain,
I should say a shower."
He asked her for the answer,
which was slow in coming.
"Possibly—or rather it does not look
probable to me."
Having delivered herself of this bril-
liant speech she arched her neck with
extravagant courtesy to examine the
clouds.
"We had thunder last week," con-
tinued the young man, despatchly.
"Is it necessary," retorted Miss St.
John, "that you should turn yourself
into a weather bureau and give me re-
ports of what has been—? I suppose
that you should confine ourselves to the
present or future."
"There is no future for me," said her
companion, sadly. Then blithely, as
if anxious to recall his words, he added:
"Don't you think there is a limit to
the weather for a topic? Suppose we
try something else."
"We have talked long enough," re-
turned the young woman, severely. "I
prefer to read—" and she resolutely
opened the novel.
"Is it interesting?" he persisted, after
a pause.
"In a measure."
"It must be rather difficult to read
upside down. Is that an aerobatic feat
you have learned to accomplish in the
four years of my absence?"
"It goes without saying that the same
length of time has not improved
your intellect," said Miss St. John.
Mr. Dennison accepted in silence the
proof of his companion, but after a
moment of hesitation he left his seat
and ensconced himself in the one di-
rectly facing her.
"In a little while," he whispered,
disregarding her glance of angry tol-
eration, "the train will reach Holy-
head, and like thistle-downs we shall
be blown apart, perhaps never to meet
again. We were very good friends—
once—but, of course, that is all over,
and you cordially detest me. Just at
this moment you are wishing me in
hell."
"I did not say so," exclaimed the
girl, with flashing eyes.
"I thought," he continued, "that to
pass away the time and enable you to
forget your antagonism to my pres-
ence, you might like to hear the plot
of one of my stories. Possibly you re-
member that I write a book—occasion-
ally."
"Yes," she seemed to force the words
from her lips—"I remember—that. It
is very obliging in you to entertain me.
What is your plot?"
Mr. Dennison began to count off on
his fingers his dramatic personae.
"There is Miss Maude Vivian—heir-
ess."
"Mr. Henry Dubois—a poverty-stricken
artist."
"Mr. John Hallifax—Very handsome,
very rich, and—nothing in particular."
"Scene—Central Africa."
"Your scene is preposterous and your
combination of characters improbable,"
complained Miss St. John.

"Truth is not necessary in fiction,"
responded the story teller.
"Oblige me, then, by not lying any
more than is absolutely necessary."
"Miss Vivian was fair and lovable.
Consequently when she met Mr. Du-
bois at a lawn party he fell in love
with her and she reciprocated his affec-
tion."
"A lawn party in Central Africa?"
expostulated the young lady. "Play
are you telling me a romance among the
Manyueer word accept it."
"The color of the skin is immaterial,"
replied Mr. Dennison, "but as you ob-
ject to Africa I will call it Europe—
England will do. All went well with
the lovers until, like the snake in the
garden of Eden, a third person stepped
in. Mr. John Hallifax, a well-to-do
blonde Miss Vivian if she preferred the
corn and wine of Egypt to love in a cot-
tage with poverty."
There was a pause, which Miss St.
John broke by exclaiming irritably:
"You are not entertaining at all.
Your story is not worth writing. No
publisher would accept it."
"Why not?" (politely). "Have you
never known a similar case?"
"No, never, except in some absurd
story."
"By and by," continued the young
man, "Mr. Dubois decides to 'win
her.' He asks Miss Vivian to marry
him at once and share his mod-
est income, which is, however, a sure
one. He—made a fool of himself."
"Most men do," murmured the girl.
"That is true, otherwise women
would not care for them, but in this
case the lady shared his folly."
"In what way?"
"She threw aside a loyal heart."
"Probably she had good reasons for
so doing."
"It occurs to me that you espouse
her cause very warmly."
"Probably the young man was over-
bearing and imperious. She very
properly decided to be a slave. It is a
Briton's privilege."
"I grant it. But suppose that Du-
bois loved her deeply and truly, that
realizing that he had spoken hastily
and regretted it, and wrote her a letter
full of entreaties for pardon, which he
sent by mail with a bunch of Parma
violet."
"Well," whispered Miss St. John;
"well!" It was easy to see that she
was at last deeply interested.
"Mr. Dubois asked her in this letter
if she still loved him to wear his flow-
ers the next evening at a dance where
they would meet. He called her his
'little queen'—he was madly in love
with her."
"And then?" The girl's voice sound-
ed as if she were crying.
"Oh, then, he went to the dance.
She was there radiant, smiling, beau-
tiful. But she did not wear her violets,
her gown was white, but upon her
bosom nestled a bunch of crimson roses
—which had been given to her by John
Hallifax."
The voice of the narrator trembled,
but he still gazed at his companion.
Already they were approaching a
tunnel which heralded the end of their
journey. Miss St. John realized it, and
was thankful, for she hoped the semi-
darkness might hide her falling tears.
"That night," continued Mr. Denni-
son, "the next day. Impetuous as
ever, Dubois decided to go with him.
He was away four years."
"Did it occur to him," whispered the
young girl, reaching for a sachet out
of which she drew a small jeweled box
and laid it on her knee, "that Miss
Vivian might not have received the let-
ter until after the hot-headed and im-
petuous lover was beyond recall? Be-
sides, she might have been too much
hurt to evince her desire for his return.
With such men 'Love flows like Sol-
way but ebbs like its tide.'"
Already they were at the mouth of
the tunnel. The revolving wheels of
the train sounded like thunder, but an
instant before the engine plunged into
darkness Dennison saw Miss St. John
pinning with trembling fingers a bunch
of faded flowers to the bosom of her
dress. On her lap lay the open box and
a letter.
"Madeline!" cried the young man,
seizing her hand and covering it with
kisses. "Oh, my little queen, my sweet-
heart."
She uttered no word of protest; only
her tears belated the violets upon her
bosom, and lay there sparkling like

SEIZED HER HAND AND COVERED IT WITH
KISSES.

diamonds in the flickering glow of the
carriage lamp.
"All these years wasted, when I
might have held you in these arms,"
exclaimed Dennison, drawing the
golden head down upon his shoulder.
"Oh, Eric!" said she, "how could you
have thought it was your poverty that
influenced me. If you are poor I will
help you. See how strong I have
grown." She looked up proudly with
tender eyes.
"Have you never heard of the laurels
I have won?" he asked. "I am no
longer poor. Madeline! Fortune has
smiled upon me. My last picture was
an Eldorado."
"Oh, how sorry I am!" exclaimed the
girl, naively. "Now, it will not be
possible to prove my love to you."
Dennison picked up the bunch of
flowers which had fallen from her lap,
and as the train shot like an arrow into
the glad light of the May afternoon, he
whispered:
"Darling, these violets are proof
enough. I can never doubt your loy-
alty again."

sons of African descent, 7,470,040; Chi-
nese, 107,435; Japanese, 2,039; civil-
ized Indians, 88,800; total, 7,668,314.
—The most changeable period of
feminine fashion was in France be-
tween the outbreak of the revolution
and the restoration in 1815. During this
time 280 different styles are recorded.
—Mandy—"Lands, sakes, Josiah, do
these city folks get any plain
clothes?" Josiah—"How do you
know?" Mandy—"Didn't you notice
the gentleman standing by the carriage
we passed?" Josiah—"Yes." Mandy
—"Just as I got opposite, he said, right
out loud, 'A hansom, lady.'"
—Hoopskirts first appeared in 1530.
An iron support for the skirt was
the skirt was stretched over it. The cage
was tipped to one side, the lady
crawled underneath and the cage was
fastened to her waist by a strong
leather belt. The cage and skirts some-
times weighed as much as forty pounds.
—Mandy's first came into use in 1540.
They were introduced by doctors, who
wanted to keep their hands warm and
soft while riding from the house of
one patient to that of another. The
women adopted them, and the doctors
at once abandoned the fashion and be-
gan to use great fur gloves instead.
—A National Housekeepers' Econ-
omic association has been instituted
for the express purpose of ransoming
women to a sense of their responsibility
not only as housekeepers, but first as
householders, or as directors of how
householdings should be built in order that
home-making may be started upon the
right basis.
—Eight aqueducts supplied ancient
Rome with water, delivering forty mil-
lions of cubic feet daily. That of Clau-
dia was forty-seven miles long and
delivered four hundred feet high, so as to furnish
the city with water. Claudia was forty-one miles
of which thirty-seven were over seven thou-
sand arches seventy feet high. These
vast erections would never have been
built had the Romans known that
water always rises to its own level.
—Our western cavalry are keeping
up the reputation for hard riding.
The Third Cavalry traveled in all 18,000
miles last year, chiefly scouting on the
western border, and one troop of the
regiment, G troop, covered as high as
eighty-five miles in one day, the longest
day's march made in 1893 by any sol-
dier. Their record was forty-one miles.
Last year's record, seventy-eight miles, was
achieved by the same smart company
in the Garza campaign in southern
Texas.
—Sectional calamities have given op-
portunity for the Red Cross society to
display itself as a power in the country.
Into the midst of the desolation
wrought by fires, floods, cyclones and
earthquakes, messengers have gone
with medicine, food, clothing, tents,
lumber and furniture, and by the
method which is characteristic of the
association have done much to restore
comfort and hope than any unorgan-
ized efforts could do.
—The first printing press established
in America north of Mexico was
brought to this country by Elizabeth
Glover, the widow of Rev. Josiah Glover,
of St. Albans, England, who died on
the way to this country with his wife
and five children. His widow settled
in Cambridge and married President
Dunster, the first president of Harvard
college. Part of the revenues of the
college were derived from the use of
this printing press, which printed the famous Indian
Bible of John Eliot.
PLATONIC LOVE.
Reasons Why It Is Not an Enduring Sen-
timent.
Love between women and men was
not invented for the entertainment of
philosophers, but largely for domestic
purposes; and if platonic love is to
have anything better than a hazardous
and unstable existence, the conditions
of it must be such that it may prosper
without conflict with nature's most
important ends. Thus we see why pla-
tonic friendships between young peo-
ple who might marry do not endure.
Such couples get married, and their
friendship merges into a more durable
sentiment, or else one of them marries
someone else, and then it lapses. At
least it should lapse, for if it does not,
it not only militates against peace
in a family, but it tends to
keep the unmarried platonist from
going about his business and find-
ing himself a mate according to
nature's design. It is true that there
are women, and young women at that,
who can contrive for a time to main-
tain a husband and one or two simul-
taneous platonic intimates. But in
such cases one of three things happens:
Either the wife makes her husband
happy, and her platonic admirers mis-
erable, or she makes her friends happy
and her husband miserable, or by any
chance or force of talent she seems
to make them all happy. She makes
society miserable, because it cannot
see how she does it. And when society
is miserable it takes, until finally it
breaks up the arrangement. She is
bound to fail, and the reason does not
lie in any defect in her, but in the fact
that her purpose is contrary to the
economy of nature, which has provided
tarsy men enough to go around, and
does not permit a woman who has a
man of her own to monopolize other
men with impunity. Every marriage-
able man besides her husband that any
woman absorbs involves the waste of
some other woman's opportunities, and
unnecessarily waste with a proverbial
antipathy.—Scribner.

TASK OF A LION YAMER.

Patience and Iron Nerve Needed to Subdue
the Fierce Brutes.
Lions which are to be trained for
performing in public must be taken
when young. About nine or ten
months is the usual age, as the train-
ing can rarely be imparted after they
have begun to get their second teeth.
Lions born in captivity are nearly or
quite useless for exhibition purposes,
as they are generally very stupid and
lacking in spirit, the result frequently
of inbreeding. The best lions come
from Nubia and Abyssinia. The fe-
males are much more clever and teach-
able, but the males present the more
imposing appearance, and are there-
fore more sought after. The natural
man is fear. Consequently, the first
step in their education is to teach
them that the human beings they see
have no intention of hurting them. This
confidence being established by
familiarity with the trainer, they are
taught to fear a collar with a chain
attached. This is often a difficult mat-
ter to teach, for the lions would kill
themselves if they were chained up,
and must be constantly watched until
they have become accustomed to the
collar. Having established in some
degree at least the entente cordiale,
the trainer begins with simple tricks,
teaching the beasts to sit on a chair or
lie in a certain position. For this ad-
vanced patience and gentleness are
required; the animals rarely fail to
show signs of temper at the restraint,
but the trainer gives them no peace
until they have realized that it will be
better for them to do what is required.
If a lion has become too large and
strong, the work is doubly difficult;
for if he turns out to be a rogue, the
efforts of the trainer may be fruitless.
On very rare occasions lions, whose
training began at the age of two or
three years have been made into suc-
cessful performers.
Lions are very obstinate and sulky
brutes and their training is generally
one of fear, but they learn to detect the
difference between harsh and kindly
words—signs of marked progress in
their education. When this is learned,
and the animal has gained some idea
of obedience and is thoroughly fa-
miliar with his trainer, the real work
begins. The lion's special qualities
are soon discerned and he is set to
learn that special feat for which his
build and degree of cleverness fits him.
For example, the riding lion, when
about six months old, is put in a cage
next to that which contains his special
horse, and the two beasts soon grow
acquainted with each other. They
also have a better opportunity, for the
young lion is taken when hardly larger
than a cat and made accustomed to the
horse's back. Once this is learned,
the elaboration of the performance is
easier, so much does the success of
the trick depend on the accord exist-
ing between lion and horse that it has
been found possible only when the
same lion and the same horse are al-
ways exhibited together. In time the
lion grows too heavy for the horse and
this performance then ceases to be in
the lion's repertoire.
Although lions grow until they reach
the age of six or seven years, what
may be termed their prime of life is
reached when they are three years old.
At this age, however, they are not yet
perfected in their training, but still
show many infantile traits and seem
to lack the courage and the older
specimens. Almost all the lights with
lions are with the old ones, but a
writer recalls the case of an animal
which, when only eighteen months
old, attacked a man in the hippodrome
at Paris.
Experienced trainers rarely have to
deal with the difficulties, for to a
watchful man, accustomed to the ways
of the beasts, they rarely fail to give a
warning of an impending outbreak.
They are always obstinate and in-
clined to shirk their work and are
rather fitful in temper. This is most
noticeable when they have been too
well fed, for then they object to being
disturbed, and if forced to work are
"nasty." They are more obedient in
cool weather; it is found also that they
are apt to sulk if called upon to per-
form too often. The secret of success
in training is care in the diet and gen-
eral condition of the creatures.—N. Y.

216 Bus. 8 Lbs. Oats from One Bus. 84.

This remarkable, almost unheard-of,
yield was reported to the John A. S.
Seed Co., La Crosse, Wis., by Frank
Waters, of Montana, who planted on
bushel of Great Northern Oats, care-
fully tilled and irrigated same, and be-
lieves that in 1894 he can grow from one
bushel of Great Northern Oats three
hundred bushels. It's a wonderful out-
put, 80 sorts of field corn, yielding 80 to 130
bushels per acre. [K]
If you will cut this out and send it
with 5c postage to the above firm you
will receive sample package of above
oats and their farm seed catalogue. [K]
A woman will forgive a man anything ex-
cept his failure to ask to be forgiven.—

Catarrh Cannot Be Cured
with LOCAL APPLICATIONS, as they cannot
reach the seat of the disease. Catarrh is a
blood or constitutional disease, and in order
to cure it you must take internal remedies.
Hall's Catarrh Cure is taken internally, and
acts directly on the blood and mucous sur-
faces. Hall's Catarrh Cure is not a quick
medicine. It was prescribed by one of the
best physicians in this country for years and
is a regular prescription. It is composed of
the best tonics known, combined with the
best blood purifiers, acting directly on the
mucous surfaces. The perfect combination
of the two ingredients is what produces such
wonderful results in curing Catarrh. Send
for testimonials, free.

THE MAGPIE'S NEST.

How John Found His Sweetheart Had Been True.

There stood in Berkshire, England, far out upon a quiet country road, a little inn, which the wooden sign swinging at the door declared to be known as "The Magpie's Nest."

It had been thus named because of the number of magpies in the neighborhood. And straight before the door stood an oak tree a century old, among whose uppermost branches, year in and year out, always hung a magpie's nest, to which the country people believed that the same old magpies returned regularly.

No very elegant entertainment was offered at the Magpie's Nest for either man or beast, but its patrons thought the ale good, and then it was served to them by the most charming, rosy-cheeked little barmaid, who wore a cap with bright ribbons, and had a waist that could have been spanned by two hands—a well-behaved little maid also, who resented too much freedom by a box on the ear, and who was known by the rector of the parish to have been the best girl in his Sabbath school. So, though she was a poor orphan, and had only her little mead of wages, Betty might have married many a stout young farmer. However, she refused them all, and kept on with her duties at the Magpie's Nest until the son of her master, coming home from India, where he had served as a soldier for several years, fell in love with her, and offered her his hand and heart. Betty did not prove unkind. The innkeeper father was willing enough to secure his handy Betty for a permanent assistant, and, amid the chattering of the magpies, Betty and John exchanged their vows under the nest-hung oak tree one bright afternoon, and John put upon her finger a thick silver ring, which he had obtained abroad, perhaps by purchase, perhaps by gift, perhaps as soldiers obtain many things in time of war.

It was not a costly gift—to our eyes it would not be a beautiful one—but Betty valued it highly. She kept it polished to perfection, and wore it with great pride on high days and holidays; but though she loved John and looked forward to her wedding day with joy, she would not alter the bright coquette's manner which had always belonged to her. She joked with the farmers, hung about the rector's parsonage, and even gave them those bright glances which John the soldier thought should only be given to himself. So John grew jealous, and, being a moody sort of man, said nothing about it.

It never entered Betty's mind that the very manner which had once charmed John should now offend him, and she herself grew angry with her lover for his scowls and sulkiness. Therefore, when a young Frenchman from Marseilles, black-eyed, black-haired and as polite in his manner as Frenchmen usually are, chanced, in the course of a business journey, to stop at the Magpie's Nest, she felt that he could be really a fine example for snarly John, and was anxious to him to do so that night have made a less judicious man angry. Then, indeed, John spoke out, and Betty discovered the secret of his ill temper. Her pride glared at him, and she forgave him, but on Saturday night with the intention of winning back John's love on the morrow, her holiday when she would go to church in her best and charm his heart from him over in as he walked by her side. What man ever had any design on a man's love, ever desired to win from him favor or any gift, that she did not look her of all her finery. Before she slept she took from her trunk a Scotch plaid dress, her fringed shawl, her blue-ribboned cap, her sunshades and her silver ring, and having given the latter an extra polish, then where they would meet her the first thing next morning.

John, sulkily in his room under a red curtain, had not thought of these slow natures do not forget and forgive in a hurry, any more than they do anything else. The morning sun, shining aslant against the inn's wall, aroused Betty with his first rays. She rubbed her eyes, opened them, put her fat little feet out upon the floor, knelt down and said her simple prayer and then drew to the glass. It was only a crooked thing, with a flaw in it, and a rough outline, but it was sufficient to make her happy. She braided her hair, put on her cap, buttoned her dress, tied about her throat the gay neck ribbon, laced her shoes geometrically, and then looked for her ring. It was gone. Betty sat down and wept bitterly. All the country people of that day were superstitious. The ring had disappeared in a most mysterious way, for her door was bolted and her window high from the ground, and she firmly believed that the loss portended some great evil.

Meanwhile at the bar of the inn a little scene was going on. The Frenchman had asked for a glass of ale and John, who was always tapster on Sunday mornings, had drawn it for him, when, as their hands almost met in the act, he saw upon the little finger of his customer a thick silver ring, the very counterpart of that which he had given to his Betty.

"You've a pretty ring, monseer," he said, with a sort of catching of the breath. "May I ask where you got it?" "Ah, but, certainly," said the Frenchman. "One does not boast, but a pretty girl gave me that. Yes, and a kiss also."

John turned as pale as his florid face could turn. He made no answer, but crept straight out of the tap-room and into Betty's kitchen.

She stood near the door in her holiday dress, with her white cotton gloves on. The magpies were chattering overhead, and afar the church bells were ringing.

"You are going to church with me, John?" she asked, softly and with a smile.

"That depends," said John Leaf.

Then he walked straight up to her and looked full into her honest eyes. "You don't look like a cheat," he said, "but who knows a woman? Take off your gloves, Betty."

She obeyed. "Where's your ring," he asked. Betty burst into tears.

"It's lost, John," she said. "I can find it nowhere."

"You haven't looked on monseer's finger, then," said John. "You poor fool, to give it to him and think I shouldn't know it!"

"Oh, I'll swear I never did!" sobbed Betty. "I give your ring to anyone else? Why, John—"

But he pushed her from him with his rough hand, and would hear no word from her; and the next day he left the inn and enlisted once more, and was sent away again to India. And Betty left the inn also and took service with a farmer's wife hard by, and whatever the magpies chattered about, it was no more of the love making that they heard when John and Betty sat together beneath the old oak tree.

Five years went by. At last John received a letter from England, telling him that his father was dead, and had left all his little possessions to his only son. John Leaf's fighting days were over, in any case, and he was on the invalid list for life. He had fought as desperate a man as did, had been commended and promoted, and had some medals and ribbons to show and boast of as compensations for a wooden leg. So he went home again and settled down as proprietor of the "Magpie's Nest," and was a sort of hero among his neighbors, but he was very lonely. Men do not quite forget in five years. He could still see Betty's buxom form flitting about the kitchen in imagination, and when the magpies chattered in their nests, he could fancy that he sat with her still under the oak branches. Then he grew wroth with the magpies, who seemed to mock him, and ordered his little serving boy to tear the nests down.

In vain the lad pleaded for the birds. In vain he declared that, even if the new nests went, the old one in the topmost branches should be left "for luck."

"If the old magpies that built that find it gone, they'll peck some one's eyes out in the night time," said the boy. "It's been known to be done often."

But John Leaf, the soldier, had cast away his country's superstitions. "I'll have those magpies chattering about my ears no more," he said. "Up, and leave not a nest of them all. Some of the noise they will take possession of that old rag if it is left hanging."

So the boy obeyed. He planted a ladder against the tree and then swung out upon the branches. There was a grievous noise and doubtless to this day old magpies tell their children of that invasion of the inn's nest by the great oak tree. But there were no birds to chatter and scream in that great rag of a nest which the lad's hand clutched at last. He came down with the relic in his hand, and stood before his master with a grin.

"Eh, master! may I have all I found in the old nest?" he asked.

"If it's not a magpie's egg," said John Leaf.

"It's better than that," said the lad. "It's a silver ring."

"That's a fine ring," cried John Leaf, and snatched it from his hand.

It was the ring with which he had plighted his troth to Betty under the old oak, and he knew now that the magpies had stolen it, and that the Frenchman wore only one that resembled it.

The first thing that John did was to call himself hard names: "A jealous fool!" "A suspicious brute!" Heaven knows what else. Then he melted, and all by himself in the bit of woods beyond the house shed tears, and vowed to Betty if she still lived on earth.

Where he went of whom he inquired, matters not; but one day when the sun was setting in the west he opened a little cottage gate to which he had been directed and saw, at her knitting, under a vine-covered porch, his Betty, not changed one single bit. An ache! She looked at him and did not know him, with his thin, sallow face and his wooden leg.

"What may you be wanting, sir?" she asked.

And he said: "Betty!"

And she cried out: "Why, it's John Leaf!"

Then he sat down on a bench close by her side.

"You know I never had many words to spend on anything, Betty," he said. "I'll come to the point at once. I know now that you were true and no cheat, and that you never gave my ring to monseer. I found it—or my lad did, for I'm not very good at climbing now—in the old magpie's nest in the oak top."

"And so, Betty," said John, "if you'll overlook the past, and let bygones be bygones, I'll be a happy man."

"I love you no grudge," said Betty. "And bygones are bygones, John Leaf."

"But you'll let things be as they were, Betty?" said John. "You'll be my sweetheart again?"

She laughed.

"Don't you know?" she said. "Why, look there."

He looked. Through the gate came a foreign-looking man, with a silver ring upon his finger, who led by his hand a toddling child.

"Why, it's monseer," said John.

"You see," said Betty, "I went to him to see how he came by his ring, and he proved it was none of mine. It has a name and a date on it that mine never had. And he was kind to me, and you had been cruel. And so we have been married three years, eh, Louis?"

"And this is our boy," said John Leaf. "One is always punished for being a fool. But this is your ring. Will you have it Betty?"

"Pray, keep it for your sweetheart," said Betty. "You'll find one soon, no doubt."

MILITARY PLANTS.

They Have the Look of Fighters, and That's What They Are.

"All organic beings, without exception, tend to increase at so high a ratio that no district, no station, nor even the whole surface of the land or the whole ocean, would hold the progeny of a single pair after a certain number of generations. The inevitable result is an ever-recurring struggle for existence. It has truly been said that all nature is at war; the strongest ultimately prevail, the weakest fail."

Something like this statement by the most celebrated of the naturalists will occur to the observant person without any skill in natural history who visits the Phipps conservatory and tries to make out the meanings of the curious features which so many of the plants present.

For instance the big *Pandanus* tree, which no visitor will pass unnoted. It has a militant look from the root up, its leaves, or whatever they are to be called, reminding one of the ancient two-handed sword. That is, they do not first glance, but one must not trust that or he will be deceived.

Then that big like a sword, only one-half of it is. The whole leaf is of the shape of a half-opened book. On each edge and along the center is a row of spines, which pierce like needles. It is endogenous—that is, increases by internal growth and elongation at the top, and has no bark to strengthen and protect it. Judging from appearance, one of those long leaves would be easily broken by the push of an animal, and to keep animals at their distance it has sent out those spines, which guard it from three directions. The spines are long, which ran against them once would remember them the next time, just as calves and colts soon learn not to play close to a barbed wire fence. The *Pandanus*, which is one of the fifty species of a genus which "inhabits tropical climates from Africa to Polynesia, as it sticks out its keen spines, and threatens to puncture the hide of anything which comes near it, seems to say like the Scotch thistle: "Nobody can monkey with me with impunity. I am a fighter." That is one reason why it is so big.

It has made room for itself. In the great might is right; the weaker goes to the wall.

Some other fighters will be found in the palm house. One is easily found by its label, *Latania barboensis*, and it is particularly interesting in that it is an example of a plant protecting its young branches from being eaten by three other stalks, strong and well developed, each with its row of sharp spines, enclose and defend the tender central stalks. The leaf of a central stalk, one may see, is not allowed to pass the older stalks, lest it suffer damage. The leaf which it beholds in the distance might be behind him in time of danger. This young leaf is kept in leading strings until the stalk has grown so that it can reach out over the others and take care of itself. Meantime it will produce a set of spines that is the young to say it, the great fight which is to determine what plant is fittest to survive.

The instinct of animals is wonderful, but the instinct of the plant is equally so. That may be seen in the larger *Latania*, which states on its label that these palms are dangerous to children. In 1818, it has developed a body, and in that at the base of the branches the fruit grows. Care must be taken of that, for if the seed is not ripened they will not reproduce, and the species will suffer to that extent. See the spines that enclose the fruit, and the fruit lies. Let an animal try to get into it and he would come out with a sore hide. The plant would scratch him like a cat. The *Pandanus* is erect, and so its spines stick straight out. It wants to prevent animals from pushing their heads in to eat the fruit, to protect its fruit, and so its spines point downwards, as much as to say to the thief below: "You come up here and I'll jab your eyes out." In still another palm, the great one just inside the main entrance to the conservatory, the spines are eight inches long, look like stilettos, and form a perfect *chambre de fer*. Man, with all his thinking how to make that obstruction to an enemy most complete, has not surpassed the genius of nature in so directing the points of these stilettos as to cover every possible approach.

As for this big *Phenicia spinosa* is the Jim Corbett of the palm house. And it is great on style.

That is what some of the other fighters are not, as the cactuses. They take all sorts of shapes, in stature rising from creeping stems, though there are none so large in the conservatory to trunks thirty feet high, but are neither beautiful when small nor majestic when great. They are too abominably stupid to put on style. But what should one expect of a plant which will grow in hot, stony places, and when cultivated is entirely happy in a sandy loam mixed with brick dust? One might as well expect style in those little black Italian of the pipe line, who have been reared on mush and cucumbers. And the pity of it is these cactuses are American from way back. Pretty nearly their only redeeming feature is that they can fight. Big or little, they are ready to do battle, unless it be those granddaddies with the long white hair, which, like many men, are need looking without being venerable, and make one think they had best betake themselves to another world for all the good they are doing in this. Whoever it was that put the cutuses and the sleepy and leather-brained young alligators in the same house in the conservatory had an inspiration, for they surely go together. But that is not to say that these plants are uninteresting. Far from it. They offer many suggestions as to the humors of nature, and in their sphere they are useful. If they would only wake up and look alive! They seem doubly stupid to one who goes to them from the spirited plants in the other parts of the conservatory.

And even as one compares them to the monkey puzzle, the *Aracaria im-*

bricata, the young Chilean tree seen among them. The *Aracarians* were a South American tribe, noted for their fighting qualities. In the late Chilean war the best soldiers are said to have been the descendants of those Indians, and the most capable statesmen and commanders of that plucky little country are said to be men of *Aracarian* blood. This tree is not unlike them. It is called *Imbricata* because its stiff and hard leaves, with points sharp, are imbricated, or overlapping like the shingles on a roof. It bears edible nuts, which, the monkeys are said to like, but its branches are so arranged and its leaf points so needlessly like that it puzzles a monkey to climb it. In it there is no sign of stupidity.

It is wide awake, on guard at every quarter, fighting off everything that would rob it, not only with its weapon-like leaves, but with such a placing of its branches as to prevent the agile monkey from ascending it. In its strength, its resoluteness, its capacity for self-defense, in its dark green, almost black, it is a reminder of that valiant *Aracarian* tribe.

Int is there not fighting enough in our own struggle for existence that we need dwell on the fighting qualities of plants? Let us go and look at something different; at the sweet and graceful cyclamen, child of southern Europe and western Asia, the embodiment of the loveliness of nature, to which some reproach gave the degrading name of sow bread, because the pigs like the bulb. Here you see the bud opening there the long petals shooting downward in a twist, younger untwisting, and one after another rising at the call of the sunlight and enveloping the bud in a glory of exquisite white or pink. Stay and look long. The longer you look the better you will be, for here nature is tender and merciful and will drive out of your heart the warlike feeling aroused by the sight of the fighting plants.—Pittsburg Times.

A SIMPLE FIRE-ESCAPE.

It Can Be Used Without Danger of Injuring a Person.

The American patent office records show, in recent years, a considerable waste of inventive energy in devices for fire-escapes. The iron balcony and stairway feature to give crowds a rapid exit where haste is necessary was purely suggested nine years before the modified spiral form came into use. But the handling of large crowds from upper halls, school rooms, etc., is one thing and the means of exit down the outside of a burning building of a few persons, where no considerable expense can be incurred in stationary structures, is quite another. Many of the devices that inventive ingenuity has suggested are so complicated that only an expert under calm conditions could operate them; many are entirely impracticable, and if among the best contrived contrivances anyone really fills the bill, it has not come under the writer's notice.

A simple, easily procured, inexpensive and entirely practical means of escape from upper stories may be found in a stout duck sack and a strong manila rope. The sack may be made wide enough to hold several persons and have a rope well bound around the top to which the rope ball is attached. If no appliance is provided to hold a stout rail across the window on the inside, then the sack and rope will take around some article of furniture, wife and children dumped into the sack, the husband paying out the rope and letting them down. The sack is then drawn up when the remaining occupant goes into the sack with the sack and the rope, and paying it out lets himself down. Rope and sack will pass unhurt past considerable sheets of flame from windows below, and if occasionally treated to a strong solution of alum water, or even strong brine, are of difficult ignition. The deep sack displays a feeling of fear in not beholding the dizzy height, and also protects from flame in passing windows. Every window should have strong staples into which a rail can be inserted, and which should be ever ready if needed. A cool head could thus let down in many cases, numerous loads, and for that matter there may be rope enough to allow all the paying out and pulling up to be done by some one on the ground. Private instructions should be in every room, and each occupant should be made familiar with the working of it.

It is not known that there is anything simpler than this method, and its use can carry no infringement, as nothing about the method is patentable.

When human beings are forced to the dire necessity of either jumping down on hard pavements or being roasted to death in flames there is a most criminal ignorance or lack of foresight, that is, the knowledge that a rope and sack, and a timely action in such matters may prove a good investment.—Pittsburg Dispatch.

Webb's Great Swim.

On the 22nd of April, 1878, as the steamship *Rusnia* was proceeding on her voyage from New York to Liverpool, with a stiff breeze blowing and the ship cutting through the water at the rate of fourteen and one-half knots an hour, a seaman named Michael Heines, who was up in the rigging in performance of his duty, fell overboard. Immediately on this being perceived, a shipmate named Matthew Webb, jumped overboard and swam to the place where the poor fellow had disappeared. He was too late, however, to rescue him, seeing nothing but the man's cap, which he brought back to the ship. The steamer was stopped, a boat was lowered and sent to the rescue, and after cruising about for half an hour, returned to the ship with Webb, who was found swimming nearly a mile astern of the ship, not at all exhausted, though suffering somewhat from the cold.—Swimming.—The Baltimore Library.

Petty vexations may at times be petty, but still they are vexations. The smallest and most inconsiderable annoyances are the most piercing. As small letters weary the eye most so also the smallest affairs disturb us most.—Montaigne.

FIRE-SIDE FRAGMENTS.

—Omelet with Mushrooms.—Put into a frying pan some mushrooms that have been shredded, with an ounce of butter, some salt, pepper, a little chopped parsley and a few drops of lemon juice. Fry quickly and put in center of omelet. Serve with brown sauce.—Farm and Home.

—Friter, Croquettes.—Separate any kind of cooked fish from the bones, mince fine, season with pepper and salt to taste, bent one egg with a teaspoonful of flour and a little milk. Mix this with the fish and make into balls. Press the outside with eggs, dredge with flour. Fry nicely. It is hot food, being careful to get a nice even brown on them.—N. Y. World.

—Mock Mince Pie.—Take a teaspoonful each of rolled crackers and raisins, two teaspoonfuls water, one teaspoonful each sugar and molasses, one-third teaspoonful butter, one-half teaspoonful each of vinegar and boiled cider or coffee, one teaspoonful each of cloves, cinnamon and allspice. Cook these ingredients together half an hour, and it is ready for filling into the crusts of four pies of ordinary size.—Orange-Judd Farmer.

—Veal Kidney Suet.—Beat a lump of butter in the chaffing dish, have a quarter of an onion chopped fine, and brown it in the butter. Have the kidney ready cut in thin slices and put with the onion. Season with salt and red pepper. Cover the dish tightly and let the kidneys cook until tender. Serve with bits of lemon.—Boston Globe.

—Baked Beans.—Soak one pint of white beans in water over night. Drain off the water in the morning, put in cold water and parboil twenty minutes. Drain in a colander and put in an earthen bean pot with half a pound of fat salt pork and one tablespoonful of molasses. Cover with cold water and bake several hours, putting in more water as it boils away.—Ohio Farmer.

—Mince Meat.—One pound of meat, one pound raisins and same quantity of apples; half a cup of sugar and same of molasses, half a cup of vinegar, one teaspoonful of cinnamon, one-fourth teaspoonful each of cloves, nutmeg and allspice. If the mince is too thick, add water. If evaporated apples are used, add about a cup of water. A sausage mill and soak over night.—Prairie Farmer.

—To make clam-fritters chop fine twenty-five clams. Make the batter from the juice of the clams instead of cold water, making it a little stiffer, so that when the clams are added they will just drop from the spoon. An oyster-fritter is best made of whole oysters dipped in the same batter, seasoned with a pinch of cayenne pepper and the lemon juice.—N. Y. Tribune.

—Pineapple Souffle.—Peel and chop into bits one large or two small pineapples, fully ripe. Lay the pulp in a deep dish, and sprinkle each layer with sugar; then set aside for several hours. Mash and strain the fruit pulp till you have one pint of pure juice. Put it in a double boiler, and add six eggs, well beaten, with one pound of sugar. Cook all together to a soft custard; then strain, and beat briskly till cold. Freeze very rapidly, and serve either plain or with sweet cream flavored with a little of the juice of the fruit. In either case, you will find the ice most delicious one, and will be amply repaid for any trouble it entails. It is richer than sherbet and lighter than ice-cream, and, withal, deserves to be far more liberally known than it is.—Harper's Bazar.

FRATERNITY BADGES.

College Boys Spend Fifty Thousand Dollars a Year for Them.

At such times as the Thanksgiving football game, when the college man is very much in evidence, you may have noticed the little jeweled pin or badge that he wears. To most people these insignia are more or less of a mystery, but the college man and the college man's best girl will tell you that the dainty thing in gold and enamel is a "frat pin," and if you care to learn more about it you may go to some man who makes them, who will tell you that the gilded youth and coeds in this country spend over fifty thousand dollars a year on these baubles.

The Greek-letter college secret societies, or fraternities, as they are called, have each their special emblem, which is worn by nearly all the active members. These are usually a simple one in gold and enamel, but admitting almost infinite elaboration in precious stones. A plain pin costs about four dollars; a jeweled one may cost almost any price. One of the finest ever made was the Sigma Chi pin presented by the fraternity to President Cleveland about a year ago. The pin is shaped like a Maltese cross, and was set with diamonds all around the border. It cost five hundred dollars. The Delta Kappa Epsilon fraternity recently presented a very fine pin to United States Senator Calvin S. Brice. It was diamond-shaped, set with the finest blue-white diamonds, and cost nearly as much as Mr. Cleveland's pin. As a usual thing, however, the pins do not cost more than fifty or seventy-five dollars, although some students spend as much as Mr. Cleveland's pin. Among some fraternities of late to use only plain badges.

The shapes of the pins vary greatly. Phi kappa Psi has a shield, Alpha Delta Phi a star and crescent, Delta Tau Delta a square, Sigma Chi a St. George's cross, Phi Gamma Delta and Psi chapter diamonds, Beta Theta Pi an eight-cornered shield, and Alpha Tau Omega a Greek cross. Many have a monogram pin. Of the ladies' societies, Kappa Kappa Gamma girls wear a key, Kappa Alpha Theta a kite, Delta Gamma an anchor, Alpha Chi Omega a lyre, Pi Beta Phi an arrow and Phi Mu Epsilon a harp.

Besides the badges, the fraternity jewelers also make an almost endless variety of rings, keys, pendants and cuff links. The fraternities wear emblems, some odd combinations are also made, as when a man belongs to a class society such as Theta Xi Epsilon in addition to a fraternity, he will have a pendant with his fraternity pin on one side and the skull and cross-bones of T. N. E. on the other.—N. Y. Mail and Express.

FARM AND GARDEN.

BARK LICE DESTROYER.

A Proliferous Insect Which Feeds Upon Harmful Parasites.

The insect *Brachia setula* belongs to the order or family of Lepidoptera (this order contains all insects having broad, thin and usually brightly-colored wings, as butterflies, moths, etc.). This member of the family is a small moth of the night-flying variety. It occurs most commonly in foreign countries, but has lately been found in the western part of the United States. Being of a voracious (or preying) nature it has come to be a factor in the life histories of numerous shrubs and trees, particularly the olives, feeding as it does upon the coccidia (or bark lice) which infest those trees. There are five successive annual generations. The first appearance of the adult occurs about the middle of May; the second generation about a month later. About the middle of July a third and very abundant generation is found; the fourth appears near the end of August, and the last a month later. The first and last generations are generally few in number owing to the scarcity of food at those seasons of the year.

The egg-laying period lasts several days, each female producing about one hundred. They are deposited, one at a time, upon leaves or young buds, and are often laid directly upon the backs of bark lice. As soon as hatched the larva enters the bark louse, devouring the internal organs, leaving only the shield-like covering which is more or less thick and hard. As soon as the contents of one bark louse has been devoured the larva abandons it and seeks another. During itself in a new victim is but the work of a few minutes. When about ten days old the larva, while under the covering or shell of one of its victims, begins the construction of a silken web about itself, using the bark louse shell as a frame.

BARK LICE DESTROYER.

work. Openings are left for the head and feet, and it now crawls about carrying its artificial case and devouring several victims each day. The full-grown larva is much larger than a bark louse and as it grows its case is built out with silk and fragments of its victims.

When full-grown it searches for a favorable position in which to fasten its case (usually selecting the angle formed by two branches or a large crevice in the bark), prepares its cocoon and transforms to a pupa. Before transforming, however, the larva prepares a point of exit for the future moth. Upon emerging from the cocoon the moth falls to the ground. Three or four minutes later its wings expand and it flies among the branches. During daylight it remains motionless, holding its wings close to its body. The possibility of transporting the insects from place to place has received attention. It is found that the half-grown larva will live eight days without food. The pupa will live ten days without food. Nor will they destroy each other as is the case with most voracious larvae. Placed in bottles they can be transported long distances, and at the end of the journey need only to be placed upon plants or trees infested with bark lice. The cocoons containing full-grown larvae will also stand a journey of eight or ten days. In winter the cocoons or eggs can be sent great distances, and there is no reason why they cannot be acclimated in all countries where the injurious bark lice prevail. The accompanying illustrations are re-enlarged from Insect Life, issued by the United States department of agriculture, entomological section.

KILLING THE BUGS.

The Clever Machine Devised by a New York Horticulturist.

Mr. S. D. Willard, of Geneva, N. Y., describes in American Gardening the "bug machine" which is used on his place in killing the cecidius. It consists of an inverted umbrella-like contrivance made of sheeting, having a diameter of about eleven feet. This is mounted on a two-wheeled wheelbarrow, and it having a slit in one side ending at the inverted apex the man who operates it can really push it under a tree until the trunk is in the center. Then, with a long, padded stick, the operator strikes the limbs a quick blow and the cecidius fall upon the sheet, and the wheelbarrow is pushed on to the next tree. Just under the center is a tin drawer into which the insects are brushed, and at the end of the rows the box is removed. At point X two of the arms come near together, leaving a space, however, wide enough to pass the body of the tree between. The dotted line under figure B represents the body of the tree when the machine is set for jarring. The distance across the sheet, for instance, from E to X, is from nine to eleven feet; in the machine here shown, nine feet. A represents the wooden arms that support the sheet, all diverging to one center midway between the wheels, beneath which is a tin drawer that is pulled out to D, and the bugs dumped into a firebox and burned.

WILLARD'S BUG MACHINE.

PLANTS come out stronger in spring when they are not exposed to the full blasts of winter.

THE REPUBLICAN.

VOLUME 18

OAKLAND, MD., THURSDAY, MARCH 22, 1894

NUMBER 2.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

The man who is scared at ghosts is afraid of nothing.

A fine crayon portrait free for thirty days. Loar & Co.

Mr. Will Miller, of Accident, was here Saturday on business.

"Babies a success" at photo gallery. See ad. Loar & Co.

Mrs. Lucy Gilpin, of Deer Park, has been granted a pension.

Seeds by ounce, pound, pint and peck at H. E. Felty's Grocery.

Mr. Joe Nimer, of Eckhart, Allegany county, was here Monday.

Mr. John A. Connell, of Hutton, was here yesterday on business.

Squire E. F. Droeg, of Deer Park, was here on last Saturday.

Bring the babies and children to photo gallery. See ad. Loar & Co.

Mr. D. M. Mason was confined to his room two or three days this week.

Hon George W. Wilson, of Wilson, was here Tuesday on business.

Mr. Joel Diehl, of Engles Mills, is here this week serving as a juror.

Supt. L. A. Radisill returned from his Florida trip last Saturday morning.

Mr. W. McCullish Brown, of Gorman, was here two or three days this week.

Attorney D. James Blackiston, of Cumberland, was here on business Saturday.

If you have new ground to break up or are one of A. D. Naylor's iron plows.

For SALE OR RENT.—An eight-room house in Oakland. Apply at this office.

A. D. Naylor has a fine line of buggies on hand. Price and terms to suit buyer.

Mr. Silas Teats, of near Accident, was a pleasant caller at this office yesterday afternoon.

Mr. John W. Harvey, of Wilson, was here yesterday and made this office an agreeable call.

State's Attorney D. W. Sloan, of Cumberland, was here last Friday evening for a few hours.

Messrs. Jacob Brown and R. J. Semmes, of Cumberland, were here this week attending court.

For thirty days we will give a fine life-size crayon portrait with each dozen cabinets. Loar & Co.

Those desiring fine photographs should call at once for we will remain here only a few weeks. Loar & Co.

Ed Offutt returned from a business trip to New York and other eastern cities Thursday morning last.

If you want your carriage painted in first class style see King the Painter or leave your orders with A. D. Naylor.

It has always been a mystery why so many people suffer from chapped hands when Salvation Oil will cure them at once.

The old reliable remedy for cough, cold, croup and sore throat, Dr. Bull's Cough Syrup, should be kept in every home.

Miss Kate C. Spedden, who taught school this winter near Barton, returned to Oakland Wednesday evening of last week.

Master Harlan Jones, son of Mr. and Mrs. S. T. Jones, who has been ill for two weeks with an attack of pneumonia, is recovering.

Mrs. W. S. Dunlap, of Wilmington, N. C., arrived in Oakland Tuesday and will remain two or three days with relatives.

Attention is called to the card of Mr. E. J. Frantz, licensed auctioneer, which will be found in another column of this issue.

Mr. Simon Resh, of near Grantsville, who is serving on the grand jury this week, was in to see THE REPUBLICAN Tuesday night.

We call the attention of our readers to the card of Drs. McLane & Berkeley, which will be found in this issue of THE REPUBLICAN.

For Malaria, Liver Trouble, or Indigestion, use BROWN'S IRON BITTERS

Miss Kate C. Spedden, of Oakland, and Mrs. G. A. Bolden, of Terra Alta, were in our town on Wednesday.—Piedmont Independent.

Mr. Frank Rathbun, son of Mr. C. M. Rathbun at the Park, has entered this office to learn the mysteries of the "Art Preservative of Arts."

Miss Jennie Johnson, who spent several weeks with friends in Baltimore and Washington, returned to her home in Oakland last Saturday evening.

The Rev. Wm. L. Leisher, who spent the week with his parishioners in Piedmont and Westernport, returned to Oakland on Tuesday afternoon.

Dr. Henry W. McComas was at a sale of blooded horses at Frederick last week and made a purchase of a fine animal, which arrived in Oakland Tuesday.

It will be money in your pocket to read Sincell Brothers' new advertisement and attend the auction on Saturday. Some rare bargains will be offered.

Mr. John Shartzler is in the east looking up bargains for auction at Frederickville. He will return with a fine line of silks, matings, carpets, oil cloths, etc.

Sunnyside communication received on Tuesday cannot be published for the reason that the writer of the article failed to sign it with his or her true name.

Spring is here and you want some painting done. Don't forget to see King the Painter before letting your work. He will save you cash both in work and price.

Johnson, Freedman and wife, of Terra Alta, recently convicted in Chicago for raising \$10 bills to 50's were yesterday sentenced to three years each in the penitentiary.

Messrs. E. M. Spedden & Bro. have the frame work of H. E. Felty's house on Quality Hill up. The house will be completed and ready for occupancy about June 15.

Mrs. E. P. Russell, corner 1st and Water streets, is prepared to take boarders by the month. Persons attending court will be accommodated with board at 50 cents per day.

The band entertainment last night was a great success and reflects very much credit upon the persons engaged in getting it up. The music was all that could be desired.

Dr. W. N. Berkeley, of Frostburg, will be at the Commercial Hotel, Oakland, April 3, for the treatment of diseases of eye, ear, nose and throat. Eyes examined for glasses.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church.

The band was on the street Tuesday evening and furnished some very choice music, much to the delight of the visiting delegations from the different parts of the country.

Stone work on Mr. George M. Mason's new steam flouring mill was begun on last Thursday. The building will be three stories high 35x55 feet. Mr. Lloyd Chambers is doing the mason work.

We have been reliably informed that a party of capitalists are negotiating with Major J. C. Alderson for the purchase of several acres of ground adjoining Lake View for the purpose of making a race course.

Prof. R. B. Sanner has opened a private school at Mountain Lake Park with an enrollment of twenty pupils the first day. A number of others are expected, many of them being ladies living near and at the Park.

A wild man with red whiskers and tattered clothes is reported to be roaming near Middleburg, north of Hagerstown. A number of persons who have seen him say the man is a giant in size and that he carries a big club.

Easter comes this year on the 25th of March and it will be nearly one hundred years before it will come again so early. The earliest date upon which Easter can fall is March 22d, but so early an Easter will not come again until the year 1970.

B. F. Crane, of Mt. Lake Park, has secured the agency for Ellwanger & Barry's nursery stock. The above firm has been successful in business for over a half century, which is all the recommendation needed.

The County Commissioners were in session this week transacting routine business. The contract for erecting an iron bridge at Bloomington over the Savage river was let to the Penn Bridge Company for the sum of \$717.

Mr. A. D. Naylor, the blacksmith is turning out some pretty spring wagons, etc., for his constantly increasing trade. He is now engaged on a spring wagon for the Oakland Candy Company which they will use as a bread wagon.

The Rev. H. P. F. King will preach in the Garrett Memorial Church (D. V.) on Sunday morning at 11 o'clock. No other service will be held in this church on Sunday because of the absence of the Rev. Dr. Alexander, who will be at Davis, W. Va.

A young married man of this town was seen running toward home not long since at a rapid rate with a bundle under his arm and when asked by another gentleman what was his hurry, he replied that he had bought a new hat for his wife and wanted to get home before it went out of style.—Exchange.

A large number of Terra Alta came down to Oakland Tuesday evening to hear Rev. J. H. Moore's sermon in the Garrett Memorial church. The party returned to Terra Alta the same evening on train No. 1, accompanied by the reverend gentleman who delivered a lecture at Kingwood yesterday afternoon.

The annual Easter ball at the Glades will take place on next Monday night one hundred invitations having been issued. This promises to be a brilliant affair and will likely eclipse all former balls given by the young people of the town. Quite a number of out-of-town people are expected to be present and take part.

Mr. Joseph Friend of John, now nearly ninety-five years old, is very ill with a gripe at the home of his daughter, Mrs. Mary E. Crisholm, near Gorman, this county. Any of his friends desirous of seeing him will be cordially welcomed by his daughter and her family. It is by request of Mr. Friend that this notice is inserted in this paper.

The hook and ladder truck which the town authorities purchased some time ago, has arrived. The engine was shipped from Chicago at the same time but went astray on the way here. It is likely that it will arrive on any train. As soon as the engine arrives the test will be made of the machinery which will no doubt give satisfaction.

The Universal Plow is the only complete plow made, as you can buy it all steel, or chilled, with steel or wood beam, front or rear adjusting, plain grooved, slip or cutter shears, shins, knee cutters, jointers, wheels, etc. Write for catalogue. J. M. Davis & Son, agents, Oakland, Md.

Attention of our readers is especially called to the Gum Roofing and Paint advertised in our columns; it is ready for use, easily applied and a very low priced reliable article. Nothing better for a new roof, or an old roof needing repairs. The Gum Elastic Roofing Co., of 39 West Broadway, New York City, will mail you a sample if you write them at once, and mention this paper.

At the request of the patrons of Dr. Henry W. McComas he has decided to have regular office hours, if possible, in the future. The hours that he will endeavor to be at his office in the Mayers' building are as follows: 8 to 10 a. m., 2 to 3 p. m., 8 to 9 p. m., from June to October and from October to June, 7 to 8.30 p. m.

Mrs. Rev. H. E. Friend and daughters are visiting relatives at Johnstown, Md.—Clifford Friend has gone near Oakland, Md., to work on a farm.—Miss Lillie Blackburn was taken to Johnstown, Md., this week by her brother, Ernest Blackburn, who has been visiting at Rev. Friend's for a few days. We are sorry to lose Miss Lillie, and hope her stay here has been a pleasant one.—Kingwood Argus.

Read THE REPUBLICAN.

Public School Funds.
The comptroller of the treasury on last Friday made the quarterly distribution of the public school fund, payable on and after the 26th instant. The distribution for Allegany and Garrett counties are as follows: Allegany, white schools, \$4,540.40; colored schools, \$163.03. Garrett county, white schools, \$1,540.07; colored schools, \$21.94. The total amount distributed to the respective counties of the State is: white schools \$100,000.00; colored schools \$24,500.00.

The B. & O. Exhibit.
At the World's Fair the greatest attraction from Maryland was the B. & O. exhibit. At the close of the fair it was offered to Baltimore city for a more trifling sum for its display. The vast and costly machinery and the thousands of interesting items were packed up and shipped to Baltimore. The city was too slow and did not accept the proposition of the company and the matter died in the committee room.

Chicago was wide-awake, and the managers of the great Fields Museum made an offer to the company for the exhibition and it was accepted. Yesterday morning the entire exhibit passed through Oakland on a special train en route to Chicago from Baltimore.

Boys, Stay at Home.
Boys listen to what a good man has to say to you: A boy who gets excited, ties up a shirt and a pair of socks in a red cotton handkerchief, and leaves his parental nest with them dangling on a stick is to be pitied. The future of such a boy is a little clouded. He may go out west, grow up with the country, amass a fortune and return and surprise the old folks some day; and then again he may not. It is always a little doubtful whether he will work for this great country in congress or in a chain gang. He may knock things silly, or things may knock him silly; it is owing altogether to his own chances. There are a few great men who began life by running away from home, but they are so scarce that one grows tired turning over the pages of history looking for them. As a rule, their parents were poor and they were compelled to leave home at an early age; not from choice but from necessity. They did not leave home to shun work, but to find it.

A Scheme for Good Roads.
There is a growing popular demand for improved roads—demand which is fully justified upon economic and social grounds. Therefore I desire to recommend a measure by which tramps and vagabonds, as defined by statute, may, upon conviction, be sentenced in the different counties—at the discretion of the court or justice of the peace having jurisdiction—to labor upon the public roads or village and town districts, under the direction of the county commissioners and while in the custody of the sheriffs of the counties. Such a law would relieve the counties from the expense involved in conveying convicted tramps to the house of correction which is now incurred, while the cost of the additional force of deputy sheriffs requisite for guarding the convicts when at work and in the county jails would be more than covered by the value of the improved roads and the lessening of the road tax. Provision may also be made that those tramps and vagabonds who are sent to the house of correction from Baltimore city should be turned over for the time of their sentence by the board of managers to the commissioners of such counties as make applications for their labor.—Governor Brown of Maryland.

A Valuable Book.
This is something far and away beyond the usual run of such things.

One of the grandest works that has ever appeared in print is a magnificent book entitled "Scenes from Every Land." It contains over 500 photographic views of the most picturesque, historical and entertaining scenes of mountains, rivers, lakes, forests, buildings and every conceivable object of interest throughout the world.

Not only is it invaluable as a work of art on account of the profusion of fine engravings it contains, but it reads like a poem, so beautifully worded are the descriptions of all the famous places presented by the excellent engravings it contains. This great work, which is like entertaining and instructive, is at the

same time the largest and cheapest as well as one of the best printed books ever issued from the press. It is sold only by subscription, yet at a price so reasonable that every family can afford a copy. The book is royal oblong portfolio 11x14.

Mountain Lake Park.
The weather is all we could ask for.

Carpenters, masons and plasterers are happy over plenty of work. Rev. N. L. Baumgardner has given Henry May a contract for a two-story addition to his house.

The Masden cottage is to be papered throughout, new carpets put down and new furniture put in. We congratulate Mrs. Brown on having such an inviting boarding house.

The foundation is in for Frank Arnold's cottage at the head of E Street. The cottage will have nine rooms.

The two-story addition to Senator Davis' house is nearing completion.

Mrs. Stede and brother visited the Park Monday last, looking at lots. They expect to buy and build.

The "booklet" is out and it is nice.

Harry Clayton, of Grafton, was a Park visitor Monday.

Major Alderson, wife and Miss Neihe went to Morgantown Tuesday to attend the wedding of Rev. Stetzer.

Rev. Hart, Baptist, preached at the Park Sabbath night, and Rev. Stetzer, Presbyterian, at 3 p. m.

Messrs. Michaels & Pogue have rented the Hardy cottage and will open a hygiene house about May 1st.

The lumber is on the ground for Mrs. Kate Davis' building on E Street.

Adam Howell is busy putting in the foundation for his 30x40 foot addition to the Columbian hotel.

Supt. Radisill had a request last Monday from a Chicago gentleman for rates for an excursion of fifty from Chicago to the camp meeting. He expects 100 people from Indianapolis.

Call at J. M. Davis & Son or at the Garrett County Bank for a copy of the "booklet" and send by mail to your friend.

Hoyes.
We feel like praising the month of March for her pleasantness and good behavior.

Wheat and grass is commencing to grow nicely.

Since my last writing a man by the name of Milton McFord, of near Confluence, Pa., died very suddenly in his camp in the woods near Mr. Thomas Cuppett's. He worked all day on Saturday and went to bed at night, with two of his sons and a brother-in-law, in his usual health, but about three o'clock next morning he was heard making a noise, being then in the agonies of death.

Ami Teats, of District No. 2, moved in the house vacated by Matthew DeWitt. Since his arrival a fine boy has the attention of the parents.

Thomas H. Cuppett received a telegram that his daughter, Mrs. J. H. Enlow, of Grantsville, is dangerously ill.

Adolphus Enlow has moved to Garrett county again, and is going to stir the soil on the farm formerly owned by his father.

Daniel Thayer moved to his farm near Deer Park. May large blessings fall on Daniel and Minnie.

Mrs. George W. Kemp spent a few days with her friends at Hoyes, the place of her childhood.

The Johnstown Sunday school was reorganized last Sunday with scarcely any changes in the officers of last year. Gap Run Sunday school was reorganized and selected E. Calvin Cuppett as Superintendent. He is a young man of gifts and grace and we think will be a willing worker for the Master's cause.

We find a dull market for our fat cattle—nearly all are on hand yet. Daniel O. DeWitt thinks the old home is still complete since Letitia takes the place of Minnie.

There is a great deal written about ensilage being indispensable for dairy stock. I think it is good, but for our moist climate I feel sure we can produce mangels far cheaper than corn for ensilage, and raise as many tons per acre. After an experience of six years I find that mangels, with grain and hay to complete the ration for a cow, as good a quality of butter can be made in winter as in summer.

A Good Opportunity to Study Music.
The undersigned takes this method of informing the public that he has decided to remain in Oakland some time and will teach the following branches according to the most approved methods. *Pupils will be pushed as rapidly as is consistent with thorough work.*

PIANO.—Either American or foreign fingering. Special attention given to finger training, accentuation and phrasing. The common and pernicious habit of playing *legato* music with the arm and wrist motion will be avoided and corrected.

ORGAN.—Not the everlasting thump, thump, pull all the stops and "let-er-go" style so often heard, but a noiseless touch, regular pedal action, proper use of stops and sing voice of reeds. The organ is not and never was intended to be an instrument of percussion.

VIOLIN.—The most perfect of all musical instruments, once persecuted and considered the devil's own property (like the poor witches our forefathers burned) is now used in churches and is especially a ladies' instrument as it requires great delicacy of touch and agility of fingering to bring out its beauty of tone. Too little attention is usually given to bowing. The pupil should early be taught the different kinds of strokes, the whole, the half and the short strokes, which part of the bow to use in playing forte and piano, and later the harmonics, staccato and tremolo. Without good control of the bow it is impossible to play well. The music will be expressionless and heavy and the motions of the player as laborious and ungraceful as a saw sawing wood. Cornet and all band instruments. Ballad playing, double, triple and staccato tonguing.

VOCAL MUSIC AND VOICE CULTURE.—The human voice properly cultivated is the sweetest and best of all musical instruments, if it can be called an instrument. This is attested by the fact that the standard of excellence claimed by all instrument makers is their near approach in tone to the human voice. Musical instruments represent three distinct qualities of tone; the pipe, the reed and the string. The human voice partakes of all these, hence its superiority. We use the system of voice culture adopted by the best European teachers. Solo, duet, quartette and choros singing all require special and distinctive training for their several purposes. Musical theory must go hand in hand with practice in order that the pupil may practice intelligently. Harmony and composition are delightful studies, and the ambitious pupil can now have an opportunity to practice writing harmony, after which they may go still farther and study instrumentation, arranging music for bands and orchestras, studying the proper form of accompaniments to suit the melody, part given to each instrument, etc. etc. Having studied with graduates of the conservatories of music at Leipzig, Dresden and Munich, we have no hesitancy in asserting that we teach correctly, and an experience of nearly 20 years enables us to guarantee the greatest possible advancement in a given time.

In soliciting the patronage of Oakland's citizens we beg to say that teaching is not an experiment, but a success as has been attested by the notice of the press and the attainment of hundreds of our pupils scattered over half the states in the Union.

Respectfully,
S. C. SMITH.

Notice.
I have now received a full line of new, fresh garden seeds, onion sets, etc.; also timothy and clover seed. Don't fail to call at headquarters and save money. H. E. Felty's Grocery.

Bargains? Yes!
Children's suits, from \$2 up; boys and youths' suits, from \$5 up; men's suits, from \$5 up; men's pants, from \$1 up; overcoats, only a few left, lower than the lowest. Want to close them out. 50 and 60 cent caps, 25 and 40 cents; \$2.50 hats for \$1.75.

51 3t S. L. TOWNSEND & SON.

Valuable Advice.
Avoid lawsuits and loss by consulting H. P. Tassier and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colander Cott, opposite the bank, Oakland, Md.

41-4t.

Clean. Tablets relieve nausea.

After all the Lenten trial
It was wondrous sweet
Not to wear that
Easter bonnet
Days and weeks
Were spent upon it—
All the potency of
riches,
Woman's art that
so bewitches,
Made a wondrous combination,
Wrought a work of admiration,
Yet upon that Easter morning
Wore she not that crown adorning—
Wore her bonnet of last season—
Smiled and offered not a reason.
But I know, A bunch of roses
Like the west ere twilight closes
Came to her, also a letter
Reading thus:
"Love's gentle fetter
Binds my heart, and I am wearing
Chains for you, Love gives me daring,
Will you wear these buds in token
That the chains shall not be broken?"
Now the roses, fresh and tender,
That beaded that day to send her
Did not match the wondrous bonnet—
Spelled the colors that were on it
But the milliner's creation
Without sigh or hesitation
Was abandoned—and the maiden
With the blushing roses laden,
With the bouquet of last season,
Smiled and offered not a reason.
But somebody knew the token
That love's chains should not be broken.
—F. S. Miles, in Judge.

SUSIE BARCLAY sat in her room stitching busily, and at the same time building air-castles of a girl of eighteen, who is just waking to the consciousness of a heart to be won or given. She would have blushed with indignation and wounded feeling, had anyone told her she was actually in love, and there would have been no falsehood in her denial. Yet, since

Rev. James Castleton had come to Rosedale and taken the church under his care, life had seemed brighter to Susie. Rather reserved man of thirty-five, not handsome, not especially gifted with eloquence. But in his soft gray eyes, in the curves of his gravely set mouth lay an expression of goodness, of unostentatious piety, that made his simple language more effective than the most elaborate oratory. Old women brought their sorrows to Mr. Castleton, and went away comforted, blessing him for an unaffected sympathy that doubled the value of his counsels. Children clustered about him wherever he called, and looked eagerly for his coming into the Sunday school. The young people liked him and trusted him, wondering a little sometimes that one so grave and quiet could so thoroughly understand the troubles and temptations of youth.

He had shown an interest in Susie Barclay for many reasons. She was an orphan and had lost both parents and a sister within a fortnight, victims of a malignant fever raging in Rosedale, four years before. She was poor, having taken a position as pupil teacher in a seminary, and been household drudge as well, to earn an education. At the time Mr. Castleton came to Rosedale, Susie was teaching music, was organist at St. Mark's, and in leisure time at home earned money an odd dollar by embroidery.

ber of the church, and gave her time, little as she could spare it, to the work in the missionary society, sewing circles and festivals of the year.

And the work upon which she was sewing so steadily Susie called, in her heart, her Easter offering. Mrs. Stacey, the richest woman in Rosedale, often employed Susie's busy fingers, and it only made the gentle girl smile scornfully when she heard Bessie Stacey praised for the exquisite embroidery her own active fingers wrought.

Mrs. Stacey intended to make an Easter offering, at St. Mark's, of a new set of church-linen, and she had engaged Susie to hem-stitch and embroider it, promising her ten dollars for work she well knew would cost her three times that sum in any city store.

And Susie had already appropriated that sum, in her mind. She would buy a large cross of white flowers, such as she had seen in her visits to the city, and present it to St. Mark's. Not one penny of those ten dollars would she use for her own expenses; and if Bessie Stacey let it be understood that she had embroidered the linen her mother presented, why, Susie could give her cross, and so balance matters.

For, somewhere in the depths of her heart, so far down she had never called it to the surface, Susie knew that there was rivalry between Bessie Stacey and herself. She knew that Mr. Castleton was frequently at Mrs. Stacey's, to luncheon, to dinner, to arrange various church matters in which Mrs. Stacey suddenly awakened to an interest she had never felt when good old Mr. Murray presided in the pulpit.

And Bessie wore the most becoming dresses right under the minister's eyes, while Susie's modest dresses were hidden behind the curtains of the organ-loft.

As she worked in the passion-flowers encircling her cross, Susie thought of the order she would send to her Aunt Mary in the city for the cross she meant to buy. She had steadily put away the temptation to buy a new spring hat or one new dress, resolving to make over her gray poplin once more and have her old hat cleaned and pressed. And, really, one must be eighteen, with a very limited, hard-earned wardrobe, and a strong desire to appear attractive in the eyes of one person, to appreciate the sacrifice Susie was making. Ten dollars, with her economical habits, still in sewing, would go so far toward girlish adornment!

But it was to be her Easter offering; and if there lurked a thought of Mr. Castleton's words of praise or his grave eyes looking approvingly upon her tasteful gift, was she so very much to blame?

She had finished her work before sunset and took it home. Mrs. Stacey was in the sitting-room where Bessie was opening the parcel containing a new silk suit for Easter Sunday, and Susie

enquired her cross, Susie thought of the order she would send to her Aunt Mary in the city for the cross she meant to buy. She had steadily put away the temptation to buy a new spring hat or one new dress, resolving to make over her gray poplin once more and have her old hat cleaned and pressed. And, really, one must be eighteen, with a very limited, hard-earned wardrobe, and a strong desire to appear attractive in the eyes of one person, to appreciate the sacrifice Susie was making. Ten dollars, with her economical habits, still in sewing, would go so far toward girlish adornment!

But Mrs. Stacey took out her pocket-book and from it a ten-dollar gold piece.

"You can buy a new hat," she said, in a patronizing way indelicately irritating.

"No," Susie said, quietly, "this is to be my Easter offering."

"Oh! And speaking of Easter, would you mind, on your way home, taking this linen to Mrs. Byrne's to wash and iron. Tell her I must have it on Friday at the very latest!"

It was growing dark, and Susie remembered that so far from being "on

her way home," Mrs. Byrne lived at the other end of Rosedale, but she was too shy to refuse, and rolled the linen up again.

Mrs. Byrne was a hard-working woman with seven children, whose husband, after subjecting her to all the miseries of a drunkard's wife, had released her by pitching head-first off the bridge below Rosedale into the river. Womanlike, she grieved for him, as if he had made her life a bed of roses, and turned to her wistfully for a living, patiently and industriously. A very sunbeam of a woman she was, in spite of her troubles, and Susie was amazed to find her sitting on the doorstep sobbing like a child. She rose to receive Mrs. Stacey's message, and promised to do the work, and then, in trouble, I am afraid," her grief broke out in words:

"I've no right to complain, miss," she said, "for the Lord's been very good to us since poor Tim was drowned, but indeed it's a chance I'm fretting for."

"A chance lost?" said Susie, her voice still full of gentle sympathy.

"It's Nora, miss. She's been delicate, miss, ever since she was born, and the air here is bad for her. The doctor says her lungs are weak, and it's a bad cough she's got, and we're not near the sea here in Rosedale. And my sister, who lives at B—, she's wrote she'll take Nora for her own and give her schooling and not let her work till she's stronger. She's not much of her own, hasn't Sister Mary; but she's no childer since she put four in the church yard, and she'll be good to Nora, and the child just dyin' here by inches, for she will help me, and sloppin' in the washin'g'd bad for me. She coughs that bad at night, miss, and the doctor says the air in B— would be the makin' of her."

"But, surely, you will send her," said Susie.

"There it is, miss! Mary, she can't send money out an' all, and it costs six dollars to go to B—. I was up to Mrs. Stacey's, to ask the loan of it, and work it out a little at a time on the washin'; but she told me she could not spare it. An' she riel! I'm thinkin', miss, perhaps she'd be servin' the Lord as well as savin' a girl's life, you may say, instead of buyin' all this embroidered linen to show off at St. Mark's."

The words struck Susie like a stab. Was it to serve the Lord or for her own vanity she wanted to give the white cross to St. Mark's? Saving a human life! The thought almost took her breath.

"You can send Nora if you have ten dollars," she asked.

"Yes, miss; but it might as well be a hundred. I can't get it."

"Yes, you can, if you want to; and you can ask the Lord to bless my Easter offering."

And before the astonished woman could reply, the shining gold piece lay in her hand and Susie was speeding homeward.

"The Lord be good to her! The saints bless her bed!" cried Mrs. Byrne. "An' she, bein' for her own bread and butter, no' tradin' about in all weath'ers to earn a dollar!"

"You seen surprised at something, Mrs. Byrne," said quiet, deep-voiced Mr. Castleton, standing beside her. "I came over to see if you could come up to the parsonage and help Mrs. Willis to-morrow. She has some extra work on hand."

"Yes, sir! I'll come, and be thankful to you. An' I am surprised—just dazed like." And out came the whole story from the grateful woman's lips, ending with:

"And it's worl'd! she is as hard as meel in her own way, while Mrs. Stacey, that's rollin' in money, couldn't spare the loan of it, for it's not beggin' I'd be!"

Easter services were over, and Mrs. Stacey had invited Mr. Castleton to dinner. She had told no direct lie, but certainly had given the impression that the lovely embroidery upon the new linen was the work of Bessie's fingers. As they drove home she asked Mr. Castleton, sweetly:

"Don't think me impudent, but which of the offerings was Miss Barclay's?"

"None, that I know of."

"Was she one offering of ten dollars in the collection?"

"No—a five-dollar bill was the largest."

"Such hypocrisy!" sneered Bessie. "It was not necessary for Miss Barclay to tell you, was it? She was going to give ten dollars for an Easter offering, but she need not have told a falsehood about it!"

"Nor did she," said Mr. Castleton. "Her Easter offering was ten dollars."

"But he made no further explanation; nor did Susie, when summer time brought her a letter, asking her to share his life and labors, know that Mrs. Byrne had told him the story of her charity.—Anna Shields, in N. Y. Ledger.

Happy Easter Bells.
Oh, happy, happy Easter bells!
From each round throat sweet music wells
This perfect Sunday morning.
Dear Rose, I see her 'cross the street;
Just at the church door she shall meet—
My trembling heart gives warning.
We stop to speak within the door;
A few low, whispered words, no more,
And then she joins her mother.
A bunch of passion-flowers she wears,
One blossom trails down next the stairs,
Which near my heart I smother.
Ah, glorious day! I wait your flight;
So early Easter morn!
Ring, happy bells! entrance her!
I pray you may not tell me 'tis
She looks, she smiles, she blushes on,
That you may be her answer!
—John L. Jones, in Judge.

Lift Up Your Eyes.
What means this visit to the tomb
So early Easter morn?
What mean these spices, rare and sweet,
By loving hands so lovingly
It means that faith and hope have fled,
And now they seek in Christ that's dead.
But hark! The stone is rolled away,
And Christ, the Lord, is risen to-day.
And, now, we often think of Him
As crucified and dead,
And fail to recognize that He
Is now our living Head.
Lift up your eyes, ye saints, and see
Your King in word and majesty;
For angels "rolled the stone away,"
And Christ, the Lord, is risen to-day!
—F. S. Shepard, in Young Men's Era.

her wuy home," Mrs. Byrne lived at the other end of Rosedale, but she was too shy to refuse, and rolled the linen up again.

Mrs. Byrne was a hard-working woman with seven children, whose husband, after subjecting her to all the miseries of a drunkard's wife, had released her by pitching head-first off the bridge below Rosedale into the river. Womanlike, she grieved for him, as if he had made her life a bed of roses, and turned to her wistfully for a living, patiently and industriously. A very sunbeam of a woman she was, in spite of her troubles, and Susie was amazed to find her sitting on the doorstep sobbing like a child. Or course every dairy farmer has laid in a supply of ice for next summer's use. It is something you need in your business.

A CREAMERY, when rightly conducted, is a blessing to any community, but it takes a good while for some farmers to see the point.

MICH has already been said about the sanitary condition of the cellar, and now is the time to carefully heed past advice in that direction.

CREAM sometimes becomes bitter if raised in pans at a temperature too low for the milk to sour. Milk in pans should be sour in thirty-six hours.

ONE important point in the care of poultry is sharp grit, and unless fowls have this grit to properly grind their grain food sickness will ensue.

KEEP your laying hens busy. That is, give them exercise by throwing their grain feed upon the floor and covering with chaff, cut straw and the like.

HAVE all kinds of seeds ready so there will be no delay when planting time comes. It is a good plan to try the seeds and be sure they will grow.

ECONOMY in feeding the animals while the farm tools are exposed and rusting is more extravagant than any system of reducing expenses with stock.

THERE is not an overproduction of everything. Some crops may be abundant, but there will always be something of which the supply is less than the demand.

EARLY pens are hardy and can stand a light frost, hence the land should be ready for the seed early in the season, so as to have them ready for market or the table as soon as possible.

HAVE all kinds of seeds ready so there will be no delay when planting time comes. It is a good plan to try the seeds and be sure they will grow.

ECONOMY in feeding the animals while the farm tools are exposed and rusting is more extravagant than any system of reducing expenses with stock.

THERE is not an overproduction of everything. Some crops may be abundant, but there will always be something of which the supply is less than the demand.

EARLY pens are hardy and can stand a light frost, hence the land should be ready for the seed early in the season, so as to have them ready for market or the table as soon as possible.

FARM AND GARDEN.

SIMPLE WAGON JACK.
One That Is Not Only Easily Made But Also Easily Used.
Our illustration is of a very convenient and easily constructed wagon jack. The base or main piece is a 2x4 inch scantling four feet long. The top or notched stick, is 2x3 inches of about the same length. At each end of the base and on each side bolt pieces 2x1 1/2 inches. Let one set be about 15 or 20 inches high and the other 25 or 30 inches. Fasten the short pair so it will be stationary, but the other pair must be so it will move backward and forward.

Arrange the lever so that when in the position as shown at A, the notched stick will be nearly horizontal. Then place the jack under the axle of the wagon. Bring the lever to the position shown in B. This will lift the wheel off the ground and if the jack has been properly constructed the wheel will remain in position while the wheel is being taken off and the axle greased. Make the top and upright pieces of some kind of hard, strong wood—the lighter the better. The bottom can be pine.—Orange Judd Farmer.

WOMEN AS FARMERS.
Many of Them Have Been Successful beyond Expectation.
The state of Michigan has an unusually large number of women engaged in agriculture, due, probably, to the fact that in the fruit belts the culture of small fruits is especially adapted to the work of careful women, needing scrupulous cleanliness, close attention to detail and economy of management so necessary to success. Of course, many women are farmers because they were left by father or husband with a farm on their hands, yet there is an increasing number turning deliberately to farming as a vocation as the problem of how to make a living confronts them.

It is said that few women have ever failed who have seriously attempted to make a living from the products of the soil, a fact perhaps not strange when we consider that a deliberate choice of the profession of agriculture would scarcely be made by a woman unless she had a real love for the work which implies some knowledge of its principles.

It is a vocation capable of immense possibilities, and for a healthy woman of executive ability and some business training, there is no better field. Several cattle ranches in the far west now successfully run by women, and the states of California and Florida are dotted everywhere by attractive places where woman is the presiding genius outdoors as well as within the walls of the bright home. Dairying is yearly attracting more women. It is a business, paying rich rewards for careful, intelligent labor. Faithfulness, kindness and cleanliness, traits common more to women than men, will prove most effective in a business that produces goods that rise, rather than fall, in times of financial depression. Butter, milk and cheese, if of high grade, are ever in increasing demand at full prices.

Best of all, if a woman succeeds in this difficult profession, her work must be judged from a man's standpoint.

Farming is essentially a man's occupation, and she will be counted as a successful worker entirely independent from so-called woman's work.—Woman-kind.

FACTS FOR FARMERS.
Of course every dairy farmer has laid in a supply of ice for next summer's use. It is something you need in your business.

A CREAMERY, when rightly conducted, is a blessing to any community, but it takes a good while for some farmers to see the point.

MICH has already been said about the sanitary condition of the cellar, and now is the time to carefully heed past advice in that direction.

CREAM sometimes becomes bitter if raised in pans at a temperature too low for the milk to sour. Milk in pans should be sour in thirty-six hours.

ONE important point in the care of poultry is sharp grit, and unless fowls have this grit to properly grind their grain food sickness will ensue.

KEEP your laying hens busy. That is, give them exercise by throwing their grain feed upon the floor and covering with chaff, cut straw and the like.

HAVE all kinds of seeds ready so there will be no delay when planting time comes. It is a good plan to try the seeds and be sure they will grow.

LAW OF HEREDITY.

Qualities of Mind and Heart Passed Down From Father to Son.
The progress of science has diffused much knowledge without which many of today could scarcely endure existence. As we telephone the doctor, and he whisks to the house on an electric car or by rail, do we ever think of the day when doctors were not, or were not so capable as now, and that the average of human life has increased a score of years in a couple of centuries?

No more, perhaps, than we stop to consider that telephones, electric cars and locomotives were unknown to the fathers of the revolution.

This illustration shows that a man should be supremely grateful he is living now, and not a hundred years ago. Another and most profound development of scientific teaching is seen in the application of hereditary law as governing the parental relations to the child. Instincts, prejudices, passions, habits, moralities and immoralities are as surely handed from sire to son as the color of the skin and the shape of the nose.

Whatever you are now, you started life as the sum total of the acts and habits of your ancestry.

Consciousness so mysterious as to be past discovery, transmit good and evil to all future generations.

You should take care of that chest of yours, because pulmonary diseases will appear in your loved ones, than self more dear. The man who drinks to excess, hereditary a horrible appetite of burning thirst to his offspring. The violations of laws of health is visited upon the innocent to the third and fourth generations. And the man who represses soul to gratify sense is cultivating apples of Sodom for some of his future kinsfolk to eat.

But good is transmitted, too. The national traits have sprung out of individual peculiarities.

It is a magnificent endowment for life to be born well the first time.

Mr. Beecher bade his hearers remember they stood for future generations, as well as their individual prosperity, when they resisted evil.

What a power of restraint this fact should prove to every father, and mother reading these words. There are men in the senate and on the bench of the judge, or standing at the front in all matters of public righteousness, who owe their wealth and wealth to their fathers' prudence and care for body and mind.

There are thieves in prison, and even murderers, whose tendencies to murder and destroy resemble a tiger's taste for blood, in that they were born with them.

A woman named Jukes passed through the Massachusetts penitentiary in the last century. She was a noted criminal, and since her day the generations of her clan have produced more than four hundred criminals amenable to law.

So does one cast a stone into the sea of destiny, and the ripples move through many ages. The evil that men do lives after them. It is embodied in the babe. But so does the good, and the latter always lives forever. Let these truths have consideration.—N. Y. Ledger.

Many times women call on their family physicians, suffering, as they imagine, one from dyspepsia, another from heart disease, and another from liver or kidney disease, another from nervous exhaustion, or prostration, another with pain here and there, and in such a way they pass their lives, and their easy-going and indifferent, or over-busy doctor, separate and distinct diseases, for which he prescribes his pills and potions, assuming them to be such, when, in reality, they are all only symptoms caused by some common disorder. The physician, ignorant of the cause of suffering, encourages his practice until large bills are made. The suffering patient gets no better, but probably worse by reason of the delay, wrong treatment and consequent complications. A proper medicine, like Dr. Pierce's Favorite Prescription, directed to the cause would have entirely removed the disease, thereby dispelling all those distressing symptoms and instituting comfort instead of prolonged misery.

The lady whose portrait heads this article is Mrs. Ida Covey, of Huntsville, Logan County, Ohio. She had an experience which we will permit her to relate in her own language. "It illustrates the foregoing. Six years ago, I had female weakness very bad—in bed most of the time, dragging down pains through my back and hips; no appetite, no energy. The family physician was treating me for 'liver complaint.' I did not get any better under that treatment so I thought I would try Dr. Pierce's Favorite Prescription and his 'Golden Medical Discovery.' I felt better before I used one bottle of each. In three months' time I felt so well I did not think it necessary to take any more. In childbirth it does what Dr. Pierce recommends it to do—lessens the pain and perils to both mother and child and shortens 'labor.' I would like to recommend Dr. Pierce's Favorite Prescription and his 'Golden Medical Discovery.' I feel better before I used one bottle of each. In three months' time I felt so well I did not think it necessary to take any more. FOR YOUNG PEOPLE.

FATHER KINGFISHER.

How He Finds His Nest and Provides for His Family.

"It is getting towards spring," says Father Kingfisher. "Time to think of another nest!"

Father Kingfisher is a handsome fellow. He is of dull blue back and breast marked with black. His under parts are white and he has black tail feathers with curious white lines across them. His pretty blue head is long and adorned with a tuft of feathers. His nest is not a little affair, woven of sticks and grasses, like the majority of birds.

"I like to live near a quiet mill pond," says Father Kingfisher, "and there I dig a good tunnel, perhaps six or eight feet long, in the side of the sandy bank. At the end of this tunnel I let Mother Kingfisher arrange the nursery. I bring her plenty of good, clean fish-bones to make the cradles for the little ones. They make the most comfortable beds in the world—for little Kingfishers."

It is on account of meals that Father Kingfisher finds the sand bank a good place for a home. He sits for hours on a dry limb or a high post overlooking the water. When his sharp eyes spy a fish swimming below him he darts down and seldom misses striking his prey. Then, with the fish in his beak, he mounts again to his perch and beats the fish against the tree or post until its spine is broken.

Father Kingfisher does not look as if he enjoyed his dinner. He swallows it in great gulps, dislocating his neck and jerking his body and wings during the process. But he is a good provider, although it is to be hoped that the little Kingfishers do not tire of a fish diet, for they get little else.

The Kingfishers are large, noisy and assertive birds. They dash across the water, looking like a long blue streak in their swift flight. When they are watching they dart down, plunging into the water with a sudden dash.

The little Kingfishers lie warm and snug in their dry, sandy hole. No doubt they think it far pleasanter than the most daintily woven nest in the top of the tallest tree—N. Y. World.

VERY CLEVER TRICK.

How to Boil Water with the Heat of One's Hand.

A very clever trick whereby cold water may be made to appear to boil from the heat of the hand is easily managed by the boy magician.

Take a tumbler and fill it three-quarters full of water. Show your audience that is ordinary cold water, or ice water, if you choose. Cover this with a coarse linen handkerchief, allowing its center to fall to the surface of the water.

Place the palm of the hand tightly over the top of the tumbler and gently invert it with the right hand, which will hold it in the air after the left

hand is removed. The edges of the handkerchief are to be firmly held around the side of the glass, and when the inversion is complete it will be found that not a drop of water has been spilled and that by the pressure of the outer air the handkerchief retains its concave form in the glass.

Now with the left hand slowly and firmly draw up the handkerchief end so as to stretch it tightly over the mouth of the tumbler, when, of course, the water will follow it to the lowest point, leaving a vacuum above it.

This vacuum, being something always abhorrent to nature, as we are taught at school, must be filled at once; hence the outside air will force itself through the handkerchief and up through the water in a rapid succession of bubbles. So lively will be the vibrations in his hand, the audience will hear the bubbling as of boiling water, and if the glass is of boiling water, and if the glass is properly arranged, so that the glass is exposed to view between the four corners of the handkerchief, the violent disturbance may plainly be seen, an exact counterpart of the steam bubbles in boiling water.

If this trick be introduced by appropriate remarks and with the pantomime of rapidly rubbing the hands together to generate a high degree of animal heat, it is very effective. Of course, it is well to practice a few times over a basin until proficiency is attained.—St. Louis Republic.

Peter Made a Mistake.

The schoolmistress was showing off her pupils to some visiting friends. She had been over the same ground a day or two before, and thought she could trust them to do her credit.

"Who knows what useful article is furnished to us by the elephant?" she asked.

"Ivory," was the prompt reply of three boys at once.

"Very good. And what do you get from the whale?"

"Whalebone."

"Right again. And what from the seal?"

"Sealing-wax," answered Peter Sand, whose inventiveness was better than his memory.

"Little Jimmie's Ambition."

"Well, Jimmie," said the visitor to the small son of the schoolmaster, "are you going to be a lawyer when you grow up, or what?"

"I'm going to be a bugwump like papa," said Jimmie.

IN A BUFFALO'S HEAD.

A Hunter Kills a Bull with a Charge of Small Change.

The buffalo of Ceylon carries his head in a peculiar manner—the horns thrown back and his nose projecting on a level with his forehead—thus securing him from a fatal front shot. This renders him a dangerous enemy, as he will receive any number of balls from a small gun in the throat and chest without showing the least distress. An account of a dangerous encounter with this animal is given. The writer had fired without killing the buffalo and had not a ball left. With a stealthy step and a short grunt the bull advanced upon the man, seemingly aware of his helplessness.

"Suddenly a bright thought flashed through my mind. Without taking my eyes off the animal I put a double

"THE BULL LAY POWERLESS UPON THE GROUND."

charge of powder down the right-hand barrel, and tearing off a piece of my shirt, I took all the money from my pouch, three shillings in six penny pieces and two anna pieces.

"Quickly making them into a roll with the piece of a rag, I rammed them down the barrel. They were hardly well home before the bull sprang forward. I had no time even to replace the ramrod, and threw it into the water, bringing my gun on full cock at the same instant.

"I now held the barrel in the gun which I reversed till it was within a few feet of the muzzle, would certainly floor him. The horns were lowered, their points were on either side of me, and the muzzle of the gun barely touched his forehead when I pulled the trigger and three shillings rattled into his hard head.

"Down he went and rolled over with the suddenly checked momentum of his charge. Away went the money, and as our heels would carry us, through the water and over the plain, knowing that he was not dead, but only stunned.

"There was a large fallen tree about half a mile from us whose whitened branches, rising high above the ground, offered a tempting asylum. To this we directed our steps, and after a run of 100 yards we turned and looked back. The buffalo had regained his feet, and was following us slowly. We now experienced the difference of feeling between hunting and being hunted.

"By degrees the bull's pace slackened and he fell. We were only glad to be able to reduce our speed, but we had no sooner stopped to breathe than he was up again and after us. At length, however, we gained the tree and beheld him stretched powerless upon the ground within 200 yards of us."

Unappropriated Syllables.

In the early days of the gold excitement in California a young German from Michigan departed for California, and, after prospecting for awhile, settled there. His name was John G. Almond, and wishing to Americanize himself as much as possible he applied to the legislature of California and had his name changed to John G. Almond. A few days later a man named John Smith applied to the same legislature, and after reciting a long catalogue of the ills to which he was subject owing to his unfortunately common name, he said in conclusion:

"And whereas I have noticed that you curtailed the name of J. G. Almond to J. G. Almond, and have not disposed of the 'inger,' which seems to be lying around loose, I respectfully request that the same may be added to my name." The result of this appeal is not stated.—Youth's Companion.

Why She Didn't Run Away.

A lady who had reached the time of life when she began to regret every birthday as a personal affront was attending a sewing circle at the parsonage one day when the cry went up that there was a mouse in the room. Every lady in the room, except this one, fled, screaming. She remained in her chair, as pale as death. Hearing the uproar the pastor, who was in his study, came in to see what was the matter.

"It's a m-m-mouse!" the pale lady gasped.

"Indeed! And why didn't you run with the rest? Aren't you afraid of mice?"

"I am mortally afraid of them!"

"Then why, please, did you stay in the room?"

"I was in hopes," the lady faltered, "that I might be scared out of a year's growth!"

Tabby Lives on Vegetables.

There is a cat in the seclusion of Hampton Court, England, which has become a strict vegetarian, certainly on principle since there is plenty of meat to be had. This eccentric creature, black from nose to tail, has taken for her chief diet scarlet runner beans. Cucumbers she also likes, and carrots, if they are boiled, while she occasionally nibbles away at other vegetables. But, for some inscrutable reason, this singular cat will not touch fruit, and although she will drink milk, she rejects the bread that may be mixed with it. Altogether, there is some talk of taking this queer animal to London to have the philosophers talk over her.

OVERCROWDING IN CITIES.

Dangers to Health Which Lurk in Swarming Tenements.

One of the most threatening tendencies of modern times in matters of health is that of overcrowding in cities, and the great element of danger from this overcrowding is not only the insufficiency of air in living rooms and the lack of ready means for its renewal, but the accumulation in this air of infectious germs floating with the dust. Abundant water supply and good sewerage have rendered possible and measurably safe, so far as the ordinary waste of life is concerned, the building of vast tenements which swarm with people. But the means of getting pure air, and especially of disposing of infectious material often floating in it when it is confined, have not at all kept pace with the demands of health and cleanliness.

But when we turn to the larger and more liberally furnished dwellings of the well-to-do classes, we do not find everything reassuring from the standpoint of hygiene, for in some respects the rich are sadly handicapped by the "tyranny of things." Of course long and thick piled carpets afford persistent lurking places for infectious as well as other dust. Certainly heavy hangings in a measure hinder the detergent action of the sunlight, and by the side of the well-furnished room and shelter floating matter which might otherwise escape. Without doubt complex upholstery with roughened fabrics increases the difficulties in the maintenance of cleanliness. But the usage of the householder in these matters will, in all probability, be modified by the practical devotion he must at last make to the demands of health and cleanliness.

In one particular, however, the devotee to cleanliness may be unreservedly insistent, and that is that in the cleaning of living rooms, whether occupied by the sick or the well, the disinfecting and recognized purpose of the operation shall be to remove, and not simply to stir up the ever-gathering dust. The past few years, so beneficently signalized by the exploitation of the new germ lore, have seen marked departures from the traditional sweepings and dustings of a past era; and the emancipation of the housekeeper, and incidentally of the household, from the thrall of the pestiferous feather duster seems fairly under way. Still, some of the old barbarous travesties upon cleanliness persist. These are a set of which the most common is the use of the broom for the purpose of sweeping the carpets not the corner particles of dust alone, but the hoards of living germs which were for the time safely ensconced; and among these what malignant forms the chances of the day may have mingled. These are a set of which the most common is the use of the broom for the purpose of sweeping the carpets not the corner particles of dust alone, but the hoards of living germs which were for the time safely ensconced; and among these what malignant forms the chances of the day may have mingled.

"I don't pay," said Uncle Eben, "to lose my temper, and good nature is a great blessing to a community. But when you see a man who is not a hypocrite, but a hypocrite, you see a man who is not a hypocrite, but a hypocrite."

"I don't pay," said Uncle Eben, "to lose my temper, and good nature is a great blessing to a community. But when you see a man who is not a hypocrite, but a hypocrite, you see a man who is not a hypocrite, but a hypocrite."

THE BABIES' EYES.

Why So Many Young Children Wear Spectacles.

I would suggest to mothers in regard to children's eyes that they instruct whoever takes the baby out in its carriage for the daily airing how to lay the child down. I think one of the most fruitful causes of the necessity for children wearing glasses is the ignorance and thoughtlessness of nurse girls, and even mothers, as to the direct results which are sure to follow the wrong position of the baby while riding.

Just notice in your next outing how many babies will be seen lying on their backs with face upward to the sky. Even if the sun is not shining, the light from the clouds is more than the eyes can stand if in a lying posture. Try it yourself, you who have never thought of this universal carelessness and ignorance on the subject. The writer has often spoken to those in charge of a baby when she has seen the little one lying in this dangerous position. A thin parasol is not sufficient protection when the sun shines. Often the rays of light are falling obliquely and the parasol is of no protection whatever. We have often wished some one would take up this matter for the sake of the little martyrs. That little children should be obliged to wear spectacles, as young as we often see them, at the present day is a misfortune and a deformity. I hope every one who sees any one with a baby lying in a carriage with upturned face and no protection will at once speak to the one in charge.

N. Y. Advertiser.

"Johnny, who put this sand in the pepper box?" "I did." "What good?" "The sand man didn't attend to business, and make the baby go to sleep to-night, he'd go crazy. I got that work in the sand man didn't come."—Harper's Bazar.

"Mr. don't pay," said Uncle Eben, "to lose my temper, and good nature is a great blessing to a community. But when you see a man who is not a hypocrite, but a hypocrite, you see a man who is not a hypocrite, but a hypocrite."

"I don't pay," said Uncle Eben, "to lose my temper, and good nature is a great blessing to a community. But when you see a man who is not a hypocrite, but a hypocrite, you see a man who is not a hypocrite, but a hypocrite."

Fatal Field for Missionaries.

Sierra Leone, on the west coast of Africa, has sometimes been styled the "White Man's Grave," and no fewer than three bishops in succession died within three years of their consecration. In the first twenty years of the mission existence fifty-three missionaries' wives died at their own hands. In 1823, out of five missionaries who went out, four died within six months in the next year six volunteers were accepted, and of these two died within four months of their landing. These losses seemed to draw out more zeal, for next year three more went forth, of whom two died within six months.—Boston Post.

THURSDAY, MARCH 22, 1894

COL. BRECKENRIDGE'S "honor as a gentleman" is away below par, and still falling.

SOME cranks are crankier than other cranks. Senator Peffer, who stands very high in crankdom, introduced two bills into the Senate Monday, at the request of Mr. Redstone, who is Mr. Coxey's lieutenant at Washington. The bills provide for the issue of several hundred millions of fiat money, to be used in setting the unemployed to work. In introducing the bills, Senator Peffer solemnly washed his hands of any responsibility for them beyond their introduction. He wants it understood that while he may be crank enough to introduce bills prepared by other cranks, that does not necessarily proclaim him crank enough to urge their passage.

A CORRESPONDENT has submitted the following historical-philosophical thought, which comes in very apt at this season of the year when the country is given up to comparison making:

Who were our three greatest Presidents?

Washington—Who freed his country.

Lincoln—Who freed the slaves.

Coxey—Who freed the workingman and they have not worsened since.

To make honors even, let us now make Reed or McKinley our next President.—Brooklyn Daily Times, February 24, 1894.

The March of Coxey's Battalions.

On Sunday Coxey is to start from Massillon at the head of "the army of peace" which he is to lead on to Washington. They are to make a demand on Congress for the issue of \$500,000,000 for road improvement. Road improvement is a good cause, but this is not what is attracting the men who say they are going to join the army.

The novelty of the scheme will draw some. The idea of being fed on the way will draw more. Yet it is very doubtful whether the number of men in the march will come anywhere near the estimate of the enthusiastic and sanguine leader.

The tramp who understands his business does not hunt in regiments with banners flying and bands playing. He has a pretty fair idea of the free commissary resources of an average mile of country, and he prefers always something above the average. He knows well that if he travels in droves the pickings for each of them will be small.

The Coxey idea about this is that the bigger the crowd the more eagerness to afford snitable entertainment will be shown by people who work and manage to save a few stacks of last year's hay. It is given out that no forced levies will be made. The Coxey men will take what the people along the route will give them.

This may be the high resolve of the leader, but hungry human nature is very human, and if the people do not wish to give they will have to roost in their hen houses and see that their shooting irons are in working order.

The more men Coxey takes with him the more serious the danger of ugly business on the way. The country between Massillon and Washington will not permit itself to be ravaged. Parts of it had that experience about thirty years ago when there was no help for it,

but now they would resist and the law would back them with all its power.

Coxey may be too much of a fanatic to know what he is doing, but everybody else knows that the greater his success in getting men to follow him on his absurd campaign the greater will be the danger of serious outbreaks on the way, of suffering among his followers and of bitter disappointment. Of course there is absolutely nothing to be gained by the movement.

Town and Country.

The interests of a town or city and the community and country surrounding are identical. That which benefits one is certain to favorably affect the other. Often there is an unreasonable antagonism in the farming community against their home town. From some inexplicable reason they consider it their duty to oppose every movement that has for its object the forwarding of its interests and depreciate its importance in every conceivable manner.

Fortunately in this community all of our best and most progressive farmers and landowners have a kindly interest in the town and are as enthusiastic in wishing it success and exercise their energies to attain that end as any one who dwells within its limits. But the fact cannot be disguised that we have many individuals in our vicinity who display the same characteristics that distinguish those who have been the bane and curse of other localities.

These people only speak of their home town, community and neighbors in terms of disapproval. Their good points are kept in the background, while what they are pleased to call their faults are proclaimed from the house tops. They sell their products in a distant market and buy their supplies at the same place. They are simply barometers on the ship of progress, and the sooner they take up their residence where they transact their business and make room for some progressive and liberal minded citizen the better it will be for the community.

The fact cannot be controverted that a town cannot increase in size and importance without at the same time making the country contiguous a better place to live. As its population increases it furnishes a better market for the farmer, his land is enhanced in value, the amount of taxable property in the town becomes greater, and a consequent decrease of the farmer's tax results. The literary, social and educational advantages and church privileges keep pace with the town's growth, and the farmer, his wife, sons and daughters enjoy them equally with other citizens.

Suppose, for instance, that our thriving center of business and trade was swept away, and in its stead we had a crossroads hamlet, with a postoffice, blacksmith shop and grocery store. Do you think that this community would be as desirable a one to live in as at present?

On the other hand, should the growth of this community continue until we had as large a population as some of the larger cities we might name, with their manufacturing industries, commercial, literary and educational institutions and all the conveniences which are in reach of those who live convenient to metropolitan centers, would not the life of a farmer be more pleasant and comfortable and his sons given a better chance in life than as present situated?

Probably we may never be a New York or Chicago, but by a united effort of our citizens we can build up a place of which we may feel proud and secure to the community many of the advantages that go to make life worth living in the great cities and at the same time make our callings in life more attractive and profitable. This consummation can only be secured by the co-operative effort of the entire population of the community—farmers, mechanics, merchants, laborers and professional men as well as capitalists. Each can contribute his share by assisting his neighbor with his patronage and by giving every work-

thy enterprise or undertaking his hearty and unqualified support and approval.

Every business and professional man in this town should have an advertisement in this paper if it is nothing greater than a two inch card. In addition to the benefit it does the advertiser in bringing his business to the attention of the public, it is a slight token of his appreciation of the benefit that a well conducted and enterprising newspaper is to a town. Further, it is a notice to the world at large that his particular line of business is represented in a place by an enterprising man and gives those seeking locations a good opinion of the business men represented. The advertising columns of the local paper are a good criterion to judge a town by.

The Tariff Bill Reported to the Senate At Last.

WASHINGTON, March 20.—The tariff bill, as modified by the Senate finance committee, was reported in the Senate to-day and was ordered to be printed and placed on the calendar. Mr. Voorhees, of Indiana, who made the report, gave notice that he would ask the Senate to begin the consideration of the bill on Monday, the second day of April, and said that he would then be prepared to make a statement in relation to it. Mr. Morrill, of Vermont, stated that the Republican members of the committee had not objected to the report, but that they were opposed to the income tax feature of the bill and to the change from specific to ad valorem duties. A Democratic member of the committee, Mr. McPherson, of New Jersey, indicated also his opposition to the income tax and to the provision as to the mode of imposing duties on sugar, the bill leaving it optional with the customs officials whether the duties fixed by the tariff should be levied by the collector or by the duty stamp.

WASHINGTON.

Low Rates on the B. & O.

WASHINGTON, B. & O. A host of recollections flood the memory at the mere mention of the name. There is no place in the world which should be so dear to the heart of every patriotic American. Washington, Adams, Jefferson, Jackson, Webster, Clay, Calhoun, Sumner, Seward, Douglass, Phillips, Scott, Lincoln, Grant, Garfield and Blaine—all the great statesmen and soldiers whose names are like stars in the flag of our country—this is the theatre of their great achievements, the forum of their memorable debates, the arena of their struggles and their triumphs. Washington is justly called the most beautiful city in the world—the city of magnificent distances, a perfect arsenal of interesting features—public buildings, statuary, galleries, monuments, museums, paintings, parks and gardens.

All are ours; they belong to the citizens of this glorious country and can all be visited without paying one cent for admission or fee. As an educator, a trip to the National Capitol has not an equal on the globe.

By taking (and only by taking) the Baltimore and Ohio, you will see a river hallowed in America beyond all others by historic recollections—the river on whose banks sleeps the Father of his country—the river for whose possession more lives have been sacrificed than were lost to guard the German Rhine.

This river, the memory hallowed Potomac, is closely followed for more than one hundred miles of its most delightful scenery by the Baltimore and Ohio Railroad, a ride in itself a dream of scenic loveliness and beauty.

The last of the series of reduced rate excursions, to Washington via the B. & O., is announced for Thursday, April 5th.

We give below a list of stations in this vicinity, showing time of trains and rates of fare:

LEAVE	TIME	ARRIVE	TIME	RATE
Washington	6 P.M.	10 A.M.	5 P.M.	75c
Frederick	7:00	11:00	6:00	1.00
Thurmont	7:20	11:20	6:20	1.00
Leesburg	7:40	11:40	6:40	1.00
Frederick	8:00	12:00	7:00	1.00
Thurmont	8:20	12:20	7:20	1.00
Leesburg	8:40	12:40	7:40	1.00
Frederick	9:00	1:00	8:00	1.00
Thurmont	9:20	1:20	8:20	1.00
Leesburg	9:40	1:40	8:40	1.00

Correspondingly low rates from other stations.

Tickets will be good ten days, and will be valid for passage from Washington to Baltimore at any time within the life of the ticket.

For Pullman Car accommodations and guide to points of interest in Washington, address nearest B. & O. Agent.

Dentistry.

Dr. I. L. Ritter, of Frostburg, Md., will be at Oakland Monday, April 2, and remain a few days, prepared to do all classes of dental work. Call early and make engagements. Teeth extracted without pain. Office, Commercial Hotel.

FINANCIAL REVIEW.

Henry Clews's Weekly Letter on the Business Situation.

New York, March 17.—During the past week the course of stock market has indicated that the rising tide of speculation is gradually gaining force. There has been more buying and at better prices and transactions have extended from the industries to the railroad list.

The Bland bill, which was passed on Thursday by the senate, had a temporary depressing effect. Hitherto, it has been regarded as a matter of no really serious moment; for it has been taken for granted that the President would veto the measure. It now seems, however, that the kind of political influence that secured the passage of the bill in the house and has carried it through the Senate has been brought to bear upon the President also. What may be the effect of this pressure upon Mr. Cleveland is by no means certain at the moment; but it is safe to say that he has not met these blandishments with the prompt negative that has been expected. Among those who have gained his ear, there is no question that he is at least undecided, and his final action will probably be upon the balance of forces as between public protest and party compulsion. This introduces a temporary element of suspense into Wall street, which may possibly hold the improving tendencies in check.

At the moment, the silver question seems to be energizing itself for another of its desperate spasms; we hope its last; but it is still capable of causing more than a little mischief. In New England there has been a gathering of the scattered bi-metallic forces; the organization has been the misfortune, however, of commerce, in obedience to the urgency of India and China trades, has appealed to the government to promote the re-issuance of the brass monetary conference, with a view to considering means for restoring silver. Whether the call will result in adding another insoluble question to its already unmanageable embarrassments remains to be seen. Such is the situation of silver and such the growing aggravation of that situation, that an outcome seems possible except the conclusion that the disorder is impossible of adjustment excepting through the powerful auspices of international agreement. The supply of the metal has become absolutely unmanageable; and the devaluation has become so great that no conservative government alone could be expected to accept the impossible task of restoring its value. These movements naturally strengthen the hopes of our home silver faction, and give them an influence in legislation they would not otherwise have. In case of the silver bill finally becoming a law, its effects would probably result in its repeal by a succeeding Congress and a consequent reinforcement of public opinion against further impeding the national credit through favoring debased money.

There has been, during the week, some slight revival of London buying our securities; but it seems to have been incident to the condition of the exchanges, and has little real significance. There can be no doubt that the tendency of the Bland bill has had a depressing effect upon our securities abroad—had anything that tends to weaken the assurance afforded by the repeal act. London is evidently in the beginning of an active speculative movement; for several colonial securities and the Turkish and Egyptian loans have advanced to prices above the highest of the last two years; and yet American issues, in spite of their cheapness, have so far remained neglected, and investments in them have been mainly confined to gold-bearing mortgages.

The gold export movement moves at a slow rate. It is to be expected that, at this season, we must ship that metal; but it will probably be found that the outgo is less than usual for the spring months. The February exports of merchandise show an increase of \$5,300,000 over those of a year previous. The imports for the month exhibit a decrease of \$24,000,000; which added to the gain in exports makes the February trade balance nearly \$30,000,000 more in our favor than it was twelve months previous. It is so to be remembered, however, that, during the first quarter of 1893, we had an almost unqualified adverse trade balance against us, which resulted in the extraordinary export of gold that exceeded the pane. We can well enough afford to spare any gold that is likely to go out now, without serious consequences, as our banks hold an unusual supply.

The situation, as a whole, is one that must be constructed as on the mend. Outside the influences connected with Washington, affairs have a distinctly hopeful prospect. General trade is reviving, manufacturers are regaining confidence and resuming work on the old scale, the condition of our foreign trade is strictly conservative, and there is no doubt of money remaining easy for the remainder of the year. But there is likely to be a disposition to operate within moderate limits until the Bland bill is out of the way.

OUR WASHINGTON LETTER.
(From our Regular Correspondent.)
WASHINGTON, March 19, 1894.
Republican Senators who have heretofore conceded the probability of the ultimate success of the Democrats in passing some sort of tariff bill now consider that they have at least an even chance to defeat the bill. Although the committee has decided that the bill shall be reported to the Senate this week and taken up for consideration April 2—by the way that date represents a substantial victory for the Republicans of the committee—it is known that not a single one of the ten Democratic Senators who style themselves "conservatives," and are styled "kickers" by the other Democrats, has promised to support the bill, notwithstanding the numerous concessions made to them by the Democrats of the committee, and some of them will, it is believed, vote against the entire bill, unless they can get it amended to suit their demands. Instead of the changes made in the bill by the Democrats of the Senate committee—most of them against their will—opposing the Democratic opposition to the bill they have largely increased it. The free traders have been offended and not a single "kicker" has been propitiated.

Many shrewd observers believe that upon the disposition which Mr. Cleveland makes of the Bland bill for the coinage of the seigniorage depends the very existence of the Democratic party as at present constituted. At least three members of the cabinet—Gresham, Smith and Herbert—are so certain that the veto of the bill would be followed by an open split of the Democratic party that they are doing their best to persuade Mr. Cleveland to sign the bill, as a peace offering to the silver Democrats in the south and west who are disgruntled because of the numerous suits they have received at the hands of the administration. Representative Strauss, of New York, a personal friend of Mr. Cleveland, is also working on the same line, although himself opposed to the bill. Mr. Cleveland has given no sign of what his intentions regarding the measure are. A delegation of New York bankers are here to prevent Mr. Cleveland yielding to the party pressure that is being brought to bear upon him to allow the bill to become a law. These New Yorkers have demanded of Mr. Cleveland that he veto the bill, in accordance with the pledges made by Secretary Carlisle when he asked them to save the administration bond issued from the flat failure which it would have been had the bankers not subscribed to them. On the other hand, more than two-thirds of the Democrats in Congress voted for this bill and they are demanding that the bill be signed, or at least allowed to become a law without the President's signature, and threatening to publicly repudiate the administration should the bill be vetoed.

In addition to being vicious the Democratic tariff bill is very clumsily drawn. Since its revision by the Democrats of the Senate Finance committee the Republicans have had an opportunity to study the bill. A Republican Senator pointed out a paragraph which would have had it been allowed to remain in the bill and the bill have ever become a law, resulted in tangling up the internal revenue system to an extent that would have cost the government many millions of dollars. It would, in short, have prevented the collection of a dollar of internal revenue, except upon such articles as are specifically mentioned in the present bill. This error was, of course, corrected.

No man serving his first term in Congress was ever before given the honor of being put at the head of the Republican Congressional campaign committee, but it has just been done for Representative Babcock, of Wisconsin, who has been selected to be acting chairman of the committee, while Judge Canwell is making his canvas for the mayoralty of Cincinnati, and as Judge Canwell is likely to be elected Mr. Babcock is almost certain to become permanent chairman of the committee. This selection was not made haphazard, but because Mr. Babcock's colleagues recognized his peculiar fitness to direct the work of the committee, and were only glad to learn that he was willing to undertake it.

The investigation of the contract for printing the Patent Office Gazette, which was for a time sus-

pended because of the members of the Senate committee on Printing having been otherwise engaged, has been resumed. If Josiah Quincy, ex Assistant Secretary of State, who is accused of having a pecuniary interest in this contract, is not guilty he is a philanthropist of the first water, as he has given freely of his time, money and influence to aid the favored contractors. There has been a looseness about the whole business that would in any properly conducted commercial establishment result in some dismissals. For instance, the contractors agreed to do the work for one year from July 4, 1893, for \$45,000, yet with three and one half months remaining of the year they have drawn \$49,000, leaving only \$6,000 to pay for that time. Unless the bond filled by these contractors is better than anything else they have had anything to do with there will be a considerable loss to the government.

JONAS FRAZEE.

THE BOUNDARY.

History of the Formation of Various West Virginia Counties.

OAKLAND, MD., Mar. 8, 1891.
T. Jay in Cumberland News.

This act recites that whereas, part of the county and parish of Augusta lies within the bounds of the territory or tract of land called the North Neck belonging to the right honorable Thomas Fairfax Baron, of Cameron, and it will be more convenient if the dividing line between the said territory and the other part of this colony be established as the line of the said county and that part of the said county be added to the county of Frederick; and whereas the county of Frederick is of a very long and large extent and inconvenient to the inhabitants thereof, then enacts that on the first day of May next ensuing all that part of the county of Augusta which lies within the bound of the Northern Neck be added to and made part of the county of Frederick, and that from and immediately after the said first day of May the said county of Frederick, and said part of the county of Augusta so added to and made part of the county of Frederick aforesaid, be divided into two counties, and that all that part thereof lying to the westward of the ridge of mountains called and known by the name of Great North or Cape Capon Mountains and extending from the Great North or Capon mountains with the Potomack river to the Fairfax Stone, and thence by the line run by the commissioners from the said stone to the head of the Rappahannock, and embraced all the territory now included in the counties of Hampshire, Hardy, Grant and Mineral.

Hampshire is the oldest county now within the limits of West Virginia by 25 years. It was created 25 years before the revolution. The county seat was established at Romney, on the South Branch of the Potomac about 20 miles above its mouth, and the county authorities exercised exclusive jurisdiction over all the territory south of what Maryland calls the North Branch of the Potomac to the line of the Northern Neck, which had been established by the King between the Fairfax Stone and the head of the Rappahannock.

HARDY COUNTY CREATED.
Hardy county was formed in 1785, the act creating it providing that "the county of Hampshire shall be divided into two distinct counties by a line beginning at the north branch of the Potomac opposite to the mouth of Savage river, and running thence in a direct course so as to strike the upper end of the plantation known by the name of Myers Mill, on New creek, thence by a direct course to John Lewis' mill on Patterson creek, thence in a direct course to the highest part of the mountain known by the name of High Knob, thence, etc., etc., and all that part of the said county lying south of said line shall be called and known by the name of Hardy."

The mouth of the Savage river is just above the town of Piedmont in what is now Mineral county, West Virginia. New creek rises in what is known as Grant county, West Virginia, and runs northward through Mineral county and empties into the Potomac, or north branch of the Potomac at Keyser, the county seat of Mineral county, 23 miles above Cumberland, Maryland. Patterson's creek rises far south in Grant county and runs northward through the eastern part of Mineral and empties into the north branch of the Potomac about eight miles below Cumberland, Maryland, and about ten miles above the mouth of the south branch.

Hampshire county was enlarged by an act passed in 1785, providing that all that part of Hardy county lying north of a line to be run from the mouth of Stony river to the High Knob shall be, and the same is hereby added to and made part of Hampshire county.

MINERAL COUNTY FORMED.
Mineral county was formed in 1867 (after the creation of West Virginia) out of the western part of Hampshire county. The county seat is at Keyser on the Potomac or North Branch, at the mouth of New creek. It is a town of nearly 2,500 people, and Piedmont, in the same county, about five miles above Keyser, is also a flourishing town of over 2,000 people, and Elk Garden is a thriving mining town in the same county, near the Potomac or North Branch, and has a population of about 1,500, the population

of the county by the census of 1890 being 12,085.

GRANT COUNTY.
Grant county was formed out of the western part of Hardy county in 1866. The boundaries of Grant county as set out in said act are as follows: "Beginning at the Fairfax stone at the junction of the line between West Virginia and Maryland, corner to said county of Hardy, and with the said boundary line down the north branch of the Potomac to Hampshire (now Mineral) and Hardy county line; then with said line south-eastward, crossing Patterson Creek mountain, etc., etc."

The "Fairfax Stone" is therefore its northwestern corner. It had a population of 6,802 in 1890. Its county seat is Petersburg, on the western bank of the south branch of the Potomac river.

PENDLETON COUNTY.
Pendleton county was formed from Augusta, Hardy and Rockingham counties in 1787. The county seat is Franklin, which was formed in 1794.

MONONGALIA COUNTY.
Monongalia was the first county formed after the Revolution. It was created by an act passed in 1776, by which its boundaries are defined as follows: "All that part of said district lying to the northward of the county of Augusta, to the westward of the meridian of the fountain of the Potomac, to the southward of the county of Yoghania and to the eastward of the county of Ohio."

HARRISON COUNTY.
Harrison county was formed from Monongalia in 1784 by an act providing that "the county of Monongalia shall be divided into two distinct counties by a line beginning on the Maryland line at the Fork Ford, on the land of John Goff, thence a direct course to the head waters of Big Sandy creek, thence down said creek to Tygart's Valley Fork of the Mongalia river, etc., etc."

PRESTON COUNTY.
Preston county was formed from Monongalia in 1818. The line running from Fairfax stone to the Pennsylvania line is its eastern border line, and the Fairfax stone is the southeastern corner of said county. Population of Preston in 1890 was 20,355.

TUCKER COUNTY.
Tucker county was formed from Randolph in 1856, and the Fairfax stone is a point in its boundary. The boundaries of Tucker county as set forth in said act are as follows: "That so much of the county of Randolph as are contained in the following boundary line to wit: Beginning at Fairfax stone and running thence with the division between Hardy and Randolph counties to the corner of Pendleton county, thence to the corner of Preston county, and with the line of Preston county to the beginning, shall form one distinct and new county and shall be called and known by the name of Tucker county. Its population in 1890 was 6,459."

The towns of Thomas, with several hundred inhabitants and Davis with at least 2,000 inhabitants, and several flourishing villages along the West Virginia Central and Pittsburgh railroad, are situated in this county just south of the Fairfax stone, and have all grown up in the last ten years. The said West Virginia Central and Pittsburgh railroad was built within the last twelve years along the north branch of the Potomac river, extending from a point on the Baltimore and Ohio railroad on the south side of said North Branch about a mile above the town of Piedmont, in Mineral county, West Virginia, along the course of said North Branch, passing within a very short distance of the Fairfax stone, and crossing the Alleghany Mountains just south of said stone to Elkins, in Randolph county. The railroad crosses the North Branch at several points along its route and runs some distance on the north side of said river. This railroad was constructed under a charter granted by the Legislature of West Virginia so far as it lies south of said North Branch, and under a charter issued by the State of Maryland so far as it lies north of said North Branch.

The Baltimore & Ohio railroad which enters West Virginia at Harper's Ferry follows the course of the Potomac river from a point above Martinsburg to the mouth of the Savage river about one and a half miles above the town of Piedmont. It runs along the south bank of the river to a point near the city of Cumberland, Md., where it crosses to the west side of the river and then continues on the north side until within three miles of Keyser, in Mineral county, W. Va., where it recrosses to that side and continues on that side to a point above Piedmont about one and one-half miles, where it again crosses and leaves the river and begins to ascend the main ridge of the Alleghany mountains. The Baltimore and Ohio Railroad Company was chartered by the State of

Maryland by act of February 28, 1827, and of Virginia by act of March, 1847, the company was authorized to complete its road through the territory of Virginia, over a route thereby prescribed. And as far as said railroad was constructed north of the Potomac river, it was constructed under the authority of Maryland, and so far as it was built south of said river, it was done under the authority of Virginia.

The same is true of the Piedmont and Cumberland railroad which has been built within the past ten years, from a point one mile above the town of Piedmont to the city of Cumberland, along the north branch of the Potomac, crossing and recrossing said river several times. It was built and is operated under charters granted by both States.

possession AND JURISDICTION OF VIRGINIA AND WEST VIRGINIA.
The State of West Virginia says that from the foregoing recital of facts this court will see that the territory claimed by the State of Maryland in her said bill of complaint, was in 1745 solemnly decreed by the King in council to be within the boundaries of Virginia, and has been under the exclusive sovereign jurisdiction and control; first, of the colony of Virginia, and then of the commonwealth of Virginia, and since January 20, 1863, of the said State of West Virginia, before and since the survey of the Potomac river in 1736 by said commissioners and up to the present time. The courts of Virginia and West Virginia have administered the laws of said States in said territory ever since it came under the dominion of the white people. Their State and county governments have alone been recognized by the people residing in said territory, who voted for and elected county officers of said State, and members of the Legislature of said States and representatives of Virginia and West Virginia in the Congress of the United States. The inhabitants of this territory have paid the State and county taxes levied under the authority of the States of Virginia and West Virginia, whilst the State of Maryland has never had or exercised any sort of jurisdiction or control over any part of it, or the inhabitants thereof; no writs from her courts have run or been served in said territory; no taxes of any kind have ever been levied by her, there, or paid by the inhabitants to her, nor have any of her officers been voted for or elected by said inhabitants within said territory. The Fairfax stone has been a point in the boundaries of the counties of Virginia ever since the formation of Frederick and Hampshire counties in 1753, and is now a point in the boundaries of the counties of Grant, Tucker and Preston in West Virginia, and also of Garrett county in Maryland, as will be more fully shown hereafter.

At the time the first charter of Maryland was granted, and for many years afterwards, all this territory was entirely unknown to the white people; it was an unbroken primeval forest, the abode of red men and wild beasts. After the year 1730 white settlers began to locate in this favorite region and gradually the territory became settled up with a hardy, thrifty and intelligent population and to day the territory claimed by the State of Maryland is one of the most populous and thriving parts of the State of West Virginia. A number of large towns and villages are to be found within it and its fertile valleys are filled with people who and whose ancestors for several generations have adhered to and given allegiance only to Virginia and West Virginia.

Wherefore the State of West Virginia claims and pleads the said long continued, adverse and exclusive possession and jurisdiction and control over the said territory by her and Virginia under color and claim of title as a full and complete answer and defense to the claim set up by the State of Maryland in her said bill to said territory and she asks that she may be given the benefit of all the legal presumption and rights arising from said possession and control.

Rogers' Specific Liniment
A radical cure for cholera. Sold by A. G. Sturgis, Oakland, C. F. White, Huttons; The Co-Operative store, J. O. Delberry, Corinth; E. A. Weimer, McHenry, Smith & Callis, Johnstown; J. E. Gnagney, Accident; Jonas Frazee, Yongh Store Co., R. Liston, Selbyport; A. Wass & Son, Mineral Springs; L. E. Friend, Friendsville; P. T. Garthright, Mountain Lake Park and at all other general stores.

When Baby was sick, we gave her Castoria.
When she was a Child, she cried for Castoria.
When she became Miss, she clung to Castoria.
When she had Children, she gave them Castoria.

ON THE CAPITOL STEPS

Coxey's Army No Joke. It Will Move On to Washington March 25.

Dispatches from Massillon, Ohio, say that Coxey's army is no longer a joke, and that the citizens of that place are becoming greatly alarmed at the gathering there of cranks, tramps and unemployed laborers. One week from last Sunday, if the authorities do not stop the proceedings, the army will leave Massillon for Washington. Their first stop will be at Redurban, four miles out, where they will take refreshments and organize. Canton will be reached by evening, where a mass meeting is to be held on the public square. The army will then bivouac, probably on the fair grounds.

The line of march is mapped out: Start from Massillon on Sunday, March 25, to Redurban, where the army will be organized as planned; camp near Canton Sunday evening; camp near Louisville, Ohio, Monday night; camp near Alliance, Ohio, Tuesday, March 27; Salem, Ohio, March 28; Columbiana, Ohio, March 28; East Palestine, Ohio, March 30; New Galilee, Ohio, March 31; Beaver Falls, Pa., April 1; Sewickley, Pa., April 2; Allegheny, Pa., April 3; Pittsburgh, April 4; Whitehall, Pa., April 5; Findlayville, Pa., April 6; Bantleyville, Pa., April 7; Brownsville, Pa., April 8; Uniontown, Pa., April 9; Laurel Summit, Pa., April 10; Somersfield, Pa., April 11; Grantsville, Md., April 12; Frostburg, Md., April 13; Cumberland, Md., April 14; the route to Hancock, Md., which will be reached April 18, has not been decided upon yet; Williamsport, Md., April 19; Hagerstown, Md., April 20; Boonsboro, Md., April 21; Frederick, Md., April 22; Ridgeville, Md., April 23; Damascus, Md., April 24; Atkinson's postoffice, Md., April 25; Laytonville, Md., April 26; Olney, Md., April 27; Rockville, Md., April 28. What will be done on the 29th and 30th is not yet figured out, but it is probable that the "army" will take it easy from Rockville to Washington reaching the steps at the Capitol May 1st, the forces numbering anywhere from 5,000 to 8,000 men.

The officers of the army will ride horses furnished from the stables of Coxey, who used to own a stock-breeding farm in Kentucky. The common soldiers will walk. Arms are forbidden, and Coxey calls on all who come out to leave the army to bring baskets of provisions and give them to his soldiers.

Coxey has issued a bulletin in which he calls on his army to remember Washington in the snow at Valley Forge, and if necessary to suffer like them in a good cause.

A special from Massillon says: Reformers Coxey is just home from Pittsburgh, where he received such assurance of material aid for the commonwealth that he is radiant.

Dear Park.
Mr. David Bershears, of near Cumberland, is here among his many friends.

Mr. Harry Bernard, of near Mountain Lake Park, is visiting here.

Hon. and Mrs. A. F. Georg were here last Saturday visiting their father, Rev. Wm. E. George, who has been ill.

Mr. James Baldwin, of Seanton, was here a few days last week.

Mr. Henry Sisk, ex-Senator Davis' farm manager, has just received a new Superior seed drill.

Mr. Lorenzo Thrasher has improved his property by building a neat and substantial fence.

Miss Ella Laughlin is on the sick list.

Our school closed last week by giving an entertainment which was enjoyed by all present.

P. T. Garthright is here selling a car load of corn.

The B. & O. R. Co. are having their ice house filled with ice from Maine.

Grant is going to run our huckster wagon. He says these are Democratic times and butter and eggs, like wool, must come down.

Mr. Frank Savage, from Selbyport, is visiting here.

Charley Savage is fencing his lot, side-walks included, which is raising quite an excitement.

Farmers look to your interest and get reliable fertilizers and such as will suit your crops. We will give you our experience of over a quarter of a century. Just received two car loads of Pure Animal Bone and Phosphate, guaranteed not a particle spurious matter in our Animal Bone fertilizer. Best for seeding down in meadow and phosphates are best for corn, oats, buckwheat, etc. Also a special fertilizer for potatoes. We are agents for good reliable companies. Will sell at lowest cash price or will take your notes for six months. Cabbage, tomato and celery plants in season. Also all kinds of flowering plants and cut flowers on hand and furnished at short notice. H. Weber & Sons, Box 57, Oakland, Md.

1-2m

CASTORIA

for Infants and Children.

"Castoria is well adapted to children that I recommend it as superior to any prescription known to me." J. A. Anthon, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"The use of 'Castoria' is so universal and its merits so well known that it needs a word of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTIN, D. D., New York City.

Castoria cures Colic, Constipation, Stomach, Diarrhea, Indigestion, Kills Worms, gives sleep, and promotes digestion, Without injurious medication.

"For several years I have recommended your 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results." EDWIN F. PARKER, M. D., 125th Street and 7th Ave., New York City.

THE CASTORIA COMPANY, 77 MURRAY STREET, NEW YORK CITY.

Poor Printing

Pays

Poor Profits.

We get out a class of printing that is superior to the "general run." Good printing pays, and that is the only kind we furnish our customers and patrons.

The Republican Job Printing Department, Oakland, Maryland.

MERCHANT TAILORING.

R. Savage, of Oakland, has removed to Oakland and reopened his Tailoring Establishment, and will be glad to serve the people of the town and vicinity at exceedingly low prices.

He will make Suits of all wool goods, fit guaranteed, for \$15 and up.

He has also a large and complete stock of ready made clothing which he will alter to fit and make no charge for the alteration. Give him an early call and judge for yourselves. He will also in a short time have a full line of shoes and hats for sale. Yours respectfully, R. SAVAGE, Cor. Oak and 4th Streets.

WORTH OF \$9,000.00

GOODS AT COST

To Make Room for Spring and Summer Stock.

There is such a thing as having too many goods, so we have decided to sacrifice our entire stock of

DRY GOODS, SHOES, CLOTHING, NOTIONS, Etc., AT ONCE.

This throws thousands of dollars worth of as desirable goods as were ever brought to this vicinity into the hands of the people at first cost. We intend to make room for our new stock and won't fool all spring about it.

Staple Domestic Goods Will go in the slaughter mill with the balance. Now is the time to load up with Muslins, Calicoes, Ginghams, Canton and Woolen Flannels, Table Damask, Towels, etc.

SHOES Men's, Women's and Children's go on. Don't listen to what you hear, but drop in and see for yourselves, and above all things see prices in

The Clothing Department.

It will be a revelation to you. Men's and boys' suits for less than cost. Drop in and see. It will pay you to look through the stock and learn prices in

The Notion Department,

where thousands of useful articles at first cost may be found. The stock must move at once as the time is coming to put in the new stock. The reduction in the price of Dress Goods will be startling. You will be enabled to secure Fine Woolen Fabrics at the usual price of Cotton and Worsteds—almost as low as calicoes.

Auction Every Saturday Until Stock is Reduced.

The auction sales will be under the management of Mr. John Shortzer, who is now in the east looking up bargains and will return with a fine line of Silks, the Latest Novelties, Carpets, Mattings and Oilcloths.

WE ARE SELLING GOODS AT COST NOW.

Our first auction will be held on Saturday, March 24, beginning at 10 o'clock a. m., to which all are cordially invited. Very respectfully yours,

SINCELL BROS.

The Republican.

BENJ. H. SINCILL, Publisher.
OAKLAND, GARRETT CO., MD.

BIRD VISITORS.

'Mid joyful things that winter brings,
Who is not glad to see,
Fearless and bold through all the cold,
The merry chickadee?
Sweet is the note that fills the throat
Pours out in hearty praise,
Rejoiced we hear: yet not less dear
His arch and happy ways.

Now on the window sill he sits
And ruffles in the sun;
Or round about the bush he fits
Now up and down with fun!
His only past a merry game,
His only home a tree,
And ever he brings on fearless wings,
The friendly chickadee.

Now away the scolding jay
To orchard boughs invite,
With handsome crest, he's easily dressed
In brilliant blue and white:
But dress and temper ill agree,
His cries come loud and thick;
How shrill he calls! It seems to be:
"Bring me my breakfast quick!"

When winter comes let scatter crumbs
Along your window sill;
A bit of meat for some to eat
Will please them better still;
A shaft of wheat or a famous treat,
'Twill long surround him;
For some will come for morning calls,
And some for evening tea.

Among the things that winter brings
To cheer us, day by day,
A friend with wings, a friend that sings—
Who would not have him stay?
The snowbird and the scolding jay,
The sparrow, you will see,
But best of all that feathered band,
The merry chickadee.

—D. H. R. Goodale, in N. Y. Independent.

A BRAGGART IN LOVE.

Story of an Army Tragedy in the Southwest.

The women had gone to the drawing-room, and we had finished our first cigars, when the conversation struck on matrimony. We were all married men explaining how it happened. The other guests had told in turn their little story in the free confidence one easily feels at the end of a perfect dinner. I had related my romance, and we now turned to our host.

"Narcia, how did you win your wife?"

"It's a long story—began on a hunting pass in the Arizona desert, crossed the water and ended in Colorado. Light fresh cigars. No! I'll take Mexican. But, bring the Charteuse—green for me, if you please."

I think it was the summer of '86, Geronimo was not yet taken, and we had been chasing in our turn until, for lack of backs and feet, our horses were lagging in the race, and we were set to watch water holes in the San Simon, so polluted with alkali and arsenic a sensible savage would have shunned them. As my dyspepsia, which dates from that campaign, tells me I failed to do.

Somewhere the Geronimo campaign always reminded me of a fox chase the Indian scouts keeping their noses close to the scent like dogs too slow to force the bush into the open, while the various troops, like hunters in different wind, held and lost the place which promised first at the finish. If you know Arizona at all, you will recall how sharp and rocky are the crests of the divides; being lines of most resistance in this land of deep erosion, they retain the snows of mountain drifts as it disappears in early summer. Below these scowls lies a colony of rounded foot-hills, receding and growing less until they end in broken bowlders, then, with numerous small peaks, fades into the soft, level alkali plain and blends, as unsuspected as the canyons walls of a cyclorama join the rocks and logs in the pit below you.

The Indians preferred these sharp crests, which were for them both watch towers and impregnable bastions. Occasionally they would strike across the valley, kill a rancher, and steal fresh ponies, and some troop would cut in and crowd them in the open till they took the next divide and met some barrier that balked the pursuers and forced on them a detour, while some other troop, through acclimated to the soft, level alkali plain, would take the chosen place on the trail, giving for a few days its dast to the other pursuing columns. It was a weary, stern chase, performed under burning skies of cloudless blue in a thirsty land of heat intolerable. And it was last expressed by our lieutenant, who, on being informed by a certain captain of "Nubian Horse" that he was after Geronimo, replied: "Yes, captain, a long way after." It was like cutting cards for an ace or calling the turn at roulette or faro to tell which one of some twenty-five troops would be in at the death.

We had had our little sport; had brushed them off the divide, and for three days led in the open across the valley to the Sierra Madre, where fresher horseflesh cut in from our right and took from us the place of honor and left us, foot-sore and back-sore and winded, at the base of the mountains, where we were ordered a day's march back into the valley, near the border, to guard water holes of the San Simon in the stifling month of August. The nights were getting bearable, but the day heat still held on with the stubborn insistence of a southern summer. Our camp was not happy—the water was bad; our shelter halves, but little thicker than cheese cloth, proved leaky sunshades, and we reinforced them with our saddle blankets; we had no amusement except to growl, wish we were in the chase, and wonder whose blooming intellect had squatted us down among Gila monsters and sand flies to watch water so foul neither son nor woman would drink it.

The local sports of the environment were disgusting. A week before they were giving odds—ten to three—on us in the race, and now used pool chucks to light cigarettes from the candles about the cook fire. There was not a drop of anything in camp. The tobacco was running low. The only pack of cards was a "monte lay-out" our packer had scraped from horse hide with a piece of broken glass.

Something was going to happen, for the strain was telling on men's nerves. The weather was too hot for camp idleness, and we were near the "line." I was first sergeant of L troop then, and, next to a coward or a thief, I think I loathed a deserter. We were near the border of Mexico where our must not cross, but where smuggling is permitted and vice possible.

The men were getting irritable—I knew the signs, the tension was reaching snapping point. I had been thinking of it all day. That evening John Leighton and I were working under the orderly fly at the "records"—were posting Vaughn and Murray's "buals." Vaughn was a corporal and Murray our blacksmith, who had been killed the week before on the day we pushed the Apaches off the divide.

to bathe in the acequia and caught some of its murrain.

On the plaza I passed two groups of comrades, one seeking solace in brandy, the other, fortune in roulette—pleasant pastimes that might lead to "complications" while money lasted, and would bear little watching.

I walked on to the Jardin de Oro, a small public park where serenaders are inspired and listeners stroll or seat themselves on benches or on the grass. Only those who have suffered the heat and glare of a campaign in the desert can form any idea of the physical luxury of green trees and of water. I was seated listening to the soft clau Spanish as it fell about me in slow chatter. From afar it mingled with the murmur of the fountain.

What a contrast was this scene to the hot camp I had just left, where were heard only the whirr of the rattlesnake or the insistent cooing of the lonely turtle dove—mournful sounds which seem to add to the vibrant heat. Above the mountains lay a zone of troubled white, from which the moon had now risen into the full, upper blue, causing the leaves overhead to cast shadows in arabesque on the grass at my feet, where, as the night breeze stirred the foliage, it wove marvelous figures in trefol and tracery for fancy to play with as with those made by flames in a grate. Now it was the lazes of a Gothic window, seen in an old cathedral and almost forgotten, and now, on a grander scale, the design of delicate drawn-work rec'd from my lady's chamber.

Leighton was there, a mantilla beside him. I could only half see the revealed oval of the face, but the figure was slight and pretty, for I caught its graceful outline later when they passed me.

Next evening, at a baile, Leighton presented me to Paachita. Together they were dancing—he and this pretty animal, with eyes for him alone, in the desert so rapid is love's kindling, so quick and full its flame, no charred or half-burned brands are here left on love's altar. All is consumed, and what survives must spring, phoenix-like, from hell or else descend from heaven.

After the danza ended, Leighton was standing in shirt-sleeves near Paachita, with the collar of his jersey open at the throat—a trick of his that made me suspect he had seen service in the navy. As he leaned over her, Paachita's eye caught sight of the locked chain, and he handed it to her; this time not indifferently, but with all the pride of prized conquest.

I was watching Paachita closely as she gazed fascinated by the portrait, and I saw her smile. Only as I read can I tell how well it expressed all that hopeless sense of loss which comes with the abandonment of things loved or desired. For an instant her eyes showed the rage a child sometimes feels for an inanimate object, when that object has hurt it. And I thought she would break!—pocket, then the woman conquered, and she smiled as she returned it.

"ELLA ES MUY HERMOSA, SEÑOR!" From that moment her abandonment toward Leighton was complete; her gaiety and grace became exquisite, while a look from him would lead her to "Oh, you Eastern dervish of hearts!" I exclaimed to myself, as Paachita left and he skipped to get a handful of *cascarones* and then returned, crushing the pretty tinsel spangles in his hair, over his face, and thrusting them into the lock of the lock, opened it, and handed it to her; this time not indifferently, but with all the pride of prized conquest.

I was watching Paachita closely as she gazed fascinated by the portrait, and I saw her smile. Only as I read can I tell how well it expressed all that hopeless sense of loss which comes with the abandonment of things loved or desired. For an instant her eyes showed the rage a child sometimes feels for an inanimate object, when that object has hurt it. And I thought she would break!—pocket, then the woman conquered, and she smiled as she returned it.

I noticed it, and he took it off, handing it to me with indifference. He had opened the lock, revealing the portrait, which was that of a French girl, one of those sweet English faces, whose charm is complexion and expression of confidence complete. The eyes arrested you—pathetic, soft-brown eyes, so tender they seemed to reproach, and, as you changed your point of view of the miniature, followed you with their full, warm light. I have seen such affectionate light only in the brown eyes of faithful dogs watching those they love.

Seeing my more than casual notice of the portrait, Leighton added: "It's an old story; not worth the telling; I don't know why I keep it."

He spoke with the same absent interest we were feeling over this work for the dead. It struck me as peculiar that in a romance accomplished there should be no trace of bitterness or remorse, only weary indifference. I was so quickly fascinated by the face that Leighton's manner annoyed me, and I did not ask him for the story. Possibly overheat makes men irritable, for somehow I resented this careless fellow wearing about him a face like that with less interest than he wore his spurs.

I stopped abruptly and thought of desertion, changing the conversation to this, the subject of my day's musings.

"Leighton, something's got to be done to relieve the pressure. I know the lieutenant would like to do it, he feels the pulse of this camp and he does? His orders to remain here are imperative, and he can't pass us across the line."

"Hunting leave," laughed Leighton. "Hunting leave, then, let's be, replied, 'with no questions asked, but what you will be, you young devil! To-morrow we'll be out a hunting pass for six.' Leighton was humming a catchy service ballad that had appeared in London music halls the year before, and did not reply.

Next morning I presented with the report four days' hunting pass for six men. The lieutenant dipped his pen in the ink and held it in contemplation for a moment above the place for signature, looking thoughtfully across the level plain. Then, with quick decision, "I wish, sergeant, that you and Leighton would take hunting pass, and let no complications arise." He signed the pass, adding our names to the text.

The following evening found us all in Correllitos. After a dinner, while smoking fragrant Vuelta Abajo of the "Zona Libre," I strolled through the narrow streets of this old Spanish town, watching the wealth of a western sunset, where the afterglow was fast fading. High above the mountain-tops lay great billows of russet flame, with crests like the mane of a wind-fanned prairie-fire. Lower in the mists spread the pure deep purple of southern twilight, while from the foothills came the soft evening breeze, after the heat of day. Even sounds fell on the ear so gently you thought that before reaching you they must have loitered

to bathe in the acequia and caught some of its murrain.

On the plaza I passed two groups of comrades, one seeking solace in brandy, the other, fortune in roulette—pleasant pastimes that might lead to "complications" while money lasted, and would bear little watching.

I walked on to the Jardin de Oro, a small public park where serenaders are inspired and listeners stroll or seat themselves on benches or on the grass. SCIENCE AND INDUSTRY.

The shark is the fastest swimmer of the fish tribe over long distances, and finds no difficulty in keeping up with the swiftest vessels, swimming and playing around them and over the lookout for morsels, small or large.

Land snails are distinguished by an extreme tenacity of life in every stage of growth. Dr. R. Stearns, in his report on the mollusk fauna collected during the voyage of the Albatross in 1877-80, tells of one snail living without food for at least six years, and being apparently no worse for the long fast.

It is generally supposed that when a man's heart pulsations go down to forty a minute death will follow unless restoratives are administered. Yet the pulsations of Thomas Lyons, of Benton Harbor, Mich., have sunk as low as eighteen a minute, although to all appearances he is well and strong.

If parents are tall the children tend to be tall, but the offspring of parents of unequal height more frequently follow the shorter. Excessive tallness is very rarely perpetuated; even if both the parents are above the average, the height of the offspring is usually only a third of the excess reached by the parents.

It is estimated that during the sixteen weeks' struggle in the coal industry of Great Britain, that the loss figured out the enormous total of \$100,000,000. Among other items of this prodigious and practically unnecessary waste, coal miners lost \$24,000,000 in wages, operators, \$12,000,000 in profits; iron workers, \$48,000,000; iron manufacturers, \$8,500,000; factory and workshop employees, \$15,500,000 and employees, \$7,500,000—Age of Steel.

Okahoma continues to comport herself as if she had been open to settlement a hundred years instead of only four. Her latest statistics show nearly 2,400,000 acres of farm land in use, with a cash value of more than \$13,000,000. Her farm implements are worth \$240,000, and she has growing 688,000 apple trees, 448,000 peach trees, 69,000 cherry trees, 51,000 pear trees, and a great variety of other fruit trees and vines. The whole territory is adapted to fruit-raising.—N. Y. Sun.

Dr. Koppen, of Hamburg, has communicated to the United States hydrographic office his method for calulating the waves about a ship in times of storm. He recommends the use of soap suds. G. W. Leutcheles, assistant United States hydrographer, says that it is the particles of air underneath the water which result in the formation of waves. He also recommends soap suds for preventing the growth of waves.

A process of plating aluminum has been devised by Prof. Xaxson, a German chemist, which shows very good results. The aluminum is first dipped in a solution of caustic potash or soda, or in muriatic acid, until bubbles of gas begin to appear, then into corrosive sublimate, then a second time into the caustic or acid, and finally into a solution of a salt of the desired metal. A film of the metal is rapidly formed, and adheres so firmly that, in the case of gold, silver or copper, the plate may be rolled out or polished.

The continent of Europe is passing through a cold period has been pointed out by M. Xaxson, a German astronomer. During the past six years the mean temperature of Paris has been about two degrees below the normal, and Great Britain, Belgium, Spain, Italy, Austria and Germany have also been growing cold. The change seems to have been in progress in France for a long time, the growth of the vine having been forced far southward since the thirteenth century; and a similar cooling has been observed as far away as Rio de Janeiro, where the annual temperature has been going down for some years past.

The deep sea thermometer, as invented about a hundred years ago by the United States navy, is a marvelously ingenious and effective contrivance. It is in effect a self-registering instrument, though not technically so named, that is automatically turned upside down when the machinery begins to draw it up from the depth at which the temperature is to be ascertained. The effect of the inverting process is to break the column of mercury, and a small portion of the column, exactly enough to measure the temperature at the moment of inversion. The tube is graduated so as to read from either end, and the quantity of mercury in the upper part of the tube is so small that it does not register a rise or fall of great and sudden changes of temperature. It thus happens that the reading, when the thermometer reaches the surface, is practically correct for the temperature at the point of inversion.

A Remarkable Body of Water. Reelfoot lake, in western Tennessee, is one of the most remarkable bodies of water in the United States. It is popularly supposed to have a subterranean source from the Mississippi river, it having no visible outlet or inlet, but the evidence seems to be decidedly against this theory. I tried to fathom it once, and while this can be done at some places, yet there is a considerable sea in the center where no rise and fall of the river, but has a tide corresponding with that of the sea. The oldest settlers can remember when the land where the lake is now was a fertile farm, and no light there was an earthquake, distinctly felt, but doing very little damage to the surrounding country. The next morning the land was gone and Reelfoot lake was there, and has been there ever since. It is one of the most noted fishing resorts in the south.—St. Louis Globe Democrat.

Extension. "I hear you're an extensive acquaintance in the dime museum."

"Well, I know the India rubber man."—Truth.

PUNGENT PARAGRAPHS.

"What caused your book-keeper's downfall?" "Lost his balance."—Hochester Democrat.

"The modern servant doesn't know her place." "She can't; she changes it too often."—Pack.

"Those who fall by the wayside do not get credit even for the mileage they earned."—Milwaukee Journal.

"That harbor of yours that you sent me isn't fit to shaven dog." "Well, it's queer that I didn't think of that when I sent you."—Inter Ocean.

"I hear Smith has got married to a southern lady." "Yes, he went south to save his lungs, and lost his heart."—The dentist can hardly lay claim to originality. He is all the time taking things out of other people's mouths.—Boston Transcript.

"Shakespeare spoke of the seven ages of man. This proves his discrimination. Woman has one and generally sticks to it."—Philadelphia Times.

"Why was their engagement broken off? Did they quarrel?" "No; that was the trouble. They were both so amiable that they got tired of each other."—Philadelphia Record.

"Mary—Do you believe it is possible for a girl to be so homely as to stop a clock?" "Jane—"I don't know. You can easily find out, however."—Boston Transcript.

"Would-be Purchaser—"How much for this picture?" "Artist—"The price is \$5,000." "Why, man, alive! you expect to be paid for your work as if you had been dead four or five hundred years!"—Joker.

"Doctor—"Has your daughter been delicate always?" "Mother—"Yes, if she does anything about the house it exhausts her so that she is not able to dance longer than midnight sometimes."—Inter Ocean.

"Jillson says that with all due respect for the old proverb, when the average servant gets through with a piece of valuable bric-a-brac it is generally too late to mend."—Buffalo Courier.

A gentleman once asked the celebrated Dr. Abernethy if he thought the moderate use of snuff would injure the brain. "No, sir," was Abernethy's reply, "for no man with a single ounce of brain would ever think of taking snuff."

"I want you to understand," said a belligerent man at a meeting, "that you can't be any czar here." "Well, then," said the other as he sulkily got into his overcoat, "I'll hunt up my stenographer. I'll be a dictator if I die for it."—Washington Star.

A man points out to his wife a wild-looking personage and says: "That man, my dear, has rendered excellent services to French poetry." "Why, because he writes so well?" "No; because he has stopped writing."—Pile-gende Blatter.

"Pat has offered his school-fellow a bite from his apple and is astonished at the large portion measured off by Mike's teeth." "Here, I say, hold on there, hold on!" Then, correcting himself: "When I say 'hold on' I mean let go!"—Boston Transcript.

"Customer—"Gimme 'bout half a dozen dynamite cartridges." Dealer—"What do you want with them?" Customer—"Want to blow up some stamps." Dealer—"O, you are a farmer, eh? I was afraid you might be a college student."—Indianapolis Journal.

In 1880 a sailing car was tried on the South Carolina railroad. The trial trip was made with fifteen gentlemen on board. When going at the rate of twelve miles an hour the mast went overboard with several of the crew, and the result was general discouragement.

"See here," said the citizen, as he put a sturdy hunter down on a copy of the paper, "dis here item says dat I got a contract workin' for de state." "Well," said the editor, "we understood that you had been awarded a carting contract." "So I has, and I want you to say so in de nex paper. Hev it come out, widout sayin' wot de contract was, about half my friends wot I tink I been sent to de pen."—Indianapolis Journal.

QUEER THINGS ABOUT THE CAT. Its Conduct at Times Contradictory and Mystifying.

There are contradictory elements in the character of the cat. No animal is more independent, and if we may speak freely concerning cats, "like Montaigne, no animal is more capricious in its choice of a home than a cat. Yet none is more remarkable for its power of finding its way back from great distances than a cat is if it pleases to do so. As Mr. Romanes says, the psychology of the cat unsubdued by civilization is that of Robinson Crusoe's existence in the woods.

A dog lost in a wood howls all night and disturbs a whole country. A cat, instead of using her "howling instinct," makes herself at home with rabbits, pheasants and small birds. Again, the cat is in domestic societies, her home in a house at some perhaps imagined insult and abandons herself to a life conducted entirely on apolautic principles. Every one knows that a perfectly comfortable, well fed cat will occasionally come to his house and settle there, deserting a family by whom it is loved, and to whom if it choose it could find its way back with ease.

This conduct is a mystery which may lead us to infer that cats form a great secret society and that he who was "King of Cats" was really grand master, an Aramis of cats. Doubtless they come and go in pursuance of some secret policy connected with the education of cats, or perhaps with witchcraft. Otherwise why should a creature which does not know the nuances of space leave one home for a strange residence?"

We have known a cat to desert a home for years; once in six months he would return and look about him with an air of some contempt. "Soch," he seemed to say, "were my humble beginnings." He went on no offense given and in about three years he came back for good, his mission elsewhere having probably been accomplished.—Saturday Review.

Another Tender Heart.

Clara—Going in for charity again, are you? What is it this time? Dora—We are going to distribute cheap copies of Beethoven's Symphonies among the poor. Music is such an aid to digestion, you know.—N. Y. Weekly.

The Difference. Pater—You are very forward, sir. In my day the young man waited until he was asked to call. Young Mart—Yes, and now he waits until he's asked not to call.—Judge.

Mr. J. H. Goss, Savannah, New York.

Scrofulous Bunches

Neck Lanced Without Relief

Hood's Sarsaparilla Purifies the Blood and Conquers.

"C. I. Hood & Co., Lowell, Mass.: 'Gentlemen: I had large scrofulous bunches on my neck for seven years. I treated with different physicians and tried many remedies but

Did Not Get Any Help for them. I went to Rome, N. Y., and had them opened, but this gave me only temporary relief. My physician then urged me to take Hood's Sarsaparilla, and before I had used one bottle the bunches began to grow better.

To-Day I Am O. K., and the trouble has not returned since I took Hood's Sarsaparilla, only the scars being left.

Hood's Sarsaparilla Cures

Upon my recommendation and the effects of Hood's Sarsaparilla in my case the druggist has sold a great deal of Hood

An Old Maid's Story.

Copyright, 1894, by Annie Hector.
S. M. Co. for you to-day.

asked Miss Talbot of her pretty niece, Maud, who was enjoying an afternoon cup of tea in the lowest chair she could find in her aunt's cozy little drawing-room.

She was the only daughter of Miss Talbot's favorite brother, and had been conscientiously spoiled by both father and aunt, whose considerable means enabled them to indulge most of her whims, on the plea that she inherited her dear mother's delicacy of constitution and must not be worried.

The child of these whims had been to engage herself at eighteen to a good-looking young barrister, who, like many of his fellows, had not yet had an opportunity of giving his eloquence to the world. He was not what would be called a good "parti," but he was a gentlemanly, pleasant fellow, genuine in love with Maud, who, under all her fanciful, spoiled childishness, had a warm loving heart, that had really given itself into Jim Burgoyne's keeping. Therefore, it was with no small surprise that Miss Talbot heard the answer to her question, spoken in an aggrieved tone.

"No! I told nurse to send the carriage for me at six. I hope that is not too late for you? Jim is otherwise engaged."

"Otherwise engaged!" echoed Miss Talbot, in amazement. "Why, Maudie, what do you mean?"

"Just what I say, Aunt Joan! Jim seems to find other things quite as amusing as looking after me, so naturally I don't trouble him more than I can help, and the speaker put down her cup, and clasping her hands round her knees looked resentfully at the fire.

"And pray what did this state of things begin?" asked Miss Talbot, resuming her interrupted knitting, a smile brightening her kind gray eyes.

"Oh, you need not laugh, Aunt Joan," answered Maud, solemnly. "It is very serious. I am excessively angry with Jim, and it will be some time before I can forgive him, and—oh, and he does not care a bit!"

"This with a little catch in her voice that made her aunt look at her sharply, and find that the eyes staring at the fire were full of tears. The still handsome, stately woman rose, and drawing a chair beside her niece, put her hand upon her shoulder saying:

"Child! what foolish tiff is this? What has Jim done to offend you?"

Maud hesitated a moment, then her indignation found vent.

"I will just tell you the whole thing," she cried, "and you will see if you think he has behaved well. It all began at that ball we went to last Monday week. I had promised him some of the first waltzes and refused other partners, and he never came till more than an hour after we got there. Then, instead of apologizing, he merely said he was unexpectedly detained by a friend whom he had not seen for some time, and hoped I would give him other dances to make up. I said I could not, and told him I was not pleased, and he calmly went and amused himself as if nothing had happened, and danced three times with Mary Lovell! I would not go to supper with him, and made father come home early. Jim came down to the door with us, and asked me to look kindly at him before I said good night, but I was much too angry, and never looked at him at all. The next morning he came, and actually laughed at my reproaches when I was quite inclined to make friends with him, and did not see why I complained. The result was that I got angry again, told him that if he did not care for keeping his appointments with me he had better not make any, and would not listen to any excuses on his part, but left him and went upstairs. I had a note from him in the evening, asking me to see before he went off the next day, but I thought it would be a very good lesson for him to wait till he came back, and I wrote and said that I was engaged, and that with a little sigh—"

"—was nearly a week ago."

"Where was he going?" asked Miss Talbot.

"He had been engaged to some friends for shooting a long time ago. He will be away a fortnight." There was rather a melancholy tone in Maud's voice, in spite of her just indignation.

"And so, for a senseless bit of pride, you let this man, whom you know very well loves you with all his heart, go off without as much as a kind word! Child, child, you are playing with edged tools; take care lest you wound yourself; it is dangerous work!" Miss Talbot's voice had a sad ring in it that made her niece look at her in surprise, but she went on without noticing her, gazing at the glowing coals as if reading her words there.

"Your silly little tale brings back to me a time that is long past and gone; a time when the blood ran fast in my veins, and my face was fair and smooth like yours, though I suppose you think I must always have been forty years old. Did no one ever tell you Aunt Joan's story? Did you ever wonder why she never married? Ah, well! I daresay not!"

She paused, and Maud, a little awestruck by this strange news Aunt Joan so unexpectedly reverted to her, drew her low chair close, and put her hand upon her knee. Miss Talbot took it lovingly in hers, and went on in the same slow, sad, remembering sort of voice.

"It all happened when I was nineteen, just twenty years ago! Your grandfather had a place then, a little way out of Plymouth, near the sea."

had become engaged in the spring to Bryan Carteret. It is many a year since his name has passed my lips, or I yet see his name as plainly now as that first time we met. It was at the regimental ball at Plymouth. How bright and brave he looked in his scarlet and gold, with his sunny eyes and sweet smile! My heart beats faster now when I think of that night. We were in the garden, the moonlight, and in June he came to stay a few weeks. We have no summers now like that! The days passed like a dream of joy and sunshine by the sparkling sea that I loved so well, and that was to bring my life's happiness to an end.

"The night before Bryan left us we were all going to a ball at a neighboring country house. The next day he was to join some friends who were on a yachting cruise round the south coast, and who were to put into Plymouth to pick him up. I was in a teasing, flighty mood, delighted to see Bryan, and made him jealous, and pretend I did not mind the prospect of losing him for some time. How trivial it all seems now, looking back! At this ball we met a certain Mr. Hargrave, a man who had paid me a considerable amount of attention, and who was Bryan's special aversion. Some evil spirit prompted me to flirt with him and to dance with him oftener than was necessary. So often, that Bryan, who was the least exacting of lovers, spoke to me about it towards the end of the evening, and asked me not to dance with him again, as I was making myself a little conspicuous. I remember his little words! We were in the conservatory.

"It is not that I mind for myself, sweetheart, though I would rather you would give me more of your own self than I do now. I shall spend together, but I don't like people to be able to make any remarks about you. You can quite well stay here with me a bit and say you forgot his other dance. Such things are allowed in your case."

"There was such a loving smile in his blue eyes as he bent over me, and I, for the first time, said no, that I was not in the habit of pretending to forget an engagement, that I really could not allow him to be overbearing already, and that I would be glad if he would take me back to my place. Then his dear face grew very grave and he said: 'Are you serious, Joan? Don't think I am pushing you play a little too far? Surely you might be satisfied with having shown the world that you can be quite happy with others besides myself, without giving me the pain of this refusal of my first request—the first I have ever made to you! We shall have no other time together, either. Have you forgotten that I shall leave too early to see you to-morrow? The next will be the last dance? Give it to me!'

"For a moment I wavered and nearly gave in, as in my heart of hearts I longed to do, and then I remembered Mr. Hargrave's words as he asked for this last dance. 'May I have the last? That is if you are allowed' and my own scornful answer: 'I have no one's leave to ask,' and my consent carried the day and I refused. Bryan said no more, but he was too proud, and he came back to my seat, and he did not pass between us, but he did not seek to detain me a moment in the hall when he reached home, for a last good night, as he so often did, but bade me farewell with the rest, saying: 'Good night, and good-bye. I shall be gone to-morrow before you are down.'"

"This was more than I had intended. I thought he would have tried to make friends before he went, but my pride would not let me make any advances.

"During the sixteenth century the ladies wore at their girdles bunches of keys, a rosary or two, a bag which held a smelling-bottle, a powder-box, a looking-glass, a purse, a knife, a box of needles, some thread, and occasionally a silver-mounted dagger. These articles rattled loudly when they walked, and the social position of a lady could be judged from the noise she made while promenade."

"One of the latest fads for rich women is to have a cast made of the hand, the ear, the nose, or the foot, as the case may be of course each selecting the particular feature which will best repay immortalizing. The hand is the member which receives the most of attention. A beautiful pair of white plaster hands, a powder-box, a looking-glass, a purse, a knife, a box of needles, some thread, and occasionally a silver-mounted dagger. These articles rattled loudly when they walked, and the social position of a lady could be judged from the noise she made while promenade."

"I had looked back at the turn of the staircase, but he had gone down the hall with my father, and his back was turned to me. The next day he said good night to me, and I said good night to him, and I was much too angry, and never looked at him at all. The next morning he came, and actually laughed at my reproaches when I was quite inclined to make friends with him, and did not see why I complained. The result was that I got angry again, told him that if he did not care for keeping his appointments with me he had better not make any, and would not listen to any excuses on his part, but left him and went upstairs. I had a note from him in the evening, asking me to see before he went off the next day, but I thought it would be a very good lesson for him to wait till he came back, and I wrote and said that I was engaged, and that with a little sigh—"

"—was nearly a week ago."

"Where was he going?" asked Miss Talbot.

"He had been engaged to some friends for shooting a long time ago. He will be away a fortnight." There was rather a melancholy tone in Maud's voice, in spite of her just indignation.

MISCELLANEOUS.

—Keturah, a Hebrew name, means Incessant.

—Cassara, the Latin name, means Hairy Man.

—Cassandra is from the Greek and means a Reformer of Men.

—When we advance a little into life, we find that the tongue of man creates nearly all the mischief in the world.—Paxton Hood.

—Titles are valuable; they make me acquainted with many persons who otherwise would be lost among the rubbish.—L. W. Shaw.

—He (audaciously)—"Suppose I were to kiss you unaware?" She (coolly)—"I don't believe you could."—Brownings & King's Monthly.

—Is Hicks's wife a nice housekeeper? Mr. Hicks—"Well, I should say so. Why, half the time Hicks can't find anything that belongs to him."—Inter Ocean.

—And your wife aimed at and struck your head with the egg? "Yes, sir." "Well, then, all I have to say is that you should be very proud of her."—Inter Ocean.

—The fastest time recorded was by the Empire State express on the New York Central and Hudson River railroad, May 11, 1893, one mile being made in 32 seconds, equal to 112 miles an hour.

—Miss—"You must really break off that dreadful habit, Babet, of always wanting to have the last word." Babet—"But how am I to know, ma'am, that you have nothing more to say?"—Figaro.

—Brazil began railroad building in 1851 and has 5,780 miles. One of its lines, the Pedro Segundo, is 520 miles long through a very difficult country. On this line there are sixteen long tunnels. It cost \$50,000,000.

—If you'll be a good boy, Jimmie, maybe some day you will be superintendent of a Sunday-school, like good Mr. Hanks. "Will I, teacher? O, then I will be good; and won't I learn the delectable out of the boys that don't behave!"—Harper's Bazar.

—It is not generally known that when a person falls into the water a common felt hat may be made use of as a life preserver, and by placing the hat upon the water rim down, with the arm around it pressing it slightly to the breast, it will bear a man up for some time.

—Dr. Augustus Berggren, of Newton County, Ga., sold a mule the other day and received payment in paper money issued by a wild-cat bank at Brunswick during the war. The doctor was in such a hurry to close the trade that he looked at the figures on the bills.

—Australia has at length abandoned its refusal to recognize the American citizenship of former subjects of the emperor who had immigrated to the United States without fulfilling their military duties. Hitherto the imperial authorities have chosen to regard them as outlaws and deserters and punished them as such.

—Wigs were common both in ancient Greece, France and Italy. Yellow hair was procured in great quantities from Germany and Scandinavia, and with its coils the raven-haired beauties of South Europe concealed their own locks. The blondes, whom Catullus, Propertius and Tibullus raved were bewigged and not natural.

—Candied flowers of several sorts are among the most expensive delicacies of the modern confectioner, but the old fashion of using the candied petals of the orange blossom in tea seems to be almost forgotten. If a few of the candied petals be put into the tea before it is steeped they give it a flavor noticeably peculiar, but once esteemed very fine.

—During the sixteenth century the ladies wore at their girdles bunches of keys, a rosary or two, a bag which held a smelling-bottle, a powder-box, a looking-glass, a purse, a knife, a box of needles, some thread, and occasionally a silver-mounted dagger. These articles rattled loudly when they walked, and the social position of a lady could be judged from the noise she made while promenade."

A VISIT TO UTAH.

An Instance of the Preponderance of Smiths in That Territory.

That I know about a magnificent territory and its vastly interesting population is due solely to accident. I had become ashamed of sailing east year after year, and made up my mind to hitch my wagon to the star of empire and learn something of my own great country.

I knew there was a territory called Utah, where Mormons indulged in the domestic eccentricity of polygyny, and that was all. I might visit Salt Lake City. All would depend upon circumstances. All did. It chanced that in the middle of October I found myself in a mining town.

No path and no horse, the mountains on horseback, and snow blocked the way. I sat disconsolately in one of those hostilities that reconcile you to instant death. It was gotten up on the noble principle of violating every longing of the human soul.

TEMPERANCE NOTES.

THE RUM POWER.

The Force that is Back of the Terrible Drink Traffic.

A reader puts to us this question: "What do you mean by the 'rum power' in your noted war-ery, 'Pulverize the rum power'?"

Probably there are other readers who do not realize that the phrase, the rum power, includes all men who make money out of the liquor traffic, in any capacity. It does not mean simply saloon-keepers, but a large number of men, more than their aggregate numbers. Let us illustrate by using the figures as to the number of saloons and saloonkeepers in the state of New York, and the other persons who form, together with those, that class which is collectively denominated the rum power.

There are 7,500 licensed liquor saloons in New York city, 3,000 in Brooklyn, 2,200 in Buffalo, 950 in Albany, 550 in Rochester, and 700 in Troy, a total of 13,400 in the six largest cities of the Empire state. There are 4,500 licensed saloons in the other 45 cities of the state, and 8,000 in the unincorporated townships, a total of 28,000. Figuring at two, the average number of bar-keepers to a saloon, the result is 56,000 from my keyhole, a vast number. To this total must be added the following:

There are 630 breweries in New York state, and the number of men employed in each, workmen, superintendents, book-keepers, collectors, cashiers, drivers, hostlers, chemists, cooperers and engineers averages about eighty men, making a total of more than 50,000. There are 450 distilleries in the state, having an average working force in all departments of about thirty men in office and factory, making a total of about 13,500 men engaged in the wholesale branch of the liquor business.

Then there are the dealers in saloonkeepers' fixtures, their clerks, drummers and workmen; there are those who make a business of providing the free lunches; there are the bottlers, a large class, the manufacturers of and dealers in glassware, saloon mirrors, beer pumps, and corkscrews, and the makers of advertising signs and ornaments. This about includes the domestic beer and liquor interests of the state and those interested and affiliated with it. There is to be added the foreign import trade in wines, champagnes, ales, spirits, liquors and brandies, and the agents, clerks and salesmen engaged in it. With these additions the total number of men in the wine, liquor and beer trades in New York state, or directly connected with them, does not fall anything short of 200,000.

The liquor business is peculiar in this—that, from its nature, women and minors are excluded. It is conducted almost exclusively by men. Hence 200,000 are practically all voters; and this is one of the reasons for the potentiality of the rum power in politics. Not only does every man engaged in it have a vote, but probably the largest number of them are voters. This means, its political influence is far greater than the casual observer would be inclined to suppose.

What is the cohesive force which holds this army of voters together? Simply the money that is made in the liquor traffic. This is hardly any great occupation which affords so great a margin of profit. The greed of gain holds these men in their occupation and nerves them to resist any and all legislation that would curtail their sales, or otherwise diminish their profits. The temperance element of the country is not animated, of course, by this most potent of all factors of human activity, the desire for gain. They must depend upon argument and moral influence in the effort to pulverize the rum power.—Tolstoi Herald.

A MODERN DANIEL.

The Right Kind of Man to Keep a City in Order.

"Tea or coffee?" It was a cold winter morning at a railway station. "Neither, please; a glass of water." He sat opposite us at the breakfast table and we noted in passing, Peep Goldstar, and then we knew that he was a chief of police. We sat thinking about that glass of cold water and the frost upon the window panes, and so after our return to the train took occasion to scrape an acquaintance. There is one pleasant thing about American travel, a man never need be lonesome. There is a free-masonry about our citizenship that brooks no artificial dignity. No American, unless he has been a long time on the wrong side of the Atlantic, resents a courteous self-introduction.

"Yes," he said in answer to our inquiry, "I have been a chief of police for a number of years. But I do not think that whisky or beer helps a man keep himself or his city in order. There is not a man on my force that drinks, and as for myself I do not know the taste of liquor or tobacco. I have never played a game of cards in my life, and just now I haven't time to learn. There is not a gambling room open in our city, or half-open. I closed the last attempt to run on the six' last week. I am responsible for the good order of the community and I think my first duty is to govern myself. For years and years I have been saying 'No' to temptations to 'have something,' and now it is a matter of habit. I do not often meet a man as sound physically as I am, and there are not a great many of my size and weight that care to take hold of me. Once in awhile I take a glass of milk, if out in the country, but I have drunk water all my life so far and I think I will keep on."

We looked him all over a second time, and if there is any artist looking for a model of the young man that "appeared fairer and fatter in flesh than all the children that did eat the portion of the king's meat," we will tell him where to find a figure for his study.—Chicago Interloc.

THE SOCIAL GLASS.

How Many Young People First Contract the Drink Habit.

The great majority of those who are enslaved by strong drink did not begin their career of self-destruction in the dram-shops. While the lower class of drunkards are victims of saloons, the more respectable class began with the social glass. It was at the social party, or in the billiard room, or the club, or at the wedding, that the fatal habit was formed. Not many begin to drink alone, or from sheer appetite for stimulants. The glass was offered to them by somebody, and from want of moral courage, or from a desire to appear "gentlemanly," they consent to drink.

I was once at a wedding in a "genteel" circle of society where the popping of champagne-corks was like a rattle of musketry. Within a few years I met the eldest son in that family a confirmed drunkard. His parents had tempted other people's sons and had ruined their own. The man who sets a deceiver on his table sets a trap for his boys, and may land them in perdition. The young lady who offers any intoxicant to her young gentleman friends deserves to become that wretched object, a drunkard's wife.

The drinking usages are sadly on the increase in this country—in social life, at restaurants, at clubs and even in the fashionable shopping resorts for ladies! While the chief discussion is about prohibiting saloons, Satan is stealing a march on us by tempting young men to be tipplers. The only safe-guard for any young man—even though he be a professing Christian—is entire abstinence. He never knows what latent appetite he may have within until the spark touches the gun-powder. A young man of my acquaintance (a church member) found, before he was aware, that he was becoming a slave to the bottle. He said to me: "My young associates invite me to drink with them and are ruining me. After this when they ask me to drink I shall knock them down!" He was terribly in earnest; and no wonder; he had been playing with vipers at the mouth of hell!

For two reasons every conscientious young man ought to pledge himself to total abstinence. First, for his own sake, for he doesn't know how soon he may become a tippler. Secondly, for the sake of others whom he may tempt to ruin by his example. The reform of inebriates is difficult and rare. The one time to stop drinking treacherous intoxicants is to stop before you begin.

—Rev. Theo. L. Cuyler, D. D., in Young Men's Era.

BITS AND BRIEVITIES.

WINE is mentioned as selling at a penny a quart in France in consequence of the unusually large vintage. THERE is scarcely a crime before me that is not, directly or indirectly, caused by strong drink.—Judge Coleridge.

MATERIALS that would feed three million people are annually consumed in Great Britain in the production of alcoholic and malt liquors. ARCHDEACON FAIRBairn points out the fact that there are twenty thousand prisoners in England, who so far from suffering from total abstinence, improve in health during their incarceration.

STRONG drink—by whatever name the demon is styled, in whatever way it presents itself—this prevents our success. Remove this one obstacle, and our course will be onward and our labors will be blessed.—John Bright.

There is Archbishop John Ireland's arraignment of the drink evil: "The great cause of social crime is drink. The great cause of poverty is drink. When I hear of a family broken up and ask the cause—drink. If I go to the gallows and ask its victim the cause, the answer—drink. Then I ask myself, in perfect wonderment, why do not men put a stop to this thing?"

A CAREFUL study of a large number of cases of inebriates will always show a larger number of physical anomalies and signs of degeneration than in others who do not suffer from the drinker's ailment. Also a feebler and more unstable mental organism. Often a lower grade of mental development that may be retarded growth by congenital defects or disease.

SPEAKING of what would occur could the money that is wasted for drink be devoted to legitimate purposes, the Boston Daily Traveller says: "New buildings would be built, almost as by magic, and would be furnished with comforts heretofore unknown to people of moderate means. Thousands upon thousands of families would expend upon comfortable clothing four-fifths what they now do, and other thousands upon thousands would thereby in turn, have their own earnings increased."

THE Journal for Hygiene publishes a suggestive article entitled "The Greater Temperance," by Chas. H. Shepard, M. D., in which he says: "Judging from past experience, there seems but little hope for the adult inebriate, but we may at least save some of the younger generation." He adds: "When children shall have been taught the principles of this subject there will be a regenerated mankind." Dr. Shepard thus indicates what should impress more fully the friends of temperance everywhere, the fundamental importance of juvenile temperance work.

A DISTINGUISHED French physician has investigated the effect of smoking on thirty-eight between the ages of nine and fifteen who were addicted to the habit. Twenty-seven presented distinct symptoms of nicotine poisoning. In twenty-two there were serious disorders of the circulation, indigestion, dulness of intellect and a marked propensity for strong drink. In three there was a heart affection; in eight decided deterioration of the blood; in twelve there was frequent bleeding of the nose; ten had disturbed sleep and four had ulceration of the mouth.

THE REPUBLICAN.

VOLUME 18.

OAKLAND, MD., THURSDAY, APRIL 3, 1894

NUMBER 4.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

A fine crayon portrait free for thirty days. Loar & Co.

"Babies a success" at photo gallery. See ad. Loar & Co.

Seeds by ounce, pound, pint and peck at H. E. Felt's Grocery.

Bring the babies and children to photo gallery. See ad. Loar & Co.

If you have new ground to break up try one of A. D. Naylor's heavy iron plows. 2-3t

Mr. Henry Myers, of near Oakland, has been granted a re-issue of pension.

FOR SALE OR RENT.—An eight-room house in Oakland. Apply at this office.

Mr. George W. Moore has moved into Captain Hayden's house on Liberty street.

A. D. Naylor has a fine line of buggies on hand. Price and terms to suit buyer. 2-2t

Mr. Elias Smith, of near Oakland, has been granted a renewal and increase of pension.

For thirty days we will give a fine life-size crayon portrait with each dozen cabinets. Loar & Co.

Master Max Jarboe entertained a number of his little friends at his home on last Friday evening.

Miss Marie Cunningham, of Lonaconing, has opened a millinery store on Oak street near the bridge.

Those desiring fine photographs should call at once for we will remain here only a few weeks. Loar & Co.

The Goldsborough house on Oak street has been improved very much by being weatherboarded and painted.

Mr. Wm. H. Hagans was rendered unfit for duty at the Clerk's office this week by an attack of the rheumatism.

Big auction at Friendsville, Thursday, Friday and Saturday of this week. Next will be Accident. See hand bills.

Miss Kate C. Spedden opened a select school at Terra Alta on last Monday with an enrollment of twenty-two scholars.

To-night is the regular business meeting of Lily Division No. 9, U. R. K. of P. All members are requested to be present.

Mr. Charles Bolden is erecting a building on the town lot for the accommodation of the fire engine and hook and ladder truck.

Corporation election on Monday, April 16th, at which time a Mayor and three Councilmen to serve for a term of two years are to be elected.

Send your orders for job printing to this office where it will be executed in the best manner and at prices consistent with first-class work.

Rev. Dr. Coombs, of Washington, D. C., will preach in St. Mark's Lutheran church, Oakland, both Sunday morning and evening at the usual hours.

For sale cheap—A Columbia Safety Bicycle in first class condition except tires, which are slightly worn. Apply to Samuel Lawton, Oakland, Md. 4-3t

Trout fishing season commenced the first of this month. So far not many of the "speckled beauties" have been caught by the disciples of Isaac Walton.

Owing to the ill health of Mr. C. C. Michael he has decided to retire from business and is selling his stock of goods, fixtures, etc., at public auction.

Dr. Mahlon C. Hinebaugh has rented one of Mr. B. Reynolds' houses on Oak street in which he and his wife will go to housekeeping the first of May.

The frame of Mr. D. M. Dixon's new house on Main street adjoining THE REPUBLICAN building, has been raised, and the structure will be pushed to completion as fast as possible.

FOR DYSPEPSIA.

Indigestion and stomach disorders, flatulence, heartburn, etc., cured by Dr. J. P. Pierson's Food and Fruit Syrup.

All druggists keep it, or per post. Genuine Food and Fruit Syrup, with colored red wax on wrapper.

Attention, Republicans!

The Republican voters of the town of Oakland are respectfully requested to assemble in mass convention at the Council Chamber on Saturday evening, April 7th, 1894, at 7:30 o'clock for the purpose of nominating one candidate for Mayor of said town to serve for the term of two years and three candidates for Town Council to serve for the term of two years each.

All Republicans are earnestly requested to attend this meeting.

REPUBLICAN COMMITTEE.

A citizens meeting will be held at the Council Chamber in Oakland on next Monday evening at 7 o'clock for the purpose of nominating one person to act as Mayor of Oakland for two years, and three persons to act as Councilmen for two years, to be voted for at the municipal election to be held on Monday, April 16th, 1894.

All citizens, regardless of party affiliations, are requested to attend this meeting.

COMMITTEE.

Mr. G. W. Clary, the Railroad street barber, has secured the services of Mr. P. H. Rock, of Chicago, who comes well recommended as a first-class barber. His work speaks for itself.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-1v

It was reported in Oakland Sunday evening that the residence of Mr. Thomas McRobie near Swan town had been robbed, but up to the time this paper goes to press the report has not been corroborated.

The ladies of the Lutheran Sunday school will give an oyster supper on to-morrow and Saturday evenings at Offutt's Hall. The proceeds of the supper will be used to purchase an organ for the Sunday school room.

Craddock & Co., a newly organized firm, have purchased the soap manufacturing plant of Hubbard & Mosser, Main's Choice, Pa., and will move it to Cumberland. The factory will be located in a new building on Elm street.

The dwelling house of Mr. C. M. Miller at Swanton was robbed of \$65 on last Sunday in the absence of Mr. Miller and his family, who were attending religious services only a short distance from his residence. No arrests have as yet been made.

A council of the Jr. O. U. A. M. will be instituted on Thursday night, April 12, at Swanton. The govt will have quite a task to perform as there are forty on the charter. The Bloomington govt will do the work very nicely. All members are invited.

I recommend Chamberlain's Pain Balm for rheumatism, lame back, sprains and swelling. There is no better liniment made. I have sold over 100 bottles of it this year and all were pleased who used it. J. P. Pierson, druggist, South Chicago, Ill. It is for sale by Oakland Druggists.

Drs. Henry W. McComas and Mahlon C. Hinebaugh have purchased the drug store, fixtures and good will of Mr. Henry J. Mayers on Main street. The store will be in charge of the popular drug clerk Mr. Joseph E. Harned, who always welcomes those who call with a smile.

Joe Galloway, colored, was sent to jail Monday by Justice Hoyer, of Deer Park, on the charge of raping a white woman. It is alleged that the crime was committed last September. The grand jury will investigate the charge at the September term of Circuit Court.

The Rev. Dr. Henry Carrington Alexander will preach in the stone church in Oakland on Sunday morning at 11 o'clock and Sunday night at 7:30 o'clock. The biblical character to be taken up Sunday evening by the pastor in his lecture will be "Gideon." This series of lectures on characters from the Bible have been very interesting and large congregations have been in attendance.

HERE AND ELSEWHERE.

Movements of Prominent Persons Known to the Readers of "The Republican."

Subscribers or readers having friends visiting them or acquaintances visiting other places will please make note of the fact and send to THE REPUBLICAN for publication. (Notok.)

Col. J. E. Wood and family, of Baltimore, are here for the summer.

Rev. Jefferson R. Taylor preached at Swanton on last Sunday.

Mr. and Mrs. William H. Hagans were at Lonaconing yesterday.

Mr. Charles M. Miller, of Swanton, was here on Monday morning.

Mr. Thomas Goeke, of Cumberland, was here on business yesterday.

Miss Alice Kepner has returned from her visit to relatives in Davis.

Mr. John Shurtzer went to Philippi, W. Va., Tuesday morning on business.

Mr. A. L. Spiker, of McHenry, was in the city yesterday and called to see us.

Mr. R. E. Ferguson, of Johnston, Iowa, has gone to Port Dodge, Iowa, to reside.

Squire E. F. Froese, of Deer Park, was among our callers on last Thursday.

Miss Mamie Weber returned from her visit to friends in Cumberland Monday evening.

Mr. Harry Lorr, of Grafton, has been in the city several days visiting his parents.

Mr. Charles E. Hiltner, of District No. 8, was in the city a few hours Tuesday evening.

Mr. Will Newman started for Baltimore this morning to lay in a stock of summer goods.

Mr. David M. Beeghly, of Valley Point, W. Va., was in the city Monday on business.

Mr. William E. Wass, of Mineral Springs, was in the city last night and this morning for a few hours.

Mr. J. W. Dorsey, of this office spent Saturday and Sunday with his parents at Kingwood, West Va.

Mr. Washington Eike, of near Brookside, was in the city Tuesday and made this office a pleasant call.

Mrs. Dr. M. C. Hinebaugh went to Baltimore this morning to spend a week or ten days with her parents.

Mr. Henry Weber was at Cumberland, Lonaconing and other points in Allegany county the first part of this week.

Dr. Speicher and wife were visited by Mrs. Speicher's father, from Accident, Md., over Sunday.—Salisbury Star.

Miss Tower, of Oakland, Md., was the guest of Hon. Joseph Moreland's family here last week.—Morgantown Post.

Mr. Abraham Lawton, who is employed in the woolen mills at Keyser, was in Oakland Sunday as the guest of relatives.

Mr. and Mrs. A. L. Trenton and children, of Keyser, spent Sunday in Oakland as the guests of Mr. and Mrs. Samuel Lawton.

Mrs. Charles Wegman expects to leave Oakland on Saturday to visit her parents for a week or two at Firm Rock, this county.

F. K. O'Kelly and Joe McDerrott are enjoying fishing for trout with uncle Gus Delawder, near Oakland.—Morgantown Post.

Mrs. Edward H. Sincell and two children will depart to-night for Annapolis in which city they will visit relatives for a few days.

Mr. J. S. Gnegy, of Dobbin, departed from Oakland on Monday morning for Reliance, Va., where he will attend school this summer.

Mr. M. C. Fazenbaker, of Westport, Md., representing the New York Life Insurance Company, was in Oakland Tuesday working up insurance among our people.

Mrs. Daniel Chisholm has arrived in this city from Port Orange, Florida. She will remain here, making her home with her father, Mr. Jacob Brown. The remains of her husband will be brought to this city for re-interment next winter.—Cumberland Times.

Sheriff Wegman and Clerk to the Commissioners J. S. Myers took six prisoners, sentenced by Judge Boyd, to Baltimore on Friday morning. The sheriff and Mr. Myers returned to Oakland Saturday.

We acknowledge pleasant calls from Mr. M. V. Richards, land and immigration agent of the B. & O. R. R., and Mr. William E. Walton, of Baltimore. Mr. Richards was here in the interests of his department.

A little flurry of excitement was occasioned in Oakland Saturday morning by the alarm of fire caused by a spark falling on the roof of Mr. M. Dixon's house at the Republican building and igniting it. Fortunately it was discovered in its incipient and extinguished before the arrival of the chemical engine.

We neglected to mention last week the death of Mr. Thomas Wilburn, of Thayersville, which occurred on Sunday, March 27th. The deceased was about seventy-four years of age and was a brother of Mrs. C. Kinnel, of Oakland. The remains were interred at Thayersville on the Tuesday following his death.

Fishers in Garrett are anticipating good times when E. T. Brown has succeeded in stocking Deep Creek with the best fish of improved fish. It is said the ex-Mine Inspector is determined to fill the waters of Garrett with the most aristocratic family of fish society. He believes in blood.—Frostburg Journal.

On Monday night before adjournment the Maryland Senate confirmed the following appointments for this county made by the Governor: Orval A. Welch, salary public at Solbysport, Garrett county; vice James Gard, resigned; Ralph Beckman, judge of the Orphans' Court, Garrett county; vice H. Kamp, deceased.

It has been authentically stated that an immense vein of coal has just been discovered four miles directly west of Frostburg within the range of the great coal belt. The discovery was accidental, made by some workmen on Johnson Bros' farm. It is said the vein is a 14-foot one, and is the largest in this region.—Lonaconing Review.

On Friday, March 22, Roswell Horr, the only son of Joseph and Emma Conaway, died at their home near Wilson. He was a bright little fellow of two years three months and twenty days, and will be sadly missed by his parents and two little sisters who remain to mourn his loss. The bereaved family have the deep sympathy of their many friends in their affliction.

It will be an agreeable surprise to persons subject to attacks of bilious colic to learn that prompt relief may be had by taking Chamberlain's Colic, Cholera and Diarrhoea Remedy. In many instances the attack may be prevented by taking this remedy as soon as the first symptoms of the disease appears. 25 and 50 cent bottles for sale by Oakland Druggists.

The Hon. E. G. Rathbone, who has been spending the summer in Oakland for a number of years, was on Saturday nominated for Congress from Major McKinley's district in Ohio. Major Rathbone was Fourth Assistant Postmaster General under Mr. Harrison's administration. The gentleman has hosts of friends in Oakland who will be pleased to learn of his nomination. His election is assured.

The new chemical engine was given a trial on Saturday of last week and was eminently satisfactory. A wall of boards was built and saturated with pitch tar and coal oil and then fired. In less than a minute after the engine was "turned loose" on the flames the fire was extinguished. The hook and ladder truck is a beauty and something that has been needed in Oakland for years.

Quite a large crowd of ladies and gentlemen from Oakland went to Terra Alta Tuesday to witness the performance of the Oakland Minstrels which was given there on that evening for the benefit of the Terra Alta fund. The minstrels were greeted with a good house and excelled themselves in the rendition of the plays, farces, etc. The party remained in Terra Alta over night and returned to Oakland yesterday morning.

Our better halves say they could not keep house without Chamberlain's Cough Remedy. It is used in more than half the homes in Leeds, Sims Bros., Leeds, Iowa. This shows the esteem in which that remedy is held where it has been sold for years and is well known. Mothers have learned that there is nothing so good for colds, croup and whooping cough, that it cures these ailments quickly and permanently, and that it is pleasant and safe for the children to take. 25 and 50 cent bottles for sale by Oakland druggists.

James and William Page, two colored tramps who claim Virginia as their abiding place, were before this Honor Squire King Monday charged with maliciously destroying a fence around the slaughtering house property in the east end of town. They were sent to jail to await the action of the grand jury at the September term of Circuit Court.

Since the foregoing was put in type the two prisoners were discharged and they went on their way rejoicing.

At 9:30 last Friday morning Mr. Edward Warnick, driving a two-mile team attached to a wagon, all the property of Mr. Geo. T. Patterson, of Bloomington, stopped his team at the railroad crossing in the town of Bloomington, when an east-bound freight under conductor O'Brien came along, and as the engineer blew the signal for the crossing the team became unmanageable and pulled the wagon on the track which was struck by the locomotive and made a total wreck of. Fortunately the driver and the mules escaped without any injury at all. In the meantime the freight train was stopped, a flagman sent back, but a helper came along and gave the caboose a rather bad knock. It was on a heavy grade and no blame could be attached to any one.

Farmers look to your interest and get reliable fertilizers and such as will suit your crops. We will give you our experience of over a quarter of a century. Just received two car loads of Pure Animal Bone and Phosphate, guaranteed not a particle spurious matter in our Animal Bone fertilizer. Best for seeding down in meadow and phosphates are best for corn, oats, buckwheat, etc. Also a special fertilizer for potatoes. We are agents for good reliable companies. Will sell at lowest cash price or will take your notes for six months. Cabbage, tomato and celery plants in season. Also all kinds of flowering plants and cut flowers on hand and furnished at short notice. H. Weber (Ksons, Box 57, Oakland, Md. 1-2m)

Those who never read the advertisements in their newspapers more than they presume. Jonathan Kemson, of Bolan, Worth Co., Iowa, who had been troubled with rheumatism in his back, arms and shoulders read an item in this paper about how a prominent German citizen of Fort Madison had been cured. He procured the same medicine and to use his own words: "It cured me right up." He also says: "A neighbor and his wife were both sick in bed with rheumatism. Their boy was over to my house and said they were so bad he had to do the cooking. I told him of Chamberlain's Pain Balm and how it cured me, he got a bottle and it cured them up in a week. 50 cent bottles for sale by Oakland Druggists.

Agricultural Note.

A lady residing in Oakland, who was recently married, remarked the other day that when she had her garden made she intended having the corn planted three weeks apart. A young gentleman who overheard the remark has been trying ever since to ascertain how much space would necessarily intervene between the hills of corn.

Cure for Headache.

As a remedy for all forms of Headache Electric Bitters has proved to be the very best. It effects a permanent cure and the most dreaded habitual sick headaches yield to its influence. We urge all who are afflicted to procure a bottle, and give this remedy a fair trial. In cases of habitual constipation Electric Bitters cures by giving the needed tonic to the bowels, and few cases long resist the use of this medicine. Try it once. Large bottles only 30 cents at all Drug Stores.

Notice.

I have now received a full line of new, fresh garden seeds, onion sets, etc.; also timothy and clover seed. Don't fail to call at headquarters and save money. H. E. Felt's Grocery. 1-4t

Colored Society.

Mr. Daniel Holt and family, of Westernport, have moved to Oakland, where he expects to make his future home.

Mrs. Susan L. Staley has returned from Kingwood, where she spent a few weeks with her friends.

Mr. Stands Bradley, of Terra Alta, made a flying trip to Oakland last Monday morning.

Mrs. Daniel Pleasants is ill at her home near town.

Notice to Trespassers.

All persons are hereby warned not to trespass upon our lands, known as part of the tracts called "Blk Garden" and "Robey's Do Light," situate in Election District No. 8, Garrett County, for the purpose of hunting, fishing, cutting timber, or for any other purpose whatever. Persons found so trespassing will be prosecuted to the full extent of the law.

ALEX. KITZMILLER,
THOMAS R. EYRETS.

Buckley's Arnica Salva.

THE BEST SALVE in the world for cuts, bruises, sprains, rheumatism, neuralgia, toothache, headache, and all pains of the head, face, neck, arms, and legs. It is a sure cure for all these troubles, and is a most valuable remedy for all who are afflicted with them. Price 25 cents per box. For sale by all druggists. 3-1v

A New Millinery Store.

I have just opened a new line of millinery goods, bonnets, ribbons, laces, straw goods, fancy goods and notions. Prices reasonable. Store on Oak street near the Davis bridge.

MARIE CUNNINGHAM.

Dead.

O'BRIEN.—Mrs. George O'Brien died at her residence near Swanton a few minutes after ten o'clock yesterday morning. The funeral will occur to-morrow morning at 10 o'clock. The services will be held in the North Glade church. Interment will be made at the family burying ground on Mr. C. Beckman's farm at 1 o'clock to-morrow afternoon.

Auroral Display.

The auroral display as seen in Oakland and vicinity, Friday evening last, was magnificent to behold. The two ends of the auroral arch had a bright rosy tint; the intermediate part was occupied by a few faint, phosphorescent streamers which came and went. There was a dark segment a few degrees in height and a concentric one, less distinct a little higher, say 40 degrees above the horizon.

At 8:30 p. m. the display became more vivid. The rosy light became deeper and more distinct, appearing first at the west and then at the east end, and finally extended upward through the middle of the arch to the very zenith. The deep red recalled that of the interior of a red watermelon. At this time whisps of bright, resembling illuminated haze, would flash out and disappear instantaneously, in the manner of lightning flash. These whisps came first in one spot and then in another, following no apparent order. The streamers were of a bluish lead color and appeared pretty steadily at times; again, however, they would shoot from the horizon to the zenith, remain a few minutes and then disappear.

During the first part of the display there were light, scattered clouds. By 10 p. m. they were vanishing and the auroral light was suffused bright yellowish-white illumination of all the northern part of sky, extending upwards 40° to 50°. The entire light seemed to be bounded by an arch running from west to east, the upper part elevated about 30° above the ground. There were no merry dancers, though the flashes above alluded to bore some resemblance to them. Altogether the night was imposing and beautiful.

At 7 p. m. a bluish-green meteor about as large as a man's head, passed from the southeast to the southwest quarter of the sky. Its motion was slow and parallel with the horizon, elevated 15 to 20 degrees. It was accompanied by a short train, the end of which vanished as the meteor passed. Time occupied in passage, 3 to 8 seconds. The speed was so rapid that a hissing or whizzing sound accompanied the meteor.

This sound is frequently reported along with meteors, though it is scarcely denied by others. At noon, the upper part of the sun's disc was covered by large dark spots. These three foregoing phenomena are usually in company with each other.

LADIES.

Seedling stock, in children who want build up, and all kinds of medicine.

BROWN'S KIDNEY PILLS.

It is pleasant, cures Malaria, Indigestion, Biliousness, Liver complaints and Neuritis.

TEMPERANCE NOTES.

THE TEMPTER'S SNARE.

Let me tell you to-night of my boy that fell
In the tempter's cruel snare,
Who had guarded so long and well
With tenderest love and care,
And who had passed his childhood years,
And counted his manhood with hopes and fears.

Oh, I was proud of my beautiful boy,
As proud as a mother could be,
Of his noble nature and manly worth,
And his loving care for me.
We were bound together for we were bound
Bound together with bonds of steel.

My boy went forth in the world at last;
Out as all boys must go.
For the loving hearts in the dear home nest
Can not keep them for aye, you know.
For the harvest waits and the reapers are few,
And the world has need of the strong and true.

My boy went forth with a purpose high
All things that were great to win.
But ruin waited with smiling face
In the child's hands of sin.
Go where he would, upon every side
The doors of temptation were open wide.

The light streamed forth with a ruddy glow,
And the wine in the glasses was red,
But the demon that lurked in the ruby cup
To death and destruction led.
And the boy that reared with love and prayer
Fell into the tempter's glittering snare.

My boy came back to me one day again,
Back to the dear home nest—
Back to my empty, outstretched arms,
Back to my mother's heart to break.
Too late for my love or my prayers to save—
My boy lies low in a drunken grave.

Oh, mothers, in happy, unbroken homes,
My boy was but one to fall—
My heart but one mother's heart to break,
There is danger for one and all.
With the doors of the wine shops open wide,
There is death and destruction on every side.

Oh, listen and heed my prayer,
And help me prolong the cry.
We must close the doors that entice our boys—
We must save them or see them die.
For oh, there are brave, bright boys by scores,
Going daily down through those open doors.

—Lizzie Clark Hardy, in Western Rural.

ALCOHOL AND THE SOUL.

Drink Debauches Human Nature and Dwarfs

The human family too often fail to
understand the meaning of the word
soul; and as it is our intention to
consider the effect of alcohol on the
soul, it will be well for us to inquire
what this mysterious power is.

The soul is conscious self. It is the
ego of one's existence without material
consideration, combining all the powers
of intellect, sensibility and will.

It will be discovered from the foregoing
definition that it is not the purpose
of this article to consider the effect
of alcohol on the system further than the
relation of man's senses are connected
with conscious self, and not with physical
self.

The progress of soul-life, or the in-
trospective power of man, has no more
deadly than alcohol. It has affected
the consciousness of the entire
human family. As I pen these words
I feel that my soul has been injured by
this great evil; not that I have ever
used it, or that my ancestors were given
to its use, but because the moral
growth of the soul of a world—its con-
scious self—has been injured and I am
a part of that injured humanity.

We can not, in this article, which we
feel might be extended to the length
of a three-volume book, treat this sub-
ject biologically or sociologically. We
will simply ask what is the effect of
alcohol on the intellect, sensibility and
will.

The word intellect comes from the
Latin words inter, between, and legere,
together, and thus suggests to the
mind a power which gathers from
man's surroundings that which we call
knowledge. Have you ever noticed to
what extent the use of intoxicants in-
jures man's power to discriminate, be-
tween right and wrong? It injures,
sometimes beyond repair, the corre-
spondence between consciousness and
reality, making unreal things to ap-
pear real. This is seen in its worst
stage in what is known as traumatic
delirium, but may be noticed in the
common drunkard who finds enjoy-
ment in the satisfaction of vile pas-
sions to the injury of moral life. The
influence of intoxicants upon the soul
is also of a nature to cause doubt—
that hesitancy between right and
wrong—to be favored by error. This
may be seen in its advanced state when
the drunkard ceases to hesitate before
using unending expressions of ex-
cessive thoughts, when he seems to
enjoy the polite method of robbery
known as gambling, and kindred vices.

But under this heading should be
considered the injury that comes to
one's power of introspection. When
man becomes addicted to the use of al-
cohol he drinks a portion of his in-
trospective power. We have often
seen the heavy drinker who seemed to
live as though his soul were merely a
series of sensations. This is seen in
various degrees in the drunkard, just in
proportion as he cultivates passion and
neglects either or meditation on self.

Consciousness is a part of intellectual
self, which can not be defined. Every
attempt to define it moves in a circle.
It only admits of self-evident affirma-
tion. I comprehend my power to rea-
son, therefore I am. Alcohol has in-
sensibly, therefore I am. Alcohol has in-
sensibly, therefore I am.

The Massachusetts hospital for in-
ebriates annually receives one hun-
dred and sixty-one cases last year.
One hundred and twenty-four were
committed by the courts. Each com-
mitment was for two years.

The decline of drinking at London
dinner parties is attributed to the fact
that champagne is now usually the
only wine served, it having banished
claret and replaced the old port that
used to appear with the dessert. As a
result a guest is now contented with a
few glasses of champagne, where his
grandfather used always to consume
one and sometimes, as Pitt did, even
three bottles of port at dinner.

Dr. H. N. Moray calls attention to
the power of alcohol to weaken con-
scious control over the higher facul-
ties, allowing the lower to act un-
checked. In mental disease there is
more or less loss of self-control, and
alcohol has marked effect in such by
still further weakening control, and
leaving morbid tendencies more free
to act. People who are only partially
insane are often made violent and dan-
gerous by slight alcoholic indulgence.

When we consider the effect of al-
cohol upon the sensibility of man, our
consideration broadens to his sensation
and sentiment. Under the former we

find his appetite, or seeking sensation,
growing in favor of his habit, until his
sensibility is disregarded, and thus one
of the grandest foundations of his soul
is debased and lowered. It has been
noticed that man's appetite has often
been inherited and to this extent—the
possibility of inheritance—we reflect
upon the ancestry of our race, and
view our responsibility to the coming
generation.

Under the consideration of the sen-
sibility of a man we must view his sen-
timent, or his conception of ideas. We
can easily see how alcohol debases
modesty, meekness, hope, sympathy,
patience, sublimity and all kinds of cul-
tured emotions, and thus saps the vi-
tality from the soul's life. We have
but to meditate on the life of drunk-
ards when we have seen to substantiate
this statement. It is to be classed
among the living axioms; yet it may be
defined from a physiological point of
view.

Alcohol debases the desires and af-
fections, and dwarfs the development
of sensibility which, very largely go to
make up the sentiments of man—the
right arm of sensibility, which is the
pillar of the soul's structure.

Alcohol injures that great facul-
ty of man's soul known as will, or his
power of self-direction. His involun-
tary actions, or those which occur
without his conscious determination,
are debased, and to this extent
we see man's will is affected
by his physical ability
or disability. By the use of alcohol
man loses much of his acquired will of
a lower class. His solicitations are
not what they otherwise would be, and
he develops his will downward—if this
metaphorical expression be allowed.

In the days of Homer the people may
have revelled in drinking to fallas, the
goddess of art and science.
And the crowned goblet foams with floods of
wine.

But now man's understanding of his
relation to his God demands that those
things which hinder the growth of his
spiritual life be laid aside, and the
prayer of 1894 is:

Stretch forth Thy hand, O God, our King,
And break the power of alcohol.
Deliverance to the captive bring,
And end the usurper's reign.

—Rev. O. J. Blackford, in Michigan
Good Templar.

THE POISON OF CIGARETTES.

Why It Is That Boys Become the Victims
of the Deadly Paper Pipe.

The use of cigarettes is not merely
the use of tobacco, it is a vice by it-
self. In reformatories where the cure
of the opium, alcohol and cigarette
habits is a business, cigarette patients
are not restricted from smoking cigars
or pipes, which are regarded as com-
paratively harmless. The cigarette
works a special evil of its own which
tobacco in other forms does not effect.

This evil result may be due to drugs,
or to the paper wrappers, or to the
fact that the smoke of cigarettes is al-
most always inhaled into the lungs,
while cigar smoke is not. As to that,
let the experts decide; about the fact
of the effect there is no doubt, and no
doubt of evidence. No other form of
tobacco eats into the will as cigarettes
do. The adult man can carry off
a good deal of poison of one kind or
another without disaster, and his duty
being fixed and his will formed, he is
usually able to make his minor vices
subservient to his more important obli-
gations. And so it happens that it is a
matter of constant observation in
clubs, and wherever there are intelli-
gent men who allow themselves all the
creature indulgences that they dare,
that those experienced persons are con-
stantly "swearing off" cigarettes for
longer or shorter periods, and smoking
cigars instead. The cigarette fetter be-
comes a gall, and they fling it off. But
young boys do not do that. They have
not discretion enough, for one thing,
and, for another, cigars cost too much
for them, and can not be smoked sur-
reptitiously in a spare moment. It is
the infernal cheapness of the cigarette
and its adaptability for concealment
that tempt the schoolboy's "cellow in-
telligence."—Harper's Weekly.

GENERAL GLEANINGS.

In Belfast, Ireland, the average mor-
tality of children of sober parents is
eight per cent, whilst the average for
those of drinking parents is seventy
per cent.

At a school for Indian boys the ques-
tion was asked of a boy ten years old:
"What does alcohol do to a man's
brain?" "It makes him think crooked,"
he replied.

The annual drink of New South
Wales, Victoria and New Zealand is
thirteen and a quarter millions (£13-
250,000), a larger amount than that
raised the world over for foreign mis-
sions.

SALADS are hoppers into which our
boys tumble; and when they are
dragged out their own mothers can
hardly recognize them, because they
are so badly scarred and disfigured
while going through.

The Massachusetts hospital for in-
ebriates annually receives one hun-
dred and sixty-one cases last year.
One hundred and twenty-four were
committed by the courts. Each com-
mitment was for two years.

The decline of drinking at London
dinner parties is attributed to the fact
that champagne is now usually the
only wine served, it having banished
claret and replaced the old port that
used to appear with the dessert. As a
result a guest is now contented with a
few glasses of champagne, where his
grandfather used always to consume
one and sometimes, as Pitt did, even
three bottles of port at dinner.

Dr. H. N. Moray calls attention to
the power of alcohol to weaken con-
scious control over the higher facul-
ties, allowing the lower to act un-
checked. In mental disease there is
more or less loss of self-control, and
alcohol has marked effect in such by
still further weakening control, and
leaving morbid tendencies more free
to act. People who are only partially
insane are often made violent and dan-
gerous by slight alcoholic indulgence.

FOR YOUNG PEOPLE.

THE DRUM.

I'm a beautiful red, red drum,
And I train with the soldier boys;
As up the street we march,
Wonderful is our noise!

There's Tom and Jim and Phil
And Dick and Nat and Fred,
White Widow Cutler's Bill
And I march on ahead,
With a r-r-rat-tat-tat!

And a tum-titty-tum-tum-tum—
Oh, there's a bushel of fun in that
For boys with a little red drum!

The Indians came last night
While the soldiers were asleep,
And they gobbled a Chinese kite
And off to the woods they do!

The woods are the cherry trees
Down in the orchard lot,
And the soldiers are marching to seize
The booty the Indians got.

With tum-titty-tum-tum-tum,
And a r-r-rat-tat-tat,
When soldiers marching come
Lajinas had better act!

Step up there, little Fred,
And, Charlie, have a mind!
Jim is far ahead
As you two are behind!

Ready with gun and sword,
Your valorous work to do—
Yonder the Indian horde
Lies in wait for you!

And their hearts go pit-pat
When they hear the soldiers come
With a r-r-rat-tat-tat!

And a tum-titty-tum-tum-tum!

Course it's all in play!
The shouting Indian crew
That hustled the kite away
Are little white boys, like you!

But "honors" or "just in fun,"
It is all the same to me;
And when the battle is won,
Down goes again march we!

With r-r-rat-tat-tat,
And tum-titty-tum-tum-tum,
And their hearts go pit-pat
For the boys with their little red drum!

—Eugene Field, in Chicago Record.

LAYS OF GRAVITATION.

The Professor Tells a Story Showing That

They Can't Be Trifled With.

"No, young gentlemen," said the
professor, fondly toying as he spoke
with the strings of the Atwood's ma-
chine, "no, man cannot trifle with the
laws of gravitation. I once had this
brought very forcibly to my notice;
yes, very forcibly. The story of the
occurrence may be of value to the
class as an illustration. I was camp-
ing one summer at the mouth of a
trout stream on Lake Superior. One
day I went up the trail with my rod,
but, meeting with no success, started
back down stream. I should say that
the trail ran parallel to the stream for
several miles, crossing it once about
half a mile from the mouth by a log
bridge. This had burned away, but on
my way up I had no difficulty in cross-
ing the gorge by a running jump. It
was, however, deep, perhaps sixty feet
or more. As I was retracing my steps
my attention was attracted by light
footfalls behind me, and turning I saw
in the trail a full-grown black bear. I
was naturally eager to secure such a
fine prize, but my rifle was at the tent,
and I hastened on to procure it. Soon
I noticed that the bear was also hast-
ening, and I immediately suspected
trouble. I confess that my usually
nervous nerves were somewhat shaken by
the thought that he might contem-
plate incorporating me into his an-
atomy. So I considerably accelerated my
pace and hoped soon to terminate the
chase by a leap over the chasm I just
mentioned. At last we reached the
spot, I jumped over, alighted in safety
on the far side, and turned with a
smile at my foiled pursuer behind me.

"What was my surprise and anxiety
to see him just taking a short run pre-
paratory to following me. Not a mo-

ment was to be lost. I pulled myself
together, and we sprang from opposite
banks at the same moment, passed in
mid-air and alighted simultaneously on
opposite sides of the river. Again I
saw him prepare to spring; there was
no alternative. Again and still again
we made the leap, and at the fifth
crossing the expression of mingled
amusement and ferocity in his eye—
the left eye, sir—appalled me.

No, gentlemen; I could not see the
other eye, but it doubtless expressed
sixty of purpose. I have seldom seen
a more persevering bear. It appalled
me, and I was prepared for a change of
tactics. Sure enough, the infuriated
animal took a longer run, and as we
passed he arrested his progress
through the atmosphere, gave a vicious
growl, and aimed a savage blow at my
flying form with his right forepaw.

"He missed me, and his fate was
sealed. Of course he had never studied
the laws of nature in the light of
modern science, and did not know that
a heavy body arrested in its flight
must fall. As I struck the cliff I heard
the bear strike the rocks below with a
sickening thud.

"No; you cannot tamper with the
immutable laws of gravity. I see that
the recitation-hour has expired. You
are dismissed."—W. S. Telford, in Les-
lie's Weekly.

Woman's Way.

Upon her neighbor's hat she gazed

A while with look intent,

And in those beams the structure peered!

It's grand—magnificent!

Upon Niagara she looked

And to her lover said:

As to his arm her own she booked:

"It's pretty, ain't it, Ned?"

—N. Y. Times.

EASTER CUSTOMS.

Some That Will Please the Little Ones of

Every Family.

Among the customs observed at Easter
by some families, a very pretty one,
where there are a number of children,
is the "Egg hunt." For this purpose
mamma or aunt colors two or three
dozen eggs—pink, green, yellow, blue,
etc.—and the night before Easter hides
five or six for each child, anywhere,
everywhere, in all sorts of places. In
the morning the children start out on
their hunt. When each child has
found its number, it stops, while the
others still hunt on. This gives the
children a great deal of pleasure, and

BIDDIE ON THE NEST.

It is very interesting to see the little
toys with their aprons full of brightly
colored eggs.

There is another pretty way. Have
the colored eggs just the same, but
make a nest and have Biddie sitting on
it. To do this, take a round box, cover
with white-fringed tissue paper, line
neatly, have a cover just to fit, make a
white tissue paper hen and stuff with
a little cotton wadding. Glue her to
the top and fill in all around her with
fringed tissue paper. Paint her comb,
her bill yellow. On Easter morn-
ing set her on the breakfast table, and
hear what shouts the children will
give when she is broken up and see
if she has laid them an egg.

In a number of Sunday-schools last
year colored eggs were given to each
child in the infant department, and
they pleased wonderfully. These eggs
should be hard boiled, so that if by ac-
cident one should be broken no harm
will be done to clothing or furniture.
—Millie Abbott, in Good Housekeep-
ing.

AN ALPHABET PARTY.

Unique Entertainment in Honor of a

Child's First Party That will be given
for the first time in this country is be-
ing arranged by the wife of one of the
Central American ministers to the
United States.

It certainly ought to capture the
fancy of United States parents, for
they always take pride in displaying
the early learning of their babies.

The party is called the "Alphabet
party," and is to be given in honor of
the minister's second child, and will
take place as soon as the children can
get out of doors in the new white
party frocks without catching cold.

Madame explained its meaning. In
the country from which they hail the
alphabet party is always an event in a
child's life, and there is a gentle
rivalry among friendly mothers as to
the age at which their children are en-
titled to the right to the party.

As soon as a little boy or girl has
mastered the alphabet thoroughly the
party occurs to celebrate the child's ac-
complishment. The table is decorated
with pretty boxes and souvenirs for
the little guests, which are always
made at home.

The little cakes have
letters in frosting or are made in the
shape of A B C's, and the alphabet
figures in all sorts of devices.

The little hero or heroine has to con-
vince the guests that he is master of
the letters, and then comes the inter-
esting part of the occasion.

There is a little balloon at hand
waiting. The little alphabet book out
of which the tiny senior or seniorita has
learned the letters is shut up in the bal-
loon or tied to it, and the balloon is
then set a-flying, and if the alphabet
is thoroughly mastered the balloon
will bear the book far away, and that's
the last the little son or daughter is
supposed to need of it.

The children themselves are in a
hurry for their alphabet parties, and
the mothers, of course, delight to get
ahead of other mothers by a few
weeks.—Chicago Inter Ocean.

Eagle Caught by a Hog.

An Oregon farmer was returning
from meeting one Sunday morning
when his dog started in pursuit of
something on the other side of a wire
fence inclosing a pear orchard. The
farmer jumped over the fence and, to
his surprise, saw an eagle just spread-
ing its wings to fly. The dog immedi-
ately fastened on to the bird's leg, and
the farmer seized it around the neck.
For a few minutes there was a ter-
rible scuffle, but the bird was finally
scared or choked into submission
and its legs and wings tied with a sec-
tion of the wire fence. Then the
farmer carried his capture home, put
it in a cage and now proudly exhibits it.

Too Much of an Invitation.

Mrs. S. was extremely busy one
morning when her little boy appeared
in the kitchen and asked for something
to eat. He seemed content with her
reply, "Yes, in a minute," and went back to
his play. About ten minutes later she
hurriedly hunted up one of his favorite
cold cakes, and, calling him, said:
"Here, take this and go to Mrs. B's,
and tell her that I would like to have
her take tea with us at six o'clock to-
night." The child trotted off obedi-
ently, and though it was some distance
from the street, he soon came back, and
gravely returning the cold griddle cake
to his horrified mother, said: "She
didn't want this, but she says she'll
come."

A Particular Doll.

Kittie—My new doll has been very
naughty.
Louie—What's the matter?
Kittie—Well, I don't think she likes
to be called Mary Ann Jane, after the
cook and nurse.—Harper's Young
People.

MISCELLANEOUS.

—Letitia was a very common name
among the Romans. It means Gladness.

have as many as forty different mean-
ings.

—Parsley came to Ireland through
the Latin, and signifies a Patriotic or
Nobleman.

—A Load Off His Mind.—He—"Will
you marry me?" She—"No." He—
Thank heaven, that point is settled.
Anything is better than suspense. Let's
go out and get some ice cream."—Truth.

—Parsley was used by the Greeks as
a funeral plant. "To be in need of
parsley" was a common euphemism for
death. On one occasion a Greek army
was marching out on a campaign,
when four men laden with parsley
were panic-stricken and refused to go
any further.

—Mr. Charles E. Berry, of Hickman,
Ky., owns an ancient relic in the shape
of a clock. It is an old-fashioned
"grandfather's" clock, and its works,
made entirely of wood. It is eight
feet high, and is made of mahogany.

It is said to have been in the family for
over a century. It was made in 1583,
and is, therefore, 311 years old.

—The baobab trees of Senegal are
denominated by Humboldt the "oldest
organic monuments of our planet."

One he describes particularly as being
over 100 feet in diameter, and calcu-
lates its age at the very least as 3,000
years. Its foliage forms a gigantic
green semicircle over 100 feet high and
400 in diameter.

—Whatever may have been the origin
of some negro stories told by Joel
Chandler Harris, negro nurses down on
the eastern shore of Maryland used to
delight children with the tar baby le-
gend, and the story of the rabbit's ad-
venture with the tar baby is much like the story as
told by Harris' Uncle Remus.

—The National Lifeboat institution
at present embraces 304 stations, each
boat being manned by 13 to 20 men,
and costs \$30,000 per annum, which in-
cludes building of boats, stations, up-
keep and everything. The adminis-
tration expenses are only 6 per cent.
of the income. During its 69 years' ex-
istence it has the magnificent record of
28,000 lives saved.

—The mezzotint was invented by
Prince Rupert. He himself was a
perfect engraver, and was seeking to
perfect the processes employed in his
time. One morning he walked out
from his house at Brussels and came
upon a soldier about to clean his gun,
which had been left out over night in
the rain and was becoming rusty. The
idea applied by the soldier to the bar-
rel brought away an impression, and
the mezzotint was soon a reality.

—The agents for the smuggling
British tailors commonly approach per-
sons in New York with the proposition
to declare on their oath that they will
leave the tariff duty. Of course, all
who stop to think know that this is
only a salve to uneasy conscience.

Most of the customers are ignorant of
the method by which the garments are
sent ashore, but some suspect that they
are worn over another suit by em-
ployees of the steamship companies and
removed when the smugglers have
reached a safe retreat. This seems
rather a bad guess, since the clothes
reach their destination with no sign of
disorder. Those who profit by this sort
of smuggling are restricted to no one
economic theory.

—Shawmut, a peninsula with three
hills, on which Boston was built, was
discovered by the Pilgrims in 1621. A
boat with ten men was sent to explore
Massachusetts bay. Towards the south
they saw the blue hills from which the
Indian name was derived, which the
Pilgrims named Shawmut.

Two or three rivers entered the
bay, and peninsulas jutted into it; and
so attractive were its shores that the
Pilgrims regretted they had not settled
themselves there. When Winthrop and
a large colony came in 1630, they landed
at Salem, and some of them settled at
Boston. Sickness prevailed among
them. Observing a fine spring of water
on Shawmut, and believing it high
ground to be more healthy than at
Charlestown, Winthrop settled there
and founded Boston.

A man of doubtful reputation was
on his way home one night and came
across a pile of planks, which for some
reason had been unloaded upon the
roadside. He couldn't, or thought he
couldn't resist the temptation to steal
one of them. He could not get to the
village with it, and so he took it
through the fields. By and by, in
the gathering dusk, he wandered into
a bog hole and sank in the mire. The
more he struggled, the deeper he
sank, until, getting alarmed, he
cried lustily for help. His shouts
brought a neighbor with a lantern.
"Wily, Jones, what does this mean?"
asked the good Samaritan. "How in
the world came you here?" "I was in
a hurry to get home," said the thief.
"And so I cut across. Then I got into
this bog. The more I tried to get my-
self out, the deeper I got in, and finally
I went back to the road and got this
plank to see if I couldn't get myself
out with that."—Christian Secretary.

—Tad Lake in Western Tennessee,
Reelfoot lake, in western Tennessee,
one of the most remarkable bodies
of water in the United States. It is
popularly supposed to have a subter-
ranean source from the Mississippi
river, it having no visible outlet or in-
let, and the evidence seems to be de-
cisively against this theory. There is
a considerable area in the center where
no line has yet been found long enough
to touch bottom. It is not affected by
the rise and fall of the river, but has a
tide corresponding with that of the
sea. The oldest settlers can remem-
ber when the land where the lake is
now was a fertile farm. One night
there was an earthquake, distinctly
felt, but doing very little damage to
the surrounding country. The next
morning the lake was there and has been
there since. It is one of the most noted
fishing resorts in the south.—St. Louis
Globe-Democrat.

PUNGENT PARAGRAPHS.

—"Revenge is sweet," but it almost
always sours before it is digested.—

Galveston News.

—Blood will tell; nobody criticises
your faults quicker than your own
blood-reactions.—Truth.

—"What makes some girls look young
so long?" "The men are to blame.
They won't propose."—Life's Calen-
dar.

—"Why does De Toper attend every
temperance meeting in town?" "Be-
cause that's the only place where his
creditors don't look for him."—Hullo.

—Miss Faced—"That Mrs. Chirp is
horrid; I don't believe she can keep
anything." "O, yes, she keeps telling
everything she hears."—Inter Ocean.

—A naturalist says that the ant is the
most pugnacious of all created
beings. This must be why the poet
remarked, "Go to the ant, thou slug-
ger."—N. Y. Tribune.

—Minister—"Speak mildly to the
erring, Miss De Trop. All men are
your brothers, you know." Miss De
Trop—"O, I don't say that to every
one, you know."—Detroit Tribune.

REMITTANCES:

Remittances made by money order, postal note, or registered letter or bank draft will be acknowledged. Address: THE REPUBLICAN, Oakland, Md.

THURSDAY, APRIL 5, 1894.

Notice.

Do you owe a year's subscription to THE REPUBLICAN? If so, call and settle at once, as we must have the money due us immediately.

If COX'S army reaches Washington it will be qualified to give expert testimony on the condition of the public roads.

The Oakland Republican is 18 years old. The Republican is a worthy advocate of the interests of the glades of Garrett.—Baltimore News.

The bill making it unlawful for gamblers to enter billiard or pool rooms in Garrett county has been signed by the Governor and goes into effect immediately.

Congressional.

We desire to call the attention of our readers to the communications found in this issue on the question of a Congressional nominee this fall. Garrett county has never presented the name of a candidate for this honor, but the letters to which we refer would seem to indicate that our people are thinking seriously of having a candidate this time.

We have not been able to communicate with as many persons upon this subject as we desired, and trust that anyone taking an interest in this matter will forward their views to us for publication.

Mr. George's bill to give the people the right to elect the County School Commissioners in Garrett county was killed by a vote of 22 to 14. On the defeat of the bill the Cumberland News has the following to say:

"Mr. George, of Garrett county, tested the sincerity of the Democrats of the House of Delegates upon the subject of home rule by introducing a bill providing for the election of the school commissioners of Garrett county by a vote of the people. But the Democratic sides of home rule is rather peculiar. It has no virtue whatever unless it results in placing the Democracy in power, hence by a strict party vote Mr. George's bill was defeated."

By REFERENCE to our news columns to day it will be seen that a call has been issued to the Republicans to assemble in mass convention on Saturday night to nominate a municipal ticket.

It is earnestly desired that all Republicans attend this meeting and take part in the selection of such a ticket as will meet with the hearty support of our citizens.

There is no better way to emphasize the growth of Republican sentiment than by electing Republican city officials whenever the opportunity presents itself.

A rousing Republican majority at this election will be of vast influence on the result in this Congressional district this fall. We do not mean to say that National issues will cut any figure in this municipal contest, but a great Republican victory will show a decline of Democratic sentiment.

There are many ways of making Democrats vote Republican tickets. But one of the surest ways is for Democrats, when voted into power, to appoint Republicans in office. This may be set down as coming straight, and applying to all grades of politicians from Washington down to town elections.—Oakland Democrat.

This evidently means that if the Republican postmaster at Oakland, now holding over on Democratic

time, is not removed by the time the current issue of the Democrat reaches the white house, somebody, perhaps the editor of that paper, will vote the Republican ticket next fall. It seems it is office some people vote for, not tariff reform and things. By the way, Mr. Democrat, you declared in 1892 that you wanted nothing in the world but tariff reform. Haven't you got it?—Cumberland News.

Consideration for Pensioners.

The Hon. John M. Reynolds, as assistant secretary of the interior, lays down a just principle in the matter of pensions in a decision recently rendered, and which reverses a former ruling. Mr. Reynolds was dealing with a case which came under an act of Congress providing that in case a minor child is insane, idiotic, or otherwise permanently helpless, pension shall continue during the life of said child or during the period of such disability.

In commenting upon the former ruling the secretary said: "It would seem that little further than a careful reading of the act itself would be sufficient to demonstrate the fact that this law has been misinterpreted to the grievous harm of a class of the nation's dependents who should receive, as the law intended they should the most benevolent consideration."

The tendency of recent rulings has been in the opposite direction, and it is gratifying to note a decision which lays down the principle that pensioners are entitled to "benevolent consideration."

THE MARYLAND Legislature adjourned on last Monday night at the hour of twelve o'clock. The session which has now passed into history was one of the most expensive ones for a large number of years, the appropriations aggregating the sum of \$163,500.

The members of the Legislature from this county succeeded in having passed several bills of merit, among them being the special appropriation for school purposes and the bill granting the voters of the county the privilege of issuing bonds with which to erect and equip school buildings.

The Democratic members from different sections of the State never went to the Legislature with more of promise and returned with less of performance.

There was one promise that was general, but which has been somewhat discounted by previous misarrangements. The Democrats have been promising re-assessments long that it makes one feel old to recall when it first began to figure in their platforms. There was the usual fight this year, and the bill was defeated with the same despatch that the Chinese dispose of a criminal—nothing was said and the head was promptly and neatly cut off, leaving a large number of explanations to be made to those who want to know more about the why and wherefore.

The sins of omission were many and serious. The Good Roads law, which everybody except one or two mischievous legislators wanted, was defeated, and nothing was done to bring immigration to the State. There was a most lamentable lack of enterprise and public spirit. It would be pleasant to say that the deeds of commission belated the account, but truth will not allow it. It is a great pity that so much money was wasted to accomplish so little.

How's This For Democracy?

When Congress met the Democrats pledged relief by March 1. The Democratic leaders in the Senate dilly dallyed in committee six weeks with the bill they had received from the House on February 1, and finally reported it only to put off its consideration two weeks longer. If two or three months more are to be wasted in useless debate then good bye to the Democratic party. Business will continue to suffer, the people will grow more dissatisfied and the inevitable consequence will be a tidal wave of popular indignation against the Democrats at the next election.

The country cannot stand such

delay. Finance and trade, business and industry, capital and labor are suffering for relief. The universal cry of merchants, traders, bankers, importers, manufacturers, workingmen and the people generally is: "Cut short this intolerable delay, end this ruinous tariff agitation, that the prevailing suspense may be settled and business men know what to do."

The pressing need of the hour is not nicety of schedules but prompt action. It now matters not so much what the reason is as that it shall come quickly. Anything is preferable to delay. Nothing can be more injurious to the country than a prolongation of the agitation which becoms panic.

Slowcoach debate, which involves such momentous consequences to the people and the nation, is worse than useless and defiant. It is reckless. It is morally and politically criminal. It is dangerous.

Cut it off. Send the tariff bill to a conference committee at once.—New York Herald.

April 13 Arbor Day.

Governor Brown has appointed Friday, April 13, as Arbor day in Maryland, and has issued his proclamation to that effect. This is in accordance with the joint resolution of the General Assembly adopted in 1884, authorizing and directing the Governor to designate a day in April for the planting of forest trees, to be known as Arbor Day.

The Governor, in his proclamation, says:

"The beneficial results which have followed from the observance of Arbor Day since it was first established in this State, ten years ago, are great, and I trust that the people of the State will generally devote the appointed day to the planting or transplanting of trees, vines and shrubbery, so that the beauty and value of homes, highways and public places of the State may be increased."

Especially recommend to parents and teachers in public schools that they encourage their children, or those under their influence, to plant or transplant at least one forest or shade tree on that day by the side of some public road or about their school houses or homes.

"While the designated day is not a 'legal holiday,' I hope that the authorities will cause it to be observed in all the public schools, accompanied by instruction touching the purposes and benefit of the festival."

It is expected that Arbor day in Maryland, which is fixed for Friday, April 13, will be celebrated this year more generally than ever before.

Circulars will be sent out by Professor Prettyman, of the state board of education, to the school examiners throughout Maryland in reference to the observance of the day. A copy of the proclamation of Governor Brown, fixing the date of Arbor Day, will be enclosed in the circular. The school examiners will superintend the arrangements for the celebrations in the county schools.

Last year Professor Prettyman attempted to secure figures showing the number and variety of trees planted by the schools. The returns although incomplete, give interesting data as to the popular preference and diversity of tastes. Forty-one varieties of trees were planted by the public school children in the counties of Allegany, Caroline, Carroll, Frederick, Kent, Somerset and St. Mary's, from which returns were received.

The maple seemed to be in the greatest favor, 256 of these trees being planted in the counties named. The cherry, cedar, silver maple, willow and pine followed in the order given as to preference. In the seven counties named over 1,600 trees were planted last Arbor Day. This year Professor Prettyman will ask fuller returns, with a view of determining how many trees are planted on Arbor Day in the whole State.

In his circular to the school examiners Professor Prettyman will suggest that the celebration be of a dual character, the observance of "Library Day" being combined with the Arbor Day exercise. "Library Day" celebrations are designed and encouraged by the State board of education to stimulate interest in the establishment and support of libraries in all the country schools.

Many of the schools are without libraries, and the assembling of communities to celebrate Arbor Day is believed to offer an opportunity to invite the co-operation of the people in securing a supply of books for the schools or adding to the libraries already established. Provision is made by the school regulations that when any community raises \$10 for a school library a like sum will be available from the public funds.

FOR CONGRESSIONAL HONORS.

Messrs. G. W. Wilson, A. C. Sturgis and E. H. Sincell Named.

In order to ascertain the sentiment of our people on the question of a nominee for Congress we have addressed communications to active and prominent party workers throughout the county and we append some answers.

SELBYSPORT, Md., March 30.

To the Editor of The Republican.

Our people have not as yet given much attention or thought to the question as to who shall be nominated for Congress this fall. In my judgment it is time that Garrett county should present the name of one of her sons for that honor.

We have men of ability in the county who would represent the district with credit, not only to themselves but with honor to their constituents. Most prominent among these are Mr. George W. Wilson, Mr. Edward H. Sincell and Col. A. G. Sturgis, anyone of whom would make a good Representative. It is time that the Republicans of Garrett county claim recognition.

Yours truly,

A REPUBLICAN.

DISTRICT No. 3, March 21st.

To the Editor of The Republican.

We have some people in our county who would make creditable Representatives in the halls of Congress. I, for one, favor Mr. George W. Wilson.

Very truly yours,

A FARMER.

DISTRICT No. 5, March 29.

To the Editor of The Republican.

We have stood by the candidates of other counties at all times and have always recorded a majority in favor of the Republican nominee for Congress, no matter what county he hailed from. Don't you believe it would be a good idea to have a candidate from Garrett county this time. In the person of Mr. Edward H. Sincell we have a man who would reflect credit upon our county and ably represent the district. Whenever and wherever for the last ten years Republicanism in Garrett county needed an advocate he has always been found there to uphold and push forward our party's interest.

Respectfully,

XX.

LOXACONING, Md., April 2.

To the Editor of The Republican.

We of District No. 11 believe that Garrett county should name the candidate for Congress this fall. No man has contributed more to the upbuilding of our party than Mr. George W. Wilson, who is well acquainted with the needs of our people and would make a good Representative.

Very truly yours,

A WORKER.

RYAN'S GLADES, Md., April 3.

To the Editor of The Republican.

The party in this section of the county is in a harmonious condition and are united in their support of George W. Wilson for Congress.

Yours truly,

GARRETT.

How to Injure Your Town.

Buy from peddlers as much and as often as possible.

Denounce your merchants because they make a profit on their goods.

Make out your town as very bad and stab it every chance you get.

It will make your property less valuable but then you don't care.

Keep up divided sentiment on the best method of increasing business.

Glory in the downfall of a man who has done much to build up the town.

Refuse to unite in any scheme that will be for the betterment of the material interests of the people.

Complain of "ring" rule because you and your set cannot dominate the affairs of the town.

Tell your merchants that you can buy goods a great deal cheaper in other towns, and charge him with extortion.

If any stranger comes to your town, tell him that everything is overdone, and predict a general crash in the town in the near future.

Patronize outside newspapers to the exclusion of your own, then denounce them for not being as large as the city papers.

When you have anything to say about your town, say it in such a manner as to leave the impression that you have no faith in your town.

Merchants, don't advertise in the home papers, but buy a rubber stamp and use it. It may save you a few dimes and make your letter heads and wrapping paper look as if you were doing business in a one horse town.

If you know of anything that would bring your town to the favorable notice of capitalists, increase its prosperity, develop its dormant resources and put activity and life into its trade, heart and vigor into its people, keep it to yourself. Shut yourself up like a clam and say let the town go to the dickens—and it will go.

GOOD GRADING IMPORTANT.

Points in Roadbuilding Where the Practice of Economy is Costly.

Macadamized roads on extremely steep grades or on extremely flat ones are difficult to maintain in good condition and create constant expense. The steep grade is of course objectionable to traffic from the fact that it places a limit to the maximum load that can be hauled over the road without additional hauling power. One such grade on a road may involve the necessity of sending a tow team with every heavily laden wagon. Many of these extra teams will have to travel several miles to and from the steep grade in question simply for the purpose of assisting the load up that one hill. You can readily figure the annual loss to the individuals and determine at once whether the expenditure of a comparatively large amount would not have been judicious, in view of the fact that a permanent saving would have been effected forever thereafter. But the steep grade, besides being objectionable and costly, adds another element of expense, in that it is liable to be scourged by heavy rains.

The sliding movement of descending vehicles is injurious to it, especially if brakes are used, and the heavy pawing of the horses in their efforts to draw their loads assists in destroying the surface. All these combined will necessitate frequent attention to that roadbed, an expense that will be permanent.

On the other hand, level stretches are equally difficult to maintain in good condition, from the fact that, as they are not washed by rains, dust and mud accumulate on them.

The mud forms channels, from which the water cannot escape laterally, and through lack of fall neither can it flow longitudinally.

The result is that it remains on the roadbed, softens it, ruts follow, and a permanent expense is again incurred for the maintenance of the section. It will therefore be realized that economy in grading can be false economy of the worst kind.

Really good macadamized roads will never be realized here until they, like all other things that we own and care to keep in good condition, receive proper treatment at the hands of those using them.

Just so long as drivers continue to drive in one continuous track with heavily laden wagons, so that the calked hoofs of team after team are picking the road loose in one narrow lane while the wheels are pounding and rutting it at each stride as a suitable frame for a picture of destruction, just so long you need not look for economical roads, because the heaviest and best of construction will under those conditions give but very ordinary results.

There is no reason why country or, more properly speaking, farm wagons and carts—springless ones, as a rule, and consequently the most injurious to a road—should not be provided with wide tires and have the rear axle several inches longer than the front one. These vehicles in passing over the roads will, to a certain extent, mend the damage done by the others.—Brooklyn Eagle.

Guaranteed Cure.

We announce our advertised remedy for Dr. King's New Discovery for consumption, coughs and cures, after this condition. If you are afflicted with a cough, cold, or any lung trouble, and you are not cured by this remedy, we will give you \$10.00. You may return the money and have your money refunded.

We cannot make this offer on our own risk, as we have no money to refund. If you have a cough, cold, or any lung trouble, and you are not cured by this remedy, we will give you \$10.00. You may return the money and have your money refunded.

Early Postage Rates.

Postage was a luxury in 1816. It cost six cents to send a letter thirty miles or less; from thirty one to eighty miles the charge was ten cents; from eighty one to 120 miles, twelve and one-half cents; from 121 to 400 miles, eighteen and three-fourth cents; and over 400 miles, twenty five cents. These rates were in force until 1847, when Lyndner Spooner, of Boston, decided to run mail route between Boston, New York, Philadelphia and Baltimore, in opposition to the government. He contended that the government had no constitutional right to prevent by law private individuals from carrying the mails, so he established his route charging five cents per letter.

The legal part of the question seems never to have been decided, but congress appears to have reduced the postal rate chiefly to avoid competition. The rate was made as follows: Under 300 miles, five cents; over 300 miles, ten cents; drop letter, two cents.

This rate held for six years, when the three-cent prepaid rate for 3,000 miles was established. If the postage was not prepaid, five cents was collected of the person who received the letter. For a distance over 3,000 miles the rates were doubled.

In 1885 letter postage was again reduced to two cents per half ounce, and in 1885 to two cents per ounce.

—Kate Field Washington.

ORDER NISI.

In the matter of the estate of Edward C. TILSON, deceased, vs. F. R. Schofield, Adm'r, d. b. n. e. l. a.

No. 286 Adm. Probate. In the Orphan's Court for Garrett County.

It is hereby ordered by the Orphan's Court for Garrett County, this 1st day of March, 1894, that the sales of a part of the real estate of Edward C. Tilton, deceased, as made by F. R. Schofield, Administrator, for d. b. n. e. l. a. to George Morley and Mrs. Mary Mulligan, be null and void, unless cause to the contrary thereof be shown on or before the 20th day of April, 1894, provided a copy of this order be inserted in some newspaper published in Garrett County for at least three consecutive weeks on or before the 20th day of April next. The report shows the amount of sale to be \$190.00.

THE BOUNDARY.

The Story of the Great Boundary Dispute Continued.
T. Day in Cumberland News.

OAKLAND, Md., Mar. 29, 1894.
I give below a continuation of the boundary line discussion as shown by the proceedings in the Supreme Court of the United States. The correspondence given in this letter throws much light upon the great question as to whether the head of the North Branch or the source of the South Branch is the first fountain of the Potomac river called for in the charter of Maryland.

LORD BALTIMORE DECLINES TO REOPEN THE QUESTION.

Charles Lord Baltimore was succeeded in about 1751-2 by Frederick Lord Baltimore, and in 1753 he appointed Horatio Sharpe governor of the colony of Maryland. At that time Lord Baltimore was in the midst of his controversy with Penn in regard to the boundary line between Maryland and Pennsylvania. Penn was claiming the right to territory lying south of the 40° parallel, and Baltimore was vigorously resisting his claim, and as his charter was the older insisted on holding up to that degree of latitude according to calls of his charter. But the king was favoring Penn, and it seems had ordered a temporary line to run for the peace of the two provinces.

Baltimore was very anxious that this line should be north of the heads of the Potomac and other rivers flowing into the Chesapeake bay; otherwise the Pennsylvanians would claim the right to navigate these rivers. Gov. Sharpe had evidently been instructed to inquire into those matters, and in the correspondence between Sharpe and Baltimore in relation to the matter the former made the first suggestion that was ever made so far as appears to the respondent, that a mistake had been made by the king in fixing upon the North instead of the South Branch of the Potomac river, and he endeavored to get Lord Baltimore to reopen that question.

But the latter declined to do so unless both Lord Fairfax and the governor and colony of Virginia would consent to it. This consent was not obtained and consequently no action was taken by Baltimore, all of which will more clearly and fully appear from the correspondence between Governor Sharpe and Lord Baltimore, which is published in the "Archives of Maryland" in the volume entitled "Correspondence of Governor Sharpe—1753-1757." The following abstracts from said correspondence sustain the correctness of the above statements:

CORRESPONDENCE BETWEEN BALTIMORE AND GOVERNOR SHARPE.

In a letter from Sharpe to Cecilias Calvert (the secretary of Lord Baltimore, it is presumed) dated August 20, 1753, speaking of the Pennsylvania boundary matter Sharpe says:

"It is to be observed that the temporary line is drawn fifteen miles south of the most southern part of Philadelphia which takes away from his lordship much good land."

It would be of great advantage and is much to be grieved you could not continue the line due north (after it has turned the circle) to 40° or at least 39° 56'. A line due north on that latitude will run a little north of one of the bendings of the Potomac. Much depends thereon in respect to the boundary which Lord Fairfax, for by which I have yet seen I doubt that branch which runs about 80° west of the Allegheny mountains will be deemed the fountain head of the Potomac and is to be desired if there be considerable loss according to his first grant nor will you then be within fifteen miles of Philadelphia, although to the northward of the latitude thereof. It is impossible to fix how far north would be a good boundary for Maryland, on account of the uncertainty of the draughts and impracticability of making observations and remarks necessary for that advice. I can only say what you know that the more northward the better."

[pages 1 and 2]
Letter from Sharpe to Calvert, September 14, 1753, page 5, speaks of Mr. Emory's return from running the north line, and sends Emory's plat with his remarks and observations. In his remarks he says: "The north line will not touch the heads of any rivers, nor will the circle around Newcastle, as run by Mr. Dalkin in 1732, affect the head of the bay or any of the rivers as far as he is capable of judging, &c." "but," Sharpe continues, "opinions you see and a few inaccurate observations are the best guides we yet have, and I see no probability but of remaining still in the dark unless the Penns will give liberty to execute what the council have thought necessary to be performed, etc. Mr. Cresap gave it as his opinion to the council that the temporary line is to the northward of any bendings of the river Potomac, and that the South Branch runs 60 or 80 miles further west

than the head spring of the North Branch, upon which representation of his, by advice of council, I have wrote the following letter to Lord Fairfax:

"If you can obtain from Messrs. Penns to go to the latitude of 40° upon Susquehanna in order to run a new line thence for your northern boundary, you may give up so much of the eastern side of that river as lies north of the temporary line." * * * "and several plans and observations being laid before us, we are of the opinion that so much uncertainty appears at present as will with respect to the heads of the rivers running into Chesapeake bay, as to the circle of Newcastle and the latitude of the most northern bend of the Potomac, that we would not presume to advise any particular boundary unless a due north line could be run from the middle of such an east and west line as may be agreed on between proprietors across the Peninsula, as also a due west radius run from the center of the circle of Newcastle and the latitude of the most northern bend of the Potomac to be taken by observation."

The following is the letter written by Governor Sharpe to Lord Fairfax, as stated in his letter to Calvert of September 14, 1753:

"Lord Baltimore was pleased to charge me with an enquiry into the true meridian and place of the fountain-head of the Potomac. The best information I have been hitherto able to procure gives me reason to believe there has been a mistake in fixing the spring head of the North Branch—commonly called Wappasom—to the main and principal course of the river. I am the more willing to be persuaded of the truth of this representation from the considerable advantage that will accrue to your Lordship. That branch, I am informed, has never been fully explored and traced to its source, but I flatter myself with having your Lordship's concurrence for such an examination into its courses, length, width and depth as may bring this matter to a nearer degree of certainty, and if that should appear to be the fountain-head of the Potomac river, I shall not question but your Lordship will be for taking such measures as may ascertain the mutual limits of the two proprietorships agreeable to the direction and true intention of their respective charters."

Lord Fairfax's reply to this letter is dated September 24, 1753, page 7. In it he used this language: "I am (entirely) satisfied that the south would be much to my advantage, and therefore think it improper for me to appear therein, and that the governor of Virginia and your excellency should transact that affair. If his Lordship should obtain his demand, I must insist upon a new line between his Majesty and me to the southward."

On the 29th of November, 1753, Sharpe writes to Calvert informing him that he had received the above reply from Fairfax and continues: "My interest to examine the two branches of the Potomac I have hinted to the Governor of Virginia and writ to Col. Cresap to know whether he will undertake that business or not and return me an accurate description of their courses, rapidity and depth, and the latitudinal difference of the places of the spring heads, but I suppose the severity of the winter will hinder him from proceeding on those inquiries this three or four months at least."

January 5, 1754, the first reply of Lord Baltimore to one of the foregoing letters from Governor Sharpe was written. It is dated London, January 5, 1754, and is written by Calvert to Sharpe.

He first acknowledges receipt of the above letters August 22 and September 14, and after speaking of Pennsylvania boundary matters, says: "My Lord approves of your endeavor with Lord Fairfax in Virginia to fix the branch of Potomac river by another branch running southwest; it will enlarge and extend Maryland much more than the branch running northwest and it will advantage Lord Fairfax as to his particular tract of land, yet it will be very difficult to gain the colony of Virginia's consent to re-settle, as it will be loser by altering the course of the river which has been settled by the order of Crown and of which the late Lord Baltimore had notice and was present with Lord Fairfax at the hearing before the council, whose report the King confirmed, and accordingly the spring head has been determined by the Virginia commissioners exparte with Maryland commissioners Lord Baltimore praying none."

"Lord Fairfax and the colony of Virginia's charter of the courses of the Rappahannock and Potomac, the latter fixed boundary between Maryland and Virginia according to the order of the King and council in 1736 and 1737." * * * "His Lordship desires you to obtain Col. Cresap's opinion certain by observation of the north temporary line,

etc., etc." and then speaks of the importance of the location of the north bend of the Potomac, and says: "If the spring head and on that river, it is of consequence to know upon settling the north temporary line," etc.

Letter from Sharpe to Calvert dated London, April 17, 1754, page 44 et. seq., on page 49 is as follows:

"By Lord Fairfax's letter to you his Lordship declines having to do with any resettlements of the course of the Potomac river. The branch called the South Branch which you seem to apprehend will be much more beneficial to Maryland, as in length southwestward, will depend on proof, as its fountain head instead of the spring head of the said river determined by the Virginia commissioners in 1736 and 1737."

"If the South Branch runs as you apprehend it will certainly be of great advantage to the increase of Maryland, and also may be to Lord Fairfax's tract of land by the spring head of the Potomac lying more westward than the determined head of the Potomac as above settled."

However, you ought before you make any attempt to be well grounded how the inclinations of the Governor, the Virginians and Lord Fairfax stand, to a new settlement of the course and fountain of the Potomac with Maryland. If they oppose the crown it is now most likely, side with them. The trial of the south branch of the Potomac as to its advantages as may turn out, his Lordship is not against Mr. Cresap's essay therein; provided he does not bring upon him too great cost thereby, of which, if you find it absolutely necessary to send him; you must bargain with him reasonably."

Letter from Sharpe to Calvert, January 6, 1754; page 76

"It is owing to Col. Cresap's absence from home among the Virginians of Ohio, that I am not able yet to comply with your requisition concerning the latitude of the most northern bend of the Potomac."

I some weeks since wrote two letters desiring him to return me a copy of his map of that river, signed and authenticated, which I will transmit with the description of distances and bearings of the river heads on the eastern shore as soon as the surveyors make their return, which I expect in about three weeks or a month at the farthest."

P. S.—I have this instant received a letter from Col. Cresap with his plan and certificate concerning the North Branch of the Potomac and temporary line as run by him."

A letter from Calvert to Sharpe, December 10, 1754. "Col. Cresap's map of the North Branch of the Potomac river with respect to the north temporary line removes the doubt of the bend touching the line, there being south of the line considerable distance of country between the line and the head, admitting extensive passage to the spring head of that river." * * * "The observation in 1669 at Newcastle, and also the act of Virginia concerning the north boundary is of service as it points the opinion of Maryland, out of which the letter was taken, etc., etc."

Mountain Lake Park.

The weather the past few days prevented our contractors from making much headway with their work.

James Arnold has moved into one of Col. Barley's houses in Lake View.

J. A. Hipsley has purchased Mrs. Harris's lot on the corner of Oakland and I street. He will build on one of them, possibly on both.

P. T. Garthright made a business trip to West Virginia last week.

It is a boy. It is about a week old. Charles Dawson is as happy as a "darkey" in a watermelon patch." Mother and boy doing well.

The porch put on Mr. John Baigie's cottage by contractor Johnson is "a daisy."

The business of C. M. Rathbun & Co. this spring is far ahead of any similar date in the past. We are glad to note their success.

The seats have all been taken out of the auditorium, preparatory to the enlargement of the building. Grant Hayden is working with C. E. Dawson, at paper hanging and painting. Mr. Dawson has quite a number of houses to paper.

The rain prevented the burning of the leaves the latter part of the past week. Where the ground is clear the grass is growing nicely.

The April number of the *Chautauque* will be mailed shortly. An interesting number.

Messrs. Radisill and Johnson gave their "Picturesque America" at Keyser last night for the benefit of the new Methodist church.

Brandonville, W. Va.

We think a few items from this town would not be out of place in your valuable paper.

Warm weather has again taken the place of cold and snow.

Squire Bird, our blacksmith, is very busy at this writing.

Rev. H. E. Friend, assisted by

Rev. E. P. Idleman, is having good meetings on this work. Up to this time over one hundred have professed faith in Christ. May the good work still go on.

Miss Joe Kimberly is on the sick list.

Squire Bird is improving his property on Main street by putting up a nice fence around it.

Marsh Harned is improving his property on Main street.

Our merchant B. F. Huggins is getting a new supply of spring goods.

Mr. E. E. Friend and wife are visiting at Rev. H. E. Friend's.

Clifford Friend has gone to work for his brother near Mt. Lake Park.

Our farmers are busy preparing to do their spring planting.

Rev. Cox passed through here this week.

A. Knabb & Co. are putting up a stove mill near this place.

Mr. Hanson Liston is on the sick list. Dr. Bogges is kept very busy looking after the sick.

Quite a number of our citizens have been attending court at Kingwood.

Good folks say the recent cold snap killed all the fruit in this vicinity, but we hope they are mistaken.

B. F. Huggins is the new Mayor of our town.

We noticed deputy Sheriff Albert Fearner on our streets one day this week.

Mr. George Miller has moved to the upper end of town.

Rev. Woodruff and son, of Terra Alta, were here one day last week.

We will close with best wishes to THE REPUBLICAN.

RAMBLER.

Lake View.

The sick here are nearly all convalescent.

Trout are ripe now and everyone is after them.

C. M. Rathbun & Co. received a car load of white line this week.

Sub rosa, there is a whisper that Lake View, is to have a driving park if negotiations materialize.

The Garrett boys are building a fine cottage on the place they purchased recently near Lake Younghogeny.

Mr. Jas. G. Arnold has moved into Mr. J. L. Barley's house and has announced his intention to take out naturalization papers as a citizen of Lake View.

The beautiful display of Aurora on last Friday night awakened a great deal of curiosity among some of the boys as to the cause of it. After several reasons had been advanced, one that was finally adopted was that the earth had a hot box from her diurnal revolutions.

Dear Park.

Mr. John Long is preparing to butcher this summer.

Miss Elva Langhlin is teaching a private school here with a large attendance of pupils.

Mr. C. G. Miller lost a valuable cow last week.

Rev. C. E. Feather's little daughter is very ill.

D. T. Thayer is now located on his farm near this place. Dan is a hustler and we wish him success.

Mr. and Mrs. John Streiding, of Elk Garden, are among their many friends here.

Ex-Senator H. G. Davis was here on business last week.

Hon. and Mrs. A. F. George were among their many friends here last Sunday.

Mr. Samuel Friend is here visiting his mother.

Rev. N. Hart failed to keep his appointment here last Sunday.

Some person or persons attempted to break in W. C. Jones's store some time last week by cutting the strip that held the upper sash in place. Had they been left a few minutes longer they could have been in the store where they would have met a great surprise.

Mrs. James Feather, of your city, is visiting at Mr. Joseph Lushorn's.

Mr. D. F. Graham is here on business.

Savage River.

Fair weather and farmers sowing oats.

Ezra, oldest son of Thomas Broadwater, had his leg broken one day last week by a sapling falling on it.

Mr. John L. Michael passed through our streets last week with a fine drove of cattle.

Mr. John W. Wilt passed through here last week en route to New Jersey to visit relatives.

Mr. Stephen Wilt has left here. We do not know if he went to Florida or joined Coxey's army.

Mr. C. A. Wilt talks of putting a large saw mill at the mouth of Big run on Savage River early in this month.

Valuable Advice.

Avoid lawsuits and loss by consulting H. P. Tasker and examining his abstracts of the "conflicting titles" before paying for Military Lots. Charges reasonable. Office in Colardeau Cottage, opposite the bank, Oakland, Md. 41-1f.

CASTORIA

for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. ARCHER, M. D., 111 So. Oxford St., Brooklyn, N. Y.

Castoria cures Colic, Constipation, Sour Stomach, Diarrhoea, Eructation, Kills Worms, gives sleep, and promotes digestion, Without injurious medication.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. Few are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTIN, D. D., New York City.

"For several years I have recommended your 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results." EDWIN F. PARDEE, M. D., 128th Street and 7th Ave., New York City.

THE CASTORIA COMPANY, 17 MURRAY STREET, NEW YORK CITY.

MERCHANT TAILORING.

Re-opening, the Tailor has returned to Oakland and reopened his Tailoring Establishment, and will be pleased to serve the people of the town and vicinity at exceedingly low prices.

He will make Suits of all wool goods, fit guaranteed, for \$15 and up.

He has also a large and complete stock of ready-made clothing which he will alter to fit and make to order for the alteration. Give him an early call and judge for yourselves. He will also in short time have a full line of shoes and hats for sale. Yours respectfully,

B. SAVAGE, Oakland and 3d Streets

\$9,000.00

WORTH OF

GOODS AT COST

To Make Room for Spring and Summer Stock.

There is such a thing as having too many goods, so we have decided to sacrifice our entire stock of

DRY GOODS, SHOES, CLOTHING, NOTIONS, Etc., AT ONCE!

This throws thousands of dollars worth of as desirable goods as were ever brought to this vicinity into the hands of the people at first cost. We intend to make room for our new stock and won't fool all spring about it.

Will go in the slaughter mill with the balance. Now is the time to load up with Muslins, Calicoes, Gingham, Canton and Woolen Flannels, Table Damask, Towels, etc.

SHOES Men's, Women's and Children's go in. Don't listen to what you hear, but drop in and see for yourselves, and above all things see prices in

The Clothing Department.

It will be a revelation to you. Men's and boys' suits for less than cost. Drop in and see. It will pay you to look through the stock and learn prices in

The Notion Department,

where thousands of useful articles at first cost may be found. The stock must move at once as the time is coming to put in the new stock. The reduction in the price of Dress Goods will be startling. You will be enabled to secure Fine Woolen Fabrics at the usual price of Cotton and Worsted—almost as low as calicoes.

Auction Every Saturday Until Stock is Reduced.

The auction sales will be under the management of Mr. John Shartzer, who is now in the east looking up bargains and will return with a fine line of Silks, the Latest Novelties, Carpets, Mattings and Oilcloths.

WE ARE SELLING GOODS AT COST NOW.

Our first auction will be held on Saturday, March 24, beginning at 11 o'clock a. m., to which all are cordially invited. Very respectfully yours,

SINCELL BROS.

PHOTOGRAPHED.

How a Camera Spoiled a Rogue's Noat Plans.

Every room in Harley Hall was occupied; omnibuses, broughams and luggage cart had been to and from the station so often that Mr. Blunder, the head of the stable department, had been in the habit of mounting something not very complimentary about people who went about with "trunks as big as haystacks," and who expected to find "carriages and horses waiting for 'em everywhere to drag 'em up the hills."

Among the latest arrivals were two young men who were as unlike each other in every respect as two young men could be. Gilbert Hurst was a barrister, whose father owned a certain number of acres of land in the country.

Gilbert was doing fairly well at the bar and was a steady, right-minded young man, with a pair of honest blue eyes and a pair of honest gray eyes that told the story of a frank and honest nature. John Beasley, his companion, was tall, narrow shouldered, well groomed and very rich.

Mothers smiled on John Beasley, but John Beasley mostly smiled (when he had the chance) on a certain enterprising widow at South Kensington.

As Gilbert entered the drawing-room his heart gave a mighty leap when he saw that Dorothy Lae, whom he had been for two years desperately in love with, was helping Lady Harley with the distribution of bouquets. He had met Dorothy often in London, and to make her his wife was the cherished dream of his life.

John saw her, too. His heart gave no leap—it was not of the leaping kind, but he thought he had never seen her to such advantage as now, as she stood in the soft light of the shaded lamps, her dark red dress edged with sable at the throat and wrists, fitting her to perfection and showing a every curve of her graceful figure. John promptly rushed into conversation with a Miss Green, who was among the guests assembled, and who was favored by fortune to the extent of five thousand pounds sterling a year.

The next morning he felt a glow of satisfaction when his servant opened the shutters of his bedroom and his eye lighted on the portrait of Dorothy Lae, which he would "make the running" with Miss Green, with a view to matrimony and the possession of five thousand a year, at the same time amusing himself with Dorothy, whose looks pleased him mightily; then, that he would write to the South Kensington widow, omitting in his letter any mention of either Dorothy or Miss Green.

He uttered himself with great ease in shooting clothes that were a great deal too new, and not a suspicion of scent hung about him as he walked, with a self-satisfied air, into the breakfast-room.

He cast a sharp and critical eye over Gilbert, hoping to find that want of means or want of taste would betray themselves, but not a fault could be found with the shooting suit, that looked worn, but was well worn, and John realized, as he looked, that there was an indescribable something about the wearer that he (John) could not arrive at.

He played his cards very well, he thought, during the days that followed—days in which Gilbert had plenty of opportunities for finding himself with a bad headache as he watched John making secret love to the girl he cared for so much.

The men started early one morning for an outlying covert that was generally supposed to produce rookets and that was kept as a bone bonche for the end of the week's shoot. The ladies were to drive out to lunch, and Dorothy and Miss Green, who were rival photographers, were to send their cameras out in the luncheon carts.

Dorothy and Miss Green came out before lunch to a table where they were to see a drive down in the low ground. As the guns were placed behind a high, straggling hedge John was sorely tempted to ask Dorothy to stand by him to witness his skill and prowess, but prudence conquered, and Miss Green was selected as his companion.

"Will you stand by me, Miss Lane?" asked Gilbert. "I am afraid you will not see any brilliant shooting, but I will do my best. Let me unroll your waterproof and I can make you a comfortable seat here in these dry leaves and you will be sheltered from the wind."

"I am so afraid," said Dorothy, scanning the sky, that had become somewhat overcast since morning, "that it will be too dark for photography, and I want so to get a group; it is getting late, too, and the heaters seem a long time getting into line." She knelt down in the leaves that carpeted the side of the hedge and peered through a small opening.

"Oh, I can see them now quite plainly. Just look—they are down, the osiers, and will soon be here."

Gilbert knelt by her side and held back some brambles that had intercepted his view, his heart beating furiously and his hands trembling as he found his face so dangerously near to Dorothy's.

A sudden peal of laughter and John Beasley's voice calling out: "Are you saying your prayers?" brought Gilbert to his feet and the blood to Dorothy's face.

Angry words sprang to his lips, but he was silenced by an appeal from a pair of very soft brown eyes, and turning toward Dorothy he said:

"Yes, I was kneeling by your side; can't you guess what?"

"Look out, sir, there's a lot of duck coming over." This from the loader, who had been munching twigs in a ruminative manner.

Gilbert picked up his gun, but it was too late, and he knew that Beasley

would have another chance of saying something unpleasant about his shooting. After that there was no time for talking; it was hot work for ten minutes and a big mixed bag was the result.

Before lunch was over Dorothy settled to go home by a returning dog cart that had come out with a fresh supply of cartridges, and as she was leaving she saw Miss Green preparing her camera for action, a young man in attendance busy with the tripod and the legs.

John helped her with her wraps, saying as he did so:

"I am sorry you are going home, Miss Lane, I wanted you to be in the group," and then, in a lower voice: "You know very well I shall not care to have a copy unless you are in it."

"Never mind, Miss Green will be there," said Dorothy, as she clambered up into the dog cart.

John made a pretense of settling the rug round her feet and whispered: "Thank goodness, she will be busy with her camera; I have had enough of Miss Green's society for one day, and you know very well that at all times I infinitely prefer yours."

Seeing a doubling look in Dorothy's face, he added: "You do not believe it, Dorothy, but it is true. I swear I will not go near Miss Green again to-day."

The cart moved off, and Dorothy had plenty to think of during her homeward drive. She knew very well that she had cared for Gilbert Hurst, and that she had cared for him ever since she met him on the river two years ago; they had often met since, and now had been for a week together under the same roof. Surely those honest gray eyes could not lie, yet why did he so often avoid her and why did he always make way for John Beasley whenever he tried to monopolize her society?

Yet, surely he must have meant something just now—or was he only amusing himself, and did John really care more for her than Gilbert did? After dinner that evening she was playing some dreamy German music that seemed to have a particularly soothing effect on Lord Harley, who was half buried and half asleep in a big arm chair before the fire, when John came up and leaned over her shoulder till his lips almost touched her hair, and said in a low voice:

"I kept my word this afternoon; what is to be my reward?"

"That you shall be allowed to turn over the next two pages of music for me," she answered. "And this, after," she added, nodding toward the gardenia that she had left with her gloves and fan on the piano.

Gilbert's jealous ears heard the answer, and he went off with rage in his heart.

The following day it rained in torrents. Miss Green and several of the guests were leaving, and Dorothy went off to the dark room at the far end of the house to develop some negatives that she had taken of a ruined castle in the neighborhood.

She found all in order as she had left it, and soon had everything ready for business, developing solution, alum, hypo, all in their respective places, and red lamp lighted, the matches close at hand and the candle blown out. She reached up to the shelf for the slide, took out the negative and slipped it quickly into the developing tray for the preliminary wash and then poured the solution over its surface.

She gently rocked the tray to and fro in the dim red light and saw the high lights make their appearance one by one.

She searched in vain for the turrets of the ruined castle and for the high belt of trees on the hill beyond, and began to fear she had taken two pictures on the same plate. Presently odd shapes and strange figures began to appear, which, after a little fresh developer had been poured over them, took the form of folding chairs and benches, and Dorothy saw the shooting party at lunch before her.

Her hand groped about for the match box, but the thought struck her that the negative was not hers and must not be wasted, so it was left in the alum for a few minutes and after a wash was left in the hypo bath, but her quick eyes had seen enough to tell her that John Beasley had lied to her, for, fixed in her memory as surely as it was now being fixed on the plate, was the picture of that young man sitting by the side of Miss Green, his head turned toward her, his hand almost touching hers.

She sat thinking for some time, and was only roused by hearing footsteps in the passage, followed by a knock at the door.

"Yes, who is it?"

"It is I," answered Gilbert's voice. "They are trying some new music in the drawing-room and Lady Harley wants your help. May I come in?"

"Yes, the negative is fixed now, the light will not hurt it. You can come in."

Gilbert groped his way into the room and found Dorothy seated at the developing table. "May I see the photograph you have taken? Has the castle come out well?"

She lifted the plate from under the running water tap and held it up before the red lamp for him to see. She turned her head, and their eyes met for a second as he leaned over her shoulder, but before he could say a word of surprise there was a sudden flare, a snap and a gurgling sound, and with one wild flicker the lamp went out and they were in darkness.

"Where is the door? I know I shall tumble over something and do some damage. Will you lead me? You know the room better than I do."

A small soft hand was slipped into his, and though Dorothy did know that room quite well they were a very long time finding the door—but then, you see, the room was very dark.—London World.

—It is roughly estimated that railroads have effected a saving to the public of ten per cent. per annum on the cost of construction.

—The best patronized railroad in the United States is the New York Elevated, which carries 100,000,000 passengers every year.

The Old, Old Story.

There had been a death in the family, and two of the members were discussing the arrangements.

"I suppose we had better have the funeral on Thursday," said one.

"Oh, we can't," replied the other, without thinking; "that is Bridget's day out."—Harper's Bazar.

A VICTIM OF HARD TIMES.

"When I last met you, if I am not mistaken, you had an exceedingly heavy beard."

"Just so—just so; had it cut off four months ago and made into a shoulder-cape for my wife. See?"—Harper's Bazar.

A Disinterested Business Tip.

Mrs. Hyflye—George, dear, what you are having money troubles I ought to tell you that I learned to-day why your rival Soapem's credit has suddenly become so good.

Mrs. Hyflye—Why?

Mrs. Hyflye—I overheard some one remark that Soapem's finances must be all right because his wife was wearing such elegant new hats and dresses.—Chicago Record.

Unfortunate Fortune.

Clergyman—But what brought you to this condition? Was it drink?

Tramp—Nope!

Clergyman—Gambling?

Tramp—Well, in a sort of way.

Clergyman—What sort of a way?

Tramp—Well, I bet on a horse in a race for the first time in my life.

Clergyman—Ah! I see! It lost!

Tramp—O, no! It won't—Hullo.

Forenight.

"It was really clever of me to bring my umbrella, for if it had rained I would have been drenched."—Hullo.

NATURAL ENOUGH.

First Fowl—I'm surprised to see that you're afraid of a cog that's chained.

Second Fowl—Well, I can't help being chicken-hearted.—Truth.

A Shade Too Yielding.

Blinks—Why so gloomy?

Jinks—My wife let me have the last word in an argument this morning.

"That shows that she is going to do as she pleases, anyhow."—N. Y. Weekly.

A Great Mistake.

"I have just had my photograph taken."

"Ah, indeed."

"Yes, I have always had my photograph taken once a year."

"Dear me, what a lot of pictures you must have."—Texas Sittings.

Her Joke.

Heiress—There's a man after my own heart.

Papa—Who?

Heiress—The count. But he won't get it!—N. Y. World.

Nothing to Talk About.

Bingo—Do you do much talking at the woman's guild you've joined?

Mrs. Bingo (sadly)—No. All the women in the neighborhood belong to it.—Judge.

See Him Later.

He seized her hand ecstatically: "Fair maid whom I adore, Queen of my soul, my life, my hope, be mine forever more!"

She gazed into his humid eyes. So soon to die with sorrow: "I'll ask my husband, sir," she said—"We'll let you know to-morrow."—Kansas City Journal.

THE PRINCIPAL THING.

"Do you and your husband attend many of the symphony concerts?"

"No. My husband knows absolutely nothing about ladies' toilets."—Flegende Blätter.

Not a Question of "Let."

Singleman—Do you let your wife have the last word?

Bendlet—Do I let her? H'm! It's easy to tell that she knows nothing of married life.—N. Y. Press.

Very True.

"Now," said the storekeeper as he gazed proudly at the lettering on his new brass sign, "that's what I call polished English."—Washington Star.

An Affecting Tale.

Barber—Poor Jim has been sent to an insane asylum.

Victim (in chair)—Who's Jim?

"Jim is my twin brother, sir. Jim has long been broodin' over the hard times an' I suppose he finally got crazy."

"Hum! Not unlikely."

"Yes, he and me has worked side by side for years and we were so alike we couldn't tell each other apart. We both brooded a good deal, too. No money in this business anymore."

"What's the matter with it?"

"Prices too low. Unless a customer takes a shampoo or something it doesn't pay to shave or hair-cut. Poor Jim! I caught him trying to cut a customer's throat because he refused a shampoo, and so I had to have the poor fellow locked up. Makes me very melancholy. Sometimes I feel sorry I didn't let him slash all he wanted to. It might have saved his reason. Shampoo, sir?"

"Yes, sir."—N. Y. Weekly.

Ways of Trade.

A lady who had evidently been young a few years since stepped into Gant's the other day and asked the price of cream puffs.

"Three cents each," replied the maid in waiting.

"Two for five?"

"No."

"Well, that's a queer way of selling things!" remarked the possible customer. She seemed to hesitate a minute, then ordered one cream puff for a younger companion, apparently a relative, and watched severely while he ate it, after which she took a silent and dispossessed departure.—Judge.

She Objected.

"Mr. Courty asked me to marry him last night," she blushing told her mother.

"And what did you tell him?"

"I told him to ask you."

"Ask me?" echoed the startled parent. "Why, Mary, surely you wouldn't have you dear old mother commit bigamy, would you?"—Atlanta Constitution.

A Maiden's Sarcasm.

"I came to see, Miss Sprite, if you would look more favorably upon my suit to-day."

Miss Sprite (adjusting her eyeglasses and scrutinizing him from head to foot)—Yes, sir, I do. I think it looks better than the old one you wore the last time you were here.—Demorest's Magazine.

A Warning.

Little Johnny—Oh, mamma, folks say Tommy Dodd's back is broke.

Mamma—Horrors! How did it happen?

Little Johnny—I didn't hear, but Tommy told me only last week that his mamma was just as fond of spankin' as you are.—Good News.

Sure Enough.

"He pretends to be an accomplished linguist, but you should hear him murder Latin."

"I shouldn't think he would be able to murder Latin."

"Why not?"

"It is a language that is already dead."—N. Y. Press.

The Spirit of the Age.

The Minister—Mr. Robinson wishes to present a window to the church. But I don't like the inscription he wishes placed on it.

The Minister's Wife—What is it?

The Minister—"Presented by Robinson, Jones & Co.; Dry Goods."—Puck.

Merely an Investment.

Hones—What have you raised that young bookkeeper's salary for? Don't you know that the young spendthrift squanders all his salary giving presents to some girl he's infatuated with?

Hones—Of course I do. The girl's my daughter.—Chicago Record.

Why He Staid.

Mrs. Blinks—Why do you stay at the club until two o'clock in the morning? Just tell me that, will you?

Mr. Blinks—So you'll be too sleepy to talk very long about it, my dear—Puck.

Not a Recent Discovery.

"Why do you turn the lamp down low when sitting with your head at night?"

The maid replied, with face aglow: "Why, love is blind and being so thrives just as well without a light."—N. Y. Press.

HIS ADVANCES SPURNED.

Capt. Rectorious—Excuse me, but won't you have a bit of this delicious omelette?

Miss Nannie Goat—No, thank you! I never chew gum.—Puck.

Serves Him Right.

"Have you got any stale bread?" asked Johnny Fizzlepop, sticking his head into a baker's shop up in Harlem.

"Yes, I have five or six loaves."

"Serves you right. Why didn't you sell 'em while they were fresh?"—Texas Sittings.

Grithful Perseverance.

Nell—How do you know she is in love with Jack?

Belle—Because she told me he was perfectly horrid, and if she were in my place she wouldn't have anything to do with him.—Philadelphia Record.

His Record Clear.

Old Lady—My friend, are you a Christian?

Reggar—Well, mum, no one has ever accused me of workin' on Sunday.—N. Y. Weekly.

Take no Substitute for Royal Baking Powder.

It is Absolutely Pure.

All others contain alum or ammonia.

Beware of Ointments for Catarrh That Contain Mercury.

As mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous surfaces. Such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is ten fold to the good you can possibly derive from them. Hall's Catarrh Cure manufactured by F. J. Cheney & Co., Toledo, O., contains no mercury, and is taken internally, acting directly upon the blood and mucous surfaces of the system. In buying Hall's Catarrh Cure be sure you get the genuine. It is taken internally, and made in Toledo, Ohio, by F. J. Cheney & Co. Testimonials free.

Sold by Druggists, price 75c. per bottle. Hall's Family Pills, 25 cents.

The boy who is learning to skate generally gets a number of head marks before his lesson is through with.

Signs of Spring.

If that tired feeling, the forerunner of Spring, has told you that your system needs strengthening, do not take medicine, but go at once to Hot Springs, Va. The waters are like magic. The hotels are strictly first class, the scenery sublime, and the \$150,000 bath house is unsurpassed in the world. Every known description of baths being administered.

Take the F. V. V. Limited, over the C. & O. R. R. at Cincinnati at night, and reach Hot Springs the next morning. For pamphlet address C. B. Ryan, A. G. P. A., C. & O. R. R., Cincinnati, Ohio.

"He is your closest friend!" "Yes, he never lends a cent."—Harvard Lampoon.

Abraham Lincoln Stories.

An illustrated book, unmarred by advertising, containing stories and anecdotes told by Abraham Lincoln, many heretofore unpublished, will be sent free to every person sending his or her address to the Lincoln Tea Co., Ft. Wayne, Ind.

"Appearances are very deceptive," remarked the terror. "Yes," replied the prima donna, "especially farwell appearances."—Washington Star.

For Throat Diseases, Coughs, Colds, etc., effective relief is found in the use of "Brown's Bronchial Troches." Price 25 cts.

"Does Flaggson practice what he preaches?" "Great Caesar! No, he never gets through preaching."—Chicago Inter Ocean.

OUR WASHINGTON LETTER.
(From our Washington correspondent.)
WASHINGTON, March 3, 1894.
The Republicans in the House have it in their power, if so disposed, to allow the House to pass the Bland bill over Mr. Cleveland's veto, when the silver men to do it. There is little probability that the Republicans will do this, but the fact that they can do it is having such a disturbing effect upon the administration Democrats that they are talking among themselves of filibustering to prevent a veto when Mr. Bland makes his motion to pass the bill over the veto. There are a few Republicans who will vote for the motion anyway, and all that would be necessary for it to receive more than the necessary two-thirds vote would be for the other Republicans to abstain from voting, as more than two-thirds of the Democrats will vote for the motion. The out and out silver men are not, however, anxious to see the Bland bill passed over the veto. They prefer it to be out of the way, so that they will be free to try to pass a free coinage bill.

The Democratic Senators privately admit that they are not confident of passing the tariff bill, and the wildest man no longer talks of passing it by the first of May. There is much gossip of an attempt being made to attach a free coinage amendment to the bill, but even if the attempt is to be made, which is not certain, it cannot be done until the bill reached the amendment stage, which is sometime off.

Democratic Senators positively refused to grant a hearing to a delegation of New England women mill-workers, who came to Washington to protest against the injustice of the tariff bill in dealing with matters in which the mill-workers are vitally interested, but they got a hearing—Republican Senators gave it to them—and their objections to the bill will be stated to the Senate and to the country by Republican Senators during the debate on the tariff bill, which opened to-day, according to program.

These Democratic Congressmen who have been backing other applicants for the position are as mad over the announcement that the "sex" rule is again to be violated, and Mr. Thomas E. Benedict, who was Public Printer under the first Cleveland administration, is to again have that office, as they have again all along because Hon. Frank W. Palmer, admittedly one of the best Public Printers the country ever had, has not only been allowed to keep the office, but was actually begged to keep it until Mr. Cleveland got ready to select his Democratic successor. One of the principal things remembered by Republicans against Mr. Benedict's previous administration of the office is the large number of old soldiers who were dismissed by him.

The fight in the House to give the seat now held by Representative Joy, of Mo., to a Democratic contestant who was not elected, which has been waged for more than a week without success, notwithstanding since very authoritative acts of Speaker Crisp, has brought out the fact that there are a score or more of Democrats in the House who are too conscientious to take part in the theft of the seat merely to add one more to a Democratic majority of ninety. But the act will doubtless be consummated this week, in spite of the protests of Republicans and the nonvoting of conscientious Democrats, as the absentees are being arrested and brought in and a voting Democratic quorum will probably be obtained.

It is just now a little puzzling to know why Secretary Carlisle should have considered it necessary to go to New York to assure the bankers of that city that Mr. Cleveland would make no concessions to the free silver men in Congress. Why was not the veto message considered assurance enough? Some of the silver men express the fear that the administration is making arrangements for another bond issue, similar to the last one. Be that as it will, it may be set down as reasonably certain that Congress will not follow Mr. Cleveland's recommendation by authorizing a bond issue.

Senator Voorhees was a little staggered the other day when confronted by the Democratic Governor of Indiana, and his staff, who had come to Washington to protest against the tariff bill as it now stands. He couldn't turn them down, like he did the New England women, so they had a short but sharp word battle, the Senator and the Governor being the chief fighters. Governor Matthews, who is understood to be a candidate for Voorhees's seat in the Senate, told the Senator that the Indiana Democrats demanded a restoration of the original free list of the Wilson bill. Voorhees denied it, and said that Matthews had been trying to work up Democratic opposition to the bill, hoping to use it to advance his Senatorial aspirations. Matthews gave him to understand that the matter would figure in the Senatorial election.

FINANCIAL REVIEW.
Henry Clews's Weekly Letter on the Business Outlook.
New York, March 31.—The past week has shown distinct symptoms of improvement in the tone of the stock market. There has been a more settled feeling of confidence; a broader interest has been developed in both the speculative and investment departments; transactions have become more general outside the mercantile "industrial;" and some of the prominent "bears" have turned over the "long" side of the market.

In a general sense, this improvement is due to the many influences that have for some time been working towards a better condition of business, and it is to be regarded as one of those spurts of cautious hope which mark the stages of the steady process of return towards a normal condition of affairs, and which are preparing the way to a really active upward movement in values.

There is, however, one special cause for this improved feeling, which is quite important. The general confidence in the President vetoing the signiorage bill has had a notable effect in Europe. The main fact which has kept London uninterested in American investments during a very marked recovery in other securities on that market, has been a fixed apprehension lest there might be more or less recantation of the decided anti-silver policy indicated in the late suspension of silver purchases. That is the one point on which the European markets are sensitive and wary towards our corporate issues; and that distrust has been exhibited in an almost total cessation of foreign demand for our stocks and bonds for a considerable time past.

Even the Paris Bourse seems to have delayed its contemplated admission of "Americans" to its own principal on this account. What has most concerned these foreign centers is chiefly the question as to what may be the President's attitude on the silver issue, for they have felt that, if he could be trusted to prove faithful to the policy of the repeal act, no serious harm could come for the next three years, which would cover these contingencies far enough ahead to serve all present purposes. The assurance sent across the Atlantic that the President could be depended upon to veto the Bland bill, have had the effect of bringing large London orders for bonds and stocks during the past week, thereby stopping the export of gold. It is reasonably argued that if such important transactions have been made in anticipation of the President's veto, the demand is likely to prove much larger when the expectation is confirmed by the fact.

The matter of the possible London demand is more important than might be supposed at first sight. The continued increase in British trade and the active speculation on the London exchange are accepted as clear evidence of a new era of confidence and enterprise in Great Britain. The suspension of new creations of corporate capital for the last two or three years has resulted in a real scarcity of investments, and prices of certain kind of securities are becoming abnormally high. Alert bankers and promoters are on the lookout first for bargains in existing issues, and next for opportunities for new enterprises. London agents are now in this country prospecting for business of this kind. They are likely to find plenty of chances growing out of the very marked curtailment of railroad construction during the last four or five years. Schemes of that character are now in process of formation; and, at a later stage, European capital is likely to have its opportunity for participating in their fruition. Evidence as yet beneath the surface indicates that, as soon as pending obstructive legislation is out of the way and business has resumed its normal course there will be a launching of new enterprises that will give employment to the large amount of now idle home capital and at the same time attract co-operation from foreign money centers. It therefore would not be surprising if twelve months hence we find the United States and Europe in the midst of a marked revival of investment and speculation. Wall street begins to discover the dim outlines of this future. The prospect is contributing to a more hopeful, not to say sanguine, feeling; and as the outworkings of these tendencies become gradually more apparent, the spirit of speculation will develop and values will correspondingly advance.

The President's veto of the Bland bill is an invaluable gain toward the recovery of confidence. It is not only a reaffirmation of the conservative monetary policy written largely on the face of the repeal act, but it is an assurance that the policy is safe for the remaining three years of the President's tenure of office. And this is an immense assurance; for, if the silver craze can be held in restraint for three years, ways will be found for neutralizing it subsequently, if indeed it does not expire from its own inherent weakness. Senator Stewart's introduction of a free coinage bill, though annoying, is not to be regarded in a monetary sense. It may run into causing obstructive confusion of other pending legislation, for the completion of which the business interests are impatiently waiting; but no one better knows than Senator Stewart that his scheme would be quashed by the President, and that it cannot be carried over his veto. It is simply a new display of the reckless and exasperating tactics by which the silver faction seeks to worry the country into concessions which it is resolved never to grant. Whatever annoyance therefore the senator may inflict he can only share another failure.

COMMISSIONERS' MEETING.
OFFICE OF THE
GARRETT COUNTY COMMISSIONERS
HARRISBURG, Md., March 3.
The Commissioners of Garrett County will meet at their office in Harrisburg, Md., on Thursday, April 10, 1894, for the purpose of making the Annual Levy for 1894.
All persons holding orders passed by the board or any kind of bond from the board must have them presented in legal form, certified to by the Clerk, Justice of the Peace, or any other officer of the board, on or before the 10th of April, 1894, otherwise they may be extended from the benefit of the same in law.
By order of the Board,
J. S. MEYERS, Clerk.

CAUTION.—If a dealer offers W. L. Douglas's shoes at a reduced price, or even at cost, be careful. They are not the same as the ones you have seen in the store. They are not the same as the ones you have seen in the store. They are not the same as the ones you have seen in the store.

HENRY CLEWS'S WEEKLY LETTER.
NEW YORK, March 31.
The past week has shown distinct symptoms of improvement in the tone of the stock market. There has been a more settled feeling of confidence; a broader interest has been developed in both the speculative and investment departments; transactions have become more general outside the mercantile "industrial;" and some of the prominent "bears" have turned over the "long" side of the market.

Dr. A. S. Todd's
Anti-Bilious Pills
are good for sick headache, constipation, biliousness, indigestion, flatulence, and all the ailments of the stomach and bowels. They are purely vegetable, perfectly safe, and give immediate relief. 25 cents a bottle, and your money back if not satisfied.

Laughlin's
Infant Cordial
helps babies over the critical teething period, soothes and softens the gums, controls the bowels and gives rest to both child and mother. It will also cure summer complaint, dysentery, diarrhea, and all the ailments of the infant. 25 cents a bottle, and your money back if not satisfied.

Laughlin's
Worm Syrup
drives worms, which are not only bad in themselves, but which induce and aggravate other diseases. Laughlin's Syrup is purely vegetable, perfectly safe, and gives immediate relief. 25 cents a bottle, and your money back if not satisfied.

B. & O. R. R. Time-Table.
The following time table on the B. & O. went into effect on Sunday, Nov. 19th, 1893. Trains now leave Oakland as follows:

GOING WEST.

THE REPUBLICAN.

VOLUME 18.

OAKLAND, MD. THURSDAY, APRIL 12, 1894

NUMBER 5.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Mrs. D. E. Offutt is in Baltimore visiting friends.

Mr. William Jenkins, of Blaine, was here yesterday.

Cabinets, \$1.50 per dozen. LOAR & CO.

Seeds by ounce, pound, pint and peck at H. E. Felt's Grocery.

Mr. M. L. Scott has been very seriously ill but is convalescing.

Mr. William Newman returned from Baltimore Sunday evening.

Mr. Thomas J. Peddicord was in Kingwood last Thursday attending court.

Mrs. C. Felt has gone to Baltimore to spend a week or two with friends.

Miss Laura Matthews went to Baltimore Thursday last on the excursion.

Mr. M. S. Wolf, of near Sunnyside, was in the city Tuesday on business.

Mr. W. A. Smith, of Hoyer, smiled in on this office last Thursday afternoon.

If you have new ground to break up try one of A. D. Naylor's heavy iron plows. 2-3t

A. D. Naylor has a fine line of buggies on hand. Price and terms to suit buyer. 2-3t

Mr. Frank Rathbun, of this office, was laid up with illness Friday and Saturday of last week.

Mr. George Loar, of Grafton, was in Oakland two or three days this week on a visit to his parents.

Mr. J. D. Everts, of Bayard, was in the city Monday and paid his respects to THE REPUBLICAN.

The members of the Oakland band are preparing to give open-air concerts one night each week.

Mr. William Hopkins, of Michigan, is visiting the family of Mr. Robert Porter on Second street.

Full figure cabinets, \$1.50 per dozen, and other styles proportionately low. LOAR & CO.

Miss Martha Hinebaugh accompanied Mrs. Mahlon Hinebaugh to Baltimore last Thursday morning.

The Oakland Candy Company has erected a shooting gallery adjoining their store on Railroad street.

The Rev. L. A. Rudisill, of the Park, will preach in St. Paul's church next Sunday morning and evening.

Hon. A. Frederick George, of Swanton, was here on Monday and made this office a very pleasant social call.

Mr. W. H. Malette, who has been out on the road traveling for the Mavers Drug Company, has returned to Oakland.

Dr. M. C. Hinebaugh has rented the Lutheran parsonage instead of the Reynolds' house as stated in this paper last week.

The County Commissioners have been in session this week engaged in making the annual levy and transacting routine business.

Mrs. John H. Riley, of Elkins, W. Va., who was visiting friends in and near Oakland for some time, returned home last Thursday.

Send your orders for job printing to this office where it will be executed in the best manner and at prices consistent with first-class work.

Mr. M. E. Stoddard, of White Haven, Pa., have moved to Oakland and is occupying the residence of Mr. G. W. Delawder on Second street.

Messrs. Chas. O. and T. J. Wilt, of Bittering, were in the city Tuesday. While in town these two gentlemen subscribed for THE REPUBLICAN.

Miss Alice Murphy, lately of Baltimore, will start a millinery store at Deer Park about April 21, 1894. A share of the public patronage is solicited. 5-4t

For sale cheap—A Columbia Safety Bicycle in first class condition except tires, which are slightly worn. Apply to Samuel Lawton, Oakland, Md. 4-3t

Col. Philip W. Avirett of Cumberland will shortly wed Miss May Goodwin of Waterville, N. Y. The bride-elect is a niece of Ex-Secretary William C. Whitney.

Lucy Stine, daughter of D. H. Stine, of Morgantown, W. Va., was cheered on by a crowd while she cowered Kit Pastories for alleged defamatory remarks concerning her.

Mrs. Eli Williams, of Oakland, Md., is visiting her mother, Mrs. John Hansell. She has been ill since October and is still under medical treatment. Frostburg Journal.

Rev. George W. Kepler has been granted a leave of absence by the quarterly conference of this district and has gone on a visit of about a week to his mother, who lives in Cincinnati.

All members of the Uniform Rank Knights of Pythias desiring to retain their membership are requested to assemble at the armory on next Thursday night for inspection.

Dr. A. L. Wagner has located in Oakland and will practice both in town or country. Calls promptly answered either day or night. Office, one door west of St. Paul's M. E. church. 8-1yt

Mr. William Grove, of District No. 4, was in the city Tuesday and made this office a very pleasant call, bringing with him three gentlemen who became subscribers to THE REPUBLICAN. Visitors like the above are doubly welcome.

The ladies of the Lutheran Sunday school gave an oyster supper on Friday and Saturday nights of last week. The proceeds amounted to about thirty dollars and will be applied towards purchasing an organ for the Sunday school room.

A broken wheel on a freight train caused a very considerable wreck on the seventeen-mile grade last Thursday morning just below Everett's tunnel. A number of cars were piled up and travel delayed six or eight hours. No one was killed or seriously injured.

Rev. Dr. Coombs, of Washington, D. C., preached two excellent sermons to large congregations in St. Mark's church Sunday. The gentleman returned to Washington Sunday night, but will again fill the pulpit in the above church one week from next Sabbath.

I recommend Chamberlain's Pain Balm for rheumatism, lame back, sprains and swelling. There is no better liniment made. I have sold over 100 bottles of it this year and all were pleased who used it. J. F. Pierson, druggist, South Chicago, Ill. It is for sale by Oakland Druggists.

At the preliminary hearing on last Saturday before Justice Wm. D. Hoyer, Joseph Galloway, colored, who was arrested a few days ago charged with raping a white woman, was discharged from the custody of the sheriff. The testimony was considered insufficient to hold him for the grand jury.

It will be an agreeable surprise to persons subject to attacks of bilious colic to learn that prompt relief may be had by taking Chamberlain's Colic, Cholera and Diarrhoea Remedy. In many instances the attack may be prevented by taking this remedy as soon as the first symptoms of the disease appears. 25 and 50 cent bottles for sale by Oakland Druggists.

We acknowledge a very pleasant visit from Mr. J. Am. Martin, clerk of the County Court of Preston county, W. Va., on last Thursday afternoon. Mr. Martin was en route to Roanoke, Va., to accompany his daughter home from school in that city, and was delayed in his journey on account of the wreck on the seventeen-mile grade.

Our better halves say they could not keep house without Chamberlain's Cough Remedy. It is used in more than half the homes in Leeds, Sims Bros., Leeds, Iowa. This shows the esteem in which that remedy is held where it has been sold for years and is well known. Mothers have learned that there is nothing so good for colds, croup and whooping cough, that it cures these ailments quickly and permanently, and that it is pleasant and safe for the children to take. 25 and 50 cent bottles for sale by Oakland druggists.

"W" Writes From New Jersey.

NEWARK, April 5, 1894.

To the Editor of The Republican.

I have been out now four days looking up trade but so far without an order on my book. There did seem to be some movement in spruce, but I can find no one that wants to buy.

During all the years that the Republicans under Harrison and under the operations of the McKinley bill were driving the country to wreck and ruin if I had offered lumber within two dollars per thousand of what I am trying to get for it now I could have sold my entire list; but the angel of Reform with a big R overshadowed the land, and a deathly quiet pervades the centres of trade which a few months ago were all life and animation. If Daniel Webster Voorhees and the rest of the patriots of that ilk had made public declaration of their purpose and intent to destroy or cripple the industries of the country, to shut up the factories, the mills and the shops, to reduce the wages of labor or to stop it entirely the voters who hoped, and possibly very foolishly believed, they would better their condition would have said: "Very good, gentlemen; we have no further use for you, your services are cordially invited to step 'down and out' and give your place to men who are willing to legislate for the good of their own country."

The time has gone by when the masses can be so controlled by their party prejudices that they will willingly vote against their individual interests, and when the southern brigadiers discover that they can no longer control the voters by the prejudices engendered during the time they were striving in another way to destroy the Government there will be a halt, and an attempt to ride into power on the prejudices and the ignorance of a deluded people.

By the persistent declarations of party leaders and the misrepresentation of our unscrupulous party press the voters were made to believe that protection was for the benefit of the manufacturer and not of the laborer and they accordingly voted the very men into power that they don't want.

But thirteen months of stagnation in which wages have been greatly reduced, in which no new enterprise has been undertaken; thirteen months of distress, of doubt and uncertainty, in which a very great deal of the work done has been done at a loss to the manufacturer; thirteen months of masterly incapacity and floundering at Washington have convinced the people of the mistake they made by voting into power in 1892 the worst enemies which the business interests of the country ever had.

The people are now brought face to face with the problem of free trade—free trade in lumber, free trade in wool, and reduced protection on every other product, and they begin to realize as never before what this cutting down of duties means to them—it begins to have a personal significance, and they at last begin to comprehend it.

The recent elections testify to this. Last fall in New York, Ohio and elsewhere, the party was condemned, and more recently in Pennsylvania, when Galusha A. Crow, the Republican candidate for Congressman-at-large, received nearly two hundred thousand majority. Still later, in the spring elections when the Republicans from the plains of Dakota to the Atlantic swept everything before them, and only yesterday when little Rhode Island scored the biggest Republican majority of recent years, the "condemnation" of the party in power is so emphatic and unmistakable that he who runs may read.

The handwriting is plain and unequivocal and whether Mr. Wilson, Mr. Voorhees & Co. will admit it or not they and their policy stand condemned by the country to-day and it is rank treason to the will of the people to go on in the prosecution of a policy, or a theory, if you please, so emphatically condemned by the voice of the people.

I heard the remark more than once to-day from New York lumber dealers, "we expect to buy spruce in cargo lots from Canada and New Brunswick very low this year and we do not care to invest at this time."

Who will it benefit? The poor man or the man of moderate means? The New York lumber dealers have an association binding themselves to not sell under certain prices

and I am told that sixty odd dealers belong to the association and there are but two who are not in it and the selling prices are not regulated and really has no relation to the purchasing price. They have the business in their own hands and free lumber simply takes two dollars per thousand out of the mill owners and eventually out of the labor which produces the lumber in Garrett county and West Virginia.

Who does it benefit? Who is it that wants free trade? It simply destroys the prosperity of our people and adds to that of our foreign competitors.

This is what we said it would do, and this is what the Democrats did and it would not do.

But Democratic prophecies and Democratic assertions always fail in dry weather, and it is getting mighty dry in the Bulah land of Democratic prospects just now. W.

The Republican Municipal Convention.

The Republican voters of the town of Oakland assembled in the council chamber on last Saturday evening at 7.30 o'clock, for the purpose of nominating a municipal ticket to be voted for on next Monday.

Col. A. G. Sturgiss was called to the chair and Mr. E. Z. Tower was made secretary of the meeting. The chairman briefly stated the object of the meeting and nominations being then in order Dr. J. Lee McComas was unanimously chosen as candidate for Mayor. The following named gentlemen were then named as candidates for City Council: Dr. Singleton, Townsend, Mr. George D. White and Mr. G. Arthur Fraley.

The proceedings of the convention were entirely harmonious and the ticket named meets with the approbations of all liberal minded Republicans.

The Citizens Municipal Convention.

Pursuant to a call issued by "committee" the following named gentlemen assembled in the council chamber on Monday evening last for the purpose of nominating a "citizens" municipal ticket. G. M. Mason, J. W. Hart, C. S. Davis, A. J. Harne, Jos. Cogley, J. D. Hamill, F. G. Hyde, L. E. Townsend, Owen Hart, E. D. Kepner, Thomas Martin, sr., J. O. Cleveland, Dr. E. H. Bartlett, J. M. Litzinger, Bruce Whorl, Ben Stemple, Joseph Martin, sr., Chas. Bosley, Mike Rice, R. C. Townsend, Ernest Townsend, Wm. Hinebaugh, sr., A. S. Teats, George Little, Rowan White, Alex. Fleckenstein, J. M. Jarboe, G. S. Hamill, E. Jamison, W. F. King, M. Boyle, G. A. Shirer and G. L. Bosley. The meeting was called to order by James D. Hamill and on motion Mr. J. M. Jarboe and Dr. E. H. Bartlett were named as chairman and secretary respectively. For Mayor Mr. G. M. Mason was nominated by Mr. Owen Hart; for City Council Mr. J. H. Smithman was nominated by Mr. J. D. Hamill; A. D. Naylor was nominated by Mr. William Hinebaugh; Mr. F. G. Hyde by Mr. Owen Hart; and Mr. R. C. Maroney by Mr. Ben Stemple. The convention then proceeded to ballot. Messrs. G. S. Davis and G. S. Hamill being appointed tellers. The ballot resulted in the election on Messrs. Hyde, Smithman and Naylor. The meeting then adjourned.

Dr. J. F. Graham, the eye specialist, will be at the Glades Hotel every Wednesday, where he can be consulted on all eye troubles. Consultation free. 5-3t

Farmers look to your interest and get reliable fertilizers and such as will suit your crops. We will give you our experience of over a quarter of a century. Just received two car loads of Pure Animal Bone and phosphate, guaranteed not a particle spurious matter in our Animal Bone fertilizer. Best for seeding down in meadow and phosphates are best for corn, oats, buckwheat, etc. Also a special fertilizer for potatoes. We are agents for good reliable companies. Will sell at lowest cash price or will take your notes for six months. Cabbage, tomato and celery plants in season. Also all kinds of flowering plants and cut flowers on hand and furnished at short notice. H. Weber & Sons, Box 57, Oakland, Md. 1-2m

Indigestion, Headache, Stomach Troubles, Biliousness, Constipation, etc., cured by Dr. J. F. Graham's Eye Specialist. 5-3t

Communicated.

To the Editor of the Republican.

As a Republican who believes in party success before individual preferment I cannot let the opportunity pass of recording my protest against the action of certain of my Republican friends of Oakland in endorsing and giving countenance to the so-called "citizens' movement" in opposition to the regularly constituted Republican municipal ticket.

With the Democrats who have enlisted in this cause I have nothing to do. If they, as a party realizing their weakness, desire to affiliate with people outside of their own organization and can thereby strengthen themselves surely such a move is good politics, but when Republicans by their actions place in jeopardy the interests of their party that is a matter far reaching in its consequences and disheartening to their party associates.

I have been unable to find a single Republican who had anything worthy of consideration to urge against the entire fitness, capability and competency of any of the gentlemen who have been named by their fellow Republicans as candidates on the ticket. I am willing at all times to grant to my fellow-citizens the utmost freedom in the matter of selecting candidates for official position, but when a ticket is named by the regular party organization without the faintest suspicion of bossism or individual dictation and when the men composing that ticket are representatives of the best elements in the party I have no hesitancy in condemning as unwise, unpatriotic and the worst form of politics to withhold from them the united support of the party. The best evidence, to my mind, that the so-called "citizens' movement" is a Democratic scheme concocted by the leaders of Oakland Democracy for the purpose of wresting our municipal government from Republican control, arises from the fact that the Democrats propose to make no nominations of their own. "Citizens' movement" is a misnomer as our misguided Republican friends will find should that ticket be successful. Another thing which calls for condemnation is the fact that a majority of those Republicans who have joined with the Democracy in this movement have either in themselves or their personal friends or relatives been the recipients of the united support of the Republicans of Oakland or Garrett county. Surely upon reflection these gentlemen will see the error of their way and turn back before they go so far astray from their party and its principles as to forever preclude the possibility of their again receiving any consideration at the hands of the Republican party.

Yours very truly,

A TRUE REPUBLICAN.

Mr. Shartzer Defines His Position.

OAKLAND, April 11, 1894.

To the Editor of the Republican.

I am more than surprised at the efforts of certain individuals in trying to put all the blame upon me for the actions of the other members of the Town Council.

First, that the repairing of Oak street as done by me was done without authority from the Council; that the buying of the chemical engine was at my request; in short that I am responsible for the indebtedness now resting upon this town.

The journal of the proceedings of the Council of June 5th, 1893, on page 107 of our record book will be found the unanimous vote of the Council authorizing me to repair Oak street from the railroad bridge to the corporate limits.

When the engine was bought I was absent from town and every member of the present Council well knows that I protested against the purchasing of the engine on the ground that we had no money to buy it with.

At the time when I agreed to repair Oak street the Council had voted to issue bonds and fix up other streets as well. Some time in July the majority of the Council changed their minds and said they would not issue bonds. I at once told the Council to stop work and to do nothing more than we had money to pay for. From that day to this I have opposed all work unless it was an absolute necessity and the minutes of the Council will show my vote so recorded.

Now I would like to know what the above has to do with the present election. My friends surely know that the General Assembly of Maryland has repealed the bond

bill and that no bonds can be issued.

The so-called citizens' movement is nothing more nor less than a Democratic scheme, concocted by a few Democrats, assisted by one or two dissatisfied Republicans.

From the talk heard upon the streets within the past few days one would conclude that my personal life was an issue in this campaign. I beg to inform the gentlemen who are prominent in this Democratic sideshow that I am already a member of the Council, not asking for the votes of the people at this election, but earnestly desirous of the success of the entire Republican ticket. My past record is sufficient to justify the assertion that I am always for what is best for the town and its interests. Believing as I do that there are Democrats in this community who think for themselves and who act from principle they will hardly endorse the ticket which has been put up for them to swallow at the dictates of some of our misguided Republicans.

JOHN SHARTZER.

Those who never read the advertisements in their newspapers miss more than they presume. Jonathan Kemson, of Bolan, Worth Co., Iowa, who had been troubled with rheumatism in his back, arms and shoulders read an item in this paper about how a prominent German citizen of Port Madison had been cured. He procured the same medicine and to use his own words: "It cured me right up." He also says: "A neighbor and his wife were both sick in bed with rheumatism. Their boy was over to my house and said they were so bad he had to do the cooking. I told him of Chamberlain's Pain Balm and how it cured me, he got a bottle and it cured them up in a week. 50 cent bottles for sale by Oakland Druggists."

Died.

THOMPSON.—Mrs. Catharine Thompson, relict of the late Israel Thompson, died at the old homestead on Ryan's Glade on Friday evening last in the ninety-first year of her age. Mrs. Thompson, whose maiden name was Catharine Lower, was born on the 12th day of December, 1803, on the old Lower farm near Oakland, and on the 26th day of December, 1890, she was united in marriage to Israel Thompson, who died about twenty years ago. Their union was blessed with twelve children, four of whom survive their parents, namely, Mrs. Julia A. Wonderly, Mrs. William Wilderson and Messrs. Henry and Isaac I. Thompson, both of whom are successful farmers in Ryan's Glades. Mrs. Thompson was noted for her works of charity and the devout christian spirit which she evinced throughout her long and useful life. She had twenty-eight grandchildren, seventy-six great-grandchildren and six great-great-grandchildren. Her funeral took place from the White church on Sunday last at two o'clock p. m. The funeral sermon was preached by Rev. John M. Davis assisted by Rev. Boyle, of the M. E. church, and Rev. N. W. Woodworth, of the Presbyterian church, and the interment was made on the farm of her son Henry. Her remains were followed to their last resting place by a large concourse of sympathizing relatives and friends, whose presence denoted the high esteem in which she was held.

Colored Society Notes.

Miss Ida Dnnmark, who was ill last week with an attack of the grip, is improving in health.

Mr. Daniel Holt has moved into Mr. Gortner's house on Main street.

Mrs. Baker Banks has returned to her home in Oakland.

Miss Kate Taylor was the guest of Mrs. W. H. Walker on Oak street last Sunday evening.

Mr. Lewis Brown, of Piedmont, was in Oakland on last Monday evening.

Mrs. Phil Davis was over the mountain on last Sunday to attend a funeral.

Mrs. Daniel Pleasants, who has been ill for some time, is improving and will soon be entirely recovered. Mr. Albert Truly is engaged as a waiter at the Glades.

Bucklen's Arnica Salve.

THE BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chills, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction or money refunded. Price 25 cents per box. For sale by all druggists.

OAKLAND, GARRETT CO., MD.

ON A LAWLESS COAST.

A Night Adventure at an Alaskan Cannery.

It was my first glimpse of Alaska. Naturally, then, as I climbed over the steamer's bulwarks and dropped into the dory on the choppy sea alongside, I took but little notice of the boat or the rough fishermen who were my fellow-passengers. My eyes were fixed on the black, beetling cliffs against which the white surf curled and thundered two miles away, and on the snow-capped mountains that towered, white and mysterious, in disordered ranks behind.

"This dory's leakin' like a basket, Jim; you'd better drop yer oar and help bail her out."

"Where's yer bailer?"

"Ain't it under yer seat?"

"No."

"Then there ain't none aboard."

This conversation roused me from my reverie. We were still a mile from shore, and about the same distance from the steamer. The water was more than six inches deep in the bottom of the boat, and it was pouring in now at every joint. The dory had stood beside the smokestack on the steamer's deck during the whole voyage, and its timbers had shrunk fearfully.

"Full with all yer might fer shore!"

The cry startled the oarsmen, and they gave away with a will. But it was too late: the boat was filling rapidly. I hung to my rifle and satchel and began wondering how long a swimmer could live in such an icy sea.

Suddenly one burly, low-browed rower, Jim Murphy, dropped his oars.

"We've got a Jonah aboard," he muttered, with a superstitious glance toward my end of the boat.

"Heave him out!" cried another.

My heart stopped beating for a moment, until I glanced over my shoulder and saw that all eyes were fixed, not upon me, but upon a Chinaman who sat behind me.

It was Mong Hio, the foreman of the Chinese gang, or the "China boss," as he was called. He was a broad-faced, well-built fellow, with a strong chin and intelligent eyes, and was neatly dressed in American clothes; his queue was bound around his head. He was the mental superior of nine-tenths of the white men on the expedition, and spoke English quite well. My chum, Charlie Smith, and I had had several interesting talks with him during the voyage.

"He's a hoodoo," muttered Jim. "Tain't no use tryin' to get nowhere with him aboard."

"Stop your silly nonsense and bail the dory out with your hats!"

The angry voice of my chum drew all eyes toward him, and at the same time he set the example with his own hat.

Fortunately Charlie's idea took with the fishermen. Water-dogs though they were, the situation had now grown serious enough to alarm even them, and they forgot their superstitious race hatred for a time. All hats went to work with a will, and enough of the water was bailed out to let us almost reach the shore. But when we got into the roll of the breakers in the shallow water the dory was swamped and everybody was drowned.

"We were lucky to save everything," said I, after I had dragged my water-logged satchel out upon the beach.

"I'd 'a been willin' to lose every hit of the stuff aboard," replied Jim Murphy. "If we could 'a' drowned that sneakin' Chiny."

It was only such associates that Charlie Smith and I arrived at the Alaskan cannery, on the coast of Alaska peninsula, where I was to be storekeeper and he bookkeeper. We had been schoolmates together, and seventeen days before had shipped from San Francisco in quest of experience. Thus far we had had our stomachs full of experience and painfully empty otherwise.

We found the cannery to be a long, low frame shell of a building, that looked like a machine shop inside. A snowdrift lay along its northern side; the huge accumulation had been even with the comb of the roof, but the last week in April had come, and it was now only on a level with the eaves.

Charlie's bunk was upstairs with the fishermen; mine was on the lower floor in the store. In fact, my boudoir was store, office and bedroom all combined, and was only ten feet square at that. A bare wooden bunk, a drygoods box laid on one side for a counter, a barrel capped with a salmon case by way of a desk—these were my sole articles of furniture. The sides of the room were crowded with shelves on which were piled a chaotic stock that included black sou'westers, blue woolen underwear, plug tobacco, sugar, rubber boots, soap, molasses and fish-oil.

I had not been in the place ten minutes before my first customer appeared. "Be you the storekeeper?"

A burly Norwegian, clad in hip-boots and torn shirt, asked the question. He had the grizzled head of a Viking and an arm like that of a prize-fighter.

"Yes, sir," said I, thinking it politic to address such a Goliath respectfully. He glanced at his rugged clothes, gave me a look of mingled astonishment and contempt, and said:

"Don't 'dr' me; I were as poor as you wunst."

"Did you want to buy something?" I asked, resolved to cover up the break I had made.

"Yep. Gimme a lamie."

"A lamie?" I gasped. "What's it like?"

"Dunno what a lamie is!" exclaimed the fisherman, grinning from ear to ear. "Why, a hump-back salmon could keep store better than that. Them's the wimes under 'em nose, there," he

pointed to a bale of what I had taken for brown blankets. They were heavy overshirts, worn by the fishermen in lieu of overcoats.

"Got any whisky?" my customer inquired, confidentially, as he turned to go.

"No; the superintendent says none is to be allowed in camp."

Ding-a-ling! The big triangle that served as a supper-bell came to my rescue. This sound had two distinct effects—it started four big Newfoundland dogs to howling like fog-horns, and it stamped all hands to the long, low dining-room like a regiment of wild horses. They were a motley crowd, gathered from earth's odd corners, with rubber boots that came almost to their waists, soiled lamies, grimy faces, disheveled locks, and dirty hands. Charlie and I sat down with the rest.

Everything was on the table except the tea and coffee, and the native waiter-boy went around with two immense tin kettles, singing: "Coffee! Chai! Coffee! Chai!"

Everybody grabbed for himself, and as I was accustomed to that style of table service I did not fare any too sumptuously. While we were eating, the "China boss" quietly entered and took his seat at the table.

The Chinese gang, who operated the cannery, were quartered separately from the fishermen in the "China house." They boarded themselves there at their own expense—all except the foreman, Mong Hio. He was to be boarded by the company and had been assigned by the superintendent to the fishermen's mess.

There was a momentary silence; then Jim roared out:

"I'll be horsewhipped afore I'll eat at de same table wid a howlin' hay-then."

"Me too!"

"That's what!"

"I'll be feller nigger!"

"See here," said Mike; "who tote yez to eat at this table wid daycent people?"

"Boss man telles me all light sittee here."

"Well, 'tain't all roight to set here, an' yez kin jest tell the boss we ain't no dogs, an' we ain't agoin' to set by no Chiny."

Mong rose and looked doubtfully around the circle of hostile faces for a moment; then a look of determination settled about his lips and he took his seat again without a word.

"The impudent monkey! I'll teach him!"

Jim Murphy grabbed the Celestial by the hair and dragged him from his seat. But Mong was not an ordinary Chinaman; he had considerable pluck. Quick as a flash his antagonist was laid on the floor by a stunning blow.

"Smash him!" "Kill de sneakin' thief!" The air was filled with mingled cries and curses as the men all leaped to their feet.

But before anybody could stop him Mong had a big bread-knife in his hand, and there was a dangerous light in his eyes as he backed toward the kitchen door. Nobody hindered him as he made good his retreat to the cook's domains.

"The yaller-livered Chiny dog! Draw in a knife on a white man! I'll cut his 'roat afore I'm a day older," muttered Jim through his clenched teeth as he scrambled to his feet.

"Hold yer jaw; here comes the boss," was the friendly warning of a fisherman, as a powerfully-built man, with a grizzled face and stern eye, entered the dining-room.

"All hands will turn out at half-past three in the morning to surf and run the lighters." Then, as he turned to go, the superintendent added: "No drinking ashore here to-night, remember. If any man's drunk in the morning and can't surf I'll pack him back to 'Frisko aboard the same steamer he came on."

An ominous mutter went around the room as the door closed. "No drinkin', hey?" grumbled one of the men; "an' he's agoin' to hev his Tom-an'-Yerry aboard wid de captain!"

"We'll buy dat deminyon of 'sam-shoo' from de Chiny an' tap it yoozt de same, hey, boys?"

And tap it they did, with a vengeance. I turned in early, but there was no sleep for me that night. The rafters and floor above me rocked under a bacchanalian dance; the sand that sifted down into my eyes kept company with the curses that assailed my ears. The boys were having a gay time—uncomfortably gay.

Suddenly the pandemonium upstairs was still. I could hear the voice of some one addressing the crowd in a low tone. Loud cries of approval and indignation suppressed, interrupted the speaker. After a pause the tramp of heavy feet upon the stairs announced that the whole crowd was off on some expedition.

They had all gone in the same direction—the china house, leaving the building as still as death. I struck a match and looked at my watch; it was a little after midnight.

There was a hurried rap at the door. "Who is there?"

"It's I," replied Charlie's voice. "I want to speak to you, quick."

I let him in.

"Do you know what those devils are going to do?" he asked, excitedly.

"No; I heard—"

At that moment a dark form rushed in at the half-open door, and a panting voice stammered:

"Storekeep—hide me!"

"Why, Mong? Is that you? What is the matter?"

"Fishmen heap drunk—smash door—say heap loud: 'We wantee Chiny boss—we hang him.'"

"That's just what I came in to tell you," cried Charlie. "I heard that scoundrel Jim work up the whole scheme."

"A pretty kettle of fish!" I soliloquized, as I hurried into my clothes.

Charlie's lightning-calculator head served him well at that moment. "Quick, Mong! Get into that bunk and cover yourself up. They'll search everywhere else before they look here. Now," said he, dragging me out of the room by the arm, "let's make a break

for the steamer and get the boss; he'll throw a damper on this festive necktie party."

There was a stiff on-shore breeze and quite a heavy sea running. But we never thought of the danger of swamping as we shoved off in the captain's dingy with the two rail preparatory

By good luck we got beyond the breakers, without shipping very much water, and then it was a long pull and a strong pull, with the boat's bottom slapping the chop sea till the craft trembled in every fiber. It was pitch dark to the bargain, and the west that blew smoked strongly of eternal snows. But we could see the red gleam of the vessel's port light, and for that we pulled. At last we were alongside.

"Watch ahoy!" yelled Charlie, as we pulled under the stern.

"Yes, ay, sir; what's up?" came the answer.

"Call the cannery boss, quick! There's trouble ashore."

In less than five minutes the superintendent and foreman were both leaning over the bulwarks.

"What's the matter ashore?" It was the superintendent's gruff voice.

"The fishermen are on a drunk and have started out to hang the China boss, sir. He's hid in the store, but they won't rest till they have him," we answered.

He muttered something angrily between his teeth and seized a rope.

"Going to hang my China boss?" cried the cannery foreman. "I have a word to say on that deal myself. Wait till I get my Winchester!" he added to the superintendent, who was already bidding a rough good-bye to the rail preparatory to coming aboard the dingy.

A minute more and we were scudding toward the shore before the wind. A big breaker deluged us as we struck the beach, but nobody spoke a word.

All was silent and dark around the buildings, but the glimmer of a lantern was visible against the black base of the cliff that rose abruptly a hundred yards from the house. A confused murmur of voices came from the spot, and a frightened gull cried plaintively in the darkness among the jagged rocks above.

"Quick! or we shall be too late," whispered the foreman as we sped silently toward the murderous group. The outline of a ladder was visible now against the dark wall of rock, beneath which stood two barrels with a board across the tops. A rope hung from the ladder and swung in the night breeze, casting its moving shadow on the gloomy cliff. On the platform stood a burly form; on the ground, tied hand and foot, lay poor Mong Hio.

I caught the words: "Come up here, you dog," followed by a piercing shriek as the murderer dragged the Chinaman upon the platform by the hair, slipped the dangling noose about his neck, and leaped to the ground with a sneering laugh:

"All ready, boys!" It was Jim's hoarse voice.

At that moment the foreman beside me raised his rifle and shouted:

"The first man that moves from his tracks gets a rifle-bullet through him."

There was a sudden pause; then a voice from the group called out:

"You'll never live to know who we are if you move a foot," cried the superintendent in a voice that was instantly recognized, then, addressing me, he said: "Go and cut that Chinaman loose."

I moved forward to obey, when, with a muttered oath, Jim Murphy kicked the barrel from beneath the doomed man. At the same moment a rifle and a revolver flashed in the darkness and sent their thunder reverberating along the rocks. A hoarse groan was mingled with the screams of frightened sea-birds on the cliff above, as a fox leaped from among the rocks and sped down the open beach.

Jim Murphy lay across a salmon barrel—dead.

I cut down the unfortunate Chinaman, but life was extinct; his neck had been broken by the fall.

Utter silence fell upon the awed group surrounding those still forms, a moment ago so hostile toward each other, now lying side by side so peacefully, alike unmindful of the flickering lantern's rays that fell into their wide eyes. Around us lay the wild, fierce scenery of Alaskan crags and glaciers; over us the thick darkness, and in our midst that mightiest mystery—death.

At length the superintendent spoke. "This is a bad beginning," said he, sadly. Then, after a pause, he added: "I suppose we'll have to call it quits; you can go and turn in now." The men silently obeyed. We were nearly a thousand miles from the nearest court of justice, at Sitka. The superintendent had to be law-giver, judge and executioner on that desolate coast. To try to give up the whole party of criminals to justice would mean the failure of the whole expedition. So the matter was simply dropped.

The Chinaman buried their dead with heathen rites—sprinkled rice and salmon (gin) on the grave and burned all the dead man's possessions on the mound. All the spectators were given pieces of money wrapped in paper for good luck.

The fishermen carried their burden to the grave in silence, and buried it without any rites. As the shovelfuls of sand tumbled down upon the rude pine box, Mike slowly took the pipe from his mouth and said:

"Jim could stan' more whisky 'n any man I ever knowed; he could carry it beautiful."

A murmur of admiring approval went around the grim circle; the right thing had been said in the right place.

—Edwin L. Shinn, in Leslie's Newspaper.

Wiser Than Solomon.

After his mother had got through paddling him the boy, who had neither whimpered nor shed a tear during the ordeal, calmly remarked:

"Well, father was a wiser man than Solomon."

"What do you mean by that, sir?" she asked sharply.

"I mean that Solomon had seven hundred wives,"—Jingo.

—In Monte Veritas—"Dobson married a hebrew, but he always protested it was a marriage of the heart."

"Did he prove it when he father lost everything?" "Yes. He was found dead the next day with a note saying it was heart failure."—Judge.

—Henry Van Etten in 1690 anticipated several inventions believed to be modern. He described the air gun, the steam gun, the hydraulic press and the method of teaching the blind to read by means of raised letters whose impression can be perceived by the fingers.

—Lake Titicaca is the most elevated and one of the largest of the lakes of South America. It forms part of the boundary between South Peru and Bolivia, in the center of an alpine valley, between two great cordilleras of the Andes. Titicaca is 12,900 feet above the level of the sea.

—The most costly of all metals, save only gallium, which is worth \$3,000 an ounce, is germanium, which is quoted at \$1,125 an ounce. Rhodium is worth \$112.50 an ounce; ruthenium, \$90 an ounce; iridium, \$37.50 an ounce; osmium, \$26 an ounce, and palladium, \$24 an ounce. The last is about equal in value to gold. These metals are of no great commercial importance.—Inventive Age.

—The surrender of his name by a young man in Delaware who recently married a widow and is hereafter to be known by his wife's name, has elicited considerable comment as a quite remarkable innovation of a custom that is hoary with age. Though why the giving up of one's revered family name should be confined exclusively to one sex has never been satisfactorily explained.—Minneapolis Times.

—Americans know little about the economy of slow cooking, though the underlying principle has been applied in the case of Edward Atkinson's cooker. The Mexican tomalis in their cornish coverings keep hot and go on cooking long after they have left the fire. The Russians bring with them to this country the device of enclosing very hot food in felt-covered vessels and permitting the cooking process to go on without the aid of fuel.

—Horses have often been insured and so, to have prize cattle and dogs, but the boxing kangaroo at the Westminster aquarium, in London, is probably the first of its kind in whose case a policy has been taken out. While the directors of that institution offered no objection to the payment of the premium for the kangaroo, they absolutely declined, as a superfluous expense, to defray the cost of insurance upon the lives of the divers who constitute some of the side features of the show.

—The first windmill in Germany was built at Windsheim. The Augustine monks at that place desired to build one such as they had seen in Italy, but the lord of the manor forbade them, declaring that the winds belonged to him. The monks applied to the bishop of Utrecht, who promptly laid down the fundamental principle that no one had any power over the winds of his diocese but himself. He gave permission to build the mill, and it was erected in the closing years of the fourteenth century.

—How can you find out whether a postage stamp has been used or not? Photograph it. If the postmark has been obliterated, the blue or green color will not make any impression on the plate, while the black traces of the obliteration will appear with great clearness. Even when the stamps have been well washed and no trace of the obliteration can be seen by the naked eye or through the microscope, the photograph will show very clearly the two concentric circles of the stamp, the date and even the name of the locality.—Popular Science News.

—The means adopted by nature for the dissemination of plants are equally varied and curious. The seed-vessels of some species open with a snap that sends the seeds to a considerable distance; the seeds of other species are provided with wings composed of a thin membrane, like the maple, or almost every description of birds and beasts, continually aid the efforts of nature to perpetuate certain kinds of plants.

The Black Writer (preparing a biography of eminent modern men)—How shall I handle this man? I've got to praise him and they say he drinks like a fish, and doesn't pay his debts.

The Publisher—That's easy. Just say he has "the artistic temperament."—Chicago Record.

Degrees of Admiration.

Amy—When I get married I am going to tell my husband all about my former lovers.

Emeline—What courage!

Emma—What frankness!

Lily—What a memory!—Halla.

COMPLETED THE COURSE.

Brief But Thorough Instruction Given at the Union School.

He made his appearance at the Union school the other morning, and, arriving ahead of time, he prevented any feeling of loneliness from seizing him by licking three boys and riding the gate off its hinges. He went in with the crowd when the bell rang, and finding no empty seat, he perched himself on the wood-box. When school finally opened, the teacher scanned his name and began asking him questions, in order to find out how he should be graded.

"Can you spell?" she asked.

"What kind of spelling?" he cautiously replied.

"Spell 'house,' if you please."

"Any kind of a house."

"With a mortgage on it?"

"You may spell 'man,' if you will," she said, giving a severe look.

"Yes."

"I don't care much about spelling 'man' this morning, but I will this afternoon. I've spelled it with my eyes shut."

"Do you know your alphabet?" she asked, changing the subject.

"Never had any?" was the prompt reply.

"Do you know anything about reading?"

"I read like lightning," he answered. She handed him a reader, and said:

"Let me hear you read."

"Read right out loud?"

"Yes."

"I'm afraid it would disturb the children," he whispered.

"Go on, and let me hear you read."

He looked carefully at the page, scowled his brow, and read:

"If I was a lame boy and didn't get any presents in my stocking Christmas, but I'd make things jump around the house next moi."

He handed back the book and the teacher asked:

"Richard, how many are three and three?"

"Three and three what?" he inquired.

"Anything."

"It's a good deal according to what it is," he replied, as he settled back. "I know that three and three cats don't make a dog."

"Did you ever study geography, Richard?"

"Yes, nam."

"What is geography?"

"It's a book."

"Is this world round or flat?"

"Hills and hollows," he replied.

"Richard, can you write?"

"Write what?"

"I could, I suppose; but I've got my name without writing it."

"Can you write a letter?"

"Who to?"

"To any one."

"Yes, I could, if I had money to pay the postage."

"Well, Richard," she said, in despair, "you will have to go into the lower room, if you want to come to school here."

"I druther stay here."

"But you can't."

"I'll bet you this knife ag'in ten cents I can."

She took him by the arm to remove him, but he laid his hand on her shoulder and said in a warning voice:

"Don't get me mad now, or I'll let myself loose."

She called the principal down, and as he approached the boy he demanded:

"Boy, what are you doing here?"

"Gitting education," replied Richard.

"You go right down stairs now," continued the principal.

"Well, don't s'ness me, for I never was here before," replied Richard, slowly moving his legs as if he meant to get down.

The principal took him by the collar and jerked him around, got kicked on the shin, and bitten on the wrist, and finally landed the young student on the walk.

"Now you go home!" he shouted, as he tried to recover his breath.

"Am I educated?" inquired Richard.

"You seem to be."

"Gimme a diploma, then."

"You clear out, or I'll have you arrested."

"Ain't I a scholar in this school no more?"

"No, sir."

"Who owns this schoolhouse?" demanded the boy.

"No matter—you clear out."

"Will you come out in the yard here where you can't hang to anything?" asked the boy.

"Begone, I say!"

"Don't draw no derringer on me!" warned the boy, as he backed off; "nor don't you think you can scare me with any of your bowie-knives."

The principal walked and shut the door, and after the new boy had stood there long enough to show that he wasn't afraid, he turned and walked off, growling to himself.

"I'll git foreman of No. 6 to pound that feller afore he's a week older,"—Street and Smith's Good News.

Timber Wanted in Sawdust.

TEMPERANCE NOTES.

THE FOES OF DRINK.

I can show plain in Commandments Ten,
That murder must not come from men;
And most foul crimes of which we think,
Originate from taking drink.

Man's liberty you only mean to plan?
Fond, noble, reasoning, thinking man?
Free agents! We admit this all.
Though not free to make his brother fall

Into dark pits where drink will lead,
Not free to bring distress and need
Into lone homes where cheer should reign,
Leaving the sinner of the serpent's stain.

Not free to go to weeping wife,
With maddened brain and words of strife;
To take from children morsels sweet,
And give them cheerless discontent.

Not free to make some mother's heart
To write and grieve with painful smart
Of cruel stings, her child may throw
Around her head where she may go.

"By bread man does not live alone,"
Thunders from Heaven in mighty tone;
And none need fear by honest gain,
The "Star of Life" ever to obtain.

Ah, no! this never will be denied,
If energy and push are not supplied,
But the motive is to gain this bread,
By sweat from honest, manly hand.

Then put not wine to the brother's lip,
At first he may gently, lightly slip.
This is cool as law, then temper thick;
Oh, do not urge thy friend to drink.

The Book tells us that long ago,
At Cana's feast that wine did flow,
But Christ, with His own blood Divine,
Turned crystal water into wine!

Not such as would the brain set fire,
With drenching thoughts and foul desire
To slunk and plot, devise and plan,
To slay, mayhap, his fellow man.

And now, the time is just ahead,
When "stone" will not be given for bread,
Nor "serpent," to the children sweet,
Instead of "fish" that they may eat!

Then peace and joy will reign supreme,
"Free agency" will be the theme;
Free agents—but to do the right,
But never free to drink and fight.

And in this mighty, coming fight,
Just pause and ask: "Who's for the Right?"
The answer comes along the line,
"The woman, prayer, and Hand Divine."

Sure conquerors! this stalwart force,
Right will prevail, though rough its course;
Then Right's fair banner will not trail,
Nor hear on breeze the oppressor's wail.

Ah! on your side no prayers ascend,
And earnest with the angels band,
No pure-souled woman's voice to hear:
"March bravely on! we give you cheer."

No, while you fight, no knee is bent,
No silent prayer to Heaven is sent,
That Right may conquer—Right may reign,
O'er all this sunny, southern plain!

—Hattie A. Mahry, in Banner of Gold.

CONDEMN DRINK.

What Medical Authorities Have to Say On the Drink Habit.

It is not so well known as it should be that the best medical thought of the world, for a generation, and more, has been opposed to the habitual use of liquors of any kind, as beverages; and that, for the past score of years, many of the most eminent authorities in the world of physicians have taken the ground that the total abstainer lives longer, is stronger, is more sound in mind and body, than the man who drinks, even though the latter be merely occasional.

Dr. Henry Thompson says: "I am of opinion that the habitual use of wine, beer, or spirits, is a dietetic error, say for nineteen persons out of twenty. In other words, the great majority of people, at any age or of either sex, will enjoy better health, both of body and mind, and will live longer, than if they drank alcoholic drinks whatever, than with habitual indulgence in their use, even although such use be what is popularly understood as moderate."

Sir Andrew Clark said, in his emphatic way: "I am bound to say that for all honest work alcohol never helps a human. Every adult man who finds himself after trial—and every man should try to be a thousand times better without alcohol, should not resume it, because he will work better, he will enjoy more, he will have a longer exemption from disease, he will probably live longer, and certainly he will be better in all the higher relations of life."

Prof. Sydney Ringer, in his "Handbook of Therapeutics," written in 1880, says: "Experience plainly shows that for the healthy, alcohol is not a necessary nor even a useful article of diet. Varied, repeated and prolonged experience, and the testimony of many medical men, prove that troops endure fatigue and the extremes of climate better if alcohol is altogether abstained from. The experience of the celebrated Moscovitz campaign showed this, so also, quite recently, the Red River expedition. During arduous marches it has always been found that, without alcohol, the health of the men is exceptionally good, but as soon as spirits are allowed disease breaks out. Modern trainers recognize the fact that the power of sustained exertion and resistance to fatigue is best promoted by abstaining from alcohol."

The British Medical Journal (March 11, 1880), in an article on "The Truth About Alcohol," says: "We take it as conclusively proved, in the first place, that alcohol is not a necessary food, and that the most perfect physical and intellectual vigor is compatible with rigid total abstinence. We may go a step further, and confidently assert that people in perfect health are, as a rule, better without alcohol. The evils of intemperance are manifest, the evils of total abstinence are unproved and improbable. The excellent health enjoyed by the great and increasing army of teetotallers; the returns of insurance and benefit societies; the example of abstaining nations, seems to us proof positive that total abstinence is at least harmless and safe. Alcohol may be accorded a place as a luxury, it certainly has a definite value as a medicine, but we think it most desirable, in the interests alike of truth and national morality, that the medical profession should authoritatively and unambiguously declare that it is in no sense a necessity."

In view of the array of facts which we have now given, bearing on the various phases of the pleas for the use of intoxicants, and the further fact that the position of these high medical authorities is not generally known by the public at large, we ask: Do not the people need education? A New York prohibition newspaper, in a late issue, was lamenting that "the cause does not grow rapidly enough." The way to make it grow is to educate the people to a full and complete understanding of the facts we have given, and others in the same line. When they are fully understood, the great mass of intelligent Americans will be ready to join in the movement to suppress the traffic, and to pulverize the rum power.—Toledo Blade.

WORKED FOR HIS WHISKY.

An Indiana Farmer Shovels Fourteen Hundred Bushels of Wheat in One Day.

They have what they call a "Farmers' Club" down at Decatur, Ind. It is composed of about a dozen gentlemen, each one of whom owns a lot of land, and one of whom has turned a foot of furrow in the last ten years. They are great story tellers, and after they have discussed all public questions and saved the country by deciding the tariff, financial and other questions, they amuse each other by telling some incident a past rather interesting life has produced.

One day they were telling about the hardest day's work. They like to talk of hard work, and encourage quite a rivalry in that sort of reminiscence. Henry Wilson told how he had split a thousand rails in a day one time, and the next man passed. Mr. Bettendorf related the incidents of a forty-mile march under a broiling July sun down in Georgia. Jack Hammy remembered having cradled seven and one-half acres of oats from sun to sun, and then it became McDougal's turn.

"Well, sir," said the old man, "I'll tell you I used to be a drinking man." "Used to be?" interjected two or three.

"Yes, used to be. I had a habit of taking a jug of liquor when I went home, as I lived about seven miles from town. And I would slip the jug out of the wagon and bury it in a bin of wheat. My wife always had one drink in a bottle at the house—never more than one—and when I got right dry she would let me have it."

"But after I took to bringing the jug home she got suspicious. She couldn't understand how I could stay happy so long on her poor little single drink. So she watched me. One time I came home all tangled up, drove into the barn and hurried my jug into the granary, where I buried it in the wheat bin. Then the hired man came and took care of the team and I went to the house."

"After supper I got thirsty and my wife gave me that everlasting last drink from the bottle on the shelf. But it wasn't enough, and along about nine o'clock I went out to the barn and crept around for my jug. But I couldn't find it. I kept digging my hands down here and there, but it wasn't there. I kept hunting till they got to calling me from the house and then I gave up and went to bed thirsty."

"And Lord! what a thirst I had in the morning! But I knew what was the matter with my jug. I had looked in the wrong bin. So I went out before breakfast and looked in the others. But I couldn't find it. After breakfast I went out again, my tongue thick and my throat dry, and made another search. But it was too well hid. So I got a seep, locked the granary door and I shifted fourteen hundred bushels of wheat trying to find that jug of whisky. And I didn't find it. That was the hardest day's work ever I done."

"Where had it gone?" asked Bettendorf.

"Why, my wife had it in the cellar. But she wouldn't give me a sup of it."

"How many bushels of wheat?" asked Wilson.

"Fourteen hundred bushels," said McDougal, firmly.

"Well, I wish that's the hardest day's work," said Jack Hammy.

"And the farmers' club so decided."—Chicago Herald.

NOTES BY THE WAY.

Dr. Brock, of Leipzig, says: "Beer is brutalizing; wine, impassion; whisky infuriates."

It is officially estimated that there are now remaining in bond in the United States 130,561,910 gallons of whisky.

MISS GOULD, of the Women's Help society, London, says that drink more than anything else puts women wage-earners at the mercy of the sweaters.

SO MANY accidents have been traced to drunken employees on the Trans-Mississippi that the directors have decided to discharge anyone who shall be caught under the influence of liquor. Good for Chilli!

ABERN, Kas., a town of one thousand inhabitants, discourages the great Kentucky interest of whisky-making. The village has not had an open saloon for fifteen years. Four elections in that time have turned upon the question of licensing the sale of strong drink, but at no election has the affirmative vote reached forty-five. Meanwhile the churches flourish, and Abern is well pleased to be singular among its sister villages.

Is commenting upon some of these differences in mortality the Registrar-General says: "The mortality of men who are directly engaged in the liquor trade is appalling. The death-rate of brewers, innkeepers, publicans, and generally all dealers in wines, spirits and beer, and that of inn and hotel servants, is above the average death-rate." It will be seen that alcoholic consumption results in a high death-rate, in most striking contrast with the more generally abstaining farmer, gardener, and minister.

PUNGENT PARAGRAPHS.

—What a pity man was not born with a horn in his mouth.—Galveston News.

—Wife—"What are you coming home for at this time in the morning?" Husband—"Back fish."—Pearson's Weekly.

—He went to the office loaded, you say? What was the result? "He was fired."—N. Y. Press.

—There are some exceptions, but as a rule when you have nothing to say, it is best to say it silently.—Youth's Companion.

—Business is business, unless the customer happens to be a lady, in which case it becomes a strategy.—Oil City Blizzard.

—What is a friend? A friend is a man who points out the silver lining in the clouds to avoid lending you an umbrella.—Lowell Courier.

—Miss Lottleigh—"There are some social chasms that cannot be bridged with gold."—Mrs. Dowitt—"Yes, but if you have enough of it you can fill them in."—Washington News.

—One swallow does not make a summer, but it may have occurred to you that one grasshopper makes more than a dozen springs.—Tammammy Times.

—Two carpenters got into a row. "I'm sorry to relate," said one, "but when the first one took offense the other struck a nail."

—I guess you don't know my name. "I—Tommy—" "Yes, I do, sis calls you old stupid." "Why does she?" "Cause you don't take the hint that she likes you better'n anybody."—Inter Ocean.

—Consoler—"Think of the meeting with your departed friends." Society (lady mourning)—"O dear, I wonder if they have followed the changes in the hand-shake."—Detroit Tribune.

—Johnny—"Mamma, don't you think Tommy Morgan is an awfully good little boy in church?" "Mamma—" "I guess so, why?" "Well, when he takes the money round he didn't take any, and he wanted some for his savings bank, too."—Inter Ocean.

—Teacher—"For men must work and women must weep." What is the meaning of that line, Tommy Flagg?" Tommy—"It means that men has to work to get money, and then the women has to cry before the men will divide with them."

—First Student—"I've had notice that I must move out to-day, for I haven't paid my rent for more than a year."

Second Student—"Remarkable coincidence. That's just my case." First Student—"What do you say, then, to exchanging rooms?"—Pilegenda Blatter.

—"Dear," asked Mrs. Wickwire, looking up from her paper, "what does this paper mean by referring to the supper of money?" "What is a superfluous word?" "In our engagement days," answered Mr. Wickwire, "the superfluous woman was your youngest sister."—Indianapolis Journal.

—Sirel—"I can't use your cantata, professor, but I know a man who has plenty of money, and if he could hear he'd buy it." Professor Spinet (eagerly)—"Introduce me!" Manager—"I will; but he's deaf and dumb."—Judge.

HIS MAMA WAS THERE.

Consequently he and the straw-haired beauty were in love, and he was fair; his hair was parted in the middle, and his unmentionables were freshly creased. He carried an embryo tree for a cane, and his patent leather shoes again. In short, he was a college boy and a dude, and he sat in a car of the Sixth avenue "L."

She was petite and painted. Her hair was of the variety into the composition of which peroxide of hydrogen largely enters. She sat in the seat across the aisle of the same car.

The third one was stately and matronly. She sat in the cross seat and vainly tried to attract his attention. She was fashionable, and his mamma.

He glanced at the straw-haired beauty, and she threw him an encouraging glance in return. He smiled, and she smiled too. The third one looked at both, and her face was red as white by turns.

Another interchange of smiles, and he slowly rose and seated himself at the straw-haired beauty's side. He was just uttering his preparatory "alien," and she was just turning around to face him, when a command—"Robert!" brought him to his feet with a start. There was a commotion in the cross-seat, and the second "she" came down the aisle with firm tread and blazing eyes.

He looked very sheepish as he left the car with his mamma and the yellow-haired fairy behind him regretfully.—N. Y. Recorder.

A poor investment. The old gentleman had let five of his lovely daughters go to that many more or less worthless sons-in-law, and he was watching the sixth one with more care, though whether matters were made any difference in such matters is open to question. For her, at last, came a young man, as the others had come.

"Don't say a word," interrupted the father when the young man appeared trembling in his presence. "I know what you are here for, 'Can you suppose I will let my daughter when she becomes your wife?' Five of them have married, and I've never been able to declare a dividend on one of them yet. If you can elude my luck, young man, I'll set you up in business, and will charge you a cent."—Detroit Free Press.

No More Bills.

Jinkers—Your wife is running up big bills at the stores, is she? Huh! my wife started on the same road, but I stopped her mighty quick. I can tell you—yes, sir. I ordered her never to get another thing charged, and she never has—no, sir.

Winklers—But she still shops.

Jinkers—Yes; she—er—name me put my bank account in her name and give her a check book.—N. Y. Weekly.

FIRESIDE FRAGMENTS.

—Boiled Macaroni.—Four one pint of collag water over five ounces of macaroni. Let it stand half an hour, drain off, put in a kettle, cover with boiling milk, season and grate cheese over it.—United Presbyterian.

—Potato Puff.—Stir into one quart of cold, mashed potatoes two tablespoonfuls of butter, two well beaten eggs and a teaspoonful of cream. Salt, beat till very light, pour into a deep dish and brown nicely in a quick oven.—Farm, Field and Fireside.

—Oyster Omelet.—Six eggs beaten very light, half a cup of cream, pepper and salt to taste. Put a tablespoonful of butter into a hot saucepan, and when melted pour in the omelet and before it hardens drop in a dozen good-sized oysters cut in halves. Fry until a delicate brown, and turn if necessary, but it is better not to do so, but cook on one side only. This may be accomplished if the fire is not too hot.—Boston Budget.

—Chocolate Jumbles.—One cupful of butter beaten to a cream, beat in two cupfuls of sugar, add four well beaten eggs, then three scant cupfuls of flour in which are two heaping teaspoonfuls of baking powder and one-half teaspoonful of salt. If the butter is fresh, use one or one-half cupful of grated chocolate to half the dough. In the other half add the juice and grated rind of an orange. Roll thin. Cut in fancy shapes and bake in a quick oven. These are also excellent plain jumbles.—Good Housekeeping.

—Curled Wafers.—Beat to a cream six ounces of butter and mix it with three well-beaten eggs, two ounces of white sugar, half a teaspoonful of lemon extract, a pinch of salt and three or four tablespoonfuls cream. Beat the mixture well, then drop a tablespoonful at a time on a buttered pan, leaving space between each for the cakes to swell. As soon as done remove carefully and while hot twist each to form a cornucopia. Return them to the oven for a minute or two to harden, then when cold drop into each a small amount of some nice kind of sweetmeat, as strawberry or raspberry jam, and fill up the remaining space with chocolate. The jars for these must be carefully cracked, as each half should be perfect. An excellent proportion for the cream is to beat together two pounds sugar and two cupfuls of water until it threads, flavor with vanilla, taste the saucepan from the fire and stir until the sirup becomes creamy. Then roll it into balls and press half a walnut kernel into each side, roll in granulated sugar and set aside to cool. These little balls are also dipped into melted chocolate, and become the "chocolate creams," the special delight of school girls.—Boston Globe.

—Cheese Omelets.—For cheese omelets the proportions are three eggs, two tablespoonfuls of milk and four of cream beaten into the yolks, first mixing the cream with half a cup of grated cheese until quite smooth; season to taste; add the beaten whites and cook on the general omelet principle. Stewed mushrooms can be used or chopped potatoes, first boiled, then fried in a little butter, or bread crumbs, and so on and on, making the omelet a medium for a series of pleasant and savory surprises. There are other forms of egg cookery as simple as this, and when it comes to the toothsome and the feature of one's fare are very delicate; it is necessary to remember that the water should not boil violently after the eggs are broken into it, as the ebullition toughens and breaks them. The water should simmer gently.—Detroit Free Press.

ABOUT TRIMMINGS.

The Tendency is Toward Lacey Effects for Spring and Summer Wear.

The amount of manufactured trimming which is put on the market now is something astonishing. Gimp braid has become a matter of course, like linings and hooks and eyes. It is therefore, unless there is no other trimming in the dress is plain. The jetted trimmings must also have some distinctive quality about them in order to meet the approval of the critical eye. That variety called leaf jet bids fair to supersede the old, heavier kind, and as a consequence there is a perfect furor for jetted laces and nets. The old jets come in festoons and open patterns. Windows are full of these various trimmings, not merely jets, but gold and jeweled patterns of the most intricate designs. And when it comes to laces, there is an abundance and variety that one cannot tell where to begin. There is a tendency to lace patterns in everything. The jet trimming shows this characteristic, but even in solid rods a lace stripe will be woven in, and a French gingham with a stripe of half-inch Valenciennes occurring at intervals of three or four inches is shown.

There is a kind of trimming made of beads that have a wooly look which goes very prettily with the browns and tans of early spring. A pretty outdoor gown of light brown has this trimming. There is a round skirt with a feather band at the bottom, and above this a wide band of the jet trimming. The large, long beads are wound with silk in shades of brown. The bodice is made with an added basque, edged with feather trimming, and around the waist is a metal belt.

A Y-shaped vest of brown velvet is bordered with the same beaded trimming that is on the skirt, and the pointed cloth epaulets are ornamented in the same way. Velvet sleeve caps edged with feather bands fall in godets over cloth sleeves, which are gathered with a succession of puffs from the shoulder to the hand. Bonnets are trimmed with lace and agrettes, and ties with brown velvet ribbon to match the trimming on the dress.—Chicago News.

DOLABELLE'S LETTER.

The New Spring Silks Defy Accurate Description.

New York Society Going Wild Over the Many Pretty Things Exhibited for Spring Gowns—Review of the Artistic in Millinery.

(Special New York Letter.)

In the spring a young woman's fancy lightly turns to dress, and she is indeed hard to please who cannot find exactly what she most needs in the complete menu the dry-goods center has to offer this season. You would think it were May to see the lovely tempting spring silks in their delicate hues, as they lie in shimmering heaps on the counters. Every woman can now walk in silk attire, for the prices are so reasonable that it would be wicked, as I heard a gushing girl say, "not to buy." On the sale days the very newest silks are put on the counters, and the next day when the sale is "off," the prices are one-third more. I notice a prominence given to very light colors in all new goods, both silk and woolen. Some of the new China silks have a white or pinkish ground with a faded flower design, which is like the gowns in old pictures. Others have pin-head checks and buds, or small flowers. The chene taffetas are deliciously like old China patterns. The taffetas and flulle Francaise silks are soft and pliable, and drape gracefully. The India silks and Habital and Ki-Ki have been selling freely at thirty-eight cents a yard. They make up into lovely summer gowns with quillings of ribbon and lace garnitures. The changeable armure silks sell at the same price.

The moire silks are having a most determined run, being introduced by the ladies' milliners into walking suits. The moire coat is one of the fashionable spring wraps. For this purpose a silk is used that varies in price from four dollars a yard to six dollars. It is a large watered design, two in the yard, and the stripes covering the entire width. Moire Francaise has a set watered stripe, and there is also a moire that has alternating stripes of satin and moire.

This silk is used in immense quantities for making over, the sleeves and trimmings being composed of the moire. Some of the silks have a knotty effect to resemble the knots in a board. These are called arabesque moires, and make one ask "what next?" The new colors are real novelties, although we think each season must exhaust color resources. But there are absolutely new shades of green, blue, yellow and brown. Then there is Florentine pink, and a color that is pink and white combined which was original and called "puach" color. Tea green and foliage green are both new colors. All shades of brown are popular, and the red-headed girls wear them all in one costume, or at least as many of them as will harmonize.

The new woolen goods are classed under the head of novelties, there being too many of them for regular names. If you want hop-sacking, or serge, the clerk will show you all the new weaves. The French soft wool are the finest and best, as they have a melange of color which makes their dainty designs resemble old embroidery. The ground work is a pearl or gray or light tan, or pale green, but the pattern blends with it so perfectly that it has no decided tint, but a soft blending of many. Dark emerald on a mouse-gray ground is a favorite style, with small design of lighter shades. Crepons are in constant demand, as are the light-weight Scotch suitings, which are made up with silk sleeves. These delicate street suitings are made up with lace and ribbon, or some of the

featherbone, is used to stiffen the skirts of dresses instead of horsehair. The umbrella skirt is a popular form for walking dresses and tailor-made gowns.

The draped skirt is seen in new models for these spring days. In the cloth walking suit in the illustration, the skirt is draped upon one side, and trimmed at the bottom with a band of fancy fur, which also trims the surplice waist. Sleeves and front of light tufted cloth, empire poke hat.

The second dress in the illustration is of blue lady's cloth, draped on one side with lace. The arrangement of the waist is new and strikingly novel. Both designs are direct from Paris.

I must tell you what a French dressmaker said to me on a recent visit I made to her establishment. I was trying to explain to her in her native tongue that I wanted the cloth for my new gown to be of an intense shade of green. She listened politely and answered in voluble English:

"As for color, the green is the first, but the very more shades, not too much bright, are worn."

Isn't that delicious? DOLABELLE.

yellow are preferred to dead white for day wear.

I made a little tour the other day in search of spring millinery, and was just in time to see two members of the Four Hundred buy their spring bonnet, in the millinery department of a Twenty-third street dry goods house. Why shouldn't they? Oh, it has been a sort of fad with some of our old first families to buy their millinery in a millinery shop somewhere on Fifth avenue. But I will describe the bonnets, for such they really were. One was a brown Italian straw with bunches of black Russian satins in front, a fishbow of black satin loops flaring on one side and a stand-up row of small velvet loops at the back. It was simple, but the style was elegant, and the price thirty-five dollars.

The other was a yellow bird trimmed with small upright tips of ostrich feathers and gold. The ornaments were balls of jet and gold and there were great oriental rings of gold confining bunches loops of velvet. This was twenty-five dollars. Both shapes were for such they really were. The Panama straws are in again, which is like a turban with strings. There are yellow Panamas and white ones. I saw some that were faced with black satin under the brim and trimmed with the crazy satin loops so much in vogue and bunches of violets.

There are all kinds of funny lace straws and fine Neapolitan or elip peaked crowns, with open straw brims. The English walking-hat is a boat-shaped straw with a dent in the crown. The new sailor is long instead of round and is trimmed with a high bunch of violets.

The ebenebons are bonnet shapes, no larger than your hand. They are of jet, knobs and spikes.

Ribbons are not "in" this season for trimming, except the wide ones for Alsatian bows. Big buckles of steel, jet or silver are worn on hats, but they are laid lengthwise of the brim instead of up and down.

Among novelties are the sleeveless silk waists, with rows of lace insertion running across the front. It only takes a yard and a half of silk to make one of these, as the back of the waistcoat can be of old silk. One I noticed was of blue satin. There were five rows of lace across the front—one in the collar, two in the belt. The price of the garment was three dollars. The new shirt waists are of fine pink or blue chambray solid colors, with shoulder ruffles and big sleeves. These are \$3.50 each.

In regard to gowns, I heard an authority say recently that if a woman could only have two gowns a year she should let one of them be tailor-made; then she would always be dressed like a gentlewoman.

The improvement that a tailor-made gown makes in the figure is very marked, and it carries with it, as the result of skilled labor, an impression of extreme elegance.

Long basques are worn by young ladies, short ones by matrons. The round waist with surplice front is used this spring. A light material called

CLOTH AND LACE COSTUME.

featherbone, is used to stiffen the skirts of dresses instead of horsehair. The umbrella skirt is a popular form for walking dresses and tailor-made gowns.

The draped skirt is seen in new models for these spring days. In the cloth walking suit in the illustration, the skirt is draped upon one side, and trimmed at the bottom with a band of fancy fur, which also trims the surplice waist. Sleeves and front of light tufted cloth, empire poke hat.

The second dress in the illustration is of blue lady's cloth, draped on one side with lace. The arrangement of the waist is new and strikingly novel. Both designs are direct from Paris.

I must tell you what a French dressmaker said to me on a recent visit I made to her establishment. I was trying to explain to her in her native tongue that I wanted the cloth for my new gown to be of an intense shade of green. She listened politely and answered in voluble English:

"As for color, the green is the first, but the very more shades, not too much bright, are worn."

Republican Municipal Ticket.

For Mayor:
DR. J. LEE McCOMAS.
For Councilmen:
DR. SINGLETON TOWNSHEND
G. ARTHUR FRALEY
GEORGE D. WHITE.

Notice.
Do you owe a year's subscription to THE REPUBLICAN? If so, call and settle at once, as we must have the money due us immediately.

The Republican Municipal Ticket.
On Monday next the people of Oakland will be called upon to select by ballot a Mayor and three Councilmen to serve for the ensuing two years.

At the head of this column appears the ticket which the Republicans of Oakland have selected for the suffrages of the people. It is unnecessary to make more than a simple reference to the *personal* and peculiar fitness of each candidate for the position to which he has been nominated.

Dr. J. Lee McComas is one of the foremost citizens of our town and a man who has spent the greater portion of an active professional life in this community.

Dr. Singleton Townshend is eminently qualified for the Council and will make a most excellent member of that body.

Mr. George D. White is generally liked and respected and will give due consideration to the interests of our people.

Mr. G. Arthur Fraley is a young man, at present teller in the Garrett County Bank and is thoroughly competent and will make a good Councilman.

We have no hesitancy in saying that the Republicans of Oakland have never placed a better and more conservative ticket in the field than this one. It is a ticket upon which all Republicans can unite and one which commands the respect and hearty support of our people.

The Congressional Candidates.
Speaking of the candidates throughout this Congressional district, the Baltimore News of last Sunday, contained the following which is of interest to the Republicans of Garrett county:

"Garrett Republicans will also come to the front with a candidate for Congress this fall in the person of George W. Wilson, who has been a member of the House of Delegates three times. Mr. Wilson is a lumber manufacturer and is very popular. His friends have been urging him for some time to allow the use of his name, and he has finally consented. It is the first time that Garrett Republicans have asked for recognition in a Congressional convention, and they say if Mr. Wilson is nominated he will make one of the most vigorous campaigns the district has ever known."

Among the many serious and difficult problems confronting the American people at this time, one of the most important is that of immigration. It is a fact patent to all that a large proportion of the

immigrants now daily landing upon our shores are not such as will make desirable citizens. Every honest, intelligent, industrious, law-abiding man, come from whence he may, should be welcome to our shores. He will add to our civilization and prosperity. But we cannot hope to assimilate the mass of ignorance, crime, filth and pauperism daily dumped upon our soil from southern Europe. Their presence is a danger, which grows as the number increases.

This problem is so complicated that no one can hope for a perfect solution all at once. Any steps in that direction should receive our hearty endorsement. The Stone bill providing for consular inspection on the other side, is such a step. There is no reason why the immigrants should come 4000 miles to determine whether he is admissible or not. It is much better for him to know that before he starts, and that fact can certainly be more accurately ascertained where he lives than on the other side of the globe. It is to be hoped that this measure shall become a law, and to that end every citizen should lend his influence.

A Democratic Scheme.

The municipal ticket which was evolved at the citizens meeting on Monday night last is composed of gentlemen well known and respected in this community, and against whom personally we have nothing to say. We do deprecate, however, the scheme underlying their nominations, for it is nothing more nor less than an attempt on the part of the Democrats of this town to once more regain control of our municipal government.

Repeatedly beaten and defeated they have concocted this plan, which, with the aid and assistance of certain people who have heretofore affiliated with the Republican party, they hope to carry to a successful issue. No man who claims to be a Republican can afford, and especially at this time, in the light of Democratic imbecility and inconsistency in National affairs, even in a local election, give aid or countenance, or assist in any manner, in the upholding of that discredited organization.

We are pained to think that any Republican should so far forget his allegiance to his party to for one moment waiver in defence of its principles, even in a municipal election.

The Tariff of 1846.

THE REPUBLICAN can say nothing stronger or more to the point than the *Wheeling Intelligencer* condenses in the following article upon the tariff bill, and the speech of Senator Voorhees in defence thereof:

"The advocates of the Wilson tariff bill delight to dwell on the good old days when the Democratic party made the tariff laws of the country. They have special fondness for the Walker tariff of 1846. Senator Voorhees lauds it in opening the discussion in the Senate.

The Walker tariff-for-revenue took the place of the protective tariff of 1842. It was an abandonment of the protective policy and was heralded as a revenue measure. In the first it was successful, in the second an abject failure. It did not raise the revenue enough to support the government, and the government was in Democratic hands.

The tariff acts of 1846 and 1857 were in operation from 1847 to 1861, a period of fifteen years. In that time the expenditures of the treasury went beyond its receipts by \$99,000,000. The average annual expenditures were \$53,000,000 so that the deficiency was almost equal to the cost of running the government for two average years. The public debt increased from \$15,550,202 in 1846 to \$90,580,873 in 1861.

The act of 1857 to make worse the bad tariff of 1846 was signed by President Pierce a few hours before he went out of office. President Buchanan, who was just coming in, was a Pennsylvanian and a protectionist, and the free traders desired to fix things before he got in. Then as now the Secretary of the

Treasury was a Kentuckian and a stout free trader. Jefferson Davis was Secretary of War.

Whether it was the scheme to deplete the treasury and to ruin the public credit so as to cripple the government in the civil war then fast coming on, the fact is that both of these ends were accomplished in addition to bringing on the country the desolating panic of 1857.

To mitigate the evils of the Democratic tariff policy the country had had all the advantages of war and famine in Europe and of the gold development in California, which in the five years from 1850 to 1855 yielded a production of \$290,000,000. Yet the condition of the country was such that President Buchanan, the last Democratic President until Mr. Cleveland, painted this picture of distress in his annual message to Congress:

With unsurpassed plenty in all the productions and all the elements of natural wealth, our manufacturers have suspended, our public works are retarded, our private enterprises of different kinds are abandoned, and thousands of useful laborers are thrown out of employment and reduced to want. We have possessed all the elements of material wealth in rich abundance, and yet, notwithstanding all these advantages, our country, in its monetary interests, is in a deplorable condition.

The treasury was in straits and had to have money to pay the interest on the public debt due January 1, 1861, and to keep the government moving. Congress authorized a loan of \$20,000,000. The Secretary of the Treasury tried to place half of it and failed. Then Congress authorized the issue of \$10,000,000 in treasury notes, resulting in a humiliating experience for the government.

The Secretary of the Treasury offered \$5,000,000 of this issue. There were bids for one-tenth of it, \$500,000, which the bidders were willing to accept at discounts ranging from 35 per cent. down to 12 per cent., and the \$500,000 was borrowed at a discount of twelve cents on the dollar. A syndicate of bankers took \$1,500,000 at the same rate of discount, and later took the whole of it on the same terms. At the same time the State of New York placed its bonds on the market at a premium ranging from 13 to 24 per cent.

In January, 1861, the government was obliged to try another loan of \$5,000,000, and the offers for it ran from 8 1/2 to 11 per cent. discount. Things were going so badly that Congress passed an act to provide more revenue and President Buchanan signed it two days before he went out of office. When the Republicans got control they were confronted with a civil war, but they understood the business of finance, provided revenue, restored the credit of the government to the highest among nations and began such a development of home industry as the world had not seen before.

Garthright has just opened up the best and finest line of dress shoes for ladies and gentlemen that was ever brought to this country. He is still closing out his entire stock of dress goods and men's and boys clothing at cost. Just received a car load of wire nails to be sold out at rock bottom prices. Will be receiving extra good bargains in drugs, groceries, clothing, prints and muslins every week. The cash will always get good bargains. 5-2t

Notice.

I take this method of informing the public generally that I have sold my drug store and good will to Messrs. Henry W. McComas and Mallon C. Hinebaugh who will conduct the business at the old stand in the Mayers' building. Thanking the public for the patronage I received and hoping the new firm will deserve the continuance of the same, I am, Very truly yours, HENRY J. MAYERS.

Card of Thanks.

We desire through the columns of your valuable paper to extend our heartfelt gratitude to the many kind-hearted people for their sympathy in our sore bereavement. May God's richest and brightest blessings be ever theirs to enjoy. Mrs. JAS. G. ARKOLD & FAMILY.

Ripans Tabules relieve nausea.

FOR CONGRESSIONAL HONORS.

Several More Letters Received by "The Republican" Favoring a Garrett County Man for Congress.

(In order to meet the sentiment of our people on the question of a nominee for Congress we have addressed communications to active and prominent party workers throughout the county and we are pleased to announce that the following are the results.)

SWANTON, April 10, 1894.

To the Editor of the Republican.
In a few months the Republicans of the Sixth Congressional District will be called upon to name a candidate for Congress. Already the names of several gentlemen have been mentioned in connection with the nomination to this county and that we are entitled to that honor. Garrett county Republicans have always loyally supported the nominee of the party, no matter from what county he came. So staunch and true has been the support that Garrett county has been a synonym for Republicanism and when other counties forsake the principles of the G. G. P. Garrett was always found true to the banner of the Republican party.

We have never before asked to name the candidate for Congress, but the time has come for us to demand recognition and to show that we are not "an appendage of Allegany county politically," as recently declared by a correspondent of one of the Baltimore daily papers, but that we have political rights as well as mother Allegany or any other county in the district.

I am glad to see that the people are taking an interest in this matter and I fully endorse all that has been said in favor of the nomination of that grand old Republican, the Hon. Geo. W. Wilson. No man has done more for the success of our party in the county and if he is nominated he will undoubtedly be elected by a handsome majority and will make us a creditable Representative, a true exponent of those principles which are for the best interests of the American people, and a strong opponent of Democratic Free Trade.

Yours for McKinley, Reed, George W. Wilson and victory. HOOSEER.

GORMAN, April 7, 1894.

To the Editor of the Republican.
The people of Garrett county have always stood firm and supported the Republican nominees for Congress with a good majority, no matter from what county they came. Now as Garrett has never had a candidate for that honor we think that we should be recognized this fall.

For the nomination we will with pleasure name Mr. George W. Wilson, a man who has always been a true friend of Republicanism and who would make us an able Representative.

Very truly yours, E.

Concerning Archer's Pardon.

Governor Brown has fixed May 9th to take up the application for the pardon of ex-State Treasury Stevenson Archer. Advertisement to this effect will at once be published, so as to give those who may oppose the application an opportunity to prepare their objections. Archer's term will expire September 1st deducting his commutation for good behavior. If the governor concludes to grant the pardon, Archer will be released about June 1, three months before the expiration of his sentence.

The governor is induced to take this action by the strong petitions filed with him, signed by nearly all the members of the Legislature without regard to politics. Senator Parran, of Calvert county, a Republican, started these petitions and interested himself in having them signed. Numerous other petitions asking this pardon are also on file in the executive department.

Maryland Statistics.

The statistics for Maryland are: Total number of farms, 40,798; total acreage of farms, 4,952,390; value of land, fences and buildings, \$175,058,550; value of implements and machinery, \$6,540,090; value of live stock on hand June, 1890, \$19,194,320; estimated value of farm products, \$26,463,364; number of horses, 130,395; mules and asses, 14,161; working oxen, 17,066; milch cows, 124,198; other cattle, 107,925; swine, 112,020; sheep, not including spring lambs, 132,329; number of fleeces shorn, spring of 1888 and fall of 1889, 101,535; pounds of wool, 243,225.

Rogers' Specific Liniment.

A radical cure for cholera. Sold by A. G. Sturgiss, Oakland, C. F. White, Huttons; The Co-Operative Store, J. O. Delaney, Cornith; E. A. Weimer, McHenry; Smith & Callis, Johnstown; J. E. Guagey, Accident; Jonas Frazee, Yongh Store Co., R. Liston, Sellersport; A. Wass & Son, Mineral Springs; L. E. Friend, Friendsville; P. T. Garthright, Mountain Lake Park and at all other general stores.

The Swanton Robbery.

To the Editor of the Republican.

You requested of me a statement relative to the robbery perpetrated in Swanton at my dwelling Sunday, April 1st, 1894, while all of the members of the household, except a young woman employed as a cook, were at church. The church lot and my back yard are separated only by the width of the county road, consequently the church and dwelling are close and in unobstructed view of each other. As usual my family were at Sunday school before ten o'clock a. m., but the Rev. Mr. Taylor, contrary to his custom, did not that morning attend the Sunday school and remained in our sitting room reading until time for him to commence at eleven o'clock. Walking up to the church door Mr. Taylor met my little daughter, of about nine years old, leaving the Sunday school on her way home. While reading the psalter in the opening service the little girl mentioned ran back to the church in almost breathless haste with the message to me from Ida, the cook, that two tramps were in the house. Divining from the highly excited manner of the child that violence was threatened I left the church as expeditiously as a prudent caution against alarm to the congregation would justify, bounded over the fence and ran as fast and as noiselessly as possible to my room for arms. The one thought dominant in my mind was the danger to which the lone girl, Ida, was subjected, and grasping that which might become potent in the pending emergency, I ran stealthily down the covered steps toward the kitchen where slight movements could be heard. At the dining room door Ida met me, chafing her arm and hysterical in lamentations. Negatively answering my questions she pointed towards the stable as the route the two tramps had taken. The elevation at the stable offered a commanding and clear observation of the surrounding community, and though less than ten minutes had intervened since the first appearance of those men to Ida, neither a glimpse nor a trace of them could be had, and by that time men had left both churches and were running through the lots about the stable, up the road and were deploying over the fields leading to the woods. In a brief while about fifty determined men, mounted and on foot, were in active pursuit and continued it for hours. The ground was fresh and except one tracking to which suspicion could attach was discovered and that was followed up to the man and proved futile.

THE HOUSE GIRL'S EXPLANATION.

The child, nine years old, had reached the sitting room and was looking through a book. Ida came in and exchanged a few words pleasantly with the child, then returned through the dining room to the kitchen. This must have been a few minutes after eleven o'clock. Arriving in the kitchen Ida says two supposed tramps appeared at the door, one masked, the other wearing no mask. They asked for something to eat. She left the room through a narrow hall to the pantry opening on the hall between the kitchen and the dining room, and prepared two slices of bread with butter and meat for each tramp, then went back and handed the bread in a piece of newspaper to each man. Observing no indication to leave, she inquired if more was wanted. The masked man answered, "We want money." We know Mr. Miller has been to Frankville on a survey and got money; we were here the other night, but a noise was made and we left—now we mean to have it." With that declaration the masked man, who seems to have been the tramp in the game, drew a short club to strike her over the head. She threw up her hand to parry the blow and received it on the arm. Both then ran up the steps to the floor over the kitchen and sent Mary, the child, to the church for help. She then went to the back porch to retrieve herself with a drink of water, heard a few quick strides, then the tramps rushed back over the way they went up; reaching the out door the "masked knight" rushed from his path to deal her a stunning blow from the back over the shoulders, and she saw then no more—both, just as they came, mysteriously vanished. In those few minutes they went up the kitchen stairs, found their way through the room over the kitchen, then through a storage room; then through a bed room, then over a hall, then through the door of another bed room to the press built in a recess of the wall. Passing in this intricate winding two other closets similar in formation to the one opened, having locked trunks and drawers with other places of average security for values, leaving all untouched and went as if by intuition to that remote and particular place. The fact is manifest that the press door

was first opened and the cutting about the lock and bolt done while the doors were open—the cutting would have to be done from the inside with the door shut—made likely to create misleading impressions. About sixty dollars were taken, twenty dollar bills and other notes. Part of the notes were in a small box, over ten or fifteen dollars in loose silver; the notes were taken but the silver, so far as we can see, was not touched. Respectfully, C. M. MILLER. Swanton, April 7, 1894.

A Household Treasure.

Dr. W. Fuller, of Cambridge, N. Y., says that he always keeps Dr. King's New Discovery in the house and his family has always found the very best results follow its use; that he would not be without it, if possible. Dr. A. D. Kenna, of Cambridge, N. Y., says that Dr. King's New Discovery is the best cough remedy that he has used in his family for eight years, and it has never failed to do all that is claimed for it. Why not try a remedy so long tried and tested. Total bottles free at all Drug Stores. Regular size 50c, and \$1.00.

"THE REST" FOR + SALE!

The valuable property situated in the town of Oakland, known as "THE REST," is now offered for sale. This property has a reputation and is valuable to anyone wishing to engage in keeping a Summer Resort. For particulars apply to D. P. MILLER, Cumberland, Md.

ORDER NISI.

In the matter of the estate of Edward C. Tillson, deceased, vs. P. R. Schofield, Adm'r. No. 286 Administration. In the Orphan's Court for Garrett County. It is hereby ordered by the Orphan's Court for Garrett County, this 1st day of April, 1894, that the sales of the real estate of Edward C. Tillson, deceased, as made by P. R. Schofield, Administrator for J. A. George, Mary and Mrs. Mary Madigan, be null and void, unless cause to the contrary be shown on or before the 20th day of April, 1894, and a copy of this order be inserted in some newspaper published in Garrett County for at least three consecutive weeks on or before the 20th day of April next. No report since the amount of sales to be \$120.00. J. W. WHITE, Register. True copy—Test: J. W. WHITE, Register.

Yours truly,
JONAS FRAZEE.

THE BOUNDARY.

The Story of the Great Boundary Dispute Continued.

T. Jay in Cumberland News.

OAKLAND, Md., April 1, 1894.
OBSERVATIONS ON THE CORRESPONDENCE.

From the foregoing correspondence it appears that Gov. Sharpe had been led to believe from information received from Col. Cresap that the South Branch was the larger stream and that the interest of his patron, Lord Baltimore, would be much advanced if a resettlement of the location of the head spring could be brought about, and that he was quite active in endeavoring to bring this about, but as Lord Baltimore was not impressed with the idea and had but little faith in being able to accomplish anything in that direction, and that he recognized that the decision in Fairfax's case was so far conclusive and binding upon him that unless the consent of Lord Fairfax and the governor of the colony of Virginia could be obtained it was useless to attempt to reopen and resettle the question, and he would not even consent that Col. Cresap should investigate the matter unless he would make a bargain beforehand that it should not bring very much costs upon his Lordship. Sharpe was very active and says in his letter of Nov. 29, 1753, above quoted, that he had hinted to the Governor of Virginia his intent to examine the two branches of the Potomac. But the Governor of Virginia never consented to have the question reopened, and Lord Fairfax refused to have anything to do with it, consequently nothing was done by Lord Baltimore.

Whether Col. Cresap was ever employed to survey the two branches of the Potomac with a view to this question this correspondent is not informed and has not found anything to show that he was. It has not been claimed that the map made by Col. Cresap which is found on page 12 of the volume of the Archives of Maryland from which the above correspondence is taken, was at the instance of Lord Baltimore to be used in settling up a claim that his boundary extended to the meridian of the South Branch of the Potomac. But it seems that such was not the case. It will be seen that in the letter of Calvert to Sharpe, dated January 5, 1754, and from the whole correspondence that Lord Baltimore was at that time deeply interested in and concerned about his controversy with Pennsylvania in regard to his northern boundary and that he was anxious to find the latitude of the most northern bend of the Potomac as it had an important bearing on any agreement he might make with Pennsylvania as to that boundary, he being unwilling to adopt any line that would strike the Potomac and throw any part of that river within the bounds of his northern neighbor. He accordingly desired his Gov. Sharpe to have Col. Cresap take observation of the north temporary line and ascertain the most northern bend of the Potomac, and in Sharpe's letter to Calvert of June 6, 1754, above, he says he has been unable to comply with his requisition concerning the northern bend of the Potomac; that he had some months before written two letters desiring Cresap to return to him a copy of his map of that river, and in a postscript to that letter he says he has just received a letter from Col. Cresap with the plan and certificate concerning the North Branch of the Potomac and the temporary line as run by him. And this is evidently the map which is published in the archives, and it was made for the information of and as an assistance to Baltimore in his controversy with Penn. and not with a view to any proceedings against Virginia. That this map was made solely with reference to this controversy with Penn is more clearly shown by the letter from Calvert to Sharpe, dated December 10th, 1754, page 130, above quoted. He says: Col. Cresap's map of the north bend of the Potomac river with respect to the north temporary line removes the doubt of the bend touching the line, there being south of the line considerable distance of country between the line and the bend, admitting extensive passage to the spring head of the river, it will be observed that this map is laid down on this map, and it seems clear that this is the map referred to in the above correspondence.

NO ACTION TAKEN BEFORE REVOLUTION.

And the State of West Virginia says that nothing further was done in the matter either by Lord Baltimore, the proprietor of the province of Maryland, or by his governor or colony, while said province remained subject to the British crown. No action whatever was taken by Lord Baltimore to resettle the western boundary while he retained his proprietary rights over the province of Maryland although he had become advised by Col. Cresap's map of the facts as to the length and location of the two branches of the Potomac,

and notwithstanding that the King in council had full and exclusive jurisdiction of the matter and there was nothing to prevent the institution of proceedings before His Majesty to that end.

And so the matter remained until after the revolutionary war had ended, and in the mean time the colony of Virginia as has been shown above, continued to exercise jurisdiction over the territory south of the North Branch and Lord Fairfax claimed to the boundaries established by the King in 1745, and granted patents for the lands in said territory and surveyed off for his own use large tracts that he called manor lands.

MARYLAND LAND BOUNDARY.

It appears that during the revolutionary war the State of Maryland by various acts of her General Assembly agreed to give bounties of fifty acres of land each, to her soldiers in said war. And by act of 1781, chapter 20, all the lands within the State, in Washington county westward of Fort Cumberland, with certain exceptions specified therein, were appropriated to discharge the engagement of land therefore made to the officers and soldiers of said State and the residue to the use of the public as the General Assembly should thereafter direct.

And by a resolution adopted by the General Assembly of Maryland, at its April session in 1787, the governor and council were authorized to appoint and employ some skillful person to lay out the manors and such parts of the reserves and vacant land belonging to the State lying to the westward of Fort Cumberland as he might think fit and capable of being settled and improved into lots of fifty acres.

FRANCIS DEAKINS' SURVEY OF MILITARY LOTS.

In 1788 the General Assembly of Maryland passed the act (Act 1788, ch. p. 44) reciting the above mentioned acts and resolutions and the appointment of Francis Deakins, and that said Deakins had finished the said survey and returned a general plat of the country westward of Fort Cumberland, on which 4,165 lots of 50 acres each are laid off, besides sundry tracts which have been patented, distinguishing on the plat those lots which have been settled and improved from those which remain uncultivated; that said Francis Deakins had returned two books entitled A and B, in which are entered certificates of all the lots before mentioned; that 636 of said lots had been settled and improved by settlers; that there were about 2575 soldiers entitled to said bounty, and that about 100 lots ought to be set apart for the recruiting officers; therefore enacted that 2,575 of the aforesaid lots lying in the most fertile part of the country and contained in the following limits, to wit: Beginning at the mouth of Savage river and running with the North Branch of the Potomac river to the head thereof; then with the present supposed boundary line of Maryland until the intersection of an east line to be drawn from said boundary line with a north course from the mouth of Savage river will include the number of lots aforesaid to be distributed by lot among the said soldiers and recruiting officers, and their legal representatives, etc.; also that the lots so granted to the officers aforesaid shall be adjacent to those hereinafter directed to be distributed to the soldiers, and shall be contained within the following limits, to wit: By extending the aforesaid north course from the mouth of Savage river until its intersection with an east line to be drawn from the aforesaid supposed boundary line of Maryland will include the necessary number, allowing to each officer or his representatives four lots as aforesaid.

And also further enacted that any of the said lots not theretofore appropriated should be liable to be taken up in the usual manner by warrants, etc.

Said act continues as follows: And be it enacted that the line to which said Francis Deakins has laid out the said lots is in the opinion of the General Assembly far within that which this State may rightfully claim as its western boundary, and that at a time of more leisure the consideration of the Legislature ought to be drawn to the western boundaries of the State as objects of very great importance. Said act further provides that said general plat and books of certificate be lodged in the land office, and that said book of certificates of the 4,165 lots aforesaid be considered to all the interests and purposes as record books of the land office.

DEAKINS' MAP, ETC.

A duly certified copy of said map is filed herewith as a part of this answer, marked defendants' exhibit "H," and also copies of the courses and distances of all the lots in said map which adjoin the line drawn from the Fairfax stone to the Pennsylvania line, marked defendants' exhibit "I."

The Said Francis Deakins was

directed to lay out all the lands in Maryland lying west of Fort Cumberland, and in doing so he ran a due north line from the Fairfax stone to the Pennsylvania line and laid out the lots as far westward as this line but no farther. It will be seen that the boundaries of the lots the courses and distances of which are filed herewith as above stated, all call for a due north line. This is the line from the Fairfax stone to the Pennsylvania line. And said act of 1788 speaks of this line as the "present supposed boundary line of Maryland, although it states that the said line is in the opinion of the General Assembly far within that which this State may rightfully claim as the western boundary."

This language cannot be construed to be the assertion of a claim to go to the head of the South Branch.

FIRST CONSTITUTION OF VIRGINIA.

The first constitution of Virginia was adopted June 29, 1776. Section 21 of the constitution is as follows: The territories contained within the charter erecting the colonies of Maryland, Pennsylvania, North and South Carolina, are hereby ceded released and forever confirmed to the people of those colonies respectively, with all the rights of property, jurisdiction and government and all other rights whatever which might at any time heretofore have been claimed by Virginia except the free navigation and use of the rivers Potomac and Potomoke with the property of the Virginia shores or strands bordering on either of said rivers, and all improvements which have been made or shall be made thereon. The western and northern extent of Virginia shall in all other respects stand as fixed by the charter of King James the first in the year 1609 and by the public treaty of peace between the crowns of Great Britain and France in the year 1763, unless by the act of the Legislature one or more territories shall hereafter be laid off and governments established westward of the Allegheny Mountains. And no purchase of land shall be made of the Indian natives; but on behalf of the public by authority of the General Assembly.

At the time this constitution was adopted Virginia held up to the North Branch of the Potomac and to the Fairfax stone and these were also the bound lines of Maryland, and as has been shown above neither Lord Baltimore nor the colony of Maryland had asserted or taken any steps to assert or establish any other boundaries for that colony. Virginia recognized the North Branch as the Potomac river; this is the Potomac river mentioned in the constitution, of which she retained the free navigation and use with the property of the Virginia shore or strands bordering thereon and all improvements which had been made and should thereafter be made thereon.

CONTEST OVER THE SOUTHERN BOUNDARY.

From the time the charter of Maryland was granted there had been serious controversy between that colony and Virginia as to the southern boundary line of Maryland, and this controversy had resulted in several armed conflicts between citizens of the two colonies. The principal cause of this conflict was the claim of William Claiborne to certain territorial rights granted him by the King, of trading with the natives, and of the settlement of Kent Island by Virginians prior to the date of the Maryland charter.

These controversies and conflicts are a part of the history of the two colonies, and in them was involved also the rights of the respective colonies to the navigation and fishing privileges of the Potomac river.

This state of affairs as to this southern boundary continued up to and after the revolution, and shortly after the close of the war the States of Virginia and Maryland each appointed commissioners to endeavor to arrive at some adjustment of these difficulties. Maryland appointed Daniel of St. Thomas Jenifer, Thomas Stone and Samuel Chase, and Virginia appointed George Mason and Alexander Henderson. Upon the invitation of Gen. Washington these commissioners met at Mount Vernon, and on the 28th day of March, 1783, they agreed on a compact to be adopted by the two States. This compact was approved, ratified and confirmed by the General Assembly of Virginia by an act passed January 3, 1786, which recites the compact in full and is found in 1 Rev. Code of Va., page 53, ch. 18.

Specimen Cases.

S. H. Clifford, New Cassel, Wis., was troubled with Neuritis and Rheumatism. His stomach was disordered, his liver was affected to an alarming degree, appetite lost, and he was terribly reduced in flesh and strength. Three bottles of Electric Bitters cured him. Edward Shennard, Harrisonburg, Va., had a running sore on his leg of eight years' standing. Used three bottles of Electric Bitters and seven boxes of Bucklen's Arnica Salve and his leg is sound and well. John Spence, Ontario, O., had five large Fever sores on his leg, doctors said he was incurable. One bottle Electric Bitters and one box Bucklen's Arnica Salve cured him entirely. Sold by all Drug stores.

Mountain Lake Park.

The Park is to have a millinery and dress, making establishment this season. Miss Anna Murphy and Miss Matilda Enlow, of West Virginia, have rented the Stone cottage in "Cozy Row" for that purpose.

Some Zanesville, Ohio, people have rented C. E. May's cottage for the summer.

Col. Wood and Levi Hewitt were visitors at the Park Saturday last.

Columbian Hotel is to be papered. C. E. Dawson has the contract. The job will require over 1,000 pieces of paper.

The spring in the square south of the office has been cleaned out and a neat arbor placed over it. In the early days of the Park, this spring furnished most of the water drunk by visitors to the Park.

Rev. J. O. Thompson, editor of the *Mountain Echo*, Keyser, W. Va., is to deliver his interesting lecture, on "Gettysburg," on the evening of July 3, the anniversary day of that battle. This will be a rare treat to the old soldiers and their friends, and we bespeak for our friend a full house.

We were startled Saturday afternoon by the announcement of the sudden death of one of our oldest citizens, Mr. James Arnold. The bereaved wife, daughters and sons have the fullest sympathy of all our people. Mr. Arnold has not been very strong for some time. Mr. Arnold was putting bath on Miss Emma Lush's house. About 3 p. m. Frank heard him groan. He hurried to him, but when he reached him, he was dead. Mr. Arnold was nearly 75 years of age. Funeral services were held Monday at 1:30 p. m. at Assembly Hall, by Rev. Geo. Kepler, after which the remains were followed by a number of sympathizing friends to the cemetery near Oakland.

Oak Hill.

Please allow me space in your valuable columns for a few items from this section of Garrett county. The weather has been very damp and in consequence the roads are exceedingly muddy.

There are quite a number of sick persons in this vicinity, among them being Mr. James W. Lee, Mrs. J. D. Schroyer and little Joe Teats, who is ill with typhoid fever. Twenty-eight head of fat sheep belonging to Mr. Joseph Groer are being sold from the effects of which they died.

Whilst Mr. David Evans was engaged in firing away on his mill one day last week the engine started from some unexplained reason, and the saw caught him in the leg making a very painful wound about three inches long.

Mr. Silas Teats is improving his farm by erecting new fences and clearing new ground.

Mr. Clark Rush has burned a large kind of line and scattered it over his farm.

Mr. Joseph Groer, the cattle dealer, started to Baltimore on last Tuesday with a car load of cattle for market.

Mr. Henry Schlossnagle is hauling lumber and rocks for his new barn. Mr. George Schlossnagle will build the barn for him.

Mr. Silas Teats expects to go to Virginia and locate there.

Mineral Springs.

Miss Ida Harden has returned home after spending the winter with her sister at Moscow Mills.

Mrs. Jesse Frazee has been very ill with heart trouble.

Mrs. Della Conner, of Garrett, Indiana, who spent a week with her mother and other relatives here, has returned to her home.

The young folks of Mill Run and vicinity had a ball at the home of Mr. John Boyd on the night of April 5th. Mr. Samuel Turner furnished the music and a pleasant evening was spent.

The majority of our farmers are though with their spring work.

We have had quite a cold snap and the farmers all say that the fruit is killed.

Mr. Jasper Groye was the guest of Mr. Jonas Boyd Sunday. XX

Pea Ridge.

There will be preaching services at Cherry Grove next Sunday at 10.30 o'clock a. m. All are welcome to attend.

Mr. Walter Crowe was working for Mr. Allen Wilhelm last week.

Miss Laura Robeson, of near Avilton, was here last week.

Mr. Henry Backworth, of New Germany, was on a visit to Mr. John Broadwater's recently.

Our Sunday school will be re-organized in the near future.

Mr. Calvin Coleman was on a visit to New Germany last Sunday.

We are glad to note the convalescence of Mr. R. E. Garlitz.

Mr. George Miller and family, of near New Germany, were on a visit to friends here Saturday.

LADIES.

Feeding a tonie, or children who want building up, should take

BROWN'S IRON BITTERS. It is pleasant; cures Malaria, Indigestion, Biliousness, Liver Complaints and Neuritis.

CASTORIA

for Infants and Children.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me." H. A. Archer, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"The use of 'Castoria' is so universal and its merits so well known that it seems a work of supererogation to endorse it. You are the intelligent families who do not keep Castoria within easy reach." CARLOS MARTIN, D. D., New York City.

Castoria cures Colic, Constipation, Sour Stomach, Harshness, Indigestion, Kills Worms, gives sleep, and promotes digestion. Without injurious medication.

"For several years I have recommended your 'Castoria,' and shall always continue to do so as it has invariably produced beneficial results." EDWIN P. PARKER, M. D., 155th Street and 7th Ave., New York City.

THE CASTORIA COMPANY, 77 MURRAY STREET, NEW YORK CITY.

ONE YEAR

One Dollar and Seventy-five Cents CASH IN ADVANCE!

Address all Orders to THE REPUBLICAN.

MERCHANT TAILORING.

B. Savage, the Tailor, has returned to Oakland and reopened his Tailoring establishment, and will be pleased to serve the people of the town and vicinity at exceedingly low prices.

He will make Suits of all wool goods, fit guaranteed, for \$15 and up.

He has also a large and complete stock of ready made clothing which he will alter to fit and make no charge for the alteration. Give him an early call and judge for yourselves. He will also in short time have a full line of shoes and hats for sale. Yours respectfully, B. SAVAGE, Cor. Oak and 3d Streets.

\$9,000.00

WORTH OF

GOODS AT COST

To Make Room for Spring and Summer Stock.

There is such a thing as having too many goods, so we have decided to sacrifice our entire stock of

DRY GOODS, SHOES, CLOTHING, NOTIONS, Etc., AT ONCE!

This throws thousands of dollars worth of as desirable goods as were ever brought to this vicinity into the hands of the people at first cost. We intend to make room for our new stock and won't fool all spring about it.

Will go in the slaughter mill with the balance. Now is the time to load up with Muslins, Calicoes, Gingham, Canton and Woolen Flannels, Table Damask, Towels, etc.

Men's, Women's and Children's go in. Don't listen to what you hear, but drop in and see for yourselves, and above all things see prices for

SHOES

The Clothing Department.

It will be a revelation to you. Men's and boys' suits for less than cost. Drop in and see. It will pay you to look through the stock and learn prices in

The Notion Department,

where thousands of useful articles at first cost may be found. The stock must move at once as the time is coming to put in the new stock. The reduction in the price of Dress Goods will be startling. You will be enabled to secure Fine Woolen Fabrics at the usual price of Cotton and Worsteds—almost as low as calicoes.

Auction Every Saturday Until Stock is Reduced.

The auction sales will be under the management of Mr. John Shaker, who is now in the east looking up bargains and will return with a fine line of Silks, the Latest Novelties, Carpets, Mattings and Oilcloths.

WE ARE SELLING GOODS AT COST NOW.

Our first auction will be held on Saturday, March 24, beginning at 11 o'clock a. m., to which all are cordially invited. Very respectfully yours,

SINCELL BROS.

whose duty it was to supply her with a fresh pair of gloves at the beginning of every game; "I shall not play any more. I will have my revenge to-morrow, M. le Marquis."

"Your imperial majesty has had it already," replied Marquis Stroganoff, who was the popular and accomplished French ambassador. "If you could but see the deep conviction of my heart for having had the presumption to defeat you, you would find yourself amply avenged."

The young empress smiled graciously and rejoined: "Very well, but I prefer deeds to words. That is what I try to impress upon my people. Apropos, you know how we Russians pride ourselves on the strictness and alertness of our detectives, and how nothing escapes their keen vigilance. As you seem to doubt the watchfulness of my subjects, I requested that the very next case of detected smuggling be at once made known to me."

"To doubt would be treasonable, your majesty," said the marquis, with a smile. "Do let us hear the details." "Count Lazareff has just been arrested and detained on the frontier for smuggling all kinds of contraband articles from Paris, which were most ingeniously hidden in the linings and roof of the carriage; and the emperor, to encourage the detectives, has distributed among them the heavy fine of eight hundred roubles, which the count had to pay. What do you say to that, marquis?"

"I can but say, your majesty," he answered, with a shrug of his shoulders—"I can but say how clumsy the man must have been to fail in such a simple thing."

"Simple thing!" repeated the empress, with a slight look of surprise. "I do not think you would find it so easy to deceive our inspectors."

"Will your majesty give me leave to try?" the marquis quietly asked.

"Oh, no," she answered with a smile. "It would be of no use. You know that your person and property are under the surveillance of our inspectors. You would not be a fair test. I would wager, however, this diamond ring that were you to pass our frontier as a private individual, you would not succeed in smuggling in the veriest trifle without being detected."

"I accept the challenge," replied the marquis, with a graceful bow, "and as I am shortly going to France on urgent private business, I shall avail myself of your gracious permission, return to Russia as a private individual, and subject myself and property to the most rigorous search of the custom house."

"You have accepted my challenge," the empress rejoined. "Remember, marquis, we shall have no pity on you."

Great excitement prevailed at the small frontier station on the road from Königsberg to St. Petersburg. The officers of the custom house were all alert, for they had received orders from headquarters that when the traveling carriage of the French ambassador should pass through that day it was to be most carefully searched and examined, and even the person of the marquis was not to be spared. Such were the emperor's orders, and unusual as they were they must be obeyed.

"Count Lazareff's rables were nothing to it! By St. Alexander, the emperor is a kind father to us," and the men stroked their long beards and gulped down bowls of hot tea. But hark! there is a faint tinkle of bells and the swift sound of horses on the crisp snow.

"Here he comes!" cried one of the men, jumping from his warm seat. The rest quickly followed, and as the ambassador's covered sledge with its four horses drew in sight it was surrounded by the band of officers.

Respectfully touching his cap, the head man accosted the marquis and apologized for the intrusion, but he had received orders to examine the carriage effects of his excellency, and must trouble him to alight while the search was being made.

The marquis, who was luxuriously reclining in the warm folds of a magnificent black-fox cloak, roused himself at the words and replied that there was no occasion to apologize.

"Alphonse," he called, as his valet came to the door of the sledge, "take care of Fidele, and see that the poor little thing does not catch cold coming out into this frosty air."

Like eager birds of prey over a rich prize, the examiners gathered around the sledge, and began their search in the most systematic manner, ransacking every possible place of concealment. Even the cushions and linings were not spared, to the indignation of the coachman and valet, who looked on with sullen eyes, not daring to interfere, but muttering at the folly of their master in permitting such an outrage. As yet they had not discovered a single contraband article, and more eager became the search, until at last the baffled men had to abandon it.

The marquis meanwhile was warming himself at the stove, with stolid indifference, sipping hot tea and stroking Fidele's curly head. Nor was his equanimity disturbed when they approached him and intimated that he and his two servants must submit to being searched. "Very well," said he. "Only I warn you your trouble will be to vain, for you will find nothing. But fulfill your orders by all means."

Disappointed by previous failure, the men made the personal search as strict as possible, but it was without result. One of the inspectors even approached Fidele, and insisted on examining the rug with which the dog was covered, as it might contain something hidden in its folds. Fidele gave a low growl at being thus disturbed, and its master took it up gently, and said: "Poor Fidele is not accustomed to be treated roughly. Well, you have found nothing. I told you so. And now I suppose we may proceed on our journey."

The chief examiner, bowing low, assured his excellency that he would not be further detained, and he was soon in his sledge once more, carrying his pet dog in his arms. The horses pawed impatiently, and the merry bells began to tinkle a chime of departure. In the moment the sledge was out of sight, leaving the disappointed customs officers bewailing their ill luck.

It was again a brilliant evening scene at the winter palace. The young empress was surrounded by her court circle, and, when the ambassador approached, not a little curiosity was aroused as to the result of the wager. It had become a lively topic of speculation since his departure, and bets had been high on both sides. Even the emperor, who generally kept aloof from such trifles, was amused at the incident, and was anxious to know how the marquis would explain the affair, as the baffled search at the frontier had been promptly communicated to St. Petersburg. The empress felt triumphant, and naturally concluded that the ambassador, rather than risk a failure, had given up the idea altogether.

"Welcome back to St. Petersburg," she exclaimed, graciously extending her imperial hand, and smiling as he bent down over it. "What news from Paris? I fear you did not find anything there worth smuggling, if I may trust the report of my officers, who seemed to have treated you most unmercifully, and searched every possible corner."

"Your majesty certainly has no occasion to find fault with your faithful subjects, for I can bear witness to the keenness of their eyes and fingers," the marquis replied, with slightly amused smile at the eager looks of the circle of auditors. "But still, I did bring back a trifle, which perhaps you will allow me to show you. My valet is in the anteroom, as I could not well intrust it to other hands, and perhaps your majesty will give permission for him to enter here."

With an incredulous look, which was reflected on the faces of her court, the empress gave the required order, and as Alphonse entered with Fidele in his arms she could not suppress a laugh, in which her whole circle joined.

"What a pretty little dog," she exclaimed. "But it scarcely comes under the head of contraband, and if this is

"Now, Fidele, make your bow," the only thing you have brought from Paris I am afraid you have lost your wagger and my diamond ring is safe."

The marquis did not look disconcerted, but taking Fidele from the arms of Alphonse, he placed it on the ground.

"Now, Fidele, good dog, make your bow to her majesty," and in the most absurd way the dog kept nodding its head several times in succession.

"Now, Fidele, die," said the marquis, putting his hand on the dog's curly head. Fidele wagged his tail, gave a hoarse bark, and in another moment, to the surprise and horror of the assemblage, his head rolled on the carpet.

There was an involuntary scream from the ladies, and even the empress cried out: "Oh! what is that?" as the marquis, bending down over the headless body of Fidele, quietly drew forth from the opening at the neck a long white roll of lace. Unfolding it carefully, he held up to the astonished gaze of those present an exquisite dress of the far-famed Chantilly lace, so finely wrought as to be almost priceless.

A murmur of admiration was heard from all. Gracefully kneeling before the empress, the marquis presented the lace.

"Will your majesty pardon my presumption and kindly deign to accept this souvenir from Paris?"

"How very beautiful it is!" the empress exclaimed, taking the delicate fabric in her hand. "It is truly a magnificent souvenir. Rise, M. de Marquis; you have indeed fulfilled your word and fairly won the wager. I herewith acknowledge myself defeated," she added, playfully, and, taking the diamond ring from her finger, she placed it in the ambassador's hand.

"I will not part with it but with my life," was the gallant Frenchman's answer, as he rose to his feet and put the ring on his finger.

"This is indeed a wonderful dog," said the empress, turning to Fidele. "I certainly never saw anything more true to life, and I must give you credit for the clever way in which you eluded the vigilance of my officers."

Fidele now became an object of great interest, and its head being replaced, it had to go through its various accomplishments of barking, nodding its head and wagging its tail, all of which, owing to the ingenious mechanism concealed in its head, it performed to perfection. It was not surprising that it had escaped detection at the custom house.—Harper's Bazar.

PHEASANT-BREEDING.

Early Stages of a Very Profitable Industry in the United States.

The fields are all fenced in with wire netting with two-inch meshes, and from the surface, in which it is securely embedded, it rises to a height of ten feet. In the summer-time one can hear the musical "peeping" of the little fledglings, and the answering "clucking" of the mother hen, with an occasional cry from the cocks in the breeding pens as something startles them. The noise they make sounds like the first tentative efforts of a young rooster, except that whereas the latter flaps his wings and crows afterwards, the former "drums," and then sounds his note. In drumming they move their wings so rapidly that they seem to be gnawed.

The laying season begins about the middle of April, and before that time all the birds that are wanted for this purpose are caught from the open field, where they have run all winter, and put in huge pens. These are eighteen feet square, or thereabouts, and are arranged in one large rectangle, with alleys between each alternate double row, so that access can be had to them through doors or gates left in the wire meshing for that purpose. The corners are darkened with waterproof hoods smeared with a disinfecting fluid, as indeed is everything about the place. These retreats are for the birds to lay under. The pens being in an apple orchard, the leaves afford shade, and worms and larvae also for the insatiable crops beneath. Clumps of grass are left to grow about. In spots, the rest of the ground being loosened to encourage "bathing" and scratching. Five hens are put with one cock, and unless they do not get along well together, the family is not disintegrated until the end of the season—and not then for all are kept in one field. Birds one year old are preferred for laying, the older ones being sold off to preserves where they will be less confined. Two or three years in such small quarters make a difference in their powers of propagation, but they recuperate rapidly in the woods. Great care is exercised in choosing healthy birds, but if a weak one should be discovered—and it is not infrequently so—the owner of the spot, for Mr. De Guise has no hospital for contagious diseases. Sickness, to reiterate, is not frequent enough to require one. The manner of catching the birds to put in the pens is simple. They are driven into a large box, composed of enough wire netting to get inside comfortably, with the top and sides covered with bagging to prevent injury to the captives in their efforts to escape. Wide "wings" of wire netting extend out into the field from the entrance to the box, and when a man is sent in to catch the birds, he is within the radius of the wings run swiftly to their fate. They do not try to fly unless startled, but their legs carry them along very fast. Once inside they are handled out one at a time to have a wing clipped. Even in this condition they make splendid pets, and when they are placed in the pens, turning ludicrous somersaults in the air, only to come down unceremoniously and try again.

The average hen will lay about forty eggs in the interval from the beginning of the season to the middle of July, when it is practically over. During this period the birds are fed twice a day—in the forenoon on a mixture of cracked dog-biscuit, meal and pulverized oyster shells, softened with milk, and in the afternoon the diet is changed to grain. With the appearance of the first frost the birds are moved into the late afternoon, near sunset, with flat-bottomed baskets in which to collect them. This is done every day, as regular as clockwork, for the hatching is not done by the pheasants, but by common barnyard hens.

Except evening, when the first eggs are laid the farmers in the neighborhood are notified that sitting hens will be needed at the pheasantery, and soon after all Pools they begin to bring in all their surplus stock. These are purchased at market prices and confined in the middle of July in pens inside the barn, the hens being satisfied to sit on porcelain eggs until needed for actual utility. When the pheasants have supplied enough eggs, the work of putting the latter down is begun. Back of the barn, on a gentle slope, are long rows of oblong coops, each one consisting of a closed box with a removable lid for the nest, and a diminutive yard a few square feet in area for the hen to exercise in.

This is enclosed by wire netting, and provided with a separate drinking pan of earthenware. From fifteen to eighteen eggs are set in each nest, the number depending upon the size of the hen, which may be a bantam or a Plymouth Rock. When she is very large she may take twenty, for they are smaller than her own. Light green in color, and so rich that their expensive contents precludes their resort to general use for salads and mayonnaises. Each one is tested to see that it is not cracked, and the date of the setting is marked on the top of the nest-box. The period of incubation is twenty-four days, and should, in the latter respect, any hen show disposition to shirk her duties, she is promptly disqualified, and another is substituted. But generally they are assiduous, and remain at their posts all the end.

When the young birds begin to appear, before the first of June, the constantly increasing duties of the attendants reach their maximum. Every evening the coops are examined to collect the little peepers, from whence they are transferred in baskets to one of the enclosed fields, in which light wooden coops are set down in regular rows in the grass. Around each of them is a little space fenced in with strands, and while the foster-mother is secured inside, the chicks can run out between the strands into this yard. By the time they have become strong enough to leap the low walls of the prison, they have also learned to know the "chick" of their protector, and where to come back at nightfall. Six times a day they are fed on a sort of custard,

made of cracked pheasant eggs and milk from which the whey has been expressed. When two months old they are trapped and removed to another field, having no further need for the shelter of their mother's wings. The number of feedings is gradually reduced in the mean time to three a day and the food becomes more substantial by the addition of grain. They grow wilder every day, and it is difficult to get more than a momentary glimpse of them as they dart through the grass, rustling the blades like a summer breeze. By October the early birds have attained to full growth, passing the winter undisturbed and with need for little care. The only discomfort they undergo is in the traps when their wings are clipped.—Harper's Weekly.

A FINE SHOT.

Story of the Town Marshal and the Terror of the Gulch.

The crowd around the hotel stove was listening to the tales of a few hardened liars, when a man in a slouch hat, wearing his hair long, projected himself into the conversation.

"That last story," he said, "reminds me of an experience I once had in the west, before it had reached its present civilization. I was living in a mining camp out there, and my next door neighbor was the terror of the gulch, though that wasn't his name. I got along with him very well until it came my turn to be town marshal, and then he began to be ugly, and, gents, when that man got ugly, there wasn't a pretty spot on him. Well, there was a good-looking girl in the town, and the Terror and me had our hopes set in the same way, and the girl wasn't saying which one was favorite. You know women have that way sometimes. The girl wasn't only a good-looking, but she was the best shot in the place, though the Terror disputed the point with her sometimes. Things went on smooth enough, till one day the Terror got the idea that the girl was coming my way, and then he went off and got full up to the neck and proceeded to paint the town. I'd seen him that way more times than one, and it never bothered me any, for I kept out of his way, but being marshal it was my duty to preserve the peace, and though I was willing, as far as I was personally concerned, to let the peace go to decay in this particular spot, public opinion wasn't, and I had to tackle him right in front of the girl's house and am stood by an open window and watched us. I went about it mightily careful. I can tell you, and the Terror took up an idea that I was afraid, and got bad right at the start. I don't know exactly how it came about, but the first thing I knew we had our guns pulled and the girl was standing not twenty feet away, on her porch, with a navy pistol in her hand, ready for business. The Terror's pistol caught in his clothes some way, and I got the drop on him, but my gun snapped and I thought my end had come, for the man was wild and he had his gun on me in half a second after mine had missed fire. I shut my eyes and made a jump for him, and just as I did two shots rang out, the Terror's pistol went whirling into the air, and I had him by the throat. What would have happened to him I am not prepared to say, for I was twice the man he was physically, but nothing serious happened, for the girl was right out us both with her gun.

"Let him up!" she yelled, as she stuck the barrel of the weapon against my head. 'I saved your life and you've got to save his.'"

"I had sense enough left to mind her, and then she made the Terror get up and go along peacefully with me to the lock-up. That night I went to see her and she told me she had no notion of taking part in the fight, for she didn't want to hurt anybody, or get hurt; but when she saw the Terror had me dead to rights, she knew something had to be done, and instead of shooting the man, she had got a bead on his pistol and shot it out of his hand before he could pull the trigger. Under the circumstances, gents," concluded the story-teller, "I call that middlin' fair shooting; leastways for a woman."

That point was conceded without debate.

"Of course, you married the woman who saved your life?" ventured a listener.

"This is a true bill I'm giving you, gents," he replied, "and I must say that I didn't, though I tried, for hard enough."

"The Terror didn't get her, did he?" The man smiled with a satisfied air.

"Well, not exactly. She got the Terror. Anyhow it looked that way to me, for about a year after that, he told me one night if I ever got as good a chance again to shoot him, he'd consider it personal. I did not shoot him, but I can tell you that I didn't miss a gun that missed fire."—Detroit Free Press.

Readers of Not Working at Night.

An interesting thing to be noted regarding animals in captivity—particularly those of prey belonging to the cat tribe—is that their habits undergo a complete change after they lose their liberty. Visit the animal houses at Central Park and you will find their occupants, almost without exception, wide awake. They do their sleeping at night. But in their wild state these tigers, lions, panthers, cougars and so on rested in the day time and went out looking for prey late in the afternoon, and often not before sundown. Their season of activity terminated with the passing of the darkness. Then they sought their dens or lairs unless hunger remained unappeased. As caged specimens of their kind they reverse the natural order of rest and exercise. They secure their food without effort and lead an aimless existence, longing, doubtless, in a vague way for the jungle and the prairie. For them the inspiring struggle for life is at an end. Save in rare instances the captives soon die, many, old before their time and without descendants.—N. Y. Herald.

—Not an Authority.—First Actor—"What has been the prevailing price of eggs about the country this winter?" Second Actor—"I don't know. I haven't paid anything for what I got."

It will, perhaps, require a little stretch of the imagination on the part of the reader to recognize the fact that the two portraits at head of this article are of the same individual; and yet they are truthful sketches made from photographs, taken only a few months apart, of a very much esteemed citizen of Illinois—Mr. C. H. Harris, whose address is No. 1,023 Second Avenue, Rock Island, Ill. The following extract from a letter written by Mr. Harris explains the marvelous change in his personal appearance. He writes: "Dr. Pierce's Golden Medical Discovery saved my life and has made me a man. My home physician says I am good for forty years yet. You will remember that I was just between life and death, and all of my friends were sure it was a case of death, until I commenced taking a second bottle of 'Golden Medical Discovery,' when I became able to sit up and the cough was very much better, and the bleeding from my lungs stopped, and before I had taken six bottles of 'Golden Medical Discovery' my cough ceased and I was a new man and ready for business."

I now feel that it is a duty that I owe to my fellow-men to recommend to them the 'Golden Medical Discovery' which saved my life when doctors and all other medicines failed to do me any good.

I send to you with this letter two of my photographs, one taken a few weeks before I was taken down sick in bed, and the other was taken after I was well. These two photographs are faithfully reproduced at the head of this article.

Mr. Harris's experience in the use of "Golden Medical Discovery" is not an exceptional one. Thousands of eminent people in all parts of the world testify, in just as emphatic language, to its marvelous curative powers over all chronic bronchitis, throat and lung diseases, chronic nasal catarrh, asthma, and kindred diseases.

Eminent physicians prescribe "Golden Medical Discovery" when any of their dear ones' lives are imperiled by that dread disease, Consumption. Under such circumstances only the most reliable remedy would be depended upon. The following letter is to the point. It is from an eminent physician of Stamps, Lafayette Co., Ark. He says: "Consumption is hereditary in my wife's family; some have already died with the disease. My wife has a sister, Mrs. E. A. Cleary, that was taken with consumption. She used Dr. Pierce's Golden Medical Discovery, and to the surprise of her many friends, she got well. My wife has also had hemorrhages from the lungs, and her sister in-law died on her using the 'Golden Medical Dis-

covery." I consented to her using it, and cured her. She has had no symptoms of consumption for the past six years. People having this disease can take no better remedy."

Yours very truly,
W. C. Rogers, M. D.

From the Buckeye State comes the following: "I was pronounced to have consumption by two of our best doctors. I spent nearly \$300, and was no better. I concluded to try Dr. Pierce's Golden Medical Discovery. I bought and used eight bottles and I can now say with truth that I feel just as well today as I did at twenty-five, and can do just as good a day's work on the farm, although I had not done any work for several years."

Truly, your friend,
William Dulaney

Mr. Dulaney's address is Campbell, Ohio.

"I had catarrh in the head for years and trouble with my left lung at the same time. You put so much faith in your remedies that I concluded to try one bottle or two, and I derived much benefit therefrom. I used up three bottles of Dr. Sage's Catarrh Remedy, five bottles of your 'Golden Medical Discovery,' and in four months I was myself again. I could not sleep on my left side, and now I can sleep and eat heartily. So long as I have your medicines on hand I have no need of a doctor; I do not think my house in order without them. Yours truly,

A. B. Sheard

Marlow, Baldwin Co., Ala.

If it would be any more convincing, we could easily fill the columns of this paper with letters testifying to the cure of the severest diseases of the throat, bronchitis and lungs, by the use of "Golden Medical Discovery." To build up solid flesh and strength after the grip, pneumonia, "lung fever," exhausting fevers, and other prostrating diseases, it has no equal. It does not make fat like cod liver oil and its nasty compounds, but solid, wholesome flesh.

A complete treatise on Throat, Bronchitis, and Lung Diseases; also including Asthma, and Chronic Nasal Catarrh, and pointing out successful means of home treatment for these maladies, will be mailed to any address by the World's Dispensary Medical Association of Buffalo, N. Y., on receipt of six cents in stamps, to pay postage.

Mothers' Friend

Is a scientifically prepared liniment—every ingredient of recognized value, and in constant use by the medical profession. These ingredients are combined in a manner hitherto unknown, and WILL DO all that is claimed for it, AND MORE. It shortens Labor, Lessens Pain, Diminishes Danger to Life of Mother and Child.

Sent by Express on Receipt of Price, \$1.50 per Bottle.

Book to "MOTHERS" mailed FREE, containing voluntary testimonials.

FOR YOUNG PEOPLE.

THE OUTGROWN DOLL'S LAMENT

Oh, listen well
While a tale I tell
Of a poor unfortunate doll,
Who was born in France
And given by chance
To a sweet little girl named Polly.

A wee little girl
With hair all a-curl,
And dimpled cheeks and shoulders;
When I and she
Took an airing, we
Were the joy of all beholders.

Day after day
As time passed away,
We'd nothing to do but keep jolly;
But it could not last,
For she grew so fast,
This dear little girl named Polly!

First she was seven,
Eight, nine, ten, eleven,
And then she was four times three!
She outgrew her doll,
Her apron and bib,
And now—she has outgrown me!

Forgotten, forlorn,
From night till morn,
I'm left in the playroom corner;
From morn till night,
In the same sad plight,
Like a piece of Little Jack Horner.

And Polly, she
At school must be,
Or else the piano strumming,
While I sit here
Growing old and queer,
Vainly expecting her coming.

With a frozen stare
At the walls I glare,
My mind to the question giving,
If the life of a doll
Outgrown by Polly
Be really worth the living!

—Julia Schayer, in St. Nicholas.

TRAVELS OF A DOG.

An Albany Canine Who Is a Pet of Uncle Sam's Postmaster.

Owney went to Chicago, Cincinnati and St. Louis, and they attached checks to his collar. Then he went on through Salt Lake City to California and from there to Mexico. In Mexico they hung a Mexican dollar on his neck. From there he came up through the south, finally reaching Washington. His collar was hanging full of tags and checks, and poor Owney was weary of the heavy load and his neck. Postmaster General Wainmaker saw him and took pity on him. He carried him out one day and had a harness made for him; then he took the badges from his collar and fastened

OWNEY IN FULL REGALIA.

them to his harness, as you see in the picture. If you look closely you will discover the Mexican dollar, and also a King's Daughters' badge which some one presented to him.

Owney did not tarry long in Washington, but was soon off again with his new harness. The farther he went the more checks he had to carry, and the heavier grew his load. At last the attachments alone weighed over two pounds, and poor Owney was tired of carrying the dangling things about with him.

A Boston postal clerk saw him and took pity on him as Mr. Wainmaker had done; he carried him home to his house, and wrote a letter to the postmaster at Albany, telling him of the dog's difficulties. Word came back to take off the harness just as it was, and forward it to them. This was done, and the harness with its attachments can be seen at any time in the post-office building at Albany, preserved in a glass case with Owney's picture.

When in his travels Owney reached Montreal, and happening to follow the mail-bags to the post office, he was taken possession of and locked up, while a letter was sent to Albany telling the officials there of his whereabouts. A reply came to let him go and he would take care of himself. This the Canadian postmaster refused to do till the cost of feeding and keeping him was paid, in all amounting to two dollars and fifty cents. A collection was called for among his old friends, the money forwarded and Owney released.

Everybody in the postal service in the United States knows him, and perhaps the next time he visits Canada he will not be a stranger.—M. I. Ingersoll, in St. Nicholas.

BIRD'S EYES AND EARS.

They Far Exceed in Keenness Those of Our Own Kind.

It is certain that the keenness of vision in birds far exceeds our own, but in what degree we cannot precisely estimate. We know, however, that a hawk so high above the earth as to seem a mere speck against the sky above him can at this distance distinguish his prey from its earthly surroundings.

Snipes and plovers, migrating at so great a height that to us they are invisible, seem by their calls able to recognize individuals of their own species feeding, perhaps on some mud-flat, where, if they are motionless, we can distinguish them at fifty yards with difficulty.

Plynters launch forth after gauzy-winged prey we could not detect, and I have seen juncos in the gloomy forests dart more than thirty feet into the air after some tiny insect.

The loggerhead shrike of the south always selects, like a hawk, a perch

from which he may have an unobstructed view of his surroundings. From this outlook he scans the ground for some luckless grasshopper or cricket, and sometimes flies eighty or one hundred feet to pick from the grass-grown ground an insect he had evidently seen before he left his perch. But little as we know of birds' vision, we know even less of their power of hearing. There is, however, no reason to doubt that the latter is not quite as acute as the former.

The robin on our lawns may be seen, with head on one side, listening intently for the movement of a worm beneath the sod, and it is said the woodcock has the same habit. On one occasion, while seated quietly in the woods, a barrel-owl lit about fifty yards away, with his back toward me. Watching him through my field-glass, I made the slightest possible sound with my lips—a man would not have heard it at a distance of twenty feet—and instantly the bird turned its head and the great black eyes looked directly at me.

A friend of mine in South Carolina tells me that a mocking-bird which was resident in his garden at the time of the earthquake a few years ago became a sentinel to his family, warning them, by a sharp, twittering note, of the approach of each shock several seconds before the rumble which preceded it was audible to human ears.

Instances of this kind give some idea of the acuteness of a bird's hearing, but as yet we have no observations suitable for the purpose of exact comparison.—Frank M. Chapman, in Youth's Companion.

THREE QUEER FRIENDS.

How a Cat and an Old Pug Received a Young Poodle.

These are pictures of the pets of a certain little girl. They are Punch, the pug dog, Billkins, the prize-bred Russian corded black poodle with a pedigree, and Judy, the cat. Billkins bolls on terms of friendship with the others, as you can see by the fact that he has had his picture taken with each of them. But sometimes there are slight misunderstandings.

For instance, one day Billkins was lying on the door-mat gnawing on the backbone of a duck when Punch appeared. Punch wanted a bone, too, but Billkins didn't care to share his, so Punch wandered off. By and by there was a dreadful commotion on the other side of the house, a wild barking and scrambling. Billkins jumped up and rushed off. Judy, who had something had happened to his mistress and he wanted to help Punch defend her.

When he reached the other side of the house, there was no one there. No one was hurting his mistress, the house was safe and Punch had disappeared. After a little investigation, Billkins went back to his mat and his bone, and there lay Punch gnawing contentedly at it! The false alarm had been a trick of the wily old pug to get that bone.

One Christmas the little mistress received a curious present which the cat and the dogs could not understand. Every now and then, out of a box, a bird would step and say "Peep, peep." Then a door would close, another one would open and another bird would appear and say "Cuckoo." Billkins hated the noise and said Judy, and the cat planned to kill the birds. Billkins was glad enough, but he didn't intend to take an active part in the matter. He was just going to watch. Well, in the middle of the night Judy came and woke Billkins up. What

A CONSULTATION.

the little "peep" bird came out of the box Judy prepared for a spring and when the cuckoo came out she leaped up on the stand where the box sat and seized the bird by its throat. The whole thing—how, birds and all—fell on poor Billkins, and the more he tried to get from under them the more tangled up he became. Judy disappeared as soon as trouble began.

The whole house was aroused by the clatter. Down came the little mistress, and there she found Billkins and her pretty new cuckoo clock all broken to pieces. She was very angry and she punished Billkins, while Judy looked on with amusement. Billkins thinks now that cats are very deceitful animals, but he doesn't quarrel with Judy. It seems better to him to live on peaceful terms with her and to be very careful not to give her even a negative support in her schemes.—N. Y. World.

Gathering Points for a Heron.

A laughable incident is told of a distinguished Massachusetts clergyman, who thought he had a point for a sermon. One day he walked through the local soap works, and, after having had explained to him some of the intricacies of saponification, asked the foreman how he adulterated his goods. "Thinking it was all in jest, the foreman gave him elaborate explanation of various mythical ways of substituting marble for soap. The next Sunday the soap manufacturer himself was at church, and had the pleasure of listening to a vreatful sermon about adulteration, especially of soap. The poor man had a dreadful time convincing the minister of his error, and then it was the minister's turn to feel sheepish.

FARM AND GARDEN.

CARTS WITH BARREL.

Two Styles Which Can Be Easily Constructed at Home.

A subscriber asks how a cart can be constructed so that a barrel of slop can be drawn about by hand. We illustrate herewith two such devices. No. 1 is made as follows: For the axle use 2x2 or 2x3 inch pieces of white oak or other hard wood, upon which fit quilt-vator or other wheels which may be at hand. To this axle fasten two handles, good plow handles will answer. At a distance from the axle a little less than the diameter of the barrel at the middle, bolt a 2x2 thus forming a square in

SLOP CARTS WITH BARREL.

which the barrel is placed and will remain firmly upright. If after a time the barrel seems inclined to slip down, this may be prevented by putting on a couple of cleats. Legs are put on wheelbarrow fashion merely for support. In No. 2 the barrel is so placed as to more nearly balance. First make a square by firmly mortising together four 2x4-inch timbers the desired length. To put on the wheels bore holes in the side pieces about the middle of each and in these insert pieces of hickory shaped to fit the opening in the wheel hub. Bolt handles to this, put on legs and braces and the cart is complete. In making both these carts they must be so constructed as to permit the barrel bottom to be several inches from the ground, but not so high as to make it difficult to remove the slop with a pail. An old kerosene or vinegar barrel with the head removed and used as a cover serves very well. It is not necessary to use plow handles, but they are the best. Ordinary straight pieces of lumber with the one end slightly rounded off will serve with a barrel. The length of the axle, etc., will depend upon the barrel to be used.—Orange Judd Farmer.

HOME DAIRY PRODUCT.

Unless It Is of the Best There Is No

In the fight against oleo every dairymen has a part to perform. Not the least of this with many dairymen is the improvement of their own product. Oleo advocates claim, not without some show of reason, that oleo finds ready sale because it is so much poorer butter on the market. Oleo, flavorless, or nearly so, colored and put up in attractive form in imitation of the choicest butter, is fraudulently offered to consumers as butter. Thinking that it is better, consumers buy it in preference to genuine butter, which is of inferior quality. For months past, during the lowest business depression ever known, choice dairy products have brought remunerative prices. What stronger inducements than good prices and fair profits are needed to encourage improvement in the quality of the product of the farm dairy? Better care of the cows, better methods of handling the milk, cream and butter will make the desired improvement, and they are within the reach of every butter-maker. Improved dairy apparatus saves time and labor and makes it comparatively easy to turn out a gilt-edged product. There is no profit now in anything else. There are profits in making choice butter.—Farm and Fireside.

Gardening by Electricity.

By the use of electric light Hon. W. W. Rawson, of Arlington, Mass., claims that he makes a gain of five days in each of his three crops of lettuce—that is, two weeks in a season—that the gain on one crop pays all the expenses of the electric lighting for the season, thus giving him the gain on the other two for extra profit. His attention was first called to the usefulness of the light by the advance made in the growth at the ends of his greenhouses next the street and in the greenhouse of the electric light. This was so marked that he introduced the light through his lettuce and cucumber houses. Dr. Bailey, of Cornell university, says as the result of his own experiments that the influence of the light is greatly modified by the interposition of a glass roof. Plants injured by a naked light were benefited by the protected light. Five hours' light per night at a distance of twelve feet hastened maturity a week or ten days, but proved injurious to young plants and those newly transplanted.

Cows Need Frequent Watering.

It is the almost universal practice among dairymen in this country to turn their cows out to drink once a day. They say the cow can then drink all she needs until the next day. My word for it, it can't be done, says an English writer. Their actions and appetites show very plainly to anyone who will take the trouble to test their drinking apparatus that they need water often than once a day.

Please Note the Contrast.

It is said that a ton can be moved on good, level macadam road with but forty pounds of power. There are times when it would take four-horse power to move a ton on (or in) the mud road.—Agricultural Epitomist.

Economy

requires that in all receipts calling for baking powder, Royal Baking Powder shall be used. It will go further and make the food lighter, sweeter, of finer flavor and more wholesome.

ROYAL BAKING POWDER CO., 106 WALL ST., NEW-YORK.

An Artistic Costume.

The artistic woman is turning her art toward the improvement of her own party gowns. If she is in truth an artist, the gown here described may be attempted. Cream-white satin, worn to stand alone, is used for the foundation. The front breadth of the gown is decorated by graceful, trailing vines of shaded chrysanthemums, which vary in tint from faint pink to dull violet. Around the bottom of the skirt and sweeping train is a careless coil of place velvet, which blends perfectly with the coloring of the chrysanthemums. At the side of the skirt duchesse lace falls in a jabot from the waist line to the hem. The décolleté bodice is tight-fitting, with a coil of velvet outlining the neck, below which the chrysanthemums are painted. The chrysanthemums are painted. The duchesse lace falls in a jabot from the waist line to the hem. The décolleté bodice is tight-fitting, with a coil of velvet outlining the neck, below which the chrysanthemums are painted. The chrysanthemums are painted. The duchesse lace falls in a jabot from the waist line to the hem. He Needed More Execution.

"If you have any last wish," said the priest to the convicted man on the scaffold, "tell me and I will try to carry it out."

"Yes," replied the poor wretch, "I want to learn to play the piano."—Texas Siftings.

Abraham Lincoln Stories.

An illustrated book, unmarred by advertising, containing stories and anecdotes told by Abraham Lincoln, many heretofore unpublished, will be sent free to every person sending his or her address to the Lincoln Tea Co., Ft. Wayne, Ind.

"How beautifully Mrs. Bankill expressed herself in her address before the club. Were the thoughts her very own, do you think?" Mrs. Cutbush—"Oh, dear yes! She paid ten dollars for them, she told me."—Inter Ocean.

Simple Test of the Eyesight.

There is an experiment, that any one can try, to discover whether he has an incipient cataract. Stand with the back to a window with a lighted candle before the eye. If the eye be healthy three candles are seen—two are erect, but the middle one is turned upside down. When the back of the lens is opaque the inverted candle nearly disappears or is obscured, and the front of the lens is affected the inverted candle entirely disappears.—Labouchere's Truth.

An Esthetic Hangout.

First Street Wait—Got 'nough money to buy y'r supper?
Second Street Wait—Yep.
"So'r I. Less go to de t'enter."
"Wot'll we do fer supper, den?"
"There's most always a meal in every place. We kin watch de actors eat!"—Good News.

Diamonds Still Trump.

Mayden Layne—How does your father pass his time, now that he has retired from business?
Marcus Sparks, Jr.—Gards are a great comfort to him. He busses der time playing solitaire mit himself.—Puck.

Suggested.

He—Miss Budd isn't as pretty as she was.
She—That wins my bet.
He—Did you bet that her beauty would fade?
She—Nope; that you would propose to her and get left.—Truth.

"Down brakes!" cried the railroad man's wife as the dinner platter slipped from his grasp.—Louisville Courier.

The girl who loses merely does it as a matter of form.

A DEFINITION—"Pal, what is a perquisite?"
"An authorized steal, my son."—Puck.

The weight of the world is about fourteen ounces to the pound.

—Iowa Gazette.

Yes, man is the stronger vessel—but he has often to be haled out.—Cleveland Plain Dealer.

Few men are so selfish as to be unwilling to share their thoughts with others.—Ham's Horn.

PAPA—"What are George's prospects?"

Mabel—"His uncle thinks of proposing to a rich widow."—Puck.

"How I pity the poor fellows whose business requires them to be out on night like this!"

"And the policeman, looking out from the side door."—Life.

Don't allow yourself to grow old prematurely. Keep enough summer in your heart to thaw the winter in your veins.

—Ham's Horn.

FINE BARNSTORMER—"And, may I ask, my boy, what is your favorite food?"

Peace. Wife—"Oh, certainly. If I have to tell you, 'Tis the pay-roll."—Pittsburgh Bulletin.

He—"They are not on speaking terms, you know?"

She—"Why, they are dead in love in each other." He—"For that reason they don't speak; they just sit and gaze at one another."—Boston Transcript.

"Jack has finished my portrait."

"At last! I didn't think he ever would." "Oh, yes! He's been at work on it only a year." "Dear me! Isn't that a long time?" "We didn't think so. We're engaged now."—Harper's Drawer.

He Needed More Execution.

"If you have any last wish," said the priest to the convicted man on the scaffold, "tell me and I will try to carry it out."

"Yes," replied the poor wretch, "I want to learn to play the piano."—Texas Siftings.

Abraham Lincoln Stories.

An illustrated book, unmarred by advertising, containing stories and anecdotes told by Abraham Lincoln, many heretofore unpublished, will be sent free to every person sending his or her address to the Lincoln Tea Co., Ft. Wayne, Ind.

"How beautifully Mrs. Bankill expressed herself in her address before the club. Were the thoughts her very own, do you think?" Mrs. Cutbush—"Oh, dear yes! She paid ten dollars for them, she told me."—Inter Ocean.

Simple Test of the Eyesight.

There is an experiment, that any one can try, to discover whether he has an incipient cataract. Stand with the back to a window with a lighted candle before the eye. If the eye be healthy three candles are seen—two are erect, but the middle one is turned upside down. When the back of the lens is opaque the inverted candle nearly disappears or is obscured, and the front of the lens is affected the inverted candle entirely disappears.—Labouchere's Truth.

An Esthetic Hangout.

First Street Wait—Got 'nough money to buy y'r supper?
Second Street Wait—Yep.
"So'r I. Less go to de t'enter."
"Wot'll we do fer supper, den?"
"There's most always a meal in every place. We kin watch de actors eat!"—Good News.

Diamonds Still Trump.

The lowlands breed miasma, the parent of chills and fever, bilious remittent and other forms of malarial disease. Hostetter's Stomach Bitters is a sure defense against them all. Nor is it less effective as a safeguard against rheumatic and kidney complaints caused by a wetting. Dyspepsia, liver complaint, constipation and nervousness are likewise eradicated by it. Take it regularly.

WEBSTER'S INTERNATIONAL DICTIONARY

Published by G. & C. Merriam Co., Springfield, Mass.

Everybody should own this Dictionary.

It answers all questions concerning the history, spelling, pronunciation and meaning of words.

A Library in Itself.

It also gives the often desired information concerning eminent persons, the countries, cities, towns, and natural features of the globe; particulars concerning noted battles, events and places; translation of foreign quotations. It is invaluable in the home, office, study, and schoolroom.

The One Great Standard Authority.

Mon. D. J. Brewer, Justice of U. S. Supreme Court, writes: "The International Dictionary is the perfection of dictionaries. I commend it to all as the one great standard authority."

NUMBER 6.

NEWS OF A WEEK.

Happenings in and About Town told in Short Paragraphs.

Cabinets, \$1.50 per dozen.

Loar & Co.

Seeds by ounce, pound, pint and peck at H. E. Felty's Grocery.

There has not been a licensed saloon in Terra Alta for more than twenty years.

Rev. G. W. Kepler will preach at St. Paul's M. E. church next Sunday morning and evening as usual.

The Oakland Cornet Band was out on the streets Monday evening and played some very excellent music.

Mr. E. E. Sollars, the new County Treasurer, took charge of his office on Tuesday with Mr. A. G. Ross as his assistant.

Dr. R. A. Ravenscroft has returned to Accident and taken personal charge of his large and constantly increasing practice.

Mr. Joseph Helbig and his force of hands were engaged last and this week in painting Mr. G. W. Delawder's residence on Second street.

There will be an entertainment given in St. Mark's Lutheran church by the Sunday school on April 29, at 7.30. Admission free.

A number of the young people of Oakland and Mountain Lake Park were entertained on Tuesday evening by the Misses Weber near town.

Send your orders for job printing to this office where it will be executed in the best manner and at prices consistent with first-class work.

Miss Alice Murphy, lately of Baltimore, will start a millinery store at Deer Park about April 21, 1894. A share of the public patronage is solicited.

A birthday party was given at the residence of Mr. and Mrs. E. H. Sincell on last Monday evening in honor of the fifth birthday of their son Milton.

For sale cheap—A Columbia Safety Bicycle in first class condition except tires, which are slightly worn. Apply to Samuel Lawton, Oakland, Md.

Dr. J. F. Graham, the eye specialist, will be at the Glades Hotel every Wednesday, where he can be consulted on all eye troubles. Consultation free.

Mr. John Fahey, who resided on his farm near Oakland for several years, has moved to Piedmont, W. Va., near which town he is operating a coal mine.

Rev. J. H. Moore, the Presbyterian divine of Keyser, W. Va., is expected to preach the first sermon at the opening of the season at Mountain Lake Park.

A new time table will go into effect on the B. & O. Railroad early in May. Some very important changes will be made in the time of the through passenger trains.

Rev. Dr. Alexander will conduct the usual Sunday services at the Garrett Memorial church. The biblical character selected for the Sunday evening discourse will be "Ruth the Moabitess."

Dr. J. B. Van Meter, of the Woman's College, Baltimore, has sold his Mountain Lake Park property to Mr. J. I. Hietzel, of Cumberland. Dr. Van Meter was one of the founders of Mountain Lake Park.

Mrs. Lizzie Ebert, who has successfully conducted the Gordon House at Kingwood, W. Va., for the past two or three years, will take charge of the Allegany House at the Park on the 1st of May next.

Mr. and Mrs. T. C. Hinebaugh have returned to near Oakland and are preparing their hotel, "Oak Hall," for the reception of guests. The prospects for a good season are promising at this beautifully situated hotel.

Miss Jennie Crane, of Terra Alta, died at Wheeling on Tuesday of last week and was buried on last Thursday. The funeral services were conducted by the Rev. John M. Davis, of Oakland. The interment was made in the Terra Alta cemetery.

Mr. William Browning, who moved from this county to Illinois two or three years ago, has rented one of Mrs. Sincell's houses on Liberty street and will move his

family here some time during next month.

Invitations have been issued announcing the coming marriage of Miss Blanche Browning, daughter of ex-Senator Browning, and Mr. Richard K. Maroney. The wedding will occur on Wednesday, the 25 inst., at St. Peter's church, Oakland.

It is said that the B. & O. are now doing an immense business and every passenger train is crowded, particularly the west bound trains. Last week all the trains were packed. The freight business is also picking up and an immense amount of merchandise is being hauled.

We have received a communication from the Rev. Wm. L. Leisher, formerly pastor of St. Paul's church in Oakland, but now living at Akron, O., in which he says: "We are very pleasantly located and prospects are bright for soon beginning the erection of a new church."

Miss Matthews has returned from the east, having selected a beautiful stock of hats and bonnets, a complete line of millinery goods and fancy linens. We also have a splendid line of shoes and oxfords. Our stock is complete in every department. M. L. Scott, Baltimore Store.

Rev. L. A. Radisill will lecture in St. Paul's M. E. church Monday evening, April 23rd, under the auspices of the Epworth League. His subject will be "In and about Mountain Lake Park," illustrated by over a hundred views of the Park, Oakland and Monte Vista. All are invited. Admission free.

I recommend Chamberlain's Pain Balm for rheumatism, lame back, sprains and swelling. There is no better liniment made. I have sold over 100 bottles of it this year and all were pleased who used it. J. P. Pierson, druggist, South Chicago, Ill. It is for sale by Oakland Druggists.

Farmers in some parts of Pennsylvania cling to the old superstition that if they can plow a field while the snow lies on it, the crop of corn or oats will be big. Hence there was a lively scramble last week on the part of some to turn under the few inches of snow that whitened the land in some sections.

Four hundred and twenty-five barrels of spoiled beer were poured into the Sandusky river by order of Revenue Agent Harris, and it made the fish intoxicated and the people caught them by the bushel. They frolicked about, jumped out on the bank and did many other things that fish don't do, only when they have a jag on.—Gallipolis Journal.

Rev. J. O. Thompson, editor of *The Mountain Echo*, Keyser, W. Va., has been engaged to deliver his interesting lecture on the "Battle of Gettysburg" on the evening of July 3rd—the anniversary of that battle—at Mountain Lake Park. Doubtless the G. A. R. will make that the occasion of a rally, to be followed by appropriate services on the fourth.

A swindler representing himself as a Government detective is operating a profitable game in some parts. He visits private residences with a statement that there is much counterfeit coin in circulation and requests the woman of the house to show him what she has. He then shows a chemical that turns the coin black, declares it was spurious and takes it away, informing his victims that another secret service officer would follow him in a day or two and replace the coin. That is the last of the man and coin.

Farmers look to your interest and get reliable fertilizers and such as will suit your crops. We will give you our experience of over a quarter of a century. Just received two car loads of Pure Animal Bone and Phosphate, guaranteed not a particle spurious matter in our Animal Bone fertilizer. Best for seeding down in meadow and phosphates are best for corn, oats, buckwheat, etc. Also a special fertilizer for potatoes. We are agents for good reliable companies. Will sell at lowest cash price or will take your notes for six months. Cabbage, tomato and celery plants in season. Also all kinds of flowering plants and cut flowers on hand and furnished at short notice. H. Weber & Sons, Box 57, Oakland, Md.

Movements of Prominent Persons Known to the Readers of "The Republican."

(Subscribers or readers having friends visiting them or acquaintances visiting other places will please make note of the fact and send to THE REPUBLICAN for publication.—Editor.)

Miss Laura Matthews has returned from Baltimore.

Hon. John P. Jones, of Terra Alta, was in the city Monday.

Miss Margaret Chrystal arrived home from Baltimore on last Saturday.

Mr. Chas. E. Hilleary, of near Gorman, was here Thursday of last week.

Mr. Thomas J. Paddicoe was at Terra Alta on business Monday morning.

Dr. H. W. McComas was in Baltimore on business Monday and Tuesday.

Prof. R. G. Richardson was here yesterday and this morning for a few hours.

Major Alderson, of Wheeling, was in the city a few hours on Monday morning.

Mrs. Dr. Mahlon C. Hinebaugh returned from Baltimore last Saturday evening.

Mr. John Shartzler was over on the West Virginia Central road on business Tuesday.

Mr. D. W. Buzzard, of Cumberland, was in the city on last Thursday for a few hours.

Senator and Mrs. R. A. Ravenscroft, of Accident, were in the city on Tuesday and yesterday.

Mr. Homer Ravenscroft, of Kingwood, is here working for Mr. Joseph Helbig the painter.

Mr. Naaman DeBerry, of near the city, was on a visit to his brother at Cuzart, W. Va., last week.

Mr. A. C. Brooke, who has been at Lumberport, W. Va., all winter, was in Oakland on last Monday.

Mrs. Chas. Wegman returned to Oakland on last Thursday from a visit to her parents at Firm Rock.

Mr. W. H. Scott, of Pittsburgh, spent two or three days last and this week in Oakland with his parents.

Mrs. D. E. Offutt has returned to Oakland from a visit to friends in Baltimore and other eastern cities.

Mr. R. C. Ellis, of Newburg, W. Va., was here two or three days last week on a visit to Mr. Ed. P. Anderson.

Mr. Elijah Howell, of Swanton, was here on Friday and made *THE REPUBLICAN* a very pleasant and paying visit.

Mr. G. A. Belden and wife and Miss Kate Spedden, of Terra Alta, spent Sunday in Oakland as the guests of relatives.

Miss Martha Hinebaugh, who spent ten days with friends in Baltimore, returned to Oakland on last Saturday evening.

Miss Mattie Adair returned on Monday evening from Oakland, after a very pleasant visit of two weeks or more.—Oracle.

Rev. Geo. W. Kepler has returned from his visit to his mother in Cincinnati, O., with whom he spent several days last and this week.

Mr. Walter Wolfe, of Davis, spent Saturday in Oakland with relatives. He was on his way to Brandenburg, W. Va., to visit his mother.

Mrs. E. H. Sincell and children, who were at Annapolis for several days as the guests of relatives, returned to Oakland on Saturday evening last.

Miss Florence Parks, of Kingwood, arrived in Oakland on last Thursday evening and remained over night as the guest of Mr. and Mrs. S. T. Jones.

Mr. James E. Paul, of Alexandria, Va., and Mr. Emory E. Hinebaugh, of Accident, are here working up a branch of the Washington National Building and Loan Association.

Mrs. A. F. Getty, of Cumberland, is visiting her numerous friends and relatives in town for the past few weeks, but will likely have returned home by the time this gets in print.—Salisbury Star.

Selbysport.

The weather is beautiful and the farmers are making good use of it in the way of sowing oats and planting potatoes.

The blind tiger and pool room that was opened to a few of the firm's intimates was suddenly closed. The proprietors played a game to know which one was to own both shares and from this game a quarrel arose and both left the den with furniture and stock and have not been back since. It was well for them that they did, for the officers had an eye on them and would soon have claimed them for their own.

A new girl arrived at Albert Frazee's April 30. Albert don't know any of his old acquaintances now, and is studying why he had been a Democrat, and that he could not for the life of him assign any sensible reason for it and that he had made up his mind to change his political faith and see if he would not have better luck. The gentleman said there were at least a dozen voters in his immediate neighborhood, formerly Democrats, who would not vote for Wilson this fall should he get the Democratic nomination.

On my way home I had a lengthy conversation with a conductor on the B. & O. train.

He had always voted the Democratic ticket, "but," said he, "there are some things about the Democratic party that I don't endorse—Now," said he, "I don't believe in free trade, and I am opposed to the Wilson bill because it discriminates unjustly against Wilson's own State and people, and again I don't approve of the position of the Democratic party in reference to the old soldiers. I think they should be treated generously and not hounded down like a pack of criminals. I was a soldier and although I never applied for a pension I want to see the old boys enjoy their pensions."

"Yes," said he, "I voted for Cleveland and have always been a Democrat, but I am afraid they are getting on the wrong track."

"Well, from what you say I don't believe you are very much of a Democrat," I remanded.

"The Baltimore *Sun* and the *Evening News* have been scoring Gorman for the position he took in reference to the Wilson bill, but I think Gorman's head is about level and he knows as much about the needs of the country as any of them."

I said "yes, Gorman has more good, practical, every day common sense than all the rest of the party put together."

In Philadelphia I called on some of the wholesale wool dealers, to ascertain if possible, what was the outlook for the clip this year.

A. E. Thornton said, prices are in a very unsettled condition and will depend on what is done at Washington. Should the Wilson bill become a law the price of wool will go lower than last year, but if it should fortunately be defeated, the probabilities are that it would be considerably higher."

"But our Democratic friends in my section say that free wool will make higher prices," I suggested.

"Of course I don't believe it but that is what they say."

"I should think not, and nobody else believes it that has got any sense; when free wool comes they will soon see how that will work."

John A. Leslie said, "If the Wilson bill becomes a law there will be lower prices. I could not say how much until the ports are opened. It depends on prices on the other side and wools are very low there now. There is no patriotism in free trade. We are a nation in good shape to take care of ourselves and should not be dependent for our supplies. Our manufacturers do not want free wool. They want the McKinley bill to stand, which will enable them to continue in business, and to pay fair prices for American wools."

Woolston & Moore said: "Extremely uncertain. It is not so much a question as to the price of wool with the manufacturers, but the question is, whether with a 35 per cent duty they will be able to do any business at all; and if not they can't take wool at any price, if the Wilson bill should be defeated, as now seems probable we think wool will advance in price, but should it become a law prices will go lower, so you see the price of wool may be 30 cents per pound and it may be 12."

"O, yes; if we paid the same wages we could manufacture as cheap as any other people under the

Some Notes by The Way.

To the Editor of The Republican.

When I wrote you from Newark, N. J., I had been out four days on a fruitless search for somebody willing to buy lumber and I finished out the week without selling a stick.

People are disposed to talk politics rather than business, and a great many business men in all occupations are mentally kicking themselves for being such sap heads as to vote the party into power which is playing the deuce with business.

A gentleman got on at Shenandoah Junction, only a half dozen miles from Charlestown, the town of Professor Wilson. He said that a lot of farmers and wealthy citizens had gathered in his store the night previous, and that one of them said "I had been studying why he had been a Democrat, and that he could not for the life of him assign any sensible reason for it and that he had made up his mind to change his political faith and see if he would not have better luck. The gentleman said there were at least a dozen voters in his immediate neighborhood, formerly Democrats, who would not vote for Wilson this fall should he get the Democratic nomination."

On my way home I had a lengthy conversation with a conductor on the B. & O. train.

He had always voted the Democratic ticket, "but," said he, "there are some things about the Democratic party that I don't endorse—Now," said he, "I don't believe in free trade, and I am opposed to the Wilson bill because it discriminates unjustly against Wilson's own State and people, and again I don't approve of the position of the Democratic party in reference to the old soldiers. I think they should be treated generously and not hounded down like a pack of criminals. I was a soldier and although I never applied for a pension I want to see the old boys enjoy their pensions."

"Yes," said he, "I voted for Cleveland and have always been a Democrat, but I am afraid they are getting on the wrong track."

"Well, from what you say I don't believe you are very much of a Democrat," I remanded.

"The Baltimore *Sun* and the *Evening News* have been scoring Gorman for the position he took in reference to the Wilson bill, but I think Gorman's head is about level and he knows as much about the needs of the country as any of them."

I said "yes, Gorman has more good, practical, every day common sense than all the rest of the party put together."

In Philadelphia I called on some of the wholesale wool dealers, to ascertain if possible, what was the outlook for the clip this year.

A. E. Thornton said, prices are in a very unsettled condition and will depend on what is done at Washington. Should the Wilson bill become a law the price of wool will go lower than last year, but if it should fortunately be defeated, the probabilities are that it would be considerably higher."

"But our Democratic friends in my section say that free wool will make higher prices," I suggested.

"Of course I don't believe it but that is what they say."

"I should think not, and nobody else believes it that has got any sense; when free wool comes they will soon see how that will work."

John A. Leslie said, "If the Wilson bill becomes a law there will be lower prices. I could not say how much until the ports are opened. It depends on prices on the other side and wools are very low there now. There is no patriotism in free trade. We are a nation in good shape to take care of ourselves and should not be dependent for our supplies. Our manufacturers do not want free wool. They want the McKinley bill to stand, which will enable them to continue in business, and to pay fair prices for American wools."

Woolston & Moore said: "Extremely uncertain. It is not so much a question as to the price of wool with the manufacturers, but the question is, whether with a 35 per cent duty they will be able to do any business at all; and if not they can't take wool at any price, if the Wilson bill should be defeated, as now seems probable we think wool will advance in price, but should it become a law prices will go lower, so you see the price of wool may be 30 cents per pound and it may be 12."

"O, yes; if we paid the same wages we could manufacture as cheap as any other people under the

sun, but our people are not accustomed to the foreign rate of wages nor to their mode of living and labor would not willingly consent to such a condition as that would imply."

Fisk & Co. read from a wool journal, "The sword of Damocles is still unsheathed over us, and so long as the fifty-third Congress remains in session just so long will there be suspense and uncertainty," etc. "In our opinion the passage of the Wilson bill will still further depress prices, and we think that the worst has not come yet."

Justice Bateman & Co. said: "The Wilson bill is a sectional measure whose object seems to be the destruction of the woolen industries, but it will heap on its authors, the very curse which it seeks to remove from this government that will make war on the industries of the country by enacting its prejudices into laws. When one industry is prostrated a great many others suffer in sympathy with it. We think Mr. Wilson's people will also suffer, for they are dependent on a prosperous condition of the manufacturing districts for a market for their raw materials. Just now it is impossible to attempt to forecast the future, as it all depends on what is done at Washington. If they pass the Wilson bill we think that we have not seen the worst, but if it should be defeated there would be an improvement at once and prices would be upward."

This, and much more was said to the same tenor and effect. I did not hear a word in favor of the Wilson bill or the policy of the Democratic party.

A sham, a fraud, a false pretense, a hypocrite, an enemy in disguise, and a miserable, condemned failure. It has been found out, and will be relegated to the shades of "innocuous desecration." So mote it be.

W.

It will be an agreeable surprise to persons subject to attacks of bilious colic to learn that prompt relief may be had by taking Chamberlain's Colic, Cholera and Diarrhoea Remedy. In many instances the attack may be prevented by taking this remedy as soon as the first symptoms of the disease appears. 25 and 50 cent bottles for sale by Oakland Druggists.

Our better halves say they could not keep house without Chamberlain's Cough Remedy. It is used in more than half the homes in Leeds, Sims Bros., Leeds, Iowa. This shows the esteem in which that remedy is held where it has been sold for years and is well known. Mothers have learned that there is nothing so good for colds, croup and whooping cough, that it cures these ailments quickly and permanently, and that it is pleasant and safe for the children to take. 25 and 50 cent bottles for sale by Oakland druggists.

A report reached Oakland Tuesday night that an attempt had been made to burglarize the store of Mr. Wm. Ryland at Friendsville the night previous, and that while the would-be robbers were working at the door to effect an entrance they were fired on by Mr. Ryland, wounding one of the men to such an extent that he was tracked by the blood for a considerable distance. We have been unable to learn whether the report is true or not.

Pea Ridge.

Rev. Jesse Robeson preached to a large congregation Sunday last. It is rumored that Waldo Broadwater will locate in the Backwoods settlement in the near future. Mr. Peter Broadwater attended church at New Germany Sunday last.

Mr. Hillery Michael, of Firm Rock, was in this section Sunday. Mr. Henry Brown made a trip to Salisbury last Monday for a load of feed.

Mr. Edward Lancaster attended church at Mount Union Sunday evening.

Miss Laura Robeson, of near Avilton, is among us again.

Our Sunday school will be organized next Sunday at 10.30 o'clock a. m. All are cordially invited to attend.

All Free.

Those who have used Dr. King's New Discovery know its value, and those who have not, have now the opportunity to try it. Free. Call on the advertiser druggist and get a trial bottle, free. Send your name and address to H. E. Bucklen & Co., Chicago, and get a sample box of Dr. King's New Life Pills Free, as well as a copy of Guide to Health and Household Instructor, Free. All of which is guaranteed to do you good and cost you nothing at all drug stores.

There will be an entertainment given in St. Mark's Lutheran church by the Sunday school on April 29, at 7.30. Admission free.

A number of the young people of Oakland and Mountain Lake Park were entertained on Tuesday evening by the Misses Weber near town.

Send your orders for job printing to this office where it will be executed in the best manner and at prices consistent with first-class work.

Miss Alice Murphy, lately of Baltimore, will start a millinery store at Deer Park about April 21, 1894. A share of the public patronage is solicited. 5-4t

A birthday party was given at the residence of Mr. and Mrs. E. H. Sincell on last Monday evening in honor of the fifth birthday of their son Milton.

For sale cheap—A Columbia Safety Bicycle in first class condition except tires, which are slightly worn. Apply to Samuel Lawton, Oakland, Md. 43t

Dr. J. F. Graham, the eye specialist, will be at the Glades Hotel every Wednesday, where he can be consulted on all eye troubles. Consultation free. 5-3t

Mr. John Fahy, who resided on his farm near Oakland for several years, has moved to Piedmont, W. Va., near which town he is operating a coal mine.

Rev. J. H. Moore, the Presbyterian divine of Keyser, W. Va., is expected to preach the first sermon at the opening of the season at Mountain Lake Park.

A new time table will go into effect on the B. & O. Railroad early in May. Some very important changes will be made in the time of the through passenger trains.

Rev. Dr. Alexander will conduct the usual Sunday services at the Garrett Memorial church. The biblical character selected for the evening discourse will be "Ruth the Moabitess."

Dr. J. B. Van Meter, of the Woman's College, Baltimore, has sold his Mountain Lake Park property to Mr. J. J. Metzler, of Cumberland. Dr. Van Meter was one of the founders of Mountain Lake Park.

Mrs. Lizzie Ebert, who has successfully conducted the Gorton House at Kingwood, W. Va., for the past two or three years, will take charge of the Allegany House at the Park on the 1st of May next.

Mr. and Mrs. T. C. Hinebaugh have returned to near Oakland and are preparing their hotel, "Oak Hall," for the reception of guests. The prospects for a good season are promising at this beautifully situated hotel.

Miss Jennie Crane, of Terra Alta, died at Wheeling on Tuesday of last week and was buried on last Thursday. The funeral services were conducted by the Rev. John M. Davis, of Oakland. The interment was made in the Terra Alta cemetery.

Mr. William Browning, who moved from this county to Illinois two or three years ago, has rented one of Mrs. Sincell's houses on Liberty street and will move his

family here some time during next month.

Invitations have been issued announcing the coming marriage of Miss Blanche Browning, daughter of ex-Senator Browning, and Mr. Richard K. Maroney. The wedding will occur on Wednesday, the 25 inst., at St. Peter's church, Oakland.

It is said that the B. & O. are now doing an immense business and every passenger train is crowded, particularly the west bound trains. Last week all the trains were packed. The freight business is also picking up and an immense amount of merchandise is being hauled.

We have received a communication from the Rev. Wm. L. Leisher, formerly pastor of St. Paul's church in Oakland, but now living at Akron, O., in which he says: "We are very pleasantly located and prospects are bright for soon beginning the erection of a new church."

Miss Matthews has returned from the east, having selected a beautiful stock of hats and bonnets, a complete line of millinery goods and fancy laces. We also have a splendid line of shoes and oxfords. Our stock is complete in every department. M. L. Scott, Baltimore Store.

Rev. L. A. Rudisill will lecture in St. Paul's M. E. church Monday evening, April 23rd, under the auspices of the Epworth League. His subject will be "In and about Mountain Lake Park," illustrated by over a hundred views of the Park, Oakland and Monte Vista. All are invited. Admission free.

I recommend Chamberlain's Pain Balm for rheumatism, lame back, sprains and swelling. There is no better liniment made. I have sold over 100 bottles of it this year and all were pleased who used it. J. F. Pierson, druggist, South Chicago, Ill. It is for sale by Oakland Druggists.

Farmers in some parts of Pennsylvania cling to the old superstition that if they can plow a field while the snow lies on it, the crop of corn or oats will be big. Hence there was a lively scramble last week on the part of some to turn under the few inches of snow that whitened the land in some sections.

Four hundred and twenty-five barrels of spoiled beer were poured into the Sandusky river by order of Revenue Agent Harris, and it made the fish intoxicated and the people caught them by the bushel. They frolicked about, jumped out on the bank and did many other things that fish don't do, only when they have a jag on.—Gallipolis Journal.

Rev. J. O. Thompson, editor of The Mountain Echo, Keyser, W. Va., has been engaged to deliver his interesting lecture on the "Battle of Gettysburg" on the evening of July 3rd—the anniversary of that battle—at Mountain Lake Park. Doubtless the G. A. R. will make that the occasion of a rally, to be followed by appropriate services on the fourth.

A swindler representing himself as a Government detective is operating a profitable game in some parts. He visits private residences with a statement that there is much counterfeit coin in circulation and requests the woman of the house to show him what she has. He then uses a chemical that turns the coin black, declares it was spurious and takes it away, informing his victims that another secret service officer would follow him in a day or two and replace the coin. That is the last of the man and coin.

Farmers look to your interest and get reliable fertilizers and such as will suit your crops. We will give you our experience of over a quarter of a century. Just received two car loads of Pure Animal Bone and Phosphate, guaranteed not a particle spurious matter in our Animal Bone fertilizer. Best for seeding down in meadow and phosphates are best for corn, oats, buckwheat, etc. Also a special fertilizer for potatoes. We are agents for good reliable companies. Will sell at lowest cash price or will take your notes for six months. Cabbage, tomato and celery plants in season. Also all kinds of flowering plants and cut flowers on hand and furnished at short notice. H. Weber & Sons, Box 57, Oakland, Md. 1-2m

Ripans Tablets relieve headache.

HERE AND ELSEWHERE.

Movements of Prominent Persons Known to the Readers of "The Republican."

(Subscribers or readers having friends visiting them or acquaintances visiting other places will please make note of the fact and send to THE REPUBLICAN for publication.—Editor.)

Miss Laura Matthews has returned from Baltimore.

Hon. John P. Jones, of Terra Alta, was in the city Monday.

Miss Margaret Chrystal arrived home from Baltimore on last Saturday.

Mr. Chas. E. Hilleary, of near Gorman, was here Thursday of last week.

Mr. Thomas J. Peddicord was at Terra Alta on business Monday morning.

Dr. H. W. McComas was in Baltimore on business Monday and Tuesday.

Prof. R. G. Richardson was here yesterday and this morning for a few hours.

Major Alderson, of Wheeling, was in the city a few hours on Monday morning.

Mrs. Dr. Mahlon C. Hinebaugh returned from Baltimore last Saturday evening.

Mr. John Shartzler was over on the West Virginia Central road on business Tuesday.

Mr. D. W. Buzzard, of Cumberland, was in the city on last Thursday for a few hours.

Senator and Mrs. R. A. Ravenscroft, of Accident, were in the city on Tuesday and yesterday.

Mr. Homer Ravenscroft, of Kingwood, is here working for Mr. Joseph Helbig the painter.

Mr. Naaman DeBerry, of near the city, was on a visit to his brother at Cuzzart, W. Va., last week.

Mr. A. C. Brooke, who has been at Lumberton, W. Va., all winter, was in Oakland on last Monday.

Mrs. Chas. Wegman returned to Oakland on last Thursday from a visit to her parents at Firm Lock.

Mr. W. H. Scott, of Pittsburgh, spent two or three days last and this week in Oakland with his parents.

Mrs. D. E. Offutt has returned to Oakland from a visit to friends in Baltimore and other eastern cities.

Mr. R. C. Ellis, of Newburg, W. Va., was here two or three days last week on a visit to Mr. Ed. P. Anderson.

Mr. Elijah Howell, of Swanton, was here on Friday and made THE REPUBLICAN a very pleasant and paying visit.

Mr. G. A. Belden and wife and Miss Kate Spedden, of Terra Alta, spent Sunday in Oakland as the guests of relatives.

Miss Martha Hinebaugh, who spent ten days with friends in Baltimore, returned to Oakland on last Saturday evening.

Miss Mattie Adair returned on Monday evening from Oakland, after a very pleasant visit of two weeks or more.—Oracle.

Rev. Geo. W. Kepler has returned from his visit to his mother in Cincinnati, O., with whom he spent several days last and this week.

Mr. Walter Wolfe, of Davis, spent Saturday in Oakland with relatives. He was on his way to Brandywine, W. Va., to visit his mother.

Mrs. E. H. Sincell and children, who were at Annapolis for several days as the guests of relatives, returned to Oakland on Saturday evening last.

Miss Florence Parks, of Kingwood, arrived in Oakland on last Thursday evening and remained over night as the guest of Mr. and Mrs. S. T. Jones.

Mr. James E. Paul, of Alexandria, Va., and Mr. Emory E. Hinebaugh, of Accident, are here working up a branch of the Washington National Building and Loan Association.

Mrs. A. F. Getty, of Cumberland, is visiting her numerous friends and relatives in town for the past few weeks, but will likely have returned home by the time this gets in print.—Salisbury Star.

Selbyport.

The weather is beautiful and the farmers are making good use of it in the way of sowing oats and planting potatoes.

The blind tiger and pool room that was opened to a few of the firm's intimates was suddenly closed. The proprietors played a game to know which one was to own both shares and from this game a quarrel arose and both left the den with furniture and stock and have not been back since. It was well for them that they did, for the officers had an eye on them and would soon have claimed them for their own.

A new girl arrived at Albert France's April 30. Albert don't know any of his old acquaintances now. Selby has been very sick for the past two weeks, but is somewhat improved in health at this writing.

Thos. J. Frazee, of Pittsburgh, died of small pox on the 11th. Tom was one of the young men who left our town and went to the city to seek his fortune and was making rapid strides in that direction when called away to be judged for the deeds done in the body. His family has the heartfelt sympathy of the entire neighborhood in this their sad hour of affliction.

W. D. Collier, of Friendsville, was in town last week giving Bones lessons on the violin. Walt always has a big crowd to hear him when he comes to town.

The wind works to the extension of the C. & O. R. R. is being done. Oh, for the real work now! Marshal Wilkins, of Addison, Pa., was in town on business Saturday.

D. R. Glatfally, of Connellsville, Pa., will move to our town and run a hotel and store, so report says. We would be glad to have him with us. He is a staunch Republican and a good party worker.

We notice that the several correspondents are booming Mr. G. W. Wilson for Congress. I want room to say here that Mr. W. is not the choice of the Republicans in this district. While we claim representation from this county we also claim we can better suit the majority of the voters by pushing the name of E. H. Sincell to the front.

Ed is a man who is always ready to bear the burden of a campaign when the interest of his party is at stake; besides he is better known not only in his own county but in the other counties in this Congressional district.

The magic lantern used by the Democrats to show the Homestead strike about two years ago has been smashed all to smithereens. The leaders were afraid it might be used this fall to exhibit the strike that is now going on in the Connellsville coke region. It could be used and with telling effect. Now if that party has the same sympathy for the working men that it professed to have two years ago and raise the same howl against this do-nothing administration that it did against Harrison's, you will hear the dead march played all over this land and the one word "Democracy" will be written on the box in front of the procession as it marches to the Potter's field to hide its mangled corpse and to it the word resurrection will be unknown.

There is a great deal of sickness in our neighborhood at this time.

Jonas Frazee is improving his property by a new four foot board walk around it.

We have learned that the State Council Jr. O. U. A. M. will send an organizer into Garrett county soon. This is a move in the right direction and should have been done long ago.

Photographs.

OAKLAND, MD., April 19, 1894. Owing to the fact that our business in Oakland has fallen far short of what we expected, we will make a great reduction in prices for the two or three weeks that we will remain here. Note prices: Standing cabinets, \$1.50 per dozen, and other styles proportionately low. All work guaranteed first class or money refunded. LOAR & Co.

See the World's Fair for Fifteen Cents.

Upon receipt of your address and fifteen cents in postage stamps, we will mail you our Souvenir Portfolio of the World's Columbian Exposition. The regular price is fifty cents, but as we want you to have one we make the price nominal. You will find it a work of art and a thing to be prized. It contains full page views of the great buildings, with descriptions of same, and is executed in highest style of art. If not satisfied with it, after you get it, we will refund the stamps and let you keep the book. Address H. E. HICKLES & Co., Chicago, Ill.

Ripans Tablets relieve headache.

Some Notes by The Way.

To the Editor of The Republican.

When I wrote you from Newark, N. J., I had been out four days on a fruitless search for somebody willing to buy lumber and I finished out the week without selling a stick.

People are disposed to talk politics rather than business, and a great many business men in all occupations are mentally kicking themselves for being such sap heads as to vote the party into power which is playing the deuce with business.

A gentleman got on at Shenandoah Junction, only a half dozen miles from Charlestown, the town of Professor Wilson. He said that a lot of farmers and wealthy citizens had gathered in his store the night previous, and that one of them said he had been asking why he had been a Democrat, and that he could not for the life of him assign any sensible reason for it and that he had made up his mind to change his political faith and see if he would not have better luck. The gentleman said there were at least a dozen voters in his immediate neighborhood, formerly Democrats, who would not vote for Wilson this fall should he get the Democratic nomination.

On my way home I had a lengthy conversation with a conductor on the B. & O. train.

He had always voted the Democratic ticket, "but" said he, "there are some things about the Democratic party that I don't endorse—Now," said he, "I don't believe in free trade, and I am opposed to the Wilson bill because it discriminates unjustly against Wilson's own State and people, and again I don't approve of the position of the Democratic party in reference to the old soldiers. I think they should be treated generously and not hounded down like a pack of criminals. I was a soldier; and although I never applied for a pension I want to see the old boys enjoy their pensions."

"Yes," said he, "I voted for Cleveland and have always been a Democrat, but I am afraid they are getting on the wrong track."

"Well, from what you say I don't believe you are very much of a Democrat," I remarked.

"The Baltimore Sun and the Evening News have been scoring Gorman for the position he took in reference to the Wilson bill, but I think Gorman's head is about level and he knows as much about the needs of the country as any of them."

I said "yes, Gorman has more good, practical, every day common sense than all the rest of the party put together."

In Philadelphia I called on some of the wholesale wool dealers, to ascertain if possible, what was the outlook for the clip this year.

A. E. Thornton said, prices are in a very unsettled condition and will depend on what is done at Washington. Should the Wilson bill become a law the price of wool will go lower than last year, but if it should fortunately be defeated, the probabilities are that it would be considerably higher."

"But our Democratic friends in my section say that free wool will make higher prices," I suggested.

"Of course I don't believe it but that is what they say."

"I should think not, and nobody else believes it that has got any sense; when free wool comes they will soon see how that will work."

John A. Leslie said, "If the Wilson bill becomes a law there will be lower prices. I could not say how much until the ports are opened. It depends on prices on the other side and wools are very low there now. There is no patriotism in free trade. We are a nation in good shape to take care of ourselves and should not be dependent for our supplies. Our manufacturers do not want free wool. They want the McKinley bill to stand, which will enable them to continue in business, and to pay fair prices for American wools."

Woolston & Moore said: "Extremely uncertain. It is not so much a question as to the price of wool with the manufacturers, but the question is, whether with a 35 per cent duty they will be able to do any business at all; and if not they can't take wool at any price. If the Wilson bill should be defeated, as now seems probable we think, wool will advance in price, but should it become a law prices will go lower, so you see the price of wool may be 30 cents per pound and it may be 12."

"O, yes; if we paid the same wages we could manufacture as cheap as any other people under the

sun, but our people are not accustomed to the foreign rate of wages nor to their mode of living and labor would not willingly consent to such a condition as that would imply."

Fisk & Co. read from a wool journal, "The sword of Damocles is still suspended over us, and so long as the fifty-third Congress remains in session just so long will there be suspense and uncertainty," etc. "In our opinion the passage of the Wilson bill will still further depress prices, and we think that the worst has not come yet."

Justice Bateman & Co. said: "The Wilson bill is a sectional measure whose object seems to be the destruction of the woolen industries; but it will heap on its authors, for many years to come, the curse of this government that will make war on the industries of the country by enacting its prejudices into laws."

When one industry is prostrated a great many others suffer in sympathy with it. We think Mr. Wilson's people will also suffer, for they are dependent on a prosperous condition of the manufacturing districts for a market for their raw materials. Just now it is impossible to attempt to forecast the future, as it all depends on what is done at Washington. If they pass the Wilson bill we think that we have not seen the worst, but if it should be defeated there would be an improvement at once and prices would be upward."

This, and much more was said to the same tenor and effect. I did not hear a word in favor of the Wilson bill or the policy of the Democratic party.

A sham, a fraud, a false pretense, a hypocrite, an enemy in disguise, and a miserable, condemned failure. It has been found out, and will be relegated to the shades of "innocuous desecration." So note it be. W.

It will be an agreeable surprise to persons subject to attacks of bilious colic to learn that prompt relief may be had by taking Chamberlain's Colic, Cholera and Diarrhoea Remedy. In many instances the attack may be prevented by taking this remedy as soon as the first symptoms of the disease appears. 25 and 50 cent bottles for sale by Oakland Druggists.

Our better halves say they could not keep house without Chamberlain's Cough Remedy. It is used in more than half the homes in Leeds, Sins Bros., Leeds, Iowa. This shows the esteem in which that remedy is held where it has been sold for years and is well known. Mothers have learned that there is nothing so good for colds, croup and whooping cough, that it cures these ailments quickly and permanently, and that it is pleasant and safe for the children to take. 25 and 50 cent bottles for sale by Oakland druggists.

A report reached Oakland Tuesday night that an attempt had been made to burglarize the store of Mr. Wm. Ryland at Friendsville the night previous, and that while the would-be robbers were working at the door to effect an entrance they were fired on by Mr. Ryland, wounding one of the men to such an extent that he was tracked by the blood for a considerable distance. We have been unable to learn whether the report is true or not.

Pea Ridge.

Rev. Jesse Robeson preached to a large congregation Sunday last. It is rumored that Waldo Broadwater will locate in the Backwoods settlement in the near future.

Mr. Peter Broadwater attended church at New Germany Sunday last.

Mr. Hillery Michael, of Firm Rock, was in this section Sunday.

Mr. Henry Brown made a trip to Salisbury last Monday for a load of feed.

Mr. Edward Lancaster attended church at Mount Union Sunday evening.

Miss Laura Robeson, of near Avilton, is among us again.

Our Sunday school will be organized next Sunday at 10.30 o'clock a. m. All are cordially invited to attend.

All Free.

Those who have used Dr. King's New Discovery know its value, and those who have not, have now the opportunity to try it free. Call on the advertiser, Druggist and get a trial bottle free. Send your name and address to H. E. Hickles & Co., Chicago, and get a sample box of Dr. King's New Life Pills Free, as well as a copy of Guide to Health and Household Instructor, Free. All of which is guaranteed to do you good and cost you nothing at all Drug stores.

"AND YOU'LL REMEMBER ME."

One evening as the sun went down
Among the golden hills,
And silent shadows, soft and brown,
Crept over vales and hills,
I watched the dusky bats a-wing
Dip down the dusky loam,
Harkening, heart a maiden king:
"And you'll remember me."
"When other lips and other hearts,
Came drifting through the trees;
"In language whose accents impart,
Was borne upon the breeze,
Aht love is sweet and hope is strong,
And life is a summer sea.
A woman's soul is in her song:
"And you'll remember me."
Still rippling from the throbbing throat,
With joy akin to pain,
There seemed a tear in every note
A sob in every strain:
Soft as the twilight shadows creep
Across the flitting lea,
The singer sang her love to sleep
While—"You'll remember me."
—C. L. Warren, in N. Y. Sun.

TWO OF A KIND.

How Bremner and Sommers As-
sisted Each Other.

"I am in trouble," said Bremner to his friend Sommers, "and I want you to help me out."
"Financial?" asked Sommers, with a slight contracting of the eyebrows.
"Oh, no, worse than that, a good deal."
"I didn't know that anything could be worse in these panicky times. What is it?"
"I have a friend," said Bremner, "or a man who thinks himself my friend, and whom, for certain reasons, I wish to shake off, but he refuses to be shaken. Now, you are a resourceful man, and may be able to give me a hint. I have tried everything with Snaggs—everything short of positive insult—and all to no purpose."
"What is the matter with him?" asked Sommers.

"The matter is this. He has a boy seven years old, or thereabouts, and he always persists in talking of the lad; in fact, he can't talk about anything else, and imagines everyone as deeply interested as himself. I have nothing at all against the boy; he is a good enough commonplace little fellow, like all the rest of them. But by and by a difference in boys myself, they all seem equally objectionable. But Snaggs comes to his house, sits down, and talks about his boy, what he does and what he says, until I am nearly driven crazy. I hope you can suggest something for my relief."
"I suggest," said Sommers, "that you take Snaggs to the state of Michigan, U. S. A., and kill him."
"Why to Michigan?" queried Bremner.

"Oh, simply because they don't hang for murder there, and any pennyworth of hanging should be cheerfully borne to get rid of a man like Snaggs."
"I didn't know you were acquainted with him," said Bremner excitedly.

"I'm not, but I am afflicted in the same way myself."
"Nonsense!" cried Bremner. "I never even heard you mention your children."
"I mean that I am afflicted with a friend like Snaggs. It's a daughter in his case. His name is Gregory. I am even worse off than you are, for his only daughter is but five years old. You are two years ahead of me. By and by the boy will reach years of discretion, and he will get there quicker than Gregory's girl."

"I don't know about that," Bremner answered gloomily; "girls grow up so much faster than boys do."
"But they never reach years of discretion, you know."
"I don't believe any son of Snaggs will, either. The boy's father hasn't, at any rate. But, I say, Sommers, an idea strikes me. Why not introduce Snaggs and Gregory to each other?"

"That wouldn't be a bad plan," replied Sommers, cheerfully, "and then we might let on them. I'll back my man to be the greater bore."
"There wouldn't be any use in betting," said Bremner, "for if your man is as bad as mine, it could only end in a draw."
"Bring your man around and we'll test the case."
"Shall I bring Snaggs to your house to-morrow night, then?" asked Bremner.

"Yes, and if you're in for a bet, I'm your victim. I have great faith in Gregory, and would like to have a little stake on him."
"It's a serious subject with me," replied Bremner.
"Oh, very well then, I'll expect you to-morrow night about eight o'clock, though I suspect your man is not half so capable a boxer as my little mine."

It was a few minutes before eight o'clock when Gregory pressed the electric button at the Sommers' residence. Sommers heard him talking to Mrs. Sommers in the hall, saying: "Oh, yes, thank you, she is quite well. I'll tell you something funny that she said to-day to her mother." Sommers groaned, and helped himself to a quantity of the stimulant provided for his guests. The next moment Gregory appeared, smiling, and Sommers greeted him with well-forged cordiality. Very soon the bell rang again, and a few minutes after Bremner was introducing Snaggs to the two sitting in the smoking room. "Beastly weather this," said Gregory to the newcomers. "I don't mind the weather myself, but when a man has children he is compelled to think of it." "Have you children?" asked Snaggs, with apparent interest. "I've got a little boy myself, but he doesn't mind the weather in the least."

"I shouldn't say children," replied Gregory. "I have one little girl, and she is only five years old, but wonderfully knowing for her age, and this weather is so bad that she misses her walk with her mamma. We never trust her out with a nurse, you know."

"I was saying," broke in Snaggs, "that I have a little boy myself; he is seven, and he goes out in all sorts of weather. I don't believe in coddling children. And that reminds me of a clever thing he said to me this morning. He always comes a little piece of

the way with me when I start for the office, but—"

"Ah, yes," interrupted Gregory; "but girls are delicate little creatures, and have to be taken care of."
"Quite so," agreed Snaggs. "I admit that there are disadvantages about 'delicatestangels,'" cried Gregory.

"You don't mean to say that a great clumsy boy is to be compared with a neat little girl. I would rather have a girl any day, big or little, than a boy."
"Oh, everyone to his taste," said Snaggs, loftily. "By the way, Bremner, did I tell you what my boy said, the other day, when I took him to have his hair cut?"

"No," said Bremner, enthusiastically. "Tell it to us, Snaggs."
"Girls," put in Gregory, "don't have to have their hair cut. My little girl has the most beautiful head of golden hair you ever saw. You've seen it, Sommers; everyone turns to look at her when she walks out with her mother."

"Humph," said Snaggs, with ill-concealed contempt. "I was saying that I took my boy to have his hair cut, and it was the first time that he had ever been in a barber's shop. A man was being shaved and his face was all over lather. Without a word the boy drew his hand from mine and booted for home, running so fast that I didn't know where he was at the door."
"What did you do that for, you young rascal?" I said.

"Oh, papa!" he answered, "if my face is going to break out all like that, I don't want to have my hair cut." Fanny, wasn't it? He thought the lather was the result of the hair cutting. He's awfully quick at reasoning, that boy."
"Well, it seems to me that he didn't reason to a very correct conclusion. Now, you are a resourceful man, and may be able to give me a hint. I have tried everything with Snaggs—everything short of positive insult—and all to no purpose."

"What is the matter with him?" asked Sommers.
